By keeping the young shoots in an upright position the flow of sap is directed to the proper eyes for the future crop. This also allows a free circulation of air among the leaves, thus giving them firmness of texture and allowing a full complement of light to reach and mature the eyes for future use. It also facilitates syringing, by keeping the foliage in a position where the operator can reach with the spray both the top and under sides of the leaves, and as this is most essential in order to keep down spider, any neglect in this respect will be followed by an increase of the trouble.

The tying ought to be done in a nice, tidy manner, keeping each shoot separate and not tying too tightly, so as to cut into the bark and impede the flow of sap.

Removal of Suckers.

Where grafted stock is used, it is well to keep a sharp watch of the tying, so that it does not cut into the bark, and the stocks should also be kept free from suckers. If these are taken in time, they can be rubbed off with the finger without any injury to the plant, but, if left on long enough to get hard, a sharp knife should be used for their removal, so as to leave a wound that will heal readily.

Keep the houses clear of weeds and dirt. Especial care should be given to the spaces under the benches and in corners, for, if weeds are allowed to spring up and grow, they afford excellent breeding places for spider and thrips.

Keep the atmosphere at all times moist by using the syringe frequently and watering the paths and the ground under the benches.

The earlier planted houses will require disbudding, and this, in the interests of the future crop, should be attended to as soon as needed. RIBES.

TERMITES OR WHITE ANTS.

We noticed in the REVIEW of July 22 an answer from C. W. to L. regarding termites on roses. It seems to us that C. W., in his reply, is speaking of a different pest from the one referred to in the query. Sterilization of the soil would in no way affect the termites, or white ants, as we call them, as they are never in the soil at the time the soil is placed in the benches. We believe these insects are only well known in the south and are very destructive to hardwood plants. Their method of attack is by ascending the pith of the body of the plant and hollowing out the interior.

We have tried bisulphide of carbon as a remedy, but on account of the cost it was not tried extensively enough for us to tell if it was effective or not. We have also tried painting the benches with crude oil, also with sulphur and lime, but with no results. As the insects appear to enter the benches by ascending the benches legs, we at one time thought we had a remedy by painting the bench legs with tar. This also proved to be of no avail, as the insects would eat their way up the center of the bench legs, where the tar could not reach. Someone has suggested moth balls, buried at intervals in the soil. We are trying these at the present time under infested palms, benches and around the base of posts, but the experiment has not proceeded far enough at this time for us to say if the balls will be effective or not.

We long ago came to the conclusion that the best way to fight this insect is on the preventive plan. As the insect's food consists of wood pulp, it is important that all rubbish, such as chips, pieces of plank, etc., should be kept from under the benches. Should a bench once become infested, we have found the best plan to be to throw out the entire bench and build anew. We have several times done this when the bench had only been in the second year. When refilling benches in the summer, any planks that show signs of the ants should be removed. Do not delude yourself with the hope, because you see no ants, that they are not there, as they have merely retreated to the heart of the planks and will reappear as soon as the new soil is in and moisture applied.

CHARLES VEST

SEASONABLE SUGGESTIONS

Asters.

The latest sowing of asters should be planted in the field on the first favorable opportunity. Chances for putting out young stock during the present summer have been hazardous over a large portion of the country. While some sections report too much rain, the whole eastern seaboard has suffered from one of the most severe droughts in its history. With the ground dust dry and a shade temperature of 90 degrees, it is useless setting out young plants, unless they have good balls of earth thoroughly wetted and are also watered after planting. Then keep the ground constantly stirred, and with the first rains your plants will jump.

The season can hardly be classed as a satisfactory all-around one for asters so far. They love abundant moisture, which has been lacking this year. They stand droughty conditions surprisingly well, but shorter stems are the rule, unless means for watering are at command. At this time, when carnations are near the vanishing point, roses poor and sweet peas getting inferior in many cases, the value of a good aster bed to the florist can hardly be overestimated.

Pull out any plants attacked by rot or the yellows. It is of no use planting these in the ground, as no remedial treatment will be of any avail for them. If the aster beetle makes its appearance it will work great damage, unless speedily checked. Hand picking is often resorted to, but if many of them appear it is better to spray the plants with Paris green at the rate of one pound to 200 gallons of water. This strength will not hurt the plants, but it will destroy the beetles, and any slight discoloration of flowers is easily washed out. Do not use any poisons of an adhesive nature, such as arsenate of lead, as they will stain the foliage and render the flowers unsightly and unsalable.

Genistas.

Look over the genistas occasionally and give them a pinching back or shearing. Their growth is now rapid, and if you want close, compact heads, the

Dendrobium Euosmum.

nessy in demand, you must keep them rather closely cropped. Young stock rooted in late winter should now be in 5-inch or 6-inch pots. If they can be plunged in a bed of coal ashes in an open, sunny spot, where the hose can conveniently reach them, they will make a lot of growth during the next two months.

Variegated Vinca.

There is every season a big call for variegated vinca. If your stock of it is not as large as you could wish, look over the stock plants in the field. You will notice plenty of strong, succulent growths starting from the base. Take off a quantity of these and place in the cutting bench. Pot them off singly when rooted. Stand along the edges of your carnation or other benches during winter, if no other space is at command, and they will make serviceable plants for next summer.

Geraniums.

Some anxious inquirers are wondering if this is not a good time to start propagating geraniums, being anxious to work up good stock. It will not pay to do much such propagating now. In such torrid weather as we customarily get in August, the greater part of the soft cuttings will assuredly damp off. Wait until September in the northern states or October, or even later, in the southern states, and you will have only a small percentage of loss. Geraniums which have been kept continuously under glass are much less liable to damp off than plants as have been grown outdoors. The cuttings are softer and more full of sap, and it is a great mistake to attempt much propagation until we get cooler weather.

Hard-wooded Plants.

Intensely hot weather is hard on many of the ericaceous and other hard-wooded plants. Unless watering is carefully attended to, some of them are liable to get dried out completely, in which case it is often impossible to save them. Where not planted out, which is the best summer treatment for this class of plants, the pots should at least be plunged to the rims in soil or cinders, and a thorough wetting overhead with the hose two or three times a day when hot will greatly benefit them. The old theory about its being dangerous to syringe plants during sunshine is all moonshine, and both outdoors and under glass plants are greatly refreshed by wettings overhead during the hottest part of the day.

Annual Lupines.

During the last two years lupines have jumped into favor for indoor culture in the big eastern markets and the better class of flower stores are always pleased to get hold of some such desirable novelty. Lupines succeed well in a night temperature of 45 to 50 degrees. The seed for Christmas flowering ought to be started early in August and can be either sown directly in the benches or in small pots to be planted out later. The annual pink variety forces readily, while Hartwegii, in shades of blue and white, and mutabilis make strong spikes and are handsome in vases. These lupines will yield a succession of spikes for a good many weeks. Their culture is similar to that of antirrhinums.

Brief Reminders.

Syringe plants freely overhead during hot weather, but let the foliage become dry before nightfall.

Remove runners from violets in the field and ply the cultivator constantly among them.

Order your cyclamen seed at once, if not yet bought. Remember the best is the cheapest.

Remove flower stems from winter geraniums and pinch all strong shoots.

Root some heliotropes, where plants are required for winter blooming.

Push ahead the filling of benches for carnations. The earlier the plants are in the better.

Take advantage of moist weather to transplant seedlings of perennials and biennials to nursery rows.

Watch seedling cinerarias closely, so that no caterpillars can destroy the foliage.

Look over genistas and give them an occasional pinching or shearing to keep them shapely.

ORCHIDS

DENDROBIUM EUOSMUM.

The genus dendrobium is so extensive that there are few days in the year when in a collection of orchids some members of it are not in bloom. The five varieties most in evidence commercially are D. nobile, Wardianum, formosum giganteum, Phalænopsis Schrœderianum and the summer-blooming thyrsiflorum. The last named is not adapted for cutting, but plants carrying several racemes are decorative and sell well. D. euosmum is one of the earlier hybrids and is the result of a cross between D. andocharis and D. nobile. It flowers in midwinter, just ahead of nobile. The sepals and petals are pure white, the lip being dark maroon. The bulbs are thinner and somewhat shorter than those of nobile and the flowers are deliciously scented. A close, steamy house when growing in summer, and drier and cooler quarters when the bulbs are made up, will cause them to flower well. Rather small baskets or pans are suitable to grow this variety in. It was originally raised by Veitch, of London. W. N. CRAIG.

SEASONABLE ORCHID NOTES.

Oncidium Varicosum Rogersi.

This popular oncidium is indispensable where cut orchids are in demand. It is also fine for mantel and mirror decorations, while for the fall shows it can hardly be beaten. It is now offered at cheap rates, and as it is not at all s

fussy orchid, anyone who is able to grow and flower a Cypripedium insigne, Cattleya labiata or Dendrobium nobile can succeed with this yellow oncidium.

At present, plants purchased a year ago are making up their bulbs and, on many, flower spikes are pushing. The natural flowering period is October and November, but some will come in earlier and others much later than this. The plants succeed best in rather small, shallow pans, the roots in them being under better control than if in baskets. Just now an abundant water supply is necessary, and the plants should be suspended near the glass in a house where they can get plenty of air, but be shaded from the sun's rays. Newly imported pieces, but recently placed in pans, must be watered more carefully. It is unwise to give too much root moisture, or the plants will suffer. Fern fiber, with a little sphagnum, makes a good rooting medium.

CONVENTION TROPHIES.

E. F. Winterson says that the trophies for the sports at the Cincinnati convention will be the finest list ever offered for such events at the trade conventions. The Cincinnati committee has a number of prizes for the ladies' bowling and the individual bowling, the shooting and the baseball games. In addition to this Mr. Winterson has a diamond medal valued at $75, offered by the Brunswick-Balke Co.; a silver bowling trophy, valued at $65, offered by H. Bayersdorfer & Co., Philadelphia; a silver loving cup, valued at $25, offered by the Foley Mfg. Co., and another silver cup, valued at $25, donated by Peter Reinberg, Chicago. All the above are new prizes offered this year.

Of the hold-over prizes the Whilldin cup now held by Buffalo, the Michell trophy now held by New York, and the Kasting cup now held by Philadelphia, are to be turned back to be competed for again this year, as each has to be won more than once before becoming the actual property of any team.

TO CINCINNATI.

There will be three large parties en route to the convention, at least two by special train, and florists are in each case invited to arrange to travel with these parties.

The Chicago party's special will go via Monon, leaving at 2:30 August 16. All florists north and west should be on hand and those who wish to board the train in Indiana will be stopped for if they will write Herbert Wiley, T. P. A., 182 Clark street, Chicago.

The New Yorkers' special train will go via New York Central, at 12:40 August 16. Those who will join en route can reserve berths by addressing John Young, 51 West Twenty-eighth street, New York.

The Philadelphia party will go via P. R. R., leaving Broad street at 12:31 August 16. Baltimore and Washington will be on hand and others who wish to join en route can address David Rust, Horticultural hall, who will see that reservations are made for them.

OBITUARY.

R. G. Beneke.

Richard G. Beneke died July 28, at 2 a. m., after a lingering illness, of dropsy. Mr. Beneke was the only brother of J. J. Beneke and was with him in business until the last five years of his life, when he was employed in the city park department. He was well known in the local trade. The funeral took place Friday, July 30, at SS. Peter and Paul cemetery. Members of the trade sent several beautiful floral tributes and extended their sympathy to the bereaved brother.

James Murray.

James Murray, a veteran florist and landscape gardener of Lexington, Ky., died recently at the Good Samaritan hospital, in that city, after about a week's suffering with paralysis. He was born in Annan, Dumfriesshire, Scotland, in 1848, and came to America at the age of 25 years. For many years he was an assistant to Superintendent Bell, at the Lexington cemetery, and later he was gardener and florist at the State College. His wife died last November, and there are no surviving relatives in America.

LOUISVILLE, KY.

The funeral of Harry Pulliam, of baseball fame, held here August 2, brought out one of the largest displays of flowers ever seen here. There were six wagon loads of flowers, some shipped here, but mostly made on exchange orders from florists in all points of the United States where organized baseball is played. The Cincinnati club sent a large wreath of American Beauty roses, the national commission a plateau of orchids and lilies of the valley. The firm of A. G. Spalding & Bros. sent an enormous baseball made of red and white carnations. The largest floral piece of all was an American flag made of different colored carnations standing five feet high. This design was from the management of the Louisville baseball club.

WINONA LAKE, IND.

The Northern Indiana Florists' Association held its last annual meeting at this place July 20. After being guests of the Warsaw florists in the morning and taking lunch there, they came to Winona Lake.

At the business session the following officers were elected: President, W. W. Dederick, Warsaw; vice-president, Harry White, North Manchester; secretary and treasurer, J. H. Shelton, Rochester.

Following the election of officers, there was a general discussion of the florists' business. A vote of thanks was given W. W. Dederick, Lloyd Isenbarger and the Winona Association for the royal entertainment extended to the visiting members.

The Florists' Association will hold meetings on the third Wednesday of October, January and April, at convenient points selected by the members at previous meetings, and the annual meeting in July of each year will be held here.

The following members were present: A. J. Wagoner and D. C. Noble, of Columbia City; George Pastor and Arthur Bieberick and wife, of Huntington; J. H. Shelton, Rochester; Harry White, North Manchester; Fred King, Rensselaer; G. W. Stumpner and wife and Wm. E. Hand and wife, of Argos; Lloyd Isenbarger, of Winona Lake, and W. W. Dederick, of Warsaw.

Jamaica Plain, Mass. — Arthur O'Brien, of Union avenue, is spending two weeks at Edgartown, Marthas Vineyard, where he hopes to surpass his fishing record of last year.

NEW YORK.

The Market.

Last week offered all varieties of temperature from 70 degrees up to 100 degrees July 30. Needless to say, the cut flower business continues quiet; some call it dead. One retailer said the only sign of life in it was the funeral trade. Fortunately, perhaps, for all concerned, the shipments arriving are limited. Most of the roses are short-stemmed. Some of them are so short they cannot be sold at all.

Good carnations are in demand and worth money. Most of them are, however, not good. Newport sends us some good Beauties and we send Newport the cream of our Four Hundred.

Every color and quality of gladiolus is here, with America still holding first honors and best value. Common kinds are fortunate to command 50 cents per hundred. Thousands are cleaned up for less daily. Asters are equally overabundant.

Lilies are in better demand at higher prices. Sweet peas are fortunate to bring 3 cents a bunch. A few of the best white, long-stemmed stock commands a little more. Orchids grow scarcer and more valuable.

Farewell to S. S. Butterfield.

The farewell dinner given by some of the members of the Florists' Club to S. S. Butterfield, on the eve of his departure for the west, took place at the Hotel Earlington, Friday afternoon, July 30, and Messrs. Traendly, Totty, Sheridan, Young, Weathered, Moore, Simpson, Jaenicke, Birnie, Pierson, Froment, Langjahr, Dailledouze, Wiseman, De La Mare, Hendrickson, Faulkner and Shaw were present, Charles Weathered being in the chair. A telegram was received during the afternoon from W. J. Stewart, of Boston. The presentation of an assortment of solid silver was made by C. H. Totty, to which Mr. Butterfield feelingly responded. Everyone present had a good word to say of the departing guest, of his eleven years of faithful service, his devotion, thoroughness, honesty of purpose and fair play. The best wishes of all follow him to his new field of effort in Oklahoma. One of his confreres proposed the following toast in his honor:

I'm sure we wish, both you and I,
The west may of its fortunes yield,
Give good success, and sunny sky,
And happy years to Butterfield.

So here's a toast, let's drink together:
Long may he live to bless his kin,
Find there but little stormy weather,
All of life's battles bravely win;

Feather his nest with softest down,
Reap the reward of strong endeavor,
Soon be the mayor of Buttertown,
Lots of mazuma quickly gather.

And, when the evening shadows fall,
Say, about nineteen fifty-five,
May you and he and I and all
Still be on earth and very much alive.

The Annual Clam Bake.

The annual clam bake of the New York Cut Flower Exchange took place Saturday, July 31, at Wetzel's Point, L. I., and nearly all the cut flower growers of Long Island and quite a few from Jersey were there. Over 100 joined in the festivities, which lasted from noon until sundown and included two repasts and every variety of sport, many ladies participating. Among the wholesalers present were F. H. Traendly, John Young, J. K. Allen and Charles and Joseph Millang. Several of the prominent seedsmen, or their representatives, were there.

Messrs. Donaldson and Miessem and

Top Row—N. Christatos, N. Lecakes, J. Caparell, J. Tryforos, Geo. D. Nicholas (Pres.), N. Lalas, Chas. Davis, Geo. Comatas, Christ. Casino.

Bottom Row—James Pappas, Geo. Polykranas, P. Theophine, Geo. Cotsonas, Theo. Karampas M. T. Rovatzos.

Committee in Charge of Outing of Greek Florists' Association of New York.

other crack bowlers got in some needed practice for Cincinnati, while their wives made welcome for the strangers and the press.

The clam bake was an elaborate one and where Robert Berry and J. K. Allen stowed away the soup, clams, crabs, tripe, lobsters, chicken, watermelon, corn, sweet potatoes, ice cream, beer and coffee, it would take an expert mathematician to determine. It was a perfect success in every way.

The rise in real estate values on Long Island since the new bridge was completed has made some of these growers wealthy, so that a clam bake once a week from now until Thanksgiving would not seem out of place.

The plant growers will next have their innings and in September the retailers have something up their sleeves.

Outing of the Greek Society.

Thursday, July 29, the third annual outing of the Greek-American Florists' Association was held at Wetzel's Point, L. I., 476 attending. The steamer Isabel was chartered and the sail and breakfast and dinner were all up-to-date and thoroughly enjoyed. The weather was delightfully cool at the grove, while the city sweltered in a hot wave, with a temperature of nearly 100 degrees. Mr. Kempner, A. J. Guttman's partner, took the interesting snapshot reproduced on this page, showing the committee in charge of the affair, which in every way was a success. About twenty per cent of the attendance was American.

The spirit of fraternity and good will was much in evidence. A good orchestra was provided and dancing of every nationality was indulged in. The playing of the Greek and American national hymns created great enthusiasm. Henry Rickers, of J. I. Raynor's, was floor manager, and Herman Berkowitz, of Nugent & Son, lieutenant. The $10 vase presented by Mr. Rovatsos to the winning baseball team was won by the Americans and by them presented to Captain Rickers, whose two-base hit won the game after two were out and two on bases and the Athenians one run ahead in the last inning. The score was 8 to 7 and the contest was exciting from start to finish. E. Good was a good umpire. The American team consisted of Messrs. Rickers, Goode, Murray, Hanft, Dick, Whitey, Murphy, Dewy and Volk. The Greek-Americans consisted of Messrs. Schloss, Miders, Turney, Gretch, Arthur, Reidel, Daniels, Wolff and Schreiner.

The girls' race, 5 to 10 years old, was won by Mary Flinn; silver hand bag.
Boys' race, 5 to 10 years, was won by Master Reidel.
Young ladies' race, Miss Anna Levitt, of A. J. Guttman's office force; gold bracelet.
Boys' race, 12 to 18 years, Theo. Chirikos; silver watch.
Married ladies' race, Mrs. Kimbell; silver set.
Sack race, Mr. Tolson; gold clock.
Three-legged race, Messrs. Kempner and Wolff; alarm clock.
Discus throwing, George Kiolis; kodak.
Long jump, George Georgas; pair Douglas shoes.
Fat ladies' race, Mrs. Reidel; silk umbrella.
Fat men's race, George Cotsonas; watch.
Marathon race, George Tervakos; mandolin.
The bowling prize was won by G. Schuephauser, with M. T. Rovatz as second after a tie score.

At the close of the banquet the prizes were presented by George D. Nicholas, after which he made an address in English and afterwards in Greek, stirring the big audience by his eloquent apostrophe to fraternity, loyalty and national pride. The association has every reason to feel proud of its annual celebration.

Various Notes.

Rumor says one of the aggressive retailers in Brooklyn will invade New York this fall and has already secured the best of the department stores for the venture. It will make things hum in the Fifty-ninth street section, where so many now hold sway, Hauser, Hanft Bros., John King Duer, Myer and Warendorff among them. These are enterprising days and the opportunities for enterprising florists grow with great rapidity.

Messrs. Traendly, Young and Pierson are active now in final preparations for the Cincinnati jubilee. The berths are filling rapidly and for the last time the warning is sent out to delay securing your accommodations no longer. Write Secretary Young at once. Remember the Second Empire special leaves New York at 12:40 Monday, August 16, and it will stop at any city between New York and Cleveland for the florists who secure their transportation in advance, commencing at Tarrytown and Poughkeepsie. The train arrives at Albany at 4 p. m., where the Boston and New England boys are expected to join us; Herkimer, 5:47; Utica, 6:08; Syracuse, 7:23; Rochester, 9:10; Buffalo, 10:50, and so on to Erie and Cleveland, where we expect the Detroit and Cleveland host to come on board.

Robert Berry has been appointed manager and captain of the New York bowling team, and Friday, August 6, Tuesday, August 10, and Friday, August 13, the members will bowl at Thumm's alleys to decide by their averages the five who will represent New York. Only those taking part in the bowling on these three evenings will be considered and Manager Berry has so advised the club members. Because of a contemplated trip to Europe next year, Messrs. Donaldson and Miessem, the best bowlers of the Astorias, have cut out their Ohio trip, much to the regret of the New Yorkers. Mr. Miessem won the silver cup last year at Buffalo for the highest individual score.

A unique decoration of water lilies, ferns and fountain, with ducklings, like the one in Small & Sons' window, is about all that will halt a pedestrian. Alex. McConnell, M. A. Bowe and Clarke's Sons also keep the observant eyes open and Nugent and Myer always have something out of the ordinary, even in the dog days.

Monday, August 9, the Liberty theater in New York opens with a new play called "The Florist Shop," staged by Savage, a play that it is hoped will prove a practical advertisement for the florists' trade all the season.

Reed & Keller have on exhibition in their show windows many novelties that will be seen at the convention, one representing the ship Half Moon of Hendrick Hudson, the Robert Fulton and the great modern palace steamship, the Lusitania, in comparison. Their exhibit will occupy 900 square feet at Cincinnati.

Clarence Moore, of the Moore Seed Co., of Philadelphia, was a visitor last week.

A. T. Boddington will have an exhibit covering 200 square feet at the convention and H. A. Bunyard will be in charge. Mr. Bunyard has spent the last six weeks at Oradell, N. J., with his family.

Mr. Weise, representing David Sachs, of Quedlinburg, Germany, is in the city.

R. E. Berry, of the park department, superintended last week the replanting of a gingko tree eighty-five feet high and weighing sixteen tons, moving it from One Hundred and Twenty-sixth street to Mount Morris park. If Mr. Berry manages the bowling club as well as he did the tree moving, there will be some prizes won by its members.

H. Schmidt, of Union Hill, N. J., specialist in primroses and begonias, was an attendant at the Greek outing, as well as many other American growers and florists. He is enthusiastic over his new Primula Kewensis. Herman Scholzel, the originator of the Scholzeli fern, was also at the outing. He has a large plant at New Durham, N. J., the old Asmus place there, now thoroughly up-to-date. He has 20,000 small Scholzeli and 5,000 large plants.

All the lady bookkeepers and male employees are coming back from their vacations brown and beautiful and ready for the greatest season ever known. Most of the wholesale magnates are taking their holiday in the Cincinnati trip and will take in the mountains and the baths on their return.

Charles Schenck is back from the hills, brown as a berry. A. J. Guttman has taken on avoirdupois in Maine, and is ready for business. J. AUSTIN SHAW.

fussy orchid, anyone who is able to grow and flower a Cypripedium insigne, Cattleya labiata or Dendrobium nobile can succeed with this yellow oncidium.

At present, plants purchased a year ago are making up their bulbs and, on many, flower spikes are pushing. The natural flowering period is October and November, but some will come in earlier and others much later than this. The plants succeed best in rather small, shallow pans, the roots in them being under better control than if in baskets. Just now an abundant water supply is necessary, and the plants should be suspended near the glass in a house where they can get plenty of air, but be shaded from the sun's rays. Newly imported pieces, but recently placed in pans, must be watered more carefully. It is unwise to give too much root moisture, or the plants will suffer. Fern fiber, with a little sphagnum, makes a good rooting medium.

WINONA LAKE, IND.

The Northern Indiana Florists' Association held its last annual meeting at this place July 20. After being guests of the Warsaw florists in the morning and taking lunch there, they came to Winona Lake.

At the business session the following officers were elected: President, W. W. Dederick, Warsaw; vice-president, Harry White, North Manchester; secretary and treasurer, J. H. Shelton, Rochester.

Following the election of officers, there was a general discussion of the florists' business. A vote of thanks was given W. W. Dederick, Lloyd Isenbarger and the Winona Association for the royal entertainment extended to the visiting members.

The Florists' Association will hold meetings on the third Wednesday of October, January and April, at convenient points selected by the members at previous meetings, and the annual meeting in July of each year will be held here.

The following members were present: A. J. Wagoner and D. C. Noble, of Columbia City; George Pastor and Arthur Bieberick and wife, of Huntington; J. H. Shelton, Rochester; Harry White, North Manchester; Fred King, Rensselaer; G. W. Stumpner and wife and Wm. E. Hand and wife, of Argos; Lloyd Isenbarger, of Winona Lake, and W. W. Dederick, of Warsaw.

Jamaica Plain, Mass. — Arthur O'Brien, of Union avenue, is spending two weeks at Edgartown, Marthas Vineyard, where he hopes to surpass his fishing record of last year.

NEW YORK.

The Market.

Last week offered all varieties of ... perature from 70 degrees up to 1... grees July 30. Needless to say, t... flower business continues quiet; son... it dead. One retailer said the only ... of life in it was the funeral trade. ... tunately, perhaps, for all concerne... shipments arriving are limited. M... the roses are short-stemmed. Son... them are so short they cannot be ... at all.

Good carnations are in demand ... worth money. Most of them are, ... ever, not good. Newport sends us ... good Beauties and we send Newpor... cream of our Four Hundred.

Every color and quality of glad... is here, with America still holding ... honors and best value. Common ... are fortunate to command 50 cents ... hundred. Thousands are cleaned up ... less daily. Asters are equally overabundant.

Lilies are in better demand at higher prices. Sweet peas are fortunate to bring 3 cents a bunch. A few of the best white, long-stemmed stock commands a little more. Orchids grow scarcer and more valuable.

Farewell to S. S. Butterfield.

The farewell dinner given by some of the members of the Florists' Club to S. S. Butterfield, on the eve of his departure for the west, took place at the Hotel Earlington, Friday afternoon, July 30, and Messrs. Traendly, Totty, Sheridan, Young, Weathered, Moore, Simpson, Jaenicke, Birnie, Pierson, Froment, Langjahr, Dailledouze, Wiseman, De La Mare, Hendrickson, Faulkner and Shaw were present, Charles Weathered being in the chair. A telegram was received during the afternoon from W. J. Stewart, of Boston. The presentation of an assortment of solid silver was made by C. H. Totty, to which Mr. Butterfield feelingly responded. Everyone present had a good word to say of the departing guest, of his eleven years of faithful service, of his devotion, thoroughness, honesty of purpose and fair play. The best wishes of all follow him to his new field of effort in Oklahoma. One of his confreres proposed the following toast in his honor:

I'm sure we wish, both you and I,
The west may of its fortunes yield,
Give good success, and sunny sky,
And happy years to Butterfield.

So here's a toast, let's drink together:
Long may he live to bless his kin,
Find there but little stormy weather,
All of life's battles bravely win;

Feather his nest with softest down,
Reap the reward of strong endeavor
Soon be the mayor of Buttertown,
Lots of mazuma quickly gather.

And, when the evening shadows fall,
Say, about nineteen fifty five,
May you and he and I and all
Still be on earth and very much alive.

The Annual Clam Bake.

The annual clam bake of the New Y... Cut Flower Exchange took place Sa... day, July 31, at Wetzel's Point, L. I., ... nearly all the cut flower growers of L... Island and quite a few from Jersey w... there. Over 100 joined in the festiviti... which lasted from noon until sunde... and included two repasts and every va... ety of sport, many ladies participatin... Among the wholesalers present were F. ... Traendly, John Young, J. K. Allen a... Charles and Joseph Millang. Several ... the prominent seedsmen, or their rep... sentatives, were there.

Messrs. Donaldson and Miessem a...

Top Row—N. Christatos, N. Lecakes, J. Caparell, J. Tryforos, Geo. D. Nicholas (Pres.), N. Lalas, Chris. Davis, Geo. Comatas, Christ. Casino.
Bottom Row—James Pappas, Geo. Polykranas, P. Theophine, Geo. Cotsonas, Theo. Karampas M. T. Rovatzos.

Committee in Charge of Outing of Greek Florists' Association of New York.

other crack bowlers got in some needed practice for Cincinnati, while their wives made welcome for the strangers and the [illegible].

The clam bake was an elaborate one and where Robert Berry and J. K. Allen stowed away the soup, clams, crabs, tripe, lobsters, chicken, watermelon, corn, sweet potatoes, ice cream, beer and coffee, it would take an expert mathematician to determine. It was a perfect success in every way.

The rise in real estate values on Long Island since the new bridge was completed has made some of these growers wealthy, so that a clam bake once a week from now until Thanksgiving would not seem out of place.

The plant growers will next have their innings and in September the retailers have something up their sleeves.

Outing of the Greek Society.

Thursday, July 29, the third annual outing of the Greek-American Florists' Association was held at Wetzel's Point, L. I., 476 attending. The steamer Isabel was chartered and the sail and breakfast and dinner were all up-to-date and thoroughly enjoyed. The weather was delightfully cool at the grove, while the city sweltered in a hot wave, with a temperature of nearly 100 degrees. Mr. Kemp-, A. J. Guttman's partner, took the resting snapshot reproduced on this page, showing the committee in charge of the affair, which in every way was a success. About twenty per cent of the attendance was American.

The spirit of fraternity and good will was much in evidence. A good orchestra was provided and dancing of every nationality was indulged in. The playing of the Greek and American national airs created great enthusiasm. Henry Myers, of J. I. Raynor's, was floor manager and Herman Berkowitz, of Nugent & Son, lieutenant. The $10 vase presented by Mr. Rovatsos to the winning baseball team was won by the Americans and by them presented to Captain Rickard, whose two-base hit won the game after two were out and two on bases and the Athenians one run ahead in the last inning. The score was 8 to 7 and the contest was exciting from start to finish. Mr. Good was a good umpire. The American team consisted of Messrs. Rickers, Goode, Murray, Hanft, Dick, Whitey, Murphy, Dewy and Volk. The Greek-Americans consisted of Messrs. Schloss, Miders, Turney, Gretch, Arthur, Reidel, Daniels, Wolff and Schreiner.

The girls' race, 5 to 10 years old, was won by Mary Flinn; silver hand bag.
Boys' race, 5 to 10 years, was won by Master Reidel.
Young ladies' race, Miss Anna Levitt, of A. J. Guttman's office force; gold bracelet.
Boys' race, 12 to 18 years, Theo. Chirikos; silver watch.
Married ladies' race, Mrs. Kimbell; silver set.
Sack race, Mr. Tolson; gold clock.
Three-legged race, Messrs. Kempner and Wolff; alarm clock.
Discus throwing, George Kiolis; kodak.
Long jump, George Georgas; pair Douglas shoes.
Fat ladies' race, Mrs. Reidel; silk umbrella.
Fat men's race, George Cotsonas; watch.
Marathon race, George Tervakos; mandolin.
The bowling prize was won by G. Schuephauser, with M. T. Rovatz as second after a tie score.

At the close of the banquet the prizes were presented by George D. Nicholas, after which he made an address in English and afterwards in Greek, stirring the big audience by his eloquent apostrophe to fraternity, loyalty and national pride. The association has every reason to feel proud of its annual celebration.

Various Notes.

Rumor says one of the aggressive retailers in Brooklyn will invade New York this fall and has already secured the best of the department stores for the venture. It will make things hum in the Fifty-ninth street section, where so many now hold sway, Hauser, Hanft Bros., John King Duer, Myer and Warendorff among them. These are enterprising days and the opportunities for enterprising florists grow with great rapidity.

Messrs. Traendly, Young and Pierson are active now in final preparations for the Cincinnati jubilee. The berths are filling rapidly and for the last time the warning is sent out to delay securing your accommodations no longer. Write Secretary Young at once. Remember the Second Empire special leaves New York at 12:40 Monday, August 16, and it will stop at any city between New York and Cleveland for the florists who secure their transportation in advance, commencing at Tarrytown and Poughkeepsie. The train arrives at Albany at 4 p. m., where the Boston and New England boys are expected to join us; Herkimer, 5:47; Utica, 6:08; Syracuse, 7:23; Rochester, 9:10; Buffalo, 10:50, and so on to Erie and Cleveland, where we expect the Detroit and Cleveland host to come on board.

Robert Berry has been appointed manager and captain of the New York bowling team, and Friday, August 6, Tuesday, August 10, and Friday, August 13, the members will bowl at Thumm's alleys to decide by their averages the five who will represent New York. Only those taking part in the bowling on these three evenings will be considered and Manager Berry has so advised the club members. Because of a contemplated trip to Europe next year, Messrs. Donaldson and Miessem, the best bowlers of the Astorias, have cut out their Ohio trip, much to the regret of the New Yorkers. Mr. Miessem won the silver cup last year at Buffalo for the highest individual score.

A unique decoration of water lilies, ferns and fountain, with ducklings, like the one in Small & Sons' window, is about all that will halt a pedestrian. Alex. McConnell, M. A. Bowe and Clarke's Sons also keep the observant eyes open and Nugent and Myer always have something out of the ordinary, even in the dog days.

Monday, August 9, the Liberty theater in New York opens with a new play called "The Florist Shop," staged by Savage, a play that it is hoped will prove a practical advertisement for the florists' trade all the season.

Reed & Keller have on exhibition in their show windows many novelties that will be seen at the convention, one representing the ship Half Moon of Hendrick Hudson, the Robert Fulton and the great modern palace steamship, the Lusitania, in comparison. Their exhibit will occupy 900 square feet at Cincinnati.

Clarence Moore, of the Moore Seed Co., of Philadelphia, was a visitor last week.

A. T. Boddington will have an exhibit covering 200 square feet at the convention and H. A. Bunyard will be in charge. Mr. Bunyard has spent the last six weeks at Oradell, N. J., with his family.

Mr. Weise, representing David Sachs, of Quedlinburg, Germany, is in the city.

R. E. Berry, of the park department, superintended last week the replanting of a gingko tree eighty-five feet high and weighing sixteen tons, moving it from One Hundred and Twenty-sixth street to Mount Morris park. If Mr. Berry manages the bowling club as well as he did the tree moving, there will be some prizes won by its members.

H. Schmidt, of Union Hill, N. J., specialist in primroses and begonias, was an attendant at the Greek outing, as well as many other American growers and florists. He is enthusiastic over his new Primula Kewensis. Herman Scholzel, the originator of the Scholzeli fern, was also at the outing. He has a large plant at New Durham, N. J., the old Asmus place there, now thoroughly up-to-date. He has 20,000 small Scholzeli and 5,000 large plants.

All the lady bookkeepers and male employees are coming back from their vacations brown and beautiful and ready for the greatest season ever known. Most of the wholesale magnates are taking their holiday in the Cincinnati trip and will take in the mountains and the baths on their return.

Charles Schenck is back from the hills, brown as a berry. A. J. Guttman has taken on avoirdupois in Maine, and is ready for business. J. AUSTIN SHAW.

Results bring advertising.
THE REVIEW brings results.

THE completed tariff bill, in so far as it specially affects trade interests, will be found on page 40.

H. B. DORNER, of Urbana, has been mentioned as a candidate for secretary of the S. A. F., to succeed W. N. Rudd.

FRIENDS of H. A. Bunyard are urging him to allow the use of his name in connection with the S. A. F. secretaryship.

WHEN you give a customer directions as to the care of plants, do not speak of dirt; dirt is what some florists have under the greenhouse benches, but it is soil that plants are grown in.

THE REVIEW recently has received several specimens of diseased or insect-infested plants with no accompanying letter and nothing by which the identity of the sender could be ascertained.

THE flower business is a rapid-fire affair; celerity is an essential in the execution of practically every order. But that is no reason why a florist should fail to place his own orders for supplies as much in advance as possible.

POLITICS WARM UP.

NEW YORK, August 4.—The friends of Harry A. Bunyard are circulating a paper for signatures endorsing Mr. Bunyard for secretary of the S. A. F. The names at the head of the list are those of Patrick O'Mara, F. R. Pierson, F. H. Traendly, Harry Turner, John Young, Will Rickards and C. H. Totty.

RUDD TO RETIRE.

W. N. Rudd became secretary of the S. A. F. to fill a breach in the ranks. He took the office without notice, and in the middle of the period between conventions. Last year he stood for reëlection because the best interests of the society appeared, to a large number of members, to demand his services for at least another year. In another column of this issue Mr. Rudd states that he will not be a candidate for reëlection, his personal interests precluding his giving to the office the attention it should have; and anyone who knows Mr. Rudd knows that it is not in him to give other than his best efforts in any cause he may undertake.

The selection of a successor to Mr. Rudd should have the most careful consideration of the society, for on the secretary rests the real responsibility for the society's success. The REVIEW does not believe that it is within the province of a trade publication to take part in the politics of the national society of that trade, but it counsels the careful selection of a secretary, and the choice of one whose services can be retained for a sufficient period to get the best work of which the man may be capable; the office of secretary is not one which should be filled with a new man at short intervals.

THE DUTY ON GLASS.

We now shall hear much about the way the tariff has been revised downward. If all the reductions are as liberal as the one on common window glass of the greenhouse sizes, how long will the public remain satisfied with the situation?

Under the Dingley law, for the last twelve years, the duty on greenhouse glass was 1⅞ cents per pound. Under the new law it will be reduced ⅛ of a cent a pound, in case the value of the glass is not more than 1¾ cents per pound. If the price is above 1¾ cents per pound the old rate of 1⅞ cents remains on any size up to 384 square inches, which lets in 16x24.

The way a protectionist puts it is this:

"There are 6,700 skilled window glass workers in this country, all of whom are members of organized labor, capable of producing annually 11,000,000 boxes of window glass fifty square feet in size. The total importations have averaged 854,324 boxes.

"The glassworkers were anxious not only that the duties should not be reduced, but that certain increases should be made. The American workman is employed only half the year, so that in the opinion of the unions a greater control of the market should be enjoyed by the factories. There is no doubt that the Dingley tariff has been a great benefit to the window glass workers, and without it the industry would be at the mercy of foreign manufacturers. It was the opinion of congress, however, that a slight reduction could be made without injury to the industry or to the employees, and this decision appears in the law."

A whole eighth of a cent per pound reduction, sometimes!

DOLLARS FOR PENNIES.

There are many factors which may influence an advertiser part of the time, but it is actual results which influence him most of the time.

We placed an advertisement of stevias in the Review for one week some time ago; we paid 20 cents for the advertisement and sold $9 worth of stock, so we are more than pleased.—Star Greenhouse, Big Rapids, Mich., July 29, 1909.

Cut out Perles and Ivory roses and 3-inch Sprengeri from my advertisement; these are all sold. Your paper does the business.—J. S. Wilson, Des Moines, Ia., August 2, 1909.

We shall have to ask you to discontinue our advertisement for geraniums, as we have received from it as many orders as we can fill. You will hear from us again next year.—W. G. Moulton & Son, York Village, Me., July 31, 1909.

The Annual Special Convention Number of the REVIEW will be issued August 19. It will be the "Big Noise."

CHICAGO.

The Great Central Market.

The market is in a rather peculiar position. There is an exceptionally good shipping demand, generally reported better than ever before in midsummer; when the city stores buy it is largely stock required to fill orders. The result is that there is a fair demand from those who are willing to pay reasonable prices for the right grade of goods. And right there the demand stops. The buyers who are looked for to clean up the market are doing little or nothing. In the season there are quite a number of buyers who can use almost unlimited quantities, providing the quality is fair and the buyer can name the price. These operators are now conspicuous by their absence. The result is that with receipts of stock of good summer quality considerably in advance of the needs of the regular buyers, a considerable percentage of the receipts fail of sale. The waste pulls down the average to a point which gives the commission men much concern.

Beauties are not in large supply, but it has been difficult to handle them satisfactorily the last few days, because the weather conditions have tended to make them open too quickly; neither grower, wholesaler nor retailer could hold them

We have not only the Largest Supply, but the Best

Beauties

to be had anywhere. For years we have made a specialty of Summer Beauties. This season our supply is greatly increased—and the quality is much THE BEST IN THIS MARKET.

Kaiserin—Killarney

Our Kaiserin have been and are the best white roses the market affords, and our Killarney are coming in fine. Large crops of both varieties.

RICHMOND, MAID and BRIDE that will please

Gladioli

We have a big supply of the two varieties most in demand, America, light pink, and Augusta, white. We can supply in any quantity and of best quality. Also a large cut of Mrs. Francis King, fancy light scarlet, and other good sorts. We want **YOUR** orders on these.

ASTERS

Our shippers lead the country on Asters. Some of them have been at work for years, selecting blooms for seed, until they have worked up **SPECIAL STRAINS** of their own, far better than the ordinary seed store stock that is grown and sold in quantity. Year after year we have handled the best Asters that come into this market—and so it is again this year.

The best Asters are none too good in this unfavorable season—you simply cannot use the common stuff, grown from cheap seed by men busy with other things.

Order of us and get stock grown by specialists

Peonies

Fancy pink and white. Stock is in first-class shape and sure to give satisfaction.

Green Goods

The best Ferns in the market, $1.00 per 1000. Long heavy strings of Smilax, Farleyense and Adiantum.

Fancy Valley Always on Hand

Mention The Review when you write

long. There are some splendid My Maryland, White Killarney, Kaiserin and Killarney roses in the market; too many, in fact, because there is waste even of the best grade of stock, which gets wide open while being held for possible buyers. There are large quantities of short roses and no special call for them, because other stock for funeral work is so abundant.

Few carnations are received, and those buyers who want them pay the usual summer price, from $1 to $2, but the demand does not take them all, even with the supply limited to hundreds.

Asters are abundant in practically all colors, but the season has been against the aster, and quality is below what it should be. The best grade sell fairly well at from $2 to $3, but there are many thousands with which it is difficult to do anything at all. Gladioli also are more abundant than heretofore, and selling cheaper. America continues to have the call, but Augusta, white, is a good seller. The reds do quite well, but the common stuff is difficult to move at any price.

Some splendid auratum lilies are seen, and Easter lilies are equal to requirements. There also are considerable receipts of lancifolium, in both colors, but these sell slowly.

The peony has ceased to be much of a factor. There still is some first-class stock, but those who hold the better grades say they will be cleaned up by the first part of next week; the sale has become slow. There are still some thousands of dozens in storage which report says never were and never will be salable, and a good part of those remaining are sold at cheapest prices, because of the rot on the outer petals.

There is a fair sale for green, as always in summer; no special activity.

Reduced Rate to Chicago.

Members of the trade can get a rate of one and one-half fare for the round trip to Chicago for the trip to the convention, if they live in what is known as Western Passenger Association territory, viz.:

Illinois, Missouri, Iowa, Wisconsin, Wyoming, Nebraska, Northern Peninsula of Michigan, Minnesota, North and South Dakota, New Mexico on Atchison, Topeka & Santa Fe Ry., east of but not including Deming, nor points west of Albuquerque; from points on the Colorado & Southern Ry. north of Denver to Ft. Collins, also from Denver to Clayton, N. M.; Colorado, east of and including Denver, Colorado Springs, Pueblo and Trinidad; Kansas in Western Passenger Association Territory.

This is the special rate given the Chicago Association of Commerce. Tickets will be sold coming August 14 to 22, and returning August 16 to September 1, just right for the convention.

To get this rate the florist will ask for a "certificate" (not a receipt) when he buys his ticket to Chicago, paying full fare. On arrival at Chicago get any member of the Chicago Association of Commerce to give you an "Application for Membership" card (it costs nobody anything), properly signed. This, with the certificate, is to be presented to the Association of Commerce at 77 Jackson boulevard, where the visitors are fixed up to buy a return ticket at half fare.

The trade has many members in the Association of Commerce. Among the wholesale florists there are Percy Jones, E. H. Hunt and Peter Reinberg; among seedsmen Vaughan's Seed Store, Leonard Seed Co., Albert Dickinson Co., and the Illinois Seed Co.; among retail florists, C. A. Samuelson, John Mangel, O. J. Friedman and J. E. Hauswirth; L. Baumann & Co. are members; so is the Pulverized Manure Co., and doubtless others of the allied trades.

Any of these can fix up any visitor for the half fare returning, as above. If any of them have no stock of "Application for Membership" cards for visitors they can get them without cost by asking for them at the office of the association.

The Chicago party leaves for Cincinnati at 2:30 August 16.

Business in July.

The general report is that July beat all previous records for the month. Quite a number of houses this year made more elaborate preparation than usual to supply summer stock, and for this reason

Cut Flower Boxes

Now is the time for every retail florist to write **us** about his supply of boxes for the new season. Make up a list of what sizes and quantities you used last season and send it in for estimate. We handle only one grade of boxes, realizing that the up-to-date and practical florist will not have a cheap and inferior box at any price. These boxes are made from heavy moisture-proof board, being fifty per cent heavier than any other florists' boxes now on the market. But the prices are no higher than is asked for some inferior goods.

We have a fine line of half-tone cuts which were made up especially for florists who desire a flower cut printed on boxes with name and address. If you have never used any of our boxes don't fail to give them a trial, we guarantee satisfaction. Write today.

Full line of Violet Boxes. Corrugated Boxes, all sizes. Book order now– delivery any time you say.

quite a number have excellent increases in sales to report. This market never was so well supplied with summer roses.

The wholesalers all feel pleased with the July results; the business is getting to be an all-the-year-around affair.

Reardon Resigns.

After sixteen years as gardener for Martin A. Ryerson, on Drexel boulevard, John Reardon resigned, taking effect August 1.

Mr. Reardon was one of the best known gardeners in this section. There are no more skilled growers, and at the annual flower shows he has been a leading exhibitor and premium winner among the private men. He lives at 4739 Evans avenue. Unless tempted by too good an offer to go on some private place, he has it in mind to go into the commercial end of the business, where he was before going to Mr. Ryerson.

July Weather.

July was an unusually pleasant summer month. The mean temperature was only 72 degrees, which is normal. The precipitation was only 1.77 inches, against 3.57 as an average rainfall for the month. The percentage of possible sunshine was high, 68.

Various Notes.

C. L. Washburn returned Monday by rail from Lake Minnetonka, leaving O. P. Bassett and E. B. Washburn to come by auto. They arrived August 4. The report is that the farming country passed through will have simply wonderful crops, and that prosperity is apparent everywhere.

C. S. Claussen, the pickle man, last season bought 22,000 gladiolus bulbs and planted them on his farm at Wichert, Ill. They are in three varieties, America, Augusta and Mrs. Francis King. The cut spikes are now coming in at E. C. Amling's.

The Florists' Club will hold an August meeting this year—tonight. The convention will be the subject for discussion. Six new members are up for election, Thomas C. Yarnall, Jas. Curran, August Dressel, F. A. Benthey, Fred Hoerber and W. F. Hoerber, and if any others want to get in before the convention, the way for them will be found.

The committee finds that the Florists' Club cleaned up about $60 on the picnic, which was an excellent showing.

Mrs. Horton having returned from her vacation, Miss Bloom is rusticating.

The colored pond lilies in Mangel's window are grown by Geo. Schwing, at Fifty-seventh and Rockwell streets, who is a water lily expert, and who has the finest collection of varieties of anyone in this vicinity.

The Butler Floral Co. recently opened a new store at 1319 Sheridan road. At the first store, 297 Dearborn street, a new, large ice-box and new counters have been put in.

The E. Wienhoeber Co. is freshening up its store and repairing the show house while customers are few.

Poehlmann Bros. Co. states that it will require all its field grown carnations for its own planting this season. The space given to carnations is being largely increased, by reason of the season's big addition to the glass area, and it is the intention to have an adequate supply of carnations next season. It has been two or three years since the Poehlmann Co. has cut as many carnations as it had a market for.

George M. Garland Co. is sending its friends in the trade a neat index to telephone numbers.

Robert Waters, of Boston, brother of T. E. Waters, of the A. L. Randall Co., died August 1. He was not a florist, but was well known in the trade in Boston.

A news-letter from Wheaton, Ill., published on another page, gives an account of the burning of the boiler shed and other service buildings at the E. T. Wanzer establishment, July 29.

George Hartung, of the Kensington Greenhouses, is planning a trip to the convention at Cincinnati, with a party of friends from the south end, going by boat down the Illinois and Mississippi and up the Ohio rivers.

A. C. Spencer is enjoying his annual fortnight's vacation. Miss Corbett, who has charge of Peter Reinberg's books, recently returned from her outing in the country.

Vaughan & Sperry recently received a letter from a gentleman in Wisconsin, who wrote so glowingly of the wonderful pond lilies he could ship that haste was made to tell him to send them in, for there is a good market here for the up-to-date colored varieties, but when the shipment arrived it proved to be the lotuses, which are not worth express charges in this market.

E. H. Hunt reports this the best summer in the history of the business, both

SUBJECT TO MARKET CHANGE.

Mention The Review when you write.

in the cut flower department and in supplies. Three men are now on the road, with a fourth confining himself to the city trade.

E. C. Amling says he does not see how it can pay growers of the common sorts of gladiolus to ship to this market. The time was when these mixed shipments brought fair prices, but nowadays there are so many of the fancy named sorts received that the mixed stuff can only be sold to the job lot buyers, who are few and far between at this season. Mr. Amling is able to move Augusta in large quantities at fair prices, but says America is the one best seller.

C. W. McKellar is receiving considerable consignments of tritoma, the red-hot poker plant. Place these in an appropriate bowl and they make an excellent table centerpiece, or a striking center for a retailer's window.

Miss Wattman, who has charge of E. C. Amling's books, returned from her vacation the last day of the month. The accounting departments of all the wholesalers had a busy session, the usual Monday settlements with growers coming the same day as the first business day of the month.

G. H. Pieser, president of the Kennicott Bros. Co., returned August 2 from a fortnight's trip by water to Quebec.

Percy Jones says that July was relatively a better month than June; June disappointed a good many people in this market, while July has proved better than anticipations.

Dominick Freres is taking advantage of the lull in shipments to whiten up his corner of the Flower Growers' Market.

C. W. Davison, of Des Moines, who was here this week, worked for Poehlmann Bros. Co. in 1894. He visited Morton Grove, but said he would not have recognized the place.

Caroline C. Massey, mother of Mrs. W. N. Rudd, died August 1, aged 76 years. The funeral was held from Mr. Rudd's residence in Blue Island Tuesday afternoon.

L. Baumann, of L. Baumann & Co., has been busy since his return from Europe, making preparations for the convention at Cincinnati. He will have a good exhibit there and expects to show a number of new specialties.

Leonard Kill spent Sunday at Channel Lake, running the Reinberg auto up and back, the return journey in deep mud.

Among the visitors in town this week have been B. Eschner, representing M. Rice & Co., Philadelphia; C. W. Davison, manager of the greenhouse department of the Iowa Seed Co., Des Moines, on his way home from the east; H. Roth, of La Fayette, Ind., on his vacation; J. J. Waaland, Findlay, O., on his way home from a fortnight's outing; G. Fredrickson, St. Joe, Mich., a frequent caller.

Bowling.

The team which was to have bowled against the florists July 30 failed to show up, so the boys made the following scores in practice:

Player.	1st	2d	3d
A. Zech	152	176	167
Asmus	167	211	164
Bergman	185	160	154
J. Zech	157	159	165
Yarnall	178	125	163
Groff	134	128	174
Pasternick	109	140	128
Winterson	133	130	130

The Review sends Scott's Florists' Manual postpaid for $5.

DENVER.

The Market.

Business last week was rather quiet, with lots of rain and warm weather. Many of the flower buyers are out of town, and if it were not for funeral orders occasionally, it would seem like Sunday. Still, the outlook is good.

But few American Beauties are coming, and they are practically the only rose stock that measures up to anything like what roses should be. Carnations are almost off. Asters have made their appearance on the market, but so far the early ones do not stand much judging. Sweet peas are fine and fairly plentiful. Dahlias and gladioli have also shown up, but not to any great extent.

Various Notes.

B. E. Gillis, of the Park Floral Co., is spending a few weeks at Pitkin, Colo.

The interest in the S. A. F. convention continues, and the outlook is good for a good sized delegation to accompany President Valentine. They expect to leave Denver via the Rock Island for Chicago Saturday, August 14, arriving Monday in time to accompany the Chicago florists on their special.

Among the recent visitors were Thomas Meehan, of Dreshertown, Pa., and J. H. Dayton, secretary of the Storrs & Harrison Co. They spent Friday in the city, and were entertained by President Valentine.

Carl Espelin, of Espelin & Warren, of Fort Collins, has been spending a vacation of ten days in the city.

continues to practice one night a week, getting ready for the S. A. F.

E. P. Nieman and wife have returned from a two weeks' vacation up the Platte. E. S. K.

BALTIMORE.

The Market.

There has been a considerable volume of trade, but it has see-sawed a good deal. The irregularity of the summer market is an expected condition. There is a great influx of asters and outside roses, but the bulk of them are of poor quality and thousands of the lower grades naturally find their way to the dump. There are some fine gladioli being sent in, but this showy flower is hard to get rid of, and the uses to which it is adapted seem limited.

The weather has been exceedingly dry, as we have not had any rain for over three weeks, which has shown its effect on dahlias.

State Horticultural Meeting.

A large delegation of Baltimore florists left here Friday morning, July 30, to attend the summer meeting, at Mountain Lake Park, of the Maryland State Horticultural Society, which will continue until August 3. The meetings are held in different parts of the state each year, and the object of the society in going to the mountains this year is to give the members an opportunity of seeing the cultural possibilities of the mountains and to interest the residents in fruit raising.

They stopped at Hancock to inspect the orchards there. On Monday the entire society went to Keyser, W. Va., to inspect the fine orchards at that place. The meeting Tuesday was one of the most interesting in the history of the organization. State Senator W. McColloh Brown is president of the society. C. P. Close, of College Park, Md., is secretary. Q.

MEDICINE HAT, CAN.

The property of the Rosery Flower & Seed Co., Ltd., at the southwest corner of the city park, has been placed in charge of a receiver, and is now offered for sale. The property consists of five acres of land, with the buildings thereon, including greenhouses, storerooms, cold storage basement, heating apparatus and all the usual accessories. It is said that the location "offers a good opportunity, owing to the existence of natural gas, good, sunny climate and good soil, for establishing a wholesale florists' business, with a market in Winnipeg, Regina and Calgary."

The liquidator, or receiver, T. Harry Webb, of the firm of Webb, Read & Hegan, has announced that he will receive bids, addressed to him at the New Nanton building, Winnipeg, Man., up to 4 p. m. of September 15, 1909. The bids will be opened on the following day.

Niessen's News Column

Asters

The Best.....$2.00 per 100
Good Stock..... 1.50 "
Medium.....75c to 1.00 "

We can offer you the choicest stock on the market and in any quantity. For design work we have a grade, medium stems but good large flowers, on which we can make you attractive prices.

Beauties

The Best.....per doz., $ 3.00
The Best.....per 100, 20.00
Plenty of medium grades at $1.00, $1.50 and $2.00 per doz.

Our Beauties are in fine form for this time of the year. The flowers are of fair size, good color and plenty of foliage. We claim there are no better Beauties coming to this market. Let us convince you of the superior quality of these roses by placing your next order with us.

My Maryland

This rose has proven its great value and is well liked by the trade. We get a large cut of it every day; the best of them have 15 to 18-inch stems. We have them in all grades at prices ranging from $3 to $8 per hundred.

Field-grown Carnation Plants

At your request we will send you a list of all the varieties that we have to offer. Plants are not plentiful and we advise early ordering.

Ostrich Plume Asters

August is the month when Asters are at their best. They are steadily improving now and by the time you read these lines we shall be getting some of the grand stock that made such a hit last year. The best aster on the market is, as you well know, Ostrich Plume, a name that well describes the showy flowers of this variety. We shall have them in all colors and solicit your regular or special orders, which will receive our careful attention.

Other varieties for August:

BEAUTIES, KAISERIN, EASTER LILIES.

Wire, phone or write us when you want the best.

PHILADELPHIA.

The Rising Eastern Market.

August and asters worthy the name, Semple's of remarkable size and great length of stem, have arrived together this week. August is welcome because it brings holidays to most of us. The asters, too, are cordially greeted, because everybody is tired of the miserable little make-believes that the heat and drought have forced the dealers to handle. The market can be described in a few words, so perhaps you will let me sermonize just a minute. A competent judge, one of the best in Philadelphia, asserted with feeling that if the growers would water just a tiny little patch of all their asters and cultivate them, and water some more, they would have a whole lot more pennies for their work than they are getting now, when great quantities of trash are daily dumped on a weak market. There are only a few of these asters coming into town, perhaps 500 or so a day, but the way they bring $3 per hundred, and the poor little chaps that bring 50 cents and go begging at that, is a lesson.

Gladioli are in splendid form. America leads them all. Excuse a bit of patriotism, but we certainly owe a kind thought for John Lewis Childs for sending out that lovely soft pink variety.

Of the other flowers valley and orchids enjoyed a revival for a brief day. Beauties are improving in quality, the demand being chiefly for the shorts. My Maryland and Kaiserin are not selling as well as a week ago. Sweet peas in limited quantity are extraordinarily fine in all the colors. There is quite a demand for outdoor flowers, but they do not realize paying prices. To sum up, the quality is improving, but the supply exceeds the demand.

Philadelphia to Cincinnati.

The Florists' Club of this city will leave Broad Street station Monday, August 16, at 12:31 p. m. It expects to be joined en route by the Baltimore and Washington florists. The party is due to arrive at Cincinnati over the Baltimore & Ohio on Tuesday morning, August 17, at 8:15 a. m. The fare will be $12.05 going, with $4 additional for Pullman berth each way, and $13.35 returning.

For further information address John Westcott, Ridge and Lehigh avenues, or David Rust, Horticultural hall, Broad street, below Locust street, Philadelphia.

Asters.

A local cut flower expert, who wishes his name withheld, has kindly given me a few notes on the aster growing industry of New York state. He says that the asters are produced in the vicinity of the cities of Auburn, Geneva and Rochester, where the soil is light, rich and mellow and the climate cool during summer. The asters are grown mostly outdoors. The best stock is usually produced by those who are careful to save only the best seed.

The necessity for meeting competition has brought out new methods in aster growing, designed only to facilitate work; of these methods is the planting machine, so arranged as to hold three men—a driver and two planters. On this machine is also room for the seedling asters to be planted in the field, a driller to mark where they are to go, an arrangement which presses the soil firmly about them when they are planted, and a barrel that waters them automatically as the machine moves slowly onward. This arrangement will surprise many of the REVIEW readers, as it certainly surprised me. It may be that, not having seen it, the description is imperfect, but it has been given verbatim as nearly as possible, and I feel sure it is virtually correct.

The indications in the aster growing district in New York state are for a fine crop of late asters, but it will probably not be so large as last year.

Various Notes.

Herbert G. Tull, treasurer of the Henry A. Dreer Co., left on his vacation August 2, first taking time to say a commendatory word for the REVIEW's credit article a fortnight ago.

William P. Craig was admitted to mem-

Where he hopes to meet old friends and to make new friendships.

bership in the Robert Craig Co. July 27. The officers of the company now are: President, Robert Craig; vice-president, William P. Craig; secretary and treasurer, Robert A. Craig.

George Samtman, who has, as previously announced in this column, taken the place of Fred Roos, at Orvilla, near Lansdale, Montgomery county, has erected a fine new rose house 30x100 in addition to the three houses 15x60 that were on the place. Mr. Samtman has seven acres of ground and proposes pushing his improvement further next season.

Fred Berger is enjoying a few days' let-up at Seaside Park, N. J. Mr. Berger is an enthusiastic admirer of the upper Jersey coast.

M. Rice & Co. are storing heavy shipments of supplies and novelties received this week from the steamers Prince Oscar and Taormina.

Herbert W. Johnson is spending the month of August at Cape May, N. J.

H. Bayersdorfer received a hearty welcome when he reached eleven twenty-nine August 2. A wonderful little dachshund with blue ribbon possibilities was the first novelty.

A. Saxton has succeeded Al Thomas as right-hand man for Charles F. Kruger.

The Philadelphia exhibitors at Cincinnati, so far as known, are Charles D. Ball, Lemuel Ball, H. Bayersdorfer & Co., Robert Craig Co., Henry A. Dreer, Charles Henry Fox, Henry F. Michell Co., S. S. Pennock-Meehan Co. and M. Rice & Co.

L. B. Eastburn, Kennett, Pa., is sending William J. Baker a most beautiful scarlet gladiolus, Firefly.

Julius Wolff, Jr., used 3,000 lily of the valley and many orchids in one funeral order July 28.

John Berger will leave August 9 for two weeks' fishing with his brother in the woods of Maine.

H. Bayersdorfer & Co. have received big importations from the steamers Prince Oscar and Taormina.

H. M. Weiss & Son, Hatboro, N. J.,

THE Florists' Supply House of America

Imperial Chinaware

We are going to exhibit ever so many beautiful and useful novelties at the Cincinnati Convention of the S. A. F. on August 17. Trust to give you an inkling of what we have in store for you. We will tell you of one of these novelties today—

OUR NEW IMPERIAL CHINAWARE

It is one of the prettiest things we have ever offered the florists of America, a variety of vases, bowls, jardinieres and ferneries made of china, delicately finished and exquisitely colored, some of them two-toned (as we say of crepe paper), it is so exceedingly well done. Remember, this is only one of many. Be sure to go to Cincinnati and see our grand exhibit; it will well repay you for the trip.

Everything in Florists' Supplies. Send for our Illustrated Catalogue.

H. BAYERSDORFER & CO., 1129 Arch Street, Philadelphia, Pa.

Mention The Review when you write.

expect to cut from their new crop carnations by the time these lines are read. Lieut. Peary and The Queen will be the first varieties.

The sweet peas received by the Leo Niessen Co. are much admired now when "fashion's favorite flower" is on the back track. Arthur A. Niessen says that it took lots of perseverance on the part of both grower and wholesaler before the secret was mastered.

The Philadelphia Cut Flower Co. has as pretty gladioli as one could wish to see; America, Brenchleyensis, Shakespeare and a white, the name of which W. J. Muth could not recall, are the varieties.

It is said that another of the star P-M growers, Robert Scott & Son, contemplate building in the near future.

Robert A. Craig showed, August 2, three of the prettiest plant houses one could wish to see, two entirely filled with crotons, one with begonias, Lorraine type and sisters.

J. Henry Bartram, of Lansdowne, Pa., has added three varieties to the American Beauties with which he won fame. They are Kaiserin, Richmond and My Maryland.

Henry Diehl has taken charge of Marylawn, the well known Kemble estate.

J. Bancroft Swayne, Kennett, Pa., has the honor of having produced the largest and finest crop of mushrooms in Chester county last season. They were from spawn manufactured by his company.

Louis Berger has closed his flower shop during the summer. He expects to reopen September 1. PHIL.

BOSTON.

The Market.

The supply of flowers is not great and, though business is quiet, there is no considerable surplus. Demand from shore and mountain resorts so far has been light, but trade on the whole is somewhat better than last season. Carnations are nearing the end; few good ones are seen and many of those arriving are small and spidery, selling cheaply. Roses are somewhat better. Beauties of fair quality are seen. Killarney is only moderately good. Kaiserin is the leading variety. Carnot is not much seen, but some nice My Maryland is coming in and makes a favorable impression. Sweet peas are not selling so well. The intense heat and drought has made them short-stemmed and there is considerable waste in them.

Asters are now quite abundant, but really fine flowers are wanting. A few dahlias are coming, but these sell poorly in Boston. Cosmos comes from a few growers and an abundance of fine candytuft and other outdoor annuals. Gladioli are quite plentiful and good, but move slowly. Valley is in only light demand. Lilies are more than enough for all requirements. In choice flowers, Cattleya gigas and C. Harrisoniæ are the only representatives seen. A little stephanotis and some gardenias are arriving, but there is no great call for them. For green stock the market remains much the same.

Club Picnic.

Delightful weather once more favored the Gardeners' and Florists' Club for the annual picnic at Randolph's grove, July 28. Although the temperature was 92 degrees in the shade, the picnic grounds provided ample shade, and races could all be run without the contestants being exposed to the sun's rays at all. The beautiful lake also seemed to exert a cooling influence.

There was a keen contest in practically every sporting event, the baseball teams especially putting in some hard work. The result of the various athletic sports was as follows:

Baseball for boys, five innings, winning team consisted of Crawford Ferguson, Robert Smith, W. Linsert, Jack Sisson, T. Westwood, J. Watts, Walter Westwood, A. Anderson, E. Cummings. Score, 11 to 8. Umpire, Fisher.

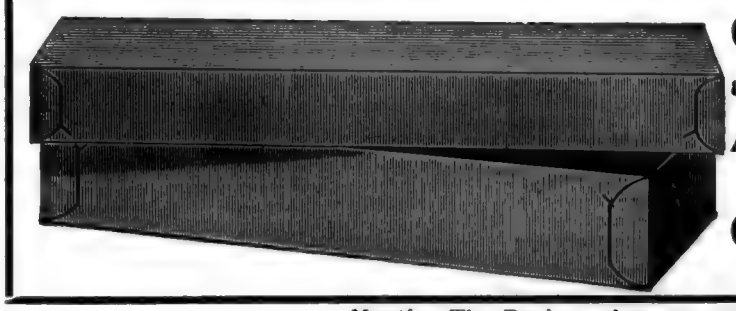
Baseball, commercial growers vs. private gardeners. Private gardeners won 8 to 4. Winning team consisted of R. W. Curtis, G. H. Cray, C. B. Johnson, S. F. Doten, D. Finlayson, Daniel Iliffe, Mr. Linsert, Duncan P. Anderson; umpire, J. L. Miller; scorer, W. E. Cahill.

Putting the 16-pound shot, first, John Reid, thirty feet six inches; second, W. J. Collins, twenty-nine feet four inches; third, A. G. Sawyer, twenty-nine feet; seven entries.

Flag race for girls under 16, handicap; final heat, first, Alice Iliffe; second, Catherine Lally; twelve entries.

Three-legged race for men, first, W. J. Collins and Mr. Reed; second, G. H. Grey and W. Iliffe, five entries.

Race, 100 yards, handicap, boys under 18; final heat, first, Dean French; second, W. Ferguson; third, Spencer Heurlin; twenty-one entries.



Fifty-yard race, boys under 12, handicap; first, Thomas Iliffe; second, Victor Heurlin; third, Dean French; ten entries.

Married ladies' race, seventy-five yards, handicap; first, Mrs. E. Rose; second, Mrs. H. F. Woods; five entries.

Three-legged race for boys, first, Jack Sisson and T. Westwood; second, Crawford Ferguson and Victor Heurlin; six entries.

Fifty-yard race, girls under 12; handicap, first, Edith Iliffe; second, Marjorie Iliffe; third, Nellie Ferguson; six entries.

Sack race for men, first, W. J. Collins; second, W. S. Grassie; five entries.

Flag race, married ladies, first, Mrs. G. H. Gray; second, Mrs. E. Rose; eight entries.

Fat men's race, first, J. L. Smith; second, J. Lally; eight entries.

Running broad jump, first, W. J. Collins, seventeen feet; second, G. H. Grey, sixteen feet; third, C. Linsert, fifteen feet and nine inches; five entries.

Half-mile race, first, W. S. Grassie; second, John Reid; five entries.

Thirty-yard race, girls under 8, first, Bessie Ferguson; second, Elizabeth Decker; third, Mary Flood; eight entries.

Thirty-yard race, boys under 8, first, Spencer Heurlin; second, William Westwood; third, Archibald Terry; seven entries.

Tug-of-war, commercial growers vs. private growers, won by the commercials. Winning team consisted of W. A. Manda, Paul F. Burke, Henry W. Vose, E. A. Peirce, Mr. Decker, C. Holbrow, H. H. Bartsch, J. P. A. Guerineau, J. L. Miller. Losing team consisted of Mr. Burns, W. Robb, A. G. Sawyer, J. L. Smith, J. Lally, F. Humphreys, A. K. Rogers, Bolton Sawyer.

The tug of war was a close shave. At the outset the commercials made a good gain, which the privates nearly overcame before the minute elapsed. W. A. Manda's weight and strength told heavily in favor of the commercials.

J. P. A. Guerineau played hard on the commercial baseball team, but the privates, under Curtis, could not be downed.

J. R. Fotheringham, of Tarrytown, F. C. Green, Providence, R. I., and W. A. Manda were among visitors. The last named played baseball well, in addition to assisting in the tug of war.

P. M. Miller was an efficient starter, and W. J. Kennedy made an excellent megaphone man. William Downs presented the prizes at the close of the contests.

The fat men's race was the best of the kind the club has yet seen, better time being made than ever before.

Too bad there was no veterans' race. M. H. Norton was ready to compete, and looking as young and fit as when he won the same race at Randolph four years previously.

Peter Fisher did not compete, but his son umpired the boys' baseball game most acceptably.

The attendance of ladies and children was the largest the club has ever had. The committee remembered them with boxes of chocolates and ice-cream.

There was no sports committee this year; the executive committee managed everything, much credit being due to the members, P. M. Miller, P. Fisher, R. Cameron and J. K. M. L. Farquhar.

The Iliffe family showed that they had done some athletic training, judging from the number of prizes they captured.

The committee had plenty of tea, coffee and sandwiches for everyone, so that no one need be hungry.

Delightful weather, beautiful picnic grounds, well contested sports, no one injured, all home in good season and all bills paid—surely that is a record the committee might well be proud of.

Various Notes.

The meeting of growers from the two wholesale markets, which was to have been held July 31, has been postponed until further notice. Many growers are away on their vacations and final action will probably be deferred until a full meeting is possible. The Winthrop Square location, near Welch Bros., would be an ideal one in every way, and with two markets combined once more, Boston would have the finest wholesale market in the country.

Thomas Pegler is at Wilton, N. H., for a short rest. Mr. Pegler is a busy man and no one needs a relaxation more than he.

James Rough, buyer for Galvin's Back Bay store, is enjoying a vacation in New Hampshire.

The Gardeners' and Florists' Club will hold a field day with W. B. Whittier & Co., of the Framingham Nurseries, August 14. Members and friends are asked to take Boston & Worcester electric cars, leaving Park square at 1 o'clock. Barges will meet the party on arrival.

The severe drought in this section continues unbroken, except for light, scattered showers. Crops are in many cases almost completely ruined and no relief is yet in sight. July 30, with shade temperatures of 98 degrees, was the hottest of the season.

William Malloy, the genial salesman for the Budlong Co., is among the latest to go on his annual vacation.

A. R. Hutson, salesman for William H. Elliott, is enjoying a few weeks' rest in Canada.

James Wheeler, wife and family are enjoying a vacation at Friendship, Me. Mr. Wheeler competed in an over 200-pound race at Camp Durrell a few days ago, coming in well in the lead.

Carnation growers are busy housing their stock. Owing to dry weather, the plants are rather smaller than usual, but will soon increase in size under glass.

The death of T. C. Thurlow, reported in last week's Review, removes one of the best known figures from local horticultural circles. The deceased was known and esteemed by a large number in the trade. The business will be continued by his sons, George C. being the best known of the trio and a great enthusiast in his calling.

William Sim is marketing tomatoes by the ton weekly from his Cliftondale greenhouses, his crop being a heavier one than ever before.

Letters from George W. Butterworth indicate that he is covering quite a little of Europe. At last advices he was doing the gay French capital.

Several local S. A. F. members, who were at Cincinnati in 1885, are planning to attend the coming convention.

Del Cartwright, the genial salesman for the Waban Rose Conservatories, is at Waterville, Me., on a few weeks' vacation.

Herman Waldecker, of Braintree, who is one of our up-to-date growers, is busy on a new house at present.

T. J. Clark is making extensive improvements at his Boylston street store, which will make it thoroughly up-to-date.

J. Seymour, from Carbone's Boylston street store, is enjoying a well earned vacation at his summer cottage in Weymouth, Mass.

H. M. Robinson & Co.'s quarters at 15 Province street are having a thorough overhauling and look spick and span with new paint.

W. N. Craig.

Denver, Colo.—The florists of this city are organizing a club, or, as Thomas Chapman states the case, they "have been dead and have come to life again." Emil Glauber, Mr. Bush and Thomas Chapman have been appointed as a committee to draft a constitution and by-laws.

SOCIETY OF AMERICAN FLORISTS.

Rudd Not a Candidate for Re-election.

As I find it impossible to do full justice to my other work and at the same time do all that might and should be done for the betterment of the S. A. F., I find it necessary not to allow my name to be used as a candidate for reëlection.

The office is of so much importance, and the prosperity of the society depends so largely on the man in the secretary's office, that I feel it necessary to make this advance announcement so that the members may have ample time to think the situation over carefully and pick out in their own minds the best available man and be prepared to work for and vote for him.

I think perhaps very few in the society, possibly no one except William J. Stewart and myself, fully realize what an enormous amount of work comes to the able, energetic and honest man in the office of secretary of this great society of ours, and what a great proportion of that work the man who has not the ability or the energy to do it, or who is not honest enough to give to his work the best that is in him, can shirk. The salary of the office at present is $1,000 per annum. A man can, if he chooses, sit down on the job and do $250 worth of work and pocket the other $750 as a Christmas present. On the other hand, the right man can do $1,500 worth of work and then feel dissatisfied with himself that he has been unable to take up many things that would undoubtedly in the future advance the society's interests and increase its membership. The bad point about the matter is that much of this important work shows only in future results, and the secretary may, if he chooses, shirk a large proportion of it without the rank and file of the society becoming aware of his shortcomings for a long time. The society has much to be grateful for in having had the long continued services of so able a man as Mr. Stewart, and I sincerely trust that they will pick out the best man available, with the idea of continuing him in office for a long term of years.

Every member of this society who has the good of the organization at heart should bear in mind that it is, although twenty-five years old, only in its infancy as yet; that the possibilities for growth and the extension of its influence and its ability to do good for the trade at large and for the individual members are almost infinite. The secretary whom you will choose at the next meeting will have the destiny of the society largely in his hands and it behooves each and every member to put aside all questions of personal friendship and look only to the man, and to his honesty and ability. If anyone asks you to vote for a man because he is a "good fellow," vote against that man for that very reason. The "good fellow," in the ordinary ac-

You know what **hot weather** does to stock. Well, Milwaukee is well favored, as we have no very hot weather here, and in consequence stock of all kinds is still in good shape. Big cut of fancy Carnations, Roses and Giganteums. Try a few shipments and be convinced.

HOLTON & HUNKEL CO.

462 Milwaukee Street, MILWAUKEE, WIS.

The best-equipped Wholesale House in the West

Mention The Review when you write.

ceptation of the words, is the worst fellow in the world for your secretary. If any one asks you to vote for a man because he "needs the money," vote against that man for that very reason. If you are personally a friend of either of the class of men spoken of above, vote against each of them for that reason also. The friend of the "good fellow" should keep him out of a position where nothing but failure awaits him. The friend of the man who "needs the money" should realize that he can get more money in many easier ways than in this position. There is no easy money to be made in the job, except by taking money for work which one does not do.

I have enjoyed immensely getting back into harness again and having an active part in the work of the society. I have enjoyed the work itself greatly and if the society wished me to continue in the office would ask no greater pleasure than to go on with that work, but to continue in the office would be to either let my own work suffer or that of the society, or more likely both.

I know that no man engaged in active business, either as a proprietor or as an employee, can take up this work and carry it out so that the society may achieve the success which is within its grasp, unless he grossly neglects his own business. Therefore, we must look elsewhere for the ideal man. As a matter of good, sound business policy also, the man selected should be a young man or at least not an old one. We should select our secretary much as we would buy a horse. The old horse may be well broken, sound and strong, and yet we will buy the young one, because there are more years of work in him. In the same way we should select a young man for the office of secretary, with the idea of postponing as far as possible the expensive process of educating a new man for the job.

I trust and believe that the members of the society will not take offense at my plain speaking, but if they do I shall simply be sorry but not regretful. The thing is of such vital importance and of such great interest to us all that these words had to be spoken.

W. N. Rudd, Sec'y.

August 2, 1909.

Ladies' S. A. F.

The Ladies' S. A. F. will hold its meetings at the assembly room of the Sinton hotel, Wednesday and Thursday, August 18 and 19, at 10:30 a. m. The secretary will be found near Secretary Rudd's office. Lady members, please wear your badge pin. Mrs. Chas. H. Maynard,

Sec'y L. S. A. F.

CHRYSANTHEMUM SOCIETY.

National Society's Next Meeting.

The Chrysanthemum Society of America will hold its next meeting and exhibition with the American Institute of New York, next November. William Wells, the well-known chrysanthemum specialist, of Earlswood, Surrey, England, is expected to be present, and has been asked by President Smith to serve as one of the judges. A schedule of special prizes is now being arranged, and will be mailed as soon as ready, to anyone interested, upon application to the secretary.

Chas. W. Johnson, Sec'y.

TRADE EXHIBITION.

The total amount of space sold for the trade's display at Cincinnati is 11,700 square feet. If there are any exhibitors who wish to get in on the ground floor with their heavy exhibits, they should do so at once, as time is drawing near to the opening day. We have plenty of good space on the second floor for light exhibits, as there is probably 5,000 square

J. F. WISNER, West McHenry, Ill.

Assignee's Sale

The undersigned ASSIGNEE, in trust for the creditors of WILLIAM K. PARTRIDGE, FLORIST, will offer for sale at

Public Auction, on Friday, August 20, 1909, at 1 o'clock p. m.

on the premises in LOCKLAND, STATION R, CINCINNATI, OHIO, the entire plant and equipment of said Assignor, representing an investment of $75,000 00, and will be offered for $18,000.00, consisting of about fifty acres of land (five acres fee, forty-five acres lease with privilege of purchase); fifteen greenhouses, having a glass exposure of 75,000 square feet, equipped with steam heating plant of three batteries of boilers.

The houses and equipment are all practically new and the plant is one of the most modern and complete in the west. This sale is timed to meet The Florists' Convention to be held in Cincinnati during the week of August 20, 1909.

The plant is easy of access by traction line and for inspection take the Millcreek Valley cars, 5th and Walnut Sts., Cincinnati, Ohio.

For further particulars call or write

W. W. BELLEW, Assignee, 41 Wiggins Block, CINCINNATI, OHIO

Judicial Sale of Part of Assets of the Rosery Flower & Seed Company, Limited

Tenders will be received addressed to T. Harry Webb, Esquire, Liquidator of the Rosery Flower & Seed Company, Limited, New Nanton Building, Winnipeg, Manitoba, Canada, and marked "Tender re Rosery Flower & Seed Company Limited," up to four o'clock p. m. of the 15th day of September, 1909, for the purchase of the following property of the above named Company, namely:

That portion of the North West Quarter of Section thirty-two (32), in Township twelve (12), Range five (5) West of the fourth meridian in the City of Medicine Hat in the Province of Alberta, consisting of five (5) acres situate and abutting the South West corner of the City Park, purchased from one William R. Johnston,

together with all buildings and erections thereon and appurtenances thereto, including the following, namely: Greenhouses, store rooms cold storage basement, piping, temporary heating apparatus, benches, pots, implements and usual accessories, representing an investment of $15 000 or thereabouts.

The City of Medicine Hat, in the Province of Alberta, has made favorable arrangements as to taxation and for the supply of water and natural gas.

The above property offers a good opportunity, owing to the existence of natural gas, good sunny climate and good soil, for establishing a wholesale florist business with a market in Winnipeg, Regina and Calgary.

TERMS OF SALE: Twenty-five per cent in cash and the balance on terms to be arranged with, and secured to the satisfaction of, the liquidator.

A marked cheque payable to the liquidator for ten per cent of the amount of the tender must accompany each tender, which will be returned if tender is not accepted. The tenders will be opened by the Liquidator at his office aforesaid on the 16th day of September, 1909, at the hour of eleven o'clock a. m., and all who tender are requested to be then present.

The highest or any tender not necessarily accepted.

The above property will be sold subject to the following conditions:

1. The property will be sold subject to a reserve price.
2. The Purchaser shall be bound by the terms of an agreement with the City of Medicine Hat dated the 17th day of May, 1909, which provides amongst other things that the occupant for the time being shall maintain upon the said lands and premises the business of florists as a going concern for a period of five years from the date of the purchase, in default of which the lands will revert to the City on repayment of the sum of $1,000.00 and the owner shall have the right to remove his buildings and other improvements. The agreement further provides that in order to obtain reduced rates for natural gas the occupant must instal and maintain on the premises a steam heating plant.
3. The purchaser will be required to enter into an agreement with the City embodying the above terms.
4. The purchaser shall have the conveyance prepared at his own expense, and tender same for execution.
5. If the purchaser fails to comply with the conditions aforesaid or any of them, the deposit and all other payments made thereon, shall be forfeited, and the premises may be resold; and the deficiency, if any resulting from such re-sale, together with all charges attending the same, or occasioned by the defaulter, are to be made good by the defaulter.
6. The said property will be sold subject to the approval of the Court of King's Bench for the Province of Manitoba.

For further particulars apply to the Liquidator, or to Messrs. Andrews, Andrews, Burbidge & Bastedo Barristers and Solicitors, Aikins Building, McDermott Avenue and Albert Street, in the City of Winnipeg, in the Province of Manitoba, his solicitors.

Dated at Winnipeg, this 28th day of July, A. D., 1909.

T. HARRY WEBB, Liquidator, No. 308-11 New Nanton Building, Winnipeg, Manitoba, Can.

INDIANAPOLIS.

The Market.

Business for the last week has been a repetition of the previous week. Outside of some funeral work, there is nothing else to be expected this time of the year. Stock, with the exception of good asters, is fairly plentiful.

Florists' Picnic.

The City Florists' Club held its annual picnic at Germania park last Thursday, and had a most enjoyable time. The ball game between the north sides and south sides was a spirited contest, and was won by the former by the narrow margin of one run, the score being 9 to 8. The batteries were Henry Rhodenbeck and Chas. Pahud, for the south sides, and E. W. Sellers and Wm. Strego, for the north sides. It looked as though Rhodenbeck had it on the north side boys, for in the beginning of the fifth inning the score was 8 to 4 in their favor. The north sides went after him in great shape in this inning, and made five runs, ending the inning with a home run by Wm. Strego, the game being called on account of rain. The rain no doubt saved Henry the disgrace of being taken out of the box, as the north side boys were pounding the ball all over the lot.

In the running race for ladies, Miss Elsner was first and Mrs. Pettit second. Miss Pahud was first and Mrs. Braendlaen was second in the bowling contest for ladies.

There were numerous other events, which took the greater part of the afternoon and were much enjoyed. A storm blew up at about five o'clock, and everyone retreated to the bowling alleys, where an enjoyable evening was spent. The prizes for the children's events were donated by Geo. H. Swain.

Various Notes.

E. A. Nelson has opened up his camp on Eagle creek. Mr. Nelson expects to spend his nights at the camp and exercise his new trotting horse, to and from his business, morning and evening.

Carl Sonnenschmidt left this week for Germany. He expects to be gone until the middle of October.

Harry Rieman is the latest auto enthusiast. He spends most of his time between burning up the country roads and examining the finer points of the machine.

Bert Stanley is the proud father of a new boy.

B. F. Hensley, of Knightstown, was a visitor this week.

Erwin Bertermann is off on his vacation this week.

Adolph Baur and family are to leave next week for a trip to the northern lakes. Mr. Baur expects to return in time for the convention.

A. Wiegand & Sons are putting up a new greenhouse.

ST. LOUIS.

The Market.

Market conditions have not changed since last report. An occasional wedding and small social function are held now and then, otherwise there is practically nothing doing, except funeral work, but that has been quite lively of late. As to stock at any of the wholesale houses, there is plenty of it, but the quality is poor in roses and carnations.

Asters are becoming plentiful and the best of them sell well at fancy prices, but only in the lighter shades. Gladioli are abundant and of good quality. In these, too, the light shades have the call. The fancy colors are mostly used for window dressing.

Auratum and longiflorum lilies sell well. Valley is slow, with a few outdoor flowers. The foregoing is about what makes up the daily market. The market has the usual greens on sale. Fancy ferns and asparagus sell well. Smilax is in slow demand.

Various Notes.

William Wrigley, representing D. Augspurger, Peoria, Ill., spent a few days with the trade last week.

Mrs. M. S. Vesey, of Fort Wayne, Ind., was a guest of the Misses Meinhardt last week.

Julius Dillhoff, representing Schloss Bros., the ribbon house, in New York, called on the local trade last week.

B. Eschner, of M. Rice & Co., Philadelphia, who was here last week, was booming the Cincinnati convention among the members of the local trade.

A. Y. Ellison is no longer connected with the Ellison Floral Co. Arthur Ellison is now with the City park department, stationed at Forest park.

W. C. Smith entertained a number of his friends in the trade with a stag party at his home on Grand avenue. A jolly time was reported.

C. A. Kuehn, with his family, visited his friend, J. F. Ammann, of Edwardsville, last week. Mr. Kuehn reports Mr.

Ammann's place in fine shape for a big fall crop of cut flowers.

Hugo Gross and his family have returned home from their western trip and Mr. Gross was around telling his many friends of the beautiful sights on the trip and of the grand western exposition at Seattle.

The Riessen Floral Co. reports an unusually good summer trade, including a big run of funeral work of large designs. Their show windows are always one of the attractions along Broadway.

William Nichols, of the St. Louis Seed Co., is spending the summer months at the northern lakes. Mr. Rau is attending to the president's duties in the latter's absence and Martin Moran looks after the retail department.

Carl Beyer and his wife came home Wednesday, July 28, from an enjoyable western trip. Mr. Beyer reports he will not be able to attend the S. A. F. convention this year, but his brother, Robert, will be represented.

C. Young & Sons Co. has nearly completed work on the new front at its salesroom, 1406 Olive street; it is one of the finest fronts along Olive street. Everything will be completed by the time President Young, with his family, returns from Atlantic City.

At C. A. Kuehn's a lot of fine asters are to be found. Ed Gerlach reports a good summer trade.

At the Smith Wholesale Floral Co. a great lot of gladioli and a good quality of asters and carnations are to be seen. William Ossic says business has been good these hot days.

At H. G. Berning's everything in season and of good quality is to be had. Mr. Berning is enjoying a good business this summer.

At George H. Angermueller's there is a nice lot of roses and carnations and other seasonable stock. He also reports a nice run of trade.

It is expected that all four wholesalers will attend the S. A. F. convention next month.

The Florists' Club will hold its regular meeting Thursday, August 12, at the place of the Bentzen Floral Co., on Marcus avenue. The election of officers will be held at this meeting, also the last meeting before the S. A. F. convention. There is a great deal of important business to be transacted. Secretary Bentzen will send out the usual notices in time, telling you how to reach this place of meeting. J. J. B.

Various Notes.

Miss Cora Hapgood, saleslady at John V. Laver's store, has returned from a three weeks' vacation.

G. H. Baur has returned from a visit with relatives in Toledo, O.

Miss Borden, formerly employed at Laver's store, left for Cleveland July 30.

The Baur Floral Co. is adding another house, 42x300, to its new plant on West Twenty-first street. The framework is constructed of iron and the benches are concrete. Much interest is taken in these new greenhouses, as they are the largest in this section. B. P.

Seed Trade News.

AMERICAN SEED TRADE ASSOCIATION.

Pres., J. C. Robinson, Waterloo, Neb.; First Vice-pres., M. H. Duryea, New York; Sec'y and Treas., C. E. Kendel, Cleveland, O.

ALASKA peas of the 1909 crop will not go begging.

VISITED NEW YORK: Mr. Weise, representing David Sachs, Quedlinburg, Germany; Clarence Moore, Philadelphia.

CHARLES N. PAGE, of the Iowa Seed Co., Des Moines, with Mrs. Page, is in the California seed growing district, after a visit to the exposition at Seattle.

CROPS of beans in Michigan are looking well but need rain. It is almost impossible to make any estimate on pea crops. Some are good and some are bad.

THE Chesmore-Eastlake Mercantile Co., of St. Joseph, Mo., received July 28, from Hamburg, Germany, a shipment of 357 bags of alfalfa seed, weighing 55,000 pounds.

THE Iowa Seed Co., Des Moines, has a non-warranty suit on its hands, started July 24. A. A. Geil claims the seed was not the clover he ordered, in 1908, and that he thereby lost the crop on seven acres.

Word comes from Holland that this year, on account of the long winter, the work in the bulb district is so much behind that the bulb exports will begin at least one and a half or two weeks later than usual.

E. J. DEAL, general manager of W. W. Johnson & Son, Ltd., Boston, England, is at the Hotel Imperial, New York city, which will be his permanent address until September 29, on which date he sails for England. In the meantime he intends to visit the seed trade in the principal cities.

ON a recent Saturday a party of more than fifty British seedsmen and members of the National Sweet Pea Society visited the seed farms of Cooper, Taber & Co., at Witham; Wm. Deal, Kelvedon, and E. W. King & Co., Coggeshall, where sweet peas are a feature.

A. J. PIETERS, of Hollister, Cal., has issued a circular letter in defense of the officials of the Department of Agriculture who have charge of the congressional seed distribution. The REVIEW never has printed anything criticising the men whose duty it is to execute this behest of Congress and subscribes to all Mr. Pieters has to say of their personal worth.

REPORTS from the pea and bean section this week are no improvement over a week ago.

No blight has been reported as yet on the onion seed fields of the central states. A good crop may therefore be expected.

SOME blight is reported from the Michigan cucumber seed sections and the harvest will likely show a falling off on account of it.

A CHICAGO visitor this week is Otto Herold, of the Ontario Seed Co., Waterloo, Ont., who is visiting the principal seed sections getting a line on the latest ideas on this side of the border.

THE new tariff law goes into effect right in the midst of the season for the arrival of French bulbs, but before any of the Dutch stock has reached this country.

THE Chicago onion set crop is showing up better this week. The article being harvested is for the most part choice as to quality and so far the weather for pulling has been excellent. More than an average crop will, on the whole, be harvested, although some of the largest operators will harvest less than sixty per cent of what they seeded for. The smaller patches are the ones that will bring up the total. The onion set machine spoken of in last week's REVIEW showed up well

THE BARTELDES SEED CO.

DENVER, COLO.

Mention The Review when you write.

in the harvest test and when it has been perfected it will undoubtedly prove of considerable value.

H. W. Johnson, Philadelphia, is spending August at Cape May, N. J.

J. W. Jung, Randolph, Wis., has taken his brother, L. C. Jung, into the business. In future the firm will be known as the J. W. Jung Seed Co. The business was established three years ago. Next season the edition of the catalogue will be 10,000 copies.

W. W. Rawson & Co., Boston, issue a little monthly called "Plant Talk," for free distribution among their customers, and find it is well received. The July issue was largely devoted to the old-fashioned garden, with instructions on growing hardy perennials from seeds. Of course there was a list of varieties, with prices.

HARRISII BULBS.

The second considerable consignment of Harrisii bulbs reached New York July 26. The consignees and the number of cases each received were as follows:

Crossmond, D. & C.	556
Elliott, Wm. & Son	35
Henderson, P. & Co.	43
Kempe, James	10
Outerbridge, A. E. & Co.	68
Pierson, F. R. Co.	54
Vaughan's Seed Store	174
To order	900
Total	1,340

As previously reported in the Review, the boat arriving July 15 had 2,274 cases.

IMPORTS.

The imports of seed through the port of New York for the week ending July 24 were as follows:

Kind.	Pkgs.	Val.	Kind.	Pkgs.	Val.
Caraway	100	$1737	Hemp	453	$1582
Cardamom	108	3929	Mustard	41	497
Celery	33	406	Poppy	300	1512
Clover	500	9625	Rape	1	23
Coriander	516	1569	Other		2216
Grass	590	4486			

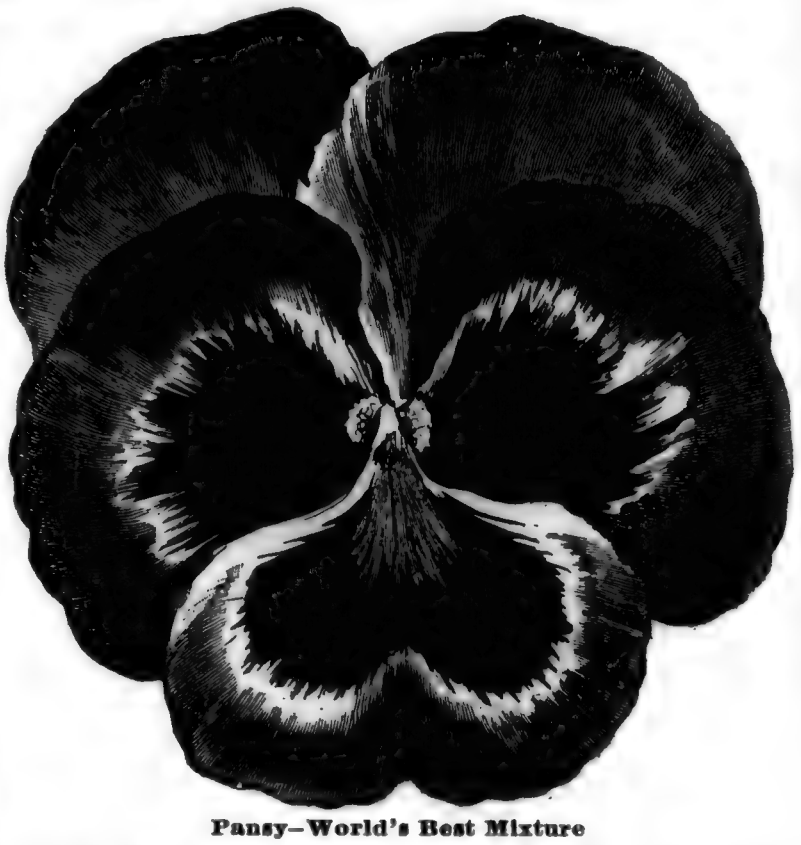
In the same period the imports of bulbs, trees and plants were valued at $1,667.

CALIFORNIA CROP CONDITIONS.

Writing under date of July 27, one of the leading growers in the Santa Clara valley of California expressed much satisfaction with the present condition of crops in that district, which he described as "very good." Continuing, he said:

"Of course, we cannot speak positively yet on most things, as we are now only harvesting, but the sweet peas give promise of a good crop, the radish of the best crop we have ever had in this section. The onion is fair; some sorts, as the whites, are rather light, while the reds and yellows are pretty good. Lettuce looks good now, but is only just blooming with us, so it is too early to predict. We find that Big Boston, especially, is subject to a blight that strikes it after the blossom comes. How much we shall suffer from that we cannot tell yet.

"Carrots with us are not very good, but we understand that the outlook is better in other parts of the state. Salsify is about all gathered, and, while not cleaned up yet, seems to be an average crop.



"On the whole, we expect to deliver all orders in full, with some minor exceptions, and consider that this has been a good year in spite of the wet winter."

PANSY

Famous Strains of Mammoth Mixed Pansies

S. & W. Co.'s Non Plus Ultra

Our Non Plus Ultra Pansy is a mixture containing the largest, handsomest, most perfect varieties ever sent out. The beautiful coloring and variety of marking give a bed of these pansies a most brilliant appearance. The seed having been saved from the greatest assortment of types, including only the best of Giant Cassiers, Bugnots, Trimardeaux and Giant English, French and German strains. Finest mixed, per trade pkt., 25c; per ¼ oz., $1.50; per oz., $5.00.

Pansy—World's Best Mixture

World's Best Mixture

This mixture is the result of careful selection, from the very largest and finest pansies, of all the varieties; and we can safely say that a better or finer strain it is impossible to get. Per trade pkt., 50c; per 1000 seeds, $1.25; per 5000 seeds, $5.00.

Very Large Flowering Varieties

These are remarkably large Pansies, which, for size of flowers and robust growth, eclipse all other strains. Their range of color has heretofore been limited, but this season we are able to offer several grand new varieties.

	Tr pkt.	¼ oz.	Oz.
S. & W. Co.'s Giant Purple Violet	$0.20	$0.50	$1.50
S. & W. Co.'s Giant Adonis, light blue	.25	.75	2.50

BEANS ARE BEANS.

The U. S. Board of General Appraisers decided, July 23, that beans are beans, and not seeds, as classified by the collector at the port of Los Angeles. The difference is that the duty was 45 cents per bushel instead of thirty per cent ad valorem.

The point was raised by an appeal by Johnson & Musser Seed Co., the question being whether seed beans were properly classified as seeds under paragraph 254, tariff act of 1897, or dutiable as beans

terest. At present the canners do not take a rosy view of the situation. The pea pack is short. Walter B. Timms, of New York, has just made a trip among the pea packers of New York, Michigan and Wisconsin, and had this to say:

"From my observations it looks safe to say that there will not be over sixty or seventy per cent of the crop which those who planted this year expected; the acreage was less than in some seasons, so this estimate is only on what was planted for canning purposes this year. The early rains and the later hot weather without moisture reduced the average of the crop, as to quality, to a considerable degree, and I would not be surprised if there might be a scarcity of the choicer grades and packs at the close of the season, with no surplus, but still sufficient of the cheaper grades available to fill the wants.

"There is a small carryover pea pack, and the present season must stand on the output of the 1909 pack."

ONION IN OHIO.

Last season the onion seed grown in small lots through the country, but especially in the middle west, was an important factor in the market, the preceding year having been marked by a decided shortage of many leading varieties. How an onion field going to seed looks in central Ohio is shown by the accompanying illustration, from a photograph made recently at the Columbus trial grounds of the Livingston Seed Co. There are four acres of Southport White Globe in this patch. These are from onion bulbs grown on the farm the year previous. At Kirkersville, in the next county east, the Livingston Co. has seven more acres of onions in three varieties, Ohio Yellow Globe, Brown Beauty and Southport Red Globe.

NEW TARIFF FRIDAY.

The fate which often overtakes "the best laid plans of mice and men" is well known, but the government expects to put the new tariff law in force Friday morning, August 6. It is to be acted on finally by the Senate at 2 p. m. today, August 5, and it is expected President Taft will sign the bill sometime tonight. It will go into effect immediately it receives his signature.

The rates in the sections affecting trade interests of seedsmen, florists and nurserymen are unchanged from the Senate schedule reported in the REVIEW at the time of their adoption by the upper house. They are as follows:

249. Beans, 45 cents per bushel of sixty pounds.

262. Seed peas, 40 cents per bushel of sixty pounds.

263. Orchids, palms, azaleas, and all other decorative or greenhouse plants and cut flowers, preserved or fresh, twenty-five per centum ad valorem; lily of the valley pips, tulips, narcissus, begonia and gloxinia bulbs, $1 per thousand; hyacinths, astilbe, dielytra and lily of the valley clumps, $2.50 per thousand; lily bulbs and calla bulbs, $5 per thousand; peony, Iris Kæmpferi or Germanica, canna, dahlia and amaryllis bulbs, $10 per thousand; all other bulbs, bulbous roots or corms which are cultivated for their flowers or foliage, 50 cents per thousand.

264. Stocks, cuttings or seedlings of Myrobolan plum, Mahaleb or Mazzard

SOW NOW

For early and winter flowering, our Tercentenary strains of **Sweet Peas**, pink, white, lavender. Per oz., 15c; per ¼ lb., 50c.

Lilium Harrisii

Now Ready for Delivery

Our first consignments have just reached us and we are now filling early orders. **Easter comes very early next year, March 27,** and a good many growers will have difficulty in getting Japan Longiflorum in flower in time, and there will be an extra demand for Harrisii in consequence.

In view of the fact that **crop is short,** we advise those who have not already placed orders to lose no time doing so. Last year we were not able to meet the demand for our selected Harrisii on late orders, so we urge customers to order without delay. At present we have a good supply still to offer, and will be able to take care of early orders, but there should be no delay in ordering, as there is sure to be a scarcity of good stock, especially in the large sizes.

We offer a selected stock of the original, true Harrisii for early forcing. These bulbs have been grown from the original pure Harrisii, and will be found splendid stock for early forcing, for which purpose Harrisii is so valuable. We have had the stock inspected and are assured it is almost absolutely pure and almost entirely free from disease. It is not stock picked up indiscriminately from different sources, but is grown from one stock, and will be found very superior to the ordinary Harrisii usually offered, both in regard to freedom from disease and purity, and not the late type now so often furnished.

6/7 inch bulbs, 350 to the case	**$ 6.00 per 100;**	**$ 55.00 per 1000**
7/9 inch bulbs, 200 to the case	**9.00 per 100;**	**85.00 per 1000**
9/11 inch bulbs, 100 to the case	**20.00 per 100;**	**180.00 per 1000**

Full case lots at 1000 rates.

Large Specimen Hydrangeas

In tubs and half barrels for July and August Flowering

We make a specialty of these plants, and have a grand lot in the finest possible condition. Our plants have never been so well budded as they are this season. Flowers are just beginning to show color.

Extra fine plants, in tubs, $3.00 each; very large specimens, in half barrels, $5.00 and $7.50 each.

DEFENDS THE MEN.

A. J. Pieters, of Hollister, Cal., has issued a circular letter, in which he defends the men who are in charge of the government seed distribution. Mr. Pieters was at one time a member of the staff of the Department of Agriculture and should have full knowledge of his subject. His circular is as follows:

"In several of the recent numbers of the trade journals letters and items have appeared that reflect on the manner in which the free seed distribution is being conducted by the Department of Agriculture. The writer of this holds no brief for the officials of the department and is convinced that they are well able to take care of themselves, but he does feel that someone ought to protest against these attacks on the men instead of on the measures. The writer has himself been engaged in this work and helped to establish some of the policies that have been followed ever since, and he knows whereof he speaks when he says that there is not a responsible official in the Bureau of Plant Industry who would not be glad to have the seed distribution done away with. Much more effort has been made by these men than the seedsmen know of to bring about this result. That they have not succeeded is not their fault, and that the distribution has grown since the work was turned over to this bureau is only the logical result of good administration.

"The trade should remember that these men have a hard problem to handle. On the one hand they have to get out the seed, and on the other they have a definite amount of money to use and the seeds must be secured within that appropriation. Mr. Landreth recently objected to the fact that the department had placed a growing contract and wanted to know why this seed could not have

been bought out of surplus. The policy of buying surplus is well fixed in the department and is carried out whenever surplus can be gotten. The writer himself lost an order last fall because another grower offered seeds in surplus that the writer wished to grow for the department. To wait till the next season, however, and take a chance on being able to get surplus would be the height of folly.

"The writer dislikes to see these attacks made when he knows that no more honest and conscientious set of men ever handled this work, and that if the seedsmen would inform themselves as to the facts they would not take the attitude they are taking. No good will come of this attitude. If the distribution is to be stopped, it must come by a gradual changing into other channels, and the writer feels sure that the department would welcome the coöperation of the trade in doing this. The trade ought to work with the officials, and not be pounding the men who really desire the best interests of the trade and are ready to help, so far as they can under the circumstances."

CATALOGUES RECEIVED.

Charles D. Ball, Philadelphia, Pa., palms and decorative plants; Mohican Peony Gardens, Sinking Spring, Pa., peonies; Wild Bros. Nursery Co., Sarcoxie, Mo., peonies, iris, and other plants, shrubs and trees; Rollins Steam Specialty & Valve Co., Chicago, Ill., Morehead steam traps, Simplex blow-off valves and Simplex pipe-joint clamps.

MEMPHIS, TENN.—According to a local newspaper, the Luehrmann hotel property, now under the control of the W. D. Roberts Building Co., "will not be abandoned to the owls and bats because of the predatory raid of prohibition which descended upon it July 1," but the first floor will be handsomely remodeled and one of the rooms will be used as a first-class flower store.

NEW ORLEANS.

A circular sent to the New Orleans florists by Charles Ebele, state vice-president of the Society of American Florists, reminds them of the approach of the convention, to be held this year in Cincinnati. New Orleans has been well represented at these conventions, considering the distance to these reunions, and it is to be hoped that some new members will be able to join.

F. B. Faessel is going into the real estate business, which, for one reason or another, lately has been taken up by several florists. He is building two double houses in the heart of the garden district, with the idea of selling his florists' establishment and giving his attention to different interests.

Charles Ebele is to move opposite his place on Baronne street, on the ground floor of the Grunewald hotel. His new location will be larger and well fitted up.

NURSERY NEWS.

AMERICAN ASSOCIATION OF NURSERYMEN.
Officers for 1909-10: Pres., F. H. Stannard, Ottawa, Kan.; Vice-Pres., W. P. Stark, Louisiana, Mo.; Sec'y., Geo. C. Seager, Rochester, N. Y.; Treas., C. L. Yates, Rochester, N. Y.

J. H. Dayton and T. B. Meehan are on a trip to the Pacific northwest.

Nurserymen will be interested in a portrait and sketch of John Charlton, on page 9 of this issue.

The completed tariff bill, in so far as it specially affects trade interests, will be found on page 40.

W. M. Simanton, formerly a nurseryman in Albany, N. Y., is now in Knoxville, Tenn., with the intention of entering into the nursery business there.

INSECTS ON ASH LEAVES.

I enclose some ash leaves which are covered with some insect or disease and which we are afraid will be injurious to the trees. Will you kindly inform me what it is, also the best remedy for it?

R. L.

The peculiar, warted-like appearance of the under surface of the leaves is due to an insect. The same trouble is common on some of the viburnums and is found on other trees and shrubs. It is not anything, however, of a serious nature. You may have none of it at all next year, but to make sure that your trees are clean I would recommend spraying them with a solution of arsenate of lead as soon as the leaves are unfolded, at the rate of four pounds to fifty gallons of water. Use a fine spray nozzle and wet the lower surface of the leaves thoroughly. This poison will not injure the foliage, is adhesive and will also protect the leaves from the attacks of any other pests, although leaf-eating insects do not seem to be partial to ash foliage.

W. N. C.

TREE AND SHRUB JOTTINGS.

Watering Recently Planted Stock.

The summer has been deficient in moisture over a considerable portion of the country, more particularly along the Atlantic seaboard, and while there were abundant rains during the planting season, many trees and shrubs are now suffering severely from drought. In the case of deciduous shrubs, if these were well pruned back at planting time, they will now have made good growths, which will be getting fairly well ripened, and dry root conditions now are less serious than would have been the case in June. When, however, leaves are wilting and even browning, it is poor policy to allow them to suffer from lack of water, as it simply means a reduced floral display next season and the weakening of the shrubs to such an extent as to make them more liable to winter-kill.

The Standard Mailing Tube

Do you do a mail order business? Would you like to be SURE your packages will arrive at destination after a long or short journey in PRIME condition? Would you like to cut down your postage bill by using the lightest possible mailing package, affording the greatest resistance to the crushing in a crowded mail sack? After two years of severe testing, the Standard Mailing Tube has proven beyond a question its efficiency and economy. If you send plants by mail, you cannot afford to be without it.

Full range of sizes and special sizes to order promptly. Samples on request.

When watering, never play the hose on the surface. It only bakes the soil and rarely soaks the roots. Use a draw hoe and draw away the earth from the stems so as to form a large saucer. Fill this up with water once or twice. After it soaks away, push back the dry soil and the plants will show almost immediate benefit.

Transplanting Evergreens.

Next to April and May, the middle to the end of August is the best time to transplant evergreens. It is unwise to attempt it if the soil is dry, but after a generous rainfall and particularly during cloudy days, with a light rain falling at intervals, most evergreens will move with perfect safety. The percentage of loss, so far as my experience goes, is no greater in August than in May, if due care is used in the work of removal. It is not a safe time of the year to have evergreens lifted, balled and shipped any considerable distance from nurseries, but where they can be lifted and planted the same day, well soaked with water, the soil thoroughly firmed about them and a mulch of strawy manure or partially decomposed leaves spread over the surface, few plants will fail to grow.

It is sometimes argued that August planting is inadvisable in the coldest states, as the trees or shrubs do not make sufficient root-hold before winter, and that the consequent mortality is greater. The reason so many evergreens die in winter is not because they have been recently removed, but because the roots are too dry. This is just as true of established as recently moved stock.

Even in the most severe winter the scorching of the foliage of evergreens and the heavy spring death roll can usually be traced to aridity of the soil. It pays to soak evergreens before freezing-up weather if the late fall is unusually dry, and if a good mulch were always kept on broad leaved evergreens, such as

rhododendrons, kalmias, andromedas, etc., we would hear much less of winter killing. All the last named evergreen flowering shrubs can be transplanted in August. I have had just as good success with this work then as in spring, always provided the planting is done with care, water furnished the roots and a mulch added.

Pavia Macrostachya.

The dwarf horse chestnut, as Pavia macrostachya is popularly named, is one of the finest of shrubs in late July. It comes in season when there is little in flower in the shrubbery, outside of a few rose species and Hydrangea arborescens and paniculata. A long belt of this in the Boston parkway system made a fine showing recently, being at its best July 22.

This pavia is often included under æsculus, with other chestnuts. The genus is named in honor of Peter Paiv, a Dutch botanist at Leyden in the seventeenth century. The flowers, which are white, are carried on long, erect racemes. Planted in large clumps on the lawn or near the edges of woodland, this pavia is handsome. It attains a height of ten to twelve feet, but grows rather slowly for a year or two after planting. There are red and rose colored forms, but they

are not by any means so good as the type.

Buddleia Variabilis Veitchiana.

Buddleia variabilis Veitchiana is one of the most beautiful of late flowering shrubs, as yet only met with to a limited extent in shrubberies. B. variabilis is one of Veitch's introductions from China, near the borders of Thibet, and caused quite a sensation when first shown in London. The variety Veitchiana is a big improvement over the type, having long clusters of rich, reddish violet flowers, which are sweetly scented. The foliage is in itself attractive, the leaves being lanceolate, a foot or more in length and suffused with a delicate pinkish white color. In severe winters this buddleia is cut down almost to the ground, but in ordinary winters it is little injured. Even when cut back, the plants break strongly from the base and flower abundantly in late summer. Some fine plants of this beautiful shrub are growing in the Boston park system, near Forest Hills station.

Baccharis Halimifolia.

The groundsel tree, as Baccharis halimifolia is popularly known, is a fine native shrub, specially adaptable for culture at the seashore and in salt marshes. It is most attractive in September, when its white, fluffy clusters of seed vessels appear, which in the distance look like masses of snow-white flowers. The plants grow six to ten feet high. The flowers and pappus are carried on large panicles. There are many other varieties of baccharis, mostly found in tropical America, but B. halimifolia is the only one of value to the planter.

Clethra Alnifolia.

Clethra Alnifolia is a common native shrub, found abundantly in woodlands from Maine to Florida, usually preferring considerable shade. It will grow well in the open, especially near the edges of ponds, but will also succeed in quite dry locations, where, however, in hot weather red spider will frequently disfigure the foliage. The sweet pepperbush flowers in late summer, when few shrubs are in season. It looks well massed and is specially adaptable for naturalizing in rather moist woodlands, making an ideal cover plant. It is not generally known how pretty a plant it is when forced, its white, fragrant, erect racemes being quite striking. C.

Now is the time to sell your surplus of field grown carnation plants. Don't wait until everybody's wants are supplied before you offer your stock.

Vegetable Forcing.

PRIZE TAKER ONION SETS.

Will Prize Taker onion seed, sown this year for sets, continue to enlarge if set out next spring, or will they go to seed? Or, if I sow seed this fall in the open ground, would they stand the winter here, in the state of Washington, and make large onions the next year, or would they go to seed? I would like to have some onions that would continue for the second year. C. J. J.

Prize Taker onion sets grown from seed this year will, if planted next year, continue to enlarge and make a big onion, provided the sets are not larger than three-fourths of an inch in diameter. A set of any onion will be likely to run to seed if the set is more than an inch in diameter, but as long as it is less than an inch it will produce a bulb and will not run to seed.

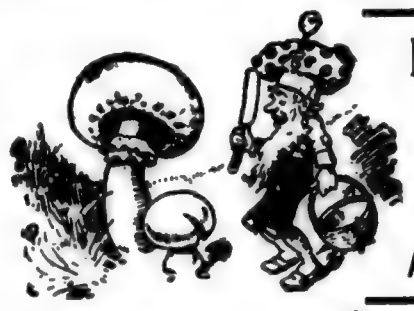
In the climate of Washington, it is likely that Prize Taker onion seed will successfully make an onion if planted in the fall and allowed to winter over. A better plan, perhaps, would be to plant the seeds early in a hotbed in the spring and transplant them to where the onions are to grow. The successful Prize Taker onion growers of this locality do this, and have good results from it. If the young plants are transplanted, they will in all cases proceed to make a bulb, provided they are not too large. The growers here who pursue this method understand just how large the small plants should be. Weather conditions have a considerable effect, and it may be that the conditions in the state of Washington would be different from those in Illinois. I should judge, however, that onions can be grown in Washington either from sets or from transplanted shoots, if the restrictions I have named in each case are looked out for. J. M. C.

PACIFIC COAST.

PORTLAND, ORE.

The Market.

Business conditions for the last fortnight have been rather quiet. The ravages of summer are to be seen on all sides and the retail stores present a semi-holiday appearance. The relaxation gives florists a chance to take account of stock and round up a few of the slow accounts which are often overlooked in the busy season. Asters are plentiful and of fine quality, which helps to fill the gap. Carnations are gradually declining in quality, but not in popularity, which is sustained at all times. Roses are plentiful and move fairly well; Carnot and Kaiserin are the choicest for summer culture. Richmond is used a great deal for metallizing purposes; it has more vitality, and withstands the process better. Metallizing is quite an industry. When properly processed the rose is produced in perfect form and coloring. Gladioli are filling in slowly, and are not unwelcomed visitors. Gypsophila is plentiful and makes an attractive decorative appearance. Lilium longiflorum is plentiful and of fine quality, moving well before the multitude of flowers.



A.-Y.-P. Exposition.

Your scribe spent a few days last week in Seattle, sightseeing and calling on the retail trade, who were especially courteous in every respect. The usual summer dullness prevails everywhere, but is not unexpected by the broad-minded business man. The A.-Y.-P. Exposition is a well arranged affair. Flowers are everywhere. The grounds are artistic, grouped in a beautiful color scheme throughout. Pansies, Shasta daisies and geraniums predominate. The Pay Streak is especially attractive. Wrestling matches are a particular feature at the arena, and in the front ranks may be seen several of the Avenue florists. As a whole the exposition is a credit to the progressive city of Seattle.

Various Notes.

W. J. Williams, of Clarke Bros., is off for a week's recreation, visiting Seattle and other points of interest along the Sound.

L. A. Boisk, formerly with Poehlmann Bros. Co., Chicago, was a recent caller. He is considering buying a ranch near

Hood River and going into the apple raising business.

R. C. Cook, 107 Fourth street, recently returned from Hot Springs, Ark., much improved in health, as was evidenced by his avoirdupois.

Mrs. G. A. Harding, of Oregon City, Ore., is adding considerable glass to her present establishment. She is president of the Oregon City Rose Club and is one of the kind who bring results.

Felix Verhoeven, of Forest Grove, Ore., has recently entered the real estate business and sold his range to Danser Bros., who will continue the same as a retail place.

S. H. Forshaw and family, of Pendleton, Ore., are spending some time in the city. Mr. Forshaw reports business very quiet, with an occasional funeral order to break the monotony.

A. M. Barnett, of Centralia, Wash., was a recent inquirer for carnation stock, to replace the Lawson, which is gradually deteriorating.

Jas. McHutchison, of McHutchison & Co., New York, who called on the trade this week, in the interest of the nursery business, reports trade conditions beyond expectations.

Thos. Meehan, of Dreshertown, Pa., and J. H. Dayton, of Storrs & Harrison Co., Painesville, O., stopped over a few days sightseeing and calling on the local florists. E. R. C.

SAN FRANCISCO.

The Market.

The month of July, from the standpoint of receipts, has been one of the poorest in the history of the local trade. Flowers of all kinds, with the exception of fancy roses, continue to be a glut on the market, and as far as prices are concerned, it seems to be ridiculous to quote them. The month of July is usually our poorest time, but this year has proven to be a "corker" in the amount of business that did not materialize.

In a general way, the depression which has affected all lines of trade is to blame, but to be more specific, the badly divided neighborhoods devoted to retail shopping have so demoralized the old landmarks that the florists have not as yet been able to direct any appreciable flow of trade to any particular locality. We are in the midst of San Francisco's rebuilding, and new dividing lines will have to be drawn before the best locations can be assured. All the principal stores are now located well down in the newer parts of town, in the immediate vicinity of the larger dry goods houses. As this has all happened within the past few months, and at that time of the year when business is very quiet anyhow, it is but to be expected it will be some time before the flower buying public will get well acquainted with the new locations and act accordingly.

The retailers have shown an unbounded faith in the revival of trade, and a majority have secured long leases at big rentals. It is held by many that the business done for a long time to come will not justify the prices asked for the different locations, and the gameness of the store men has been at once the admiration and surprise of wholesalers and others.

At none of the principal stores is there any lack of enthusiasm nor any idea that the coming of the fall trade will not fully justify the expenditures spoken of. The whole-souled way the florists have made preparations for business shows that there is no yellow streak in the San Francisco brethren.

Various Notes.

James Forbes, of the Martin J. Forbes Co., of Portland, Ore., is in town for a few days.

George Harbert, representing the Chas. H. Lilly Co., of Seattle, Wash., is interviewing the local merchants in the interests of his firm.

Arthur Zirkman, of M. Rice & Co., of Philadelphia, arrived in town over the Central & Northern route. He reports trade ahead of that of last season.

Frank Shibeley, of the Shibeley-Mann Co., has returned from a trip through Oregon and Washington.

Henry Ruehl, of San Jose, has returned from a trip to the Seattle exposition.

John Maxwell, the Napa nurseryman, was the only delegate from California present at the Pacific Coast Nurserymen's Convention, held at Seattle in July. G.

ROCKVILLE, CONN.—Calverly & Risley, in Citizens' block, have purchased Colt acetylene gas generators, and will install their own lighting plant.

WASHINGTON.

The Washington Florists' Club, their families, employees and friends, had the annual outing on the afternoon of July 29.

Great Falls was the chosen place for the outing and it took two special cars to carry the crowd. Both cars were elaborately decorated with cut flowers, vines and American flags.

The committee in charge consisted of Geo. C. Shaffer, Edward Schmidt and M. Mayberry. They arranged a program of sports, the principal feature of which was a tug-of-war between the growers and retailers.

Retail stores and greenhouses were closed at noon, so that all employees could have a chance to go to the falls.

NEW BEDFORD, MASS.

The Market.

Except for funeral work, there is practically nothing doing. There is a slight demand for bouquets and mixed bunches for graves. Outside of these calls the usual summer dullness prevails. What few carnations are coming in, are poor. They retail at 35 cents per dozen. Asters are now the main support at 35 cents per dozen retail. Sweet peas are abundant; 25 and 50 cents per 100 blooms is the retail price; they sell well put up in 5 and 10-cent bunches. Other outdoor flowers are in abundance. Not many of the florists care to handle roses just now, as they are so poor. Lily of the valley sells at 75 cents and $1 per dozen, retail. Rain is badly needed. Stock in the field is at a standstill, frequent hoeing being the only remedy just now.

Various Notes.

E. H. Chamberlain is receiving some nice Queen of the Market asters in all colors.

Lawns around here are all burning up. Forest fires are numerous, too.

Wm. Livesey is busy shipping smilax to the trade.

Mum stock is looking fairly well. Many florists are getting ready to start planting in the houses.

The north end of the city is the place chosen by the local horticultural society for the annual flower show, to be held this year in September. Lack of interest shown is the reason given for not having it in the center of the city.

The way things look now, dahlias will make but a poor showing, owing to the dry spell. Warm weather prevails.

PITTSBURG.

The Market.

Well, it was a midsummer week, and it was all you could expect. I do not know that it was the hot weather's fault, for the last week in July is always one of the worst, but business was almost at a standstill.

There are some fine roses, Killarney and White Killarney, Kaiserin and My Maryland almost up to winter quality, with good Beauties and lilies, but the market is flooded with gladioli and asters, and there is no price on anything.

The wholesale houses are all short-handed on account of vacations, and those left behind are working full time trying to handle the gladioli and asters that are swamping them. Many of the asters coming in are poor and will hardly pay the express charges.

The market and street stands are doing most of the business that is being done, but they are compelled to sell at prices which bring them little profit for the quantity of stock they handle.

Various Notes.

Fred Burki says this is to be the finest convention ever held by the S. A. F. and is advising everyone he meets not to miss it, as this city expects to send a good delegation.

The Pittsburg Cut Flower Co. is getting good roses, also some fine yellow chrysanthemums.

The Pittsburg Florists' Exchange might be called gladiolus headquarters, from the quantity they are receiving.

J. B. Murdoch & Co. are getting in some good carnations for such hot weather.

The McCallum Co. is showing good summer Beauties.

John Madden, of H. L. Blind & Bros., is on a two weeks' vacation at Ligonier. W. Paul and family, from the same shop, have just returned from Mingo, O., where they spent two weeks.

Geo. Marshall, of the Pittsburg Cut Flower Co., is at Atlantic City and if some one does not head him off he will go broke on comic postals, for he is flooding the town. Hoo-Hoo.

PHILADELPHIA, PA.—William J. Smith has secured a building permit for five greenhouses, two 10x87 feet and three 16x80 feet, at 4735 H street.

Florists' Review
When Writing Advertisers

LEXINGTON, KY.

The Market.

The usual summer quietness prevails, there being little except an occasional design to interrupt our day dreams. Stock in roses is limited, and those coming in are of the most ordinary variety. Asters are arriving in limited quantities, and other outdoor stock is plentiful enough to fill all orders.

Most of the growers here have all their carnations benched, and the stock is looking well. Some of the growers are cutting Lilium auratum and speciosum, which are used for designing and decorating. Sweet peas are about done for this season. What few are left are of poor quality, with short stems.

We are still having warm weather and plenty of rain.

Various Notes.

James Murray, one of the veteran florists and landscape gardeners of this city, died at the Good Samaritan hospital last week, of paralysis, after an illness of scarcely a week. His wife died last November, and he has been in feeble health for some time. He leaves no family and has no relatives in this country. A sister, Mrs. Jessie Bolson, lives in Carlisle, England. Mr. Murray was born in Annan, Dumfriesshire, Scotland, in 1848, and came to America at the age of 25 years. He had lived in this city during practically all of the years of his life in this country. For many years he was an assistant to Superintendent Bell, at the Lexington cemetery, and later was gardener and florist at the State College, which position he held until a year or two ago. He was an exceptionally competent man, and had many friends among those for whom he worked from time to time. Funeral services were held at the cemetery chapel, Friday, July 30, conducted by Rev. Morris, of Centenary M. E. church, and the body was laid to rest under the shade of the trees he had helped to plant and care for in his earlier days.

The Michler Bros. Co. is just beginning the erection of a greenhouse, 20x 100, which will be used for carnations.

A carnation house, 28x200 is also being erected at the J. A. Keller estate.

Blue Grass.

Omaha, Neb. — The members of the Omaha Florists' Club picnicked at Manawa July 29, afternoon and evening. L. Henderson, president of the club, Oscar Herman, George Sorensen and J. J. Hess, secretary, composed the committee on arrangements. On account of the picnic all florists' establishments were closed during the afternoon.

Ferns in Flats

Ready for delivery after July 15

Each flat contains 100 clumps of small plants which can be divided in 3 to 5 plants accordingly, all ready for potting.

We can furnish these ferns grown separately, each flat containing any one of the following sorts, ferns all good salable varieties:

Aspidium tsussimense,
Cyrtomium falcatum,
Pteris adiantoides,
cretica alba lineata,
cretica magnifica,
hastata,
Mayi,
Gilberti,
serrulata,
serrulata cristata,
serrulata variegata,
Wimsetti,
Mixed Varieties.

Price, $2.00 per flat.

FERNS IN FLATS.

KENTIA, 2¼-in. pots, $9.00 per 100, $75.00 per 1000. **COCOS,** 2¼-in. pots, $9.00 per 100, $75.00 per 1000.

Begonia Gloire de Lorraine We are headquarters for this sterling plant.

This is decidedly one of the most beautiful and profitable plants introduced in many years. It attains a height of 15 to 18 inches, bears pea green foliage and is fairly smothered with a profusion of soft pink flowers. It is naturally of a compact, bushy form, and blossoms continuously from October to April, making an ideal plant for Christmas decoration. No establishment, large or small, is complete without this begonia.

From 2½-inch pots, for delivery at once. Doz., $2.00; 100, $15.00; 1000, $140.00.

Stumpp & Walter Co. 50 Barclay St. New York

Lager & Hurrell, Summit, N. J.

DETROIT.

The Market.

Business remains good. Were it not for this fact some stock would be going to waste. As it is, there is enough to go around. A number of weddings are claiming the florists' attention, even though it is midsummer. Asters are still backward; the few good flowers arriving are soon picked up. Carnations are about forgotten. Roses are small of flower.

Club Meeting.

At the last meeting of the club, officers for the ensuing year were elected. The election was one of the most spirited which has been held in years and resulted in an entirely new set of men at the helm, with the exception of the office of librarian, to which Harry Pickworth was again elected.

The new officers are: President, Chas. Plumb, a charter member; vice-president, George E. Brown, of Greenfield; secretary, Hugo Schroeter; treasurer, Robert Rahaley.

The retiring officers, W. B. Brown, Gus H. Taepke and J. F. Sullivan, had served most acceptably but declined to run again. It was the willingness of other members to sacrifice themselves for the good of the cause that added zest to the election. There were three or four candidates for every office.

Members were earnestly urged to attend the convention at Cincinnati, which, it was explained, is to be the greatest ever.

The club meeting for August 16 was called off on account of the S. A. F. convention at Cincinnati that week.

The annual outing of the club takes place at Bois Blanc park August 9. Many interesting athletic events have been arranged, with good prizes for the winners of every event.

Various Notes.

Mr. and Mrs. Vesey, of Fort Wayne, stopped off at Detroit last week en route to northern Michigan, where several weeks will be spent in fishing.

The Ladies' S. A. F. will make its headquarters at Hotel Sinton while in Cincinnati. A reception will probably be held sometime during the week.

The Michigan Cut Flower Exchange has fitted out a large room in which to display its extensive line of baskets, vases, cutlery, etc. The decorating was done by Albert Sylvester, one of their men, and looks as though it were the work of a professional.

The Detroit delegation will leave for Cincinnati August 16. H. S.

Claverack, N. Y.—Peter W. Ham, formerly of Hudson, N. Y., has moved his violet house to this place.

Billings, Mont.—William Partington a few weeks ago started the construction of what he intends will eventually be the largest greenhouse plant in eastern Montana. The first structure is 35x140 feet, entirely of glass, supported by a framework of steel, and is located at Twenty-ninth street and Sixth avenue north. Hot water heating from a central heating plant across the street will be used. Mr. Partington will construct five other houses, on vacant lots around the new plant, as soon as business justifies it. He already has six large hothouses on his ranch near here, where vegetables of all kinds are raised.

Godfrey Aschmann, the Araucaria King

Is More Active than Ever

Four Houses Filled with the Best. With What? Sure, with ARAUCARIAS, His Specialty

Empty houses! That won't do. What shall I plant? What is the most profitable? Listen to what your neighbor florist has to say. Mr. McGinty to George Know Nothing: "I filled a reasonable portion of my greenhouses last year with Godfrey Aschmann's Araucarias, and I tell you straight out I was only sorry I did not buy more. In two weeks, just when the demand was the biggest, my stock was nearly exhausted. This year I shall be smarter. Last week my order to Aschmann called for just double the amount. I never can lose anything on such an investment as that. Every dollar put in Araucarias yields three to four times the value while we're asleep."

We are one of the largest importers of these well-known and beautiful evergreen decorative plants, the **Araucaria Robusta Compacta, Excelsa Glauca and Excelsa.**

Florists should bear in mind that no home, garden, lawn, etc., is complete without the Araucaria; therefore, if you wish to make money, recommend the Araucaria to your customers. Introduce this noble plant to your trade. We give you a special price, and it will pay you to handle them.

Araucaria Robusta Compacta, Glauca and Excelsa. Our reputation of being one of the largest importers and shippers of this beautiful evergreen decorative plant is so well known, dating far back into the 19th century, that our name, as well as the Araucaria itself, shall never die out, and is still fresh in people's minds, same as when we first started. Why the Araucaria is so popular is because it is an ancient plant, kept by Greeks and Romans as a special favorite in their household, as a good omen.

Araucaria Robusta Compacta and Excelsa Glauca, new importation, 3 tiers, 3-year-old, $1.00, $1.25 and $1.50.

Araucaria Robusta Compacta, specimen plants, 7 to 8-in. pots, 4 to 5 years old, 3, 4 and 5 tiers, 20, 25 and 30 inches high, same in width, $1.50, $1.75, $2.00, $2.50 to $3.00 each.

Araucaria Excelsa Glauca. This is a beautiful blue variety, very graceful and beautiful. Specimen plants, 6-in., 7-in., 8-in. pots, 4 and 5 years old, 4, 5 and 6 tiers, 20, 25, 30 and 32 in. high, same in width, $1.50, $1.75, $2.00, $2.50 to $3.00 each.

Araucaria Excelsa, 3, 4 and 5 years old, 4, 5, 6 and 7 tiers, 6-in. pots, 20, 25, 30 and 35 in. high, an Elephant for only 75c; a Jumbo for $1.00 and a Holy Terror for $1.25 to $1.50.

Araucaria Excelsa, April (1909) importation, 2 to 3-year-old plants, 5, 5½ to 6 in. pots, 3, 4 and 5 tiers, 12, 14, 16 to 18 in. high, 35c, 40c, 50c, 60c to 75c.

Sago Palm, or Cycas Revoluta, 5½, 6, 7 and 8-in. pots, from 5 to 20 leaves to a plant, 10c per leaf.

Kentia Belmoreana, 4-in., 18c, 20c to 25c; 6 to 7-in., 6 good leaves, 75c, $1.00, $1.25 to $1.50.

Kentia Forsteriana, 8-in. pots, made up, 1 large, 4 ft. high in center, with 3 small around, price $4.00; single plants, 6 to 7-in. pots, 30, 35, 40 to 48 in. high, $2.00, $2.50 to $3.00.

Areca Lutescens, 4-in., made up of 3 plants, 25c.

Cocos Weddelliana, 3½-in., 18 to 20 in. high, 20c to 25c; 3-in., 15 in. high, 18c.

Ferns. Nephrolepis Whitmani, Todeaoides and Boston, 5, 5½ and 6-in. pots, 35c, 40c, 50c. Whitmani, large, 4-in. pots, fit for 6-in., 25c.

Adiantum Hybridum, very valuable for cutting, 6-in. pots, 25c, 35c, 50c.

Asparagus Plumosus Nanus. 2½-in. pots, $3.00 per 100; 4-in. pots, $10 00 per 100.

Asparagus Sprengeri. 2½-in. pots, $3.00 per 100.

Dish Ferns. Best assortment, 2½-in. pots, $3.00 per 100.

Jerusalem Cherries. We offer the best, new improved variety, already laden with large, orange-colored berries, 2½-in. pots, $5 00 per 100.

Begonia Gloire de Lorraine a specialty; also own new improved strain, introduced last Xmas is still well in the minds of florists. We have both the deep pink and the light pink variety (Lonsdale), 4-in. pots, 30c.

Scarlet Sage. 4-in. pots, $6.00 per 100.

All goods must travel at purchaser's risk. Cash with order, please.

Please state if you want stock shipped in or out of pots.

GERANIUMS

Do geraniums deteriorate? is a question often asked us, when customers see how free our geraniums bloom, and we answer, "Yes, without a doubt, under some conditions." Take, for instance, the man who grows for market and carries over his own stock; will he not invariably sell his best plants every spring and save the poor ones for stock, doing this time after time? Then, does it not stand to reason that his stock will rapidly deteriorate? That is one of the reasons why we contend that it is better to sell out and buy new plants that have been propagated from selected stock. We have been selecting our stock for a number of years, always trying to improve it, until now it represents the highest type of perfection in all the best Standard Sorts. Let us give you prices for your next season's supply; we have an immense stock.

For immediate shipment we offer 1000 in 20 varieties, from 2-in. pots, for $18.50; from 3-in. pots, $25.00. Cash with order.

SALVIAS.

Salvias, fine plants, 2¼-in., 1c. Must have room. Hammerschmidt & Clark, Medina, Ohio.

SEEDS.

COBURN'S SELECTED PANSY SEED.
BEST MARKET STRAIN GROWN.

Our seed is saved from about 12,000 plants, carefully selected, when in bloom, from the 500,000 we grow for our spring sales.

Each plant is carefully selected, color, size, form and substance being taken into consideration, and the proportion of each color is properly balanced.

As a result of over 25 years' work along these lines, we feel justified in claiming to have the best strain of pansies on the market, and we invite trial and comparison.

Growing our stock in this manner, we have only a limited amount of seed to spare, and in order to distribute as widely as possible, we offer it in packets of 1,000 seeds. Price $1.00 per packet (only one to each customer).
I. E. COBURN, 291 Ferry St., Everett, Mass.

BUCKBEE'S "FULL OF LIFE" PANSY SEED.

New crop now ready, our MAMMOTH SUN RISE STRAIN unsurpassed for size, perfect form, rich colors and beautiful markings; the very finest gilt-edged stock for particular growers who want the best. 1000 seeds, 75c; ½ oz., $3.00; oz., $5.00. Giant Mme. Perret, rich wine and red shades, 1000 seeds, 50c; ½ oz., $1.75; oz., $3.00. Giant White, improved strain, 1000 seeds, 40c; ½ oz., $1.25; oz., $2.00. Improved Giant Yellow, dark center, 1000 seeds, 30c; ½ oz., $1.15; oz., $1.90. Improved Giant Black Prince, 1000 seeds, 35c; ½ oz., $1.20; oz., $2.00. Prompt shipment. Cash with order.
H. W. BUCKBEE,
Rockford Seed Farms, Rockford, Ill.

Greenhouse Heating.

A PLANT HOUSE.

I am building another house, 15x26, for odd plants, and shall have three beds, a 2½-foot one on each side and one in the center. The house measures about ten feet to the ridge and four and a half feet to the gutters. How many feet of 2-inch pipes should I use, and where should I put them? I am located in New Hampshire. H. G. S.

The best way to heat your house is by eight lines of pipes working in pairs, one flow and one return counting as two pipes. Put these in the walks on the sides of the beds. You will have a flow and return on each side of each bed. You will need about 225 feet of 2-inch pipe. G. T. E.

FOUR CONNECTED HOUSES.

Will you kindly inform me how many runs of 2-inch pipe will be required to heat to 50 degrees, in zero weather, a range of four connected, even-span houses, each house being 14½x150 feet and six and one-half feet to the gutters? I intend heating the houses with steam, carrying about twenty pounds. I am located in Michigan. C. D. L.

Two-inch pipe for heating by steam is, I think, too large, and creates too much heat in one place; 1¼-inch pipe is the size preferred in most places where a steam system is used. Six pipes in each house will be a little more than needed, but it is better to have a little more, rather than a little less. Put these under the edge of the benches. Put three extra pipes on the outside walls and a pipe under each gutter. Run a 4-inch main across the end of the houses next to the boiler house, and a return across the farther end. Put the 2-inch return pipe in tile pipe in the ground, sloping back to the boiler six inches in the length of the house. Keep the main pipe on a level with the grade of the houses and the return the same. Drop the boiler down in a pit, so that the water line in the boiler will be four feet below the point where the return enters the boiler room. Put on a tee where the return turns down, and run a pipe out of the top so as to make a siphon. Put on a valve where you can reach it. This is a vent pipe to let the air out of the system when starting steam. This is a gravity system, and will heat the houses on five pounds in zero weather. G. T. E.

THREE HOUSES AND A LEAN-TO.

I have a greenhouse plant of the general dimensions as described below, and would like to know the proper way to pipe it; also the size of boiler necessary in order to get a temperature of at least 60 degrees in zero weather, in this Long Island climate. There are three houses, running east and west, and a lean-to running north and south. House No. 1 is 14x75 feet, four feet six inches to the gutter on the south side, five feet to the gutter on the north side and nine feet to the gable. Houses No. 2 and 3 are even-span houses, 16x75 feet, ten feet to the gable and five feet to the gutter. There is no glass in the side walls. The potting shed, 14x15, is on the east end of house No. 1. The boiler pit, 12x13 and seven feet high, is under the potting shed. The lean-to runs north from the potting shed, and is 15x33 feet, ten feet to the highest point and five feet to the gutter plate. The houses each contain two side benches and one center bench. J. T. L.

I understand by your letter that the system is to be hot water. In that case, the following is the best way to heat the range: The heating pipes are to be 2-inch wrought iron. House No. 1 should have ten pipes, with this arrangement: Two under the bench next to house No. 2, four under the center bench and four under the outside bench. There should be a pitch up from the boiler to the far end and back, calling two pipes a circulation. In houses No. 2 and 3 run four pipes under each bench. Connect the pipes in pairs, so that you have two returns and two flows under each bench. Run a 5-inch flow pipe across the end next to the boiler room, as high as convenient, and run a 5-inch return pipe under the flow and about two feet below it. The lean-to should have four circulations, or eight pipes. G. T. E.

FROM STEAM TO HOT WATER.

I have three houses, 22x60, ten feet to the ridge and four feet to the eaves. The houses are three-quarter span, and are located in Indiana. I have steam heat, and would like to change to hot water. I have a sectional boiler, for either steam or water.

There is a 5-inch pipe leading from the boiler to the houses, a 4-inch pipe running crosswise through the three houses, and a 3-inch flow running under

WILKS HOT WATER BOILERS

S. WILKS MFG. CO., 3523 Shields Ave., Chicago

Mention The Review when you write.

each eave, with eight 1¼-inch pipes for returns. Could I arrange for hot water by adding more pipes, or would the system have to be changed altogether? If so, how would I do it? A. H. M.

Your system would work with the same arrangement of pipes as you have now, but you would need a circulator to push the water through the 1¼-inch pipe, as the resistance is great and the water would be cold at the return end. You would also require about half as many pipes more than you have now.
G. T. E.

CINCINNATI.

The Market.

We have been favored with many showers during the last week, and now we are undoubtedly coming into a period of ideal summer weather, neither too warm nor too cool. Business continues to be fair. Last week started out a little quiet, but finished up with a first-class demand. American Beauties headed the list, as they were the best flowers to be had. Asters were in good demand most of the time, and sold out well. Short roses are much in evidence, and sell at a low figure. There are not many carnations now. Gladioli are coming strong, but the prospects are there will be a let-up in them soon, and perhaps we will then be able to get somewhere near what they are worth. Lilies are good property, and there is not an oversupply of them.

The S. A. F. Convention.

Two weeks more, and the time for the gathering of the hosts will have arrived. The S. A. F. convention is approaching rapidly. The local committees will not have many more meetings before the fruits of their labor will be harvested. Everything appears to be in the best possible shape. Quite a few of the local boys are away now, but they will all be back in time to put the final touches on their work and to see that everything moves off smoothly.

Wm. Gardener, chairman of the shoot-

ing contest, has his end of it in good shape. The contests will be pulled off at the Northern Kentucky Gun Club, located at Dayton, Ky. This club is ideally equipped for the contest, and everything is of the best. Mr. Gardener has prepared a surprise in the way of an exhibition of fine shooting by a young lady who is a member of the gun club and one of the best lady shots in this country. This event will be a great drawing card for the shooting contests, and we are looking for a good crowd to be present.

There is not much more to say at present that has not been said before. The one thing of most importance is to impress upon everyone how anxious we are to have them be with us commencing August 17. Preparations are being made to give you as good a time as possible; besides that, we are promising you a series of meetings of the national society that will be the most interesting and instructive that have ever been held. At the same time, don't forget the trade exhibit. This alone will pay any progressive florist for what little time and money it costs him to attend the convention. The trade exhibit is going to be a great one this year, and any florist who does not pick up enough ideas, from what he sees there, to more than pay him, surely needs to visit an oculist. So come one and all, and we will do our best to make you more than welcome.

C. J. Ohmer.

NOTES ALONG THE HUDSON.

H. J. Osterhoudt, of New Hamburg, superintendent of the W. P. Clyde estate, has a splendid collection of dahlias that are the pride of the Hudson valley and has done much to make this flower so peculiar to this locality. A large exhibit will be made, at the annual dahlia show, held at Wappinger's Falls, at which competition is very keen.

W. A. Hart, of East Walden, is a close second, growing thousands of the leading varieties for a New York seed house.

Laub & Wilson, at Hughsonville, have carnations and violets in fine shape; the drought is causing the plants to make a stockier growth. They irrigate when necessary. Young smilax is very healthy. Large numbers are sold every season.

Wood Bros., of Fishkill, are having a time to supply Kaiserin, owing to the extreme heat. Blooms are soft. They do a large shipping trade solely through advertising. "Lou" Wood expressed himself as well satisfied with results from their ad in the Review.

Joseph Wood, of Spring Valley, is the first with asters for the New York market. There is something in the soil here which gives plants unusual vigor, with size of bloom. Smilax and lilies are specialties.

Conrad Gindra, of Poughkeepsie, has finished part of his new plant and when completed, next season, will have one of the show places in the valley.

Murphy & Schaumbaum report a most satisfactory seed business. They have a good combination trade, being on the main business thoroughfare.

Saltford Flower Shop folks are busy putting their elegant store in shape for fall, when the Vassar girls will be looking for the best flowers to be had. These are raised by the veteran founders of the business at their up-to-date plant, situated within easy reach of the store.

R. W. Allen, at Hudson, says the crowd may look for him at the convention. He is busy shaping things up and feels he deserves a rest and change. He is assured of both at the Queen City, which is so fortunate as to welcome the big delegation promised from this vicinity.

Henry Hansen, of Catskill, intends going to the convention. He says it is many years since he tasted of western hospitality, but is assured the trip will repay him in every way. He has a fine place, covering four city blocks.

Valentine Burgevin's Sons, of Kingston, will make a team that will show our western craftsmen the sort of material that has sprung up on the borders of our American Rhine. Hendrick Hudson landed here when on his famous voyage of discovery and some claim he built a greenhouse. Anyhow here is the oldest

and also most up-to-date range of glass to be seen within one hundred miles.

Wm. Williams is a later arrival and being on Broadway, caters to a select class of trade, which is constantly increasing.

It is uncertain how many will attend the convention from Newburgh, although at the last moment quite a number may go, as it would be hard to find a jollier crowd to travel with.

There is a possibility of forming a Florists' Club in Newburgh in the fall. The Hudson-Fulton celebration promises big things for this city, as Newburgh will entertain the chief officials for one week. A sum of money has been set aside for decorations and Artist Peattie, of the Yuess Gardens Co., is at work on some original designs for the occasion.

Percy Herbert is foreman at the greenhouses. He was a neighbor of Chas. Totty, of Madison, for some years and is also an enthusiast on mums. Golden Glow he considers the best early yellow yet

F. K. Lamereaux, of Port Jervis, who is taking life easy at Atlantic City, says it is a great place to forget dull care, especially after a prosperous season, such as he has had. M.

WHEATON, ILL.

On Wednesday evening, July 28, near the hour of midnight, one of the buildings at E. T. Wanzer's establishment was destroyed by fire. The building measured 20x120, and contained the work room, boiler room, cut flower room, coal shed, etc. The fire seems to have originated, in some unaccountable way, in the work room, and had gained considerable headway before it was discovered. By starting the engine, so as to obtain high pressure, a stream of water was brought to bear on the flames, but soon a faucet was melted off, and this equipment was thus disabled.

There were 160 tons of coal in the bins, and there was apparently no hope of saving it. When it was discovered, however, that the pump was still in working order, a six horse-power traction engine was brought on the scene, a temporary water line was arranged, some lines of greenhouse hose were attached and the fire was gradually subdued. In the afternoon the plants, or such of them as had escaped destruction, also received a little of the precious water. The main range of greenhouses was only slightly damaged. The men on the place, as well as the neighbors, gave heroic aid in fighting the flames.

The Challenge Co., of Batavia, Ill., was at once communicated with, the old boiler was removed, and a new boiler was on the premises, ready for installation, on the following Saturday morning.

Mr. Wanzer himself was not present at the time of the fire, as he had gone to Pentwater, Mich., to spend a week with his family, whom he expected to bring home August 1.

To the man who needs a Boiler

THE KROESCHELL BOILER

was installed to heat over six million (6,000,000) square feet of glass during the past three years.

Expressions from the men who know:

Used steam; was advised to change to your hot water boiler. Find it about half the work with your boiler. We would have no other.
STERNITZKE BROS., Park Ridge, Ill.

Have handled many greenhouse boilers of other makes, but Kroeschell beats them all. I get perfect circulation in 30 minutes. WM. OTTO, Oshkosh, Wis.

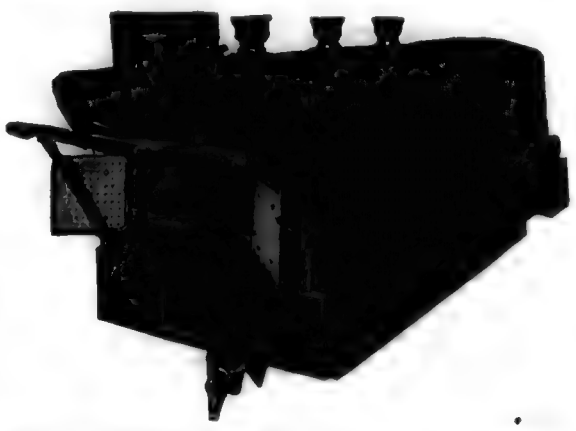
Former boiler, 16 horsepower steam; as much difference as between day and night. Your boiler does not need recommendation. Will recommend itself wherever used.
THEO. F. DAMEROW, Grosse Pointe, Mich.

Your boiler, in my estimation, is the best in use today. We have two of them.
POTTER & SONS, Waukegan, Ill.

When we rebuilt our plant, we were undecided whether to use your boiler or a cast iron boiler. We are satisfied we made no mistake in using Kroeschell.
YEATMAN & WAY, Kennett Square, Pa.

Have fired greenhouse boilers since 1885, both steam and hot water. Yours suits me the best. I have two of your boilers. At one time I had two cast iron boilers working together and during a blizzard the rear section of one boiler gave out and the front section of the other sprung a crack a couple of months later. No more cast iron boilers for me. I came very close to freezing out in both instances. G. M. THOST, DeSoto, Mo.

The Kroeschell Generator



prevents boiling over, cures sluggish circulation, saves fuel, smaller mains can be used, water can be heated to 240° without boiling, increases circulation, 3 to 5 times faster; no hot water system complete without it.

HAVE YOU EVER INVESTIGATED

the one sure thing

KROESCHELL BOILERS

See the simplicity of construction. Plate material, NOT CAST IRON. Long fire travel, thin water ways. The best and the most heating surface in the world for the money.

THE KROESCHELL BOILER will give you more heat with the same piping required by other boilers, and with less fuel.

replaced 1346 cast iron boilers in 1905, 1906, 1907, and many in 1908.

Expressions from the men who know:

We are very well pleased with your boiler. I have had fourteen years' experience in heating, six with gravity steam and eight with vacuum, but give me the hot water system for all purposes. Use me for references any time.
E. LIGHTHISER & SON, Xenia, O.

Have used upright boilers, tubular boilers, and cast iron boilers. Your boiler heats up better and easier than any boiler we have ever had anything to do with. If we ever buy another boiler, it will certainly be a Kroeschell.
POOLE & PURLIANT, Washington C. H., O.

I have fired boilers both here and in Europe for the last forty years. The Kroeschell is the best type of boiler I have ever used. I have two cast iron boilers, also a locomotive boiler coupled with yours, but did not need to use the cast iron boilers this winter. Your No. 7 boiler is rated at 15,000 sq. ft. of glass and carries 25,000 sq. ft. of glass until the outside temperature goes down to 10° of frost. We have no trouble to keep temperatures in our houses with easy firing since we installed your boiler. The main flows and returns are heating our potting shed and packing room, which are not included in the amount of square feet of glass. From the boiler to the farthest end of our violet houses and return is 800 ft. and circulates very quickly.
THE SALTFORD FLOWER SHOP,
Wm. D. Saltford, Pres.
Poughkeepsie, N. Y.

The Kroeschell Piping System

is being installed by many progressive florists. 1¼, 1½ or 2-in. threaded pipe, or 4-in. tubing is used. Boiler can be set on level with greenhouse walks. You do not need deep boiler pits.

Mention The Review when you write.

years, though the poorer quality may account in a measure for this poor demand. The asters we are now getting could, with a little more care on the growers' part, be made more salable. More care should be taken as regards bunching. The vast majority arrive carelessly tied together, no thought having been given as to grading, or in making the bunch attractive in itself, all of which detracts in large degree from the selling points of the flower. Asters neatly and properly bunched, even if the quality is poor, sell much more readily than a better grade carelessly bunched and tied any old way.

Various Notes.

A bench of Enchantress and Lady Bountiful, at Wm. Galentine's place, look especially fine, the stock appearing as well as at any time during the winter. Late asters and dahlias are the main outside crop here, and the prospects look very encouraging.

The coming convention is the main topic of conversation now. As Rochester is in line for the next meeting, a large attendance will no doubt be on hand at Cincinnati. H. B. S.

BUFFALO.

The Market.

Asters and gladioli have freshened the market considerably. Sweet peas are still plentiful, while carnations and roses are getting scarce, with few good ones to be had. Trade seems to have brightened up a little the last week, principally through funeral work.

Club Meeting.

The regular meeting of the Florists' Club took place on Tuesday of this week. The event of the evening was a paper read by Wm. Legg, on "Buffalo Parks." The picnic items were also cleaned up.

The picnic was naturally the star event of last week. While it was not the largest crowd the club ever had, everyone seemed pleased with the proceedings, and all had a good time. The day was an ideal picnic day, and immediately after arriving a picture was taken, and then all went to the field for the sports.

The program was carried out in grand style, each event having large fields, thus making it interesting to the spectators. Following the field events was the ball game. This created a big sensation. L. H. Neubeck umpired, and did it nobly. The game was between the store men and greenhouse men. It was nip and tuck until the pitcher for the greenhouse men weakened, and it finally ended 12 to 8 in favor of the store men.

Everybody then adjourned to the banquet hall and ate to their heart's content. There was not a drawback to the program of the day, so we feel safe in saying everyone was pleased.

Following is the list of prize winners in each of the various athletic events:

Boys' race, Emil Shurtz first, F. Klockow second, T. Tobin third, G. Gittere fourth.

Girls' race, Miss Bemish first, Miss Jensen second, Miss Adams third, Miss Slattery fourth.

One hundred yards dash, F. Klockow first, R. Kinkle second, E. Shurtz third, J. Longley fourth.

Men's race, over 35 years, C. Reichert first, E. Brucker second, E. Slattery third, J. Preisac fourth.

Tug-of-war, two minutes, seven store men against six greenhouse men. Won by greenhouse men.

Relay race, special event arranged between six employees of Wm. J. Palmer against any six men. Won by Palmer men.

Hop, skip and jump, J. Longley first, J. Jerome second, C. Savage third, M. Clark fourth, P. Campbell fifth.

Buckskin Greenhouse Hose

¾-inch, 15c per foot, coupled, f. o. b. Detroit.

Furnished in continuous lengths of 500 feet, without seam, joint or connection, in ½ and ¾ inch sizes only. An exceptionally high-grade Florists' hose; with a double woven jacket insertion instead of cotton duck, and with specially selected rubber in the inner tube and cover.

The double woven jacket construction makes a stronger hose than can be obtained from cotton duck, and absolutely precludes the possibility of cover opening at seam—a common cause of failure of garden hose made on cotton duck. This construction also gives a more flexible hose and reduces the possibility of kinking.

Buckskin Hose is guaranteed to stand a pressure of 500 pounds per square inch, although its bursting pressure is far in excess of this.

KENNETH ANDERSON MFG. CO., Detroit, Mich.

GRAND RAPIDS.

The Market.

At last the drought is broken. Copious rains have fallen, and the intense heat is lowered. The heat has been fearful, and continued so long that it seemed as if it would fairly cook outside vegetation. Carnation planting was hindered in the spring by too much rain. It rained heavily every two or three days for over a month, keeping the soil packed and heavy. Then came the heated spell, and the plants hardly seemed to move. Now they will grow like weeds, with such weather as we are now getting.

There are but few sweet peas to be had, on account of the heat. The aster crop is practically a failure, as stem-rot and the drought had a disastrous effect on the crop. Those who planted any inside will realize well on the crop.

Summer roses, such as Kaiserin and Killarney, are equal to the demand, although the stems on Killarney are still somewhat short. Uncle John does well for summer, also. Brides and Maids do not seem to be called for at all these days, but I presume that with cooler fall weather they will come into their own. Carnations are practically over, and what are left are of rather poor quality. There are plenty of lilies of all kinds, principally Japanese lilies, auratum and rubrum.

Various Notes.

There is little building going on. Bruinslot & Sons will put up two more houses, for lettuce, cucumbers and tomatoes. The claim is made, and seems to be pretty well founded, that it is more profitable to grow indoor tomatoes and cukes than carnations and geraniums, and infinitely less trouble and expense.

Henry Smith will overhaul several of his old houses.

There is an effort being made to get together a good delegation for the Cincinnati convention. It looks as if the following might attend: Messrs. Henry Smith, Hanna, Stover, Cross, James Scholes, G. F. Crabb and possibly Mr. Freyling, of the Wealthy Avenue Floral Co.

G. F. C.

ARLINGTON, MASS.—David W. Duncan, 133 Mystic street, has been suffering with a sprained ankle.

KANSAS CITY.

The Market.

Pink and white roses are plentiful. Good carnations are scarce. Asters are plentiful and gladioli are of good quality, the supply is large and the demand good. Prices range from 3 to 6 cents each. Business in general is rather quiet at present.

Trip to Clay Center.

A visit to Clay Center, Kan., found Chas. Humfeld busy building two large greenhouses 30x200 each, one for roses and the other for carnations. The rose house is to have solid benches with concrete sides. The gutters rest on 4-inch pipes seven and one-half feet tall set in concrete. His stock plants of verbenas in the field are looking fine and, judging from the quantity he has, he will be able to supply more than half the United States with cuttings. His carnations are the best he has had for years. They have had plenty of rain this season.

S. D. Brant was also busy planting his last house in roses. They are very fine this year. Part of one large house is devoted to stock plants of pelargoniums planted in soil. Mr. Brant has quite a large space in rooted cuttings of these. He also grows vegetables out of doors.

Various Notes.

D. Frendenthal reports business as quiet with him and collections slow.

Mr. Smith, of the Monroe greenhouses, has made a good many repairs and his place is very neat and clean. He has a large quantity of ferns planted in the bench. He is now getting ready to house his carnations.

M. E. Chandler, of Argentine, Kan., is bringing in some fine gladiolus. He is a nurseryman, but grows large quantities of asters and gladioli for this market.

W. H. H.

Lawrence, Mass.—Charles E. Wingate returned recently from Birch Island, Me., where Mrs. Wingate and other members of the family are spending the summer. A report that the party had been dangerously ill from eating toadstools proves to be untrue. The illness, Mr. Wingate says, was not serious and was not caused in the manner stated.

Boddington's Bulbs Bloom

The downward revision of the new Tariff has helped you, Mr. Florist. Write for our new catalogue, now in the press—or meet us at the Convention and we will talk price and show you quality! whether you are from Missouri—or any other state.

Bulbs, that is quality bulbs, are our specialty—and are grown in every state of the Union.

Yes, we are Seedsmen, too. We sell quality seeds—that are good from the ground up. It is no use showing you the seeds—ask the man who grows them.

We sent 35 lbs. of our Christmas Snowbird to a grower in Pennsylvania—because he knows it is the best forcing white Sweet Pea in the market. He knows—he bought the same quantity last year and we can prove it.

The name of our Pansy seed is Challenge. There's a reason.

THE RETAIL FLORIST.....

PULLIAM'S FUNERAL FLOWERS.

In last week's Review there was a note from Louisville, describing briefly the elaborate display of flowers at the funeral of Harry Pulliam, president of the National League of Baseball Clubs. The accompanying illustration shows the display of the florists' handiwork at the grave. Nothing like it ever has been seen in Louisville. It is stated that six wagons were required to transport the flowers to the cemetery. While the leading Louisville florists all were represented, and many designs came from out of town, the larger part of the work was executed by Jacob Schulz.

IDEALS IN DESIGNING.

Choosing the Piece.

Not how many, but how—. We can do much ourselves to bring about the general acceptance of the truth that the value of a design does not consist in the number of flowers employed, but in the manner in which they are used. In the case of funeral work, the choice of the design frame has considerable to do with achievement in designing itself, but the style and execution have even more to do with successful designing.

The list of purely art designs in ready-made frames is quite limited. They are imaginative creations, and, as such, are really the best and highest ideals yet reduced to common practice. In this list are included the wreath, basket, spray, vase, table centerpiece and many unusual and quaint receptacles for flowers and foliage.

Then there are the attempts at representing objects. In this class are found such designs as the pillow, harp, lyre, heart, shield, crescent, bell, clock, cross, crown, anchor, star, book, society and lodge emblems, casket cover and canopy. And it must be regretted that this catalogue includes street cars, locomotives, autos, as well as some choice menagerie specimens. Nobody is saying that the latter list does not contain valuable pieces, but the first list contains the pieces which are of themselves highly imaginative, aside from any ideal treatment which they may receive. Neither has anyone been heard to say that the latter pieces named cannot be developed in a highly artistic manner, for they can.

In Love With One's Work.

When the choice of a piece has been made, either by the purchaser or by the florist, let it be executed to the best of your ability. Be as ambitious to be a good designer as you would be to be the possessor of a million dollars. Enjoy your work, even the drudgery parts. It is no gush to say that there are persons who put their whole heart into the work and really love it.

How far would you trust a doctor who practices on you merely for the money there is in it? What artist's pictures would adorn walls which were painted for the price only? What right has a bookkeeper to your ledger who does not admit the fascinations of his columns and balances? One must not only not dislike, but must greatly like his work to make a success of it artistically, or financially, either. It seems a pity that the money advantages of a certain policy must be the only things to compel people to sit up and take notice. It must be a hard life to limit one's self to.

The Top Notch of Capacity.

If I am to do my best, how shall I know that I am working to the top notch of my capacity? First, by enlarged ambitions; second, by dissatisfaction with former attainments. Three-fourths of the work put out by florists could never come within the scope of art work, and should do itself the one justice not to claim to be anything but space filled up. To be sure, there is always a sale for poor pictures and for indifferent work of all kinds. But there are aspirations for the best in all of us, if we but give them a chance, and what is the use of catering to indifference rather than to one's higher instincts?

The next question that occurs, after having satisfied myself as to whether I am working to the top notch of my capacity, is: To what authority can I appeal for absolute judgment on my work? Who is going to say it is good, bad or indifferent?

Bound by No Man's Laws.

It is true that somebody's judgment may help by criticism, or hurt by jealousy. But, after you have graduated from the rudiments, observed work considered good by a reasonable number of people, felt your own way around some dark corners which were new to you, realized failures and profited by them, you are bound by no man's laws. Do as you please, having had an understanding with the customer whether the work is to be the conventional kind or strictly free and fanciful. Do not pay too much attention to what your neighbors are doing; sometimes it is better not to know what they are doing. Be a law to yourself; only, as you learn both by observation and experience, let your laws expand to include new occasions.

One of the tests of art work in other lines is the length of time that it survives. A mere fragment of sculpture or canvas may lay claim to greatness because of its perfection. But, though you lavish the thought of years and the experience of a lifetime on a floral piece, in a few hours its beauty has gone. It begins to deteriorate the minute it leaves your hands. Like a fleeting sunset, its charm vanishes. It looks like time and

The next question that occurs, after having satisfied myself as to whether I am working to the top notch of my capacity, is: To what authority can I appeal for absolute judgment on my work? Who is going to say it is good, bad or indifferent?

Bound by No Man's Laws.

It is true that somebody's judgment may help by criticism, or hurt by jealousy. But, after you have graduated from the rudiments, observed work considered good by a reasonable number of people, felt your own way around some dark corners which were new to you, realized failures and profited by them, you are bound by no man's laws. Do as you please, having had an understanding with the customer whether the work is to be the conventional kind or strictly free and fanciful. Do not pay too much attention to what your neighbors are doing, sometimes it is better not to know what they are doing. Be a law to yourself; only, as you learn both by observation and experience, let your laws expand to include new occasions.

One of the tests of art work in other lines is the length of time that it survives. A mere fragment of sculpture or canvas may lay claim to greatness because of its perfection. But, though you lavish the thought of years and the experience of a lifetime on a floral piece, in a few hours its beauty has gone. It begins to deteriorate the minute it leaves your hands. Like a fleeting sunset, its charm vanishes. It looks like time and

Flowers at the Funeral of Harry Pulliam, at Louisville, Ky.

energy wasted. How can it live? It is an unselfish art, surely.

Educational Value of Designing.

And yet, no one whose eyes linger over a fine piece can fail to have his standard of taste raised, and that fact contributes to education in general by his personal development, as well as his influence. It is slow and discouraging, to be sure, but every atom helps. Somebody is the better. By his influence, who knows how many more are impressed and elevated? And so the work goes on. That is living in the truest sense. The piece upon which you bestowed your best work lasts as long as a song—the song which inspires an audience and lives in memory for years. If the quality of floral work were up to what it might be, it, too, would leave its picture on the mind and be retained.

The glory of this work is its unlearnableness; there is always so much beyond. A lifetime does not afford opportunities for using all the inspirations which come to the interested student. May each piece be keyed true, and the latest the best. Gertrude Blair.

FUNERAL FLOWERS IN FLORIDA.

The accompanying illustration shows an arrangement of flowers about a grave at Ocala, Fla., for the funeral of a prominent citizen. The arrangement was in charge of John Heintz, who is the local florist. He first covered the ground with a blue cloth, but in photography blue does not "take," so it appears like a white cloth in the picture. The designs were arranged in circular fashion about the grave, so that each separate piece showed for itself. A large spray of Enchantress carnations was pendent at the head of the grave, the excavation itself being lined with the cloth.

Mr. Heintz made a number of these designs, but complains that larger florists outside of Ocala, from whom he buys considerable stock, tread on his toes by soliciting orders which Mr. Heintz would otherwise get, and use the same stock.

Flowers About a Grave in Florida.

Dover, N. H.—Charles L. Howe has been erecting some dwelling houses on Broadway, and they are now almost ready for occupancy.

MAKING GOOD AT A PINCH.

Meeting Sudden Demands.

No little ingenuity must be used in meeting the sudden demands for funeral work, at an inconvenient distance from the markets. At such times the customer who leaves it to you is highly desirable, but be wise enough to let one go somewhere else, or to "send out," rather than make a dissatisfied customer. Suggest where possible, but avoid unprofitable argument.

Every garden flower may be used in a telling or a graceful way. No flower is common. Take feverfew, for instance. A round bouquet, lying flat, of course, sets them off best. Adiantums, especially those with large, heavy fronds, seem to work in well. So, also, do natural branches of some shrub, such as bridal wreath, covered well with common fern, in an inexpensive spray. These may be lightly covered with the maidenhair, short pieces at each side and longer ones worked in full and round to the top. Let the feverfew lie a little close, in a bunch at the base, showing the beauty of your fern. Now stem a few bunches rather short, to bring out the rounded or pompon effect at the bottom of the bouquet. Use short ferns at the back; the picks will hold in well among the other stems. This, as the writer saw it, was without ribbon, but ribbon might be used in a bow or bunch of loops, without ends or with short ones. A bunch of white geraniums is quite as nice, and other ferns may be used, as well as a bit of forget-me-not or similar flower in a cluster, as a color contrast.

A Cross of Campanulas.

With large flowers one must be bold, making them up in big design. A cross on an easel was built up from the base with blue campanula, with lighter blue above. Both double and single flowers were used, the greater part of them white. A few, blue in the arms, brought out the clean contrast of blue and white. A few heavy adiantums and a tuft or two of Asparagus scandens deflexus, with a longish trailing end of the same on the leaning arm, came out as a surprise in the finish. The bells were worked in short and long, the short ones for color and the long ones to keep it from looking heavy.

The same flower eked out at another time an entire wreath of blue, keeping the stemmed sprays rather flat and following the circle, without being too stiff, from each side of a bunch of white chiffon. Silk would have been better, but a customer's wish must be considered. Chiffon is best used with like colors, as white with white. Pink is very well with it, or purple with purple flowers, as they lend their color to the gauze.

A spray of ferns, made to lie flat, of either one, two or mixed varieties, and tied with white ribbon in a bunch of bows, is beautiful among a lot of flower sprays or designs, pleasing by contrast. A wreath of simple green, a cross in foliage alone, is dignified and noble as compared with wilted flowers, however costly. Fancy a bunch of ferns as described, fresh and green, with white ribbon, on a casket of steel gray. The other, more perishable things were likely to be forgotten, though each meant a remembrance, of course.

Peonies and Cycas.

A few dark red peonies and two cycas leaves resulted in an unusual cross. Little green was used, except the peony leaves. The cycas leaves were long, straight specimens and fastened with the tips a little over on the right arm. A peony at each end outlined the design; four or five gave a solid look down the left arm and center. A heavy satin ribbon completed the piece richly, placed a little below the middle of the cycas leaves, leaving them their beauty of stem end and terminal.

Consider the taste of your customer and do not make up "classical" work for him who is unmistakably plebeian in taste. Judicially mix your flowers; he will be better pleased. Simplicity appeals to those having a more decided sense of the artistic. A design for the latter class of people, except possibly a pillow, should be carried out with one kind of flower or only a little, sparing contrast. For instance, it may be a wreath of Shastas, or antirrhinums, preferably of one color shade and tint, or white alone. The dark reds will shade off gradually into pink with a good effect.

Do not even hesitate to dare a cross of gold—in rudbeckia, if the case make it appropriate, blocking the ends square and using smaller flowers and buds for grace. If the flowers shade green to the center, all the better. A bunch of black in yellow eyed pansies is good, set at the right place, or the blue of forget-me-nots in one, two or several clusters, as you may determine. Violet Sylvester.

A STREET DISPLAY.

It used to be a favorite advice of William Scott, when counseling beginners in the business, to "wash all you got and hang out all you wash." In other words, appearances count for a great deal.

How well Mr. Scott's sons have heeded his advice in this particular is shown by the accompanying illustration, from a photograph made at their establishment at Main and Balcom streets, Buffalo. The picture shows the planting along the ends of the greenhouses. The Scott Co. believes there is nothing in the exterior appearance of a range of commercial greenhouses to promote the desire to buy in those who pass the place. On the other hand, when a florist's grounds are

Street Planting at the Greenhouses of the Wm. Scott Co., Buffalo.

well embellished with the stock he wishes to sell, it invariably makes business. So the Scott boys see to it that each season the planting on the strip of lawn around their place is of the kind that will advertise the business and make sales.

HARRISII FOR CHRISTMAS.

Our first order of Lilium Harrisii arrived July 31 and was potted up immediately. Do you think it possible to get some in bloom for Christmas?

C. A. C.

You should have little trouble in getting the major portion of your Harrisiis in bloom for Christmas. As soon as the pots are nicely filled with roots and the shoots are two or three inches long, give the plants a bench in a house with a night temperature of 60 degrees. This can be increased 5 degrees or even more after the buds show. Be careful not to overwater in the early stages of growth. Many plants are ruined by an oversupply while the pots are only partially filled with roots. To be sure of getting your lilies for Christmas, you should be able to count the buds the first week in November. Remember that in forcing for Christmas the sun's rays are steadily declining, the reverse of conditions preceding Easter. C. W.

TROUBLE WITH HONEYSUCKLE.

We are sending you a sprig of honeysuckle, on which you will see the leaves are curled up and life goes out without any seeming reason. Usually a limb, a year or so old, goes, and sometimes a new growth. We are wondering why this is, and hope you can advise us. We have used Paris green on them without any benefit. This honeysuckle grows on the south side of a porch in the sun until afternoon, when trees shade it. D. B.

From the appearance of the shoots received and your description of the trouble, I should say the trouble is at the roots of the plant. Without knowing anything of soil conditions or what treatment the plants may have had in the way of fertilizers, I am inclined to the opinion that you can improve the growth of the honeysuckle and probably overcome this dying out by loosening the surface soil around it and giving it a good surface dressing of well rotted barnyard manure. Cut out clean any shoots as they decay. Keep the surface loose and feed quite liberally. This should put new life into the plant, unless it is too far gone.

Spraying with Paris green and other poisons is of no avail, except when insects are destroying the foliage, and Bordeaux mixture is only used as a preventive of fungus on the leaves. The entire dying out of the shoots cannot be caused by any of these agencies.

W. N. C.

SEASONABLE SUGGESTIONS

Ficus Elastica.

There is always a good call for Ficus elastica. The best place to grow it in summer is in a lath-covered house. Such places are easily and cheaply built, and the plants thrive much better in them, and are far stockier than when kept under glass continuously. Where tops were mossed and are being propagated by the ringing process, it is astonishing how fast roots are now being emitted. The main consideration is to keep the moss always damp. As soon as roots begin to protrude through the moss it is time to cut off the tops and pot them. The leaves will need some tying up for convenient handling on the benches. Keep the newly potted cuttings close and moist until established, and spray overhead frequently on hot days. They will soon establish themselves in the pots, and can then have cooler and airier treatment.

Herbaceous Calceolarias.

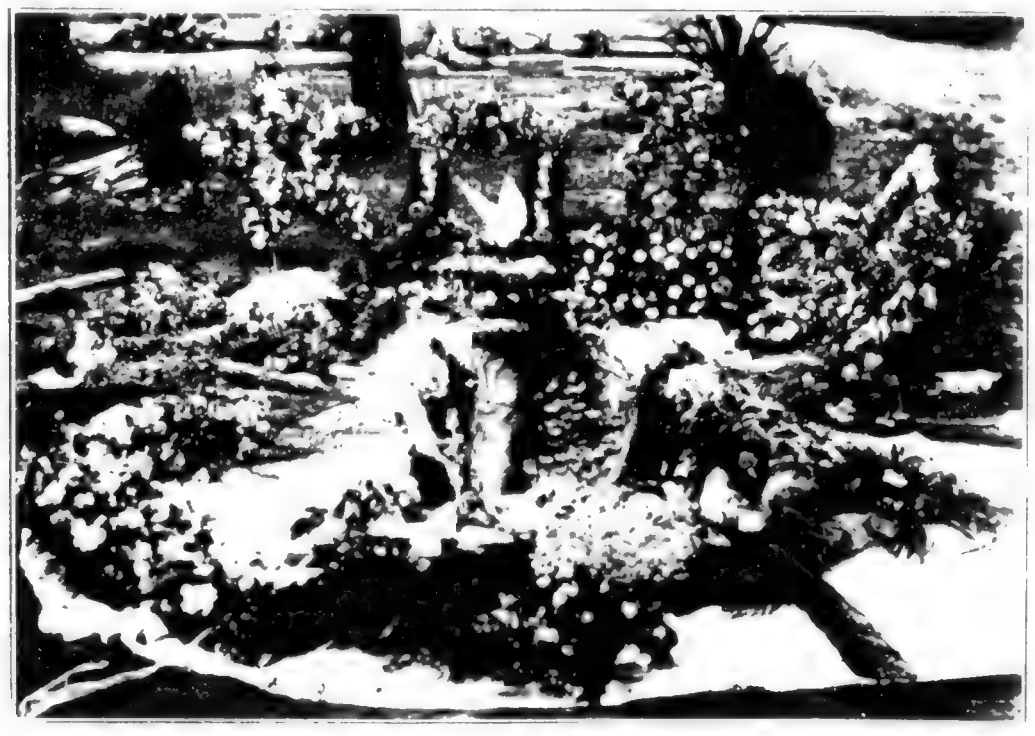
The seed of herbaceous calceolarias germinates poorly during hot weather, as a rule. Therefore, it is better to wait until August before making any sowing. The little plants simply stand still during torrid weather, and little is gained by early sowing. Well drained pans of loam and leaf-mold in equal parts, to which has been added some powdered charcoal and sand, are suitable for sowing the seeds. Make the surface fine and water before sowing the seed. Do not cover the latter at all, except it be with a little fine sand. Place sheets of glass over the pans to prevent evaporation, and lay thick paper over this. Place the pans in a north frame or north house, where as cool conditions as possible can be had. Watch carefully for any signs of drying out, and do any watering with a fine rose. Just as soon as germination starts, remove coverings and give the little seedlings light, but keep the sun's rays off them.

Primulas.

Do not neglect the primulas during this hot, dry weather. They appreciate a

energy wasted. How can it live? It is an unselfish art, surely

Educational Value of Designing.



And yet, no one whose eyes linger over a fine piece can fail to have his standard of taste raised, and that fact contributes to education in general by his personal development, as well as his influence. It is slow and discouraging, to be sure, but every atom helps. Somebody is the better. By his influence, who knows how many more are impressed and elevated? And so the work goes on. That is living in the truest sense. The piece upon which you bestowed your best work lasts as long as a song the song which inspires an audience and lives in memory for years. If the quality of floral work were up to what it might be, it, too, would leave its picture on the mind and be retained.

The glory of this work is its unlearnableness; there is always so much beyond. A lifetime does not afford opportunities for using all the inspirations which come to the interested student. May each piece be keyed true, and the latest the best. GERTRUDE BLAIR.

FUNERAL FLOWERS IN FLORIDA.

Our first order of Lilium Harrisii ar ed July 31 and was potted up imme ately. Do you think it possible to get m in bloom for Christmas?

C. A. C.

You should have little trouble in get ng the major portion of your Harrisiis bloom for Christmas. As soon as the ots are nicely filled with roots and the oots are two or three inches long, give e plants a bench in a house with a ght temperature of 60 degrees. This n be increased 5 degrees or even more ter the buds show. Be careful not to verwater in the early stages of growth. lany plants are ruined by an oversupply hile the pots are only partially filled th roots. To be sure of getting your es for Christmas, you should be able to unt the buds the first week in Novem er. Remember that in forcing for hristmas the sun's rays are steadily de ning, the reverse of conditions preced g Easter.

C. W.

TROUBLE WITH HONEYSUCKLE.

We are sending you a sprig of honey kle, on which you will see the leaves curled up and life goes out without y seeming reason. Usually a limb, a rt or so old, goes, and sometimes a w growth. We are wondering why s is, and hope you can advise us. We e used Paris green on them without y benefit. This honeysuckle grows on e south side of a porch in the sun until ternoon, when trees shade it. D. B.

From the appearance of the shoots re ved and your description of the trou le, I should say the trouble is at the roots of the plant. Without knowing anything of soil conditions or what treat ment the plants may have had in the way of fertilizers, I am inclined to the opinion that you can improve the growth of the honeysuckle and probably overcome this dying out by loosening the surface soil around it and giving it a good surface dressing of well rotted barnyard manure. Cut out clean any shoots as they decay. Keep the surface loose and feed quite liberally. This should put new life into the plant, unless it is too far gone.

Spraying with Paris green and other poisons is of no avail, except when insects are destroying the foliage, and Bordeaux mixture is only used as a preventive of fungus on the leaves. The entire dying out of the shoots cannot be caused by any of these agencies.

W. N. C.

SEASONABLE SUGGESTIONS

Ficus Elastica.

There is always a good call for Ficus elastica. The best place to grow it in summer is in a lath-covered house. Such places are easily and cheaply built, and the plants thrive much better in them, and are far stockier than when kept under glass continuously. Where tops were missed and are being propagated by the ringing process, it is astonishing how fast roots are now being emitted. The main consideration is to keep the moss always damp. As soon as roots begin to protrude through the moss it is time to cut off the tops and pot them. The leaves will need some tying up for convenient handling on the benches. Keep the newly potted cuttings close and moist until established, and spray overhead frequently on hot days. They will soon establish themselves in the pots, and can then have cooler and airier treatment.

Herbaceous Calceolarias.

The seed of herbaceous calceolarias germinates poorly during hot weather, as a rule. Therefore, it is better to wait until August before making any sowing. The little plants simply stood still during torrid weather, and little is gained by early sowing. Well drained pans of loam and leaf mold in equal parts, to which has been added some powdered charcoal and sand, are suitable for sowing the seeds. Make the surface fine and water before sowing the seed. Do not cover the latter at all, except it be with a little fine sand. Place sheets of glass over the pans to prevent evaporation, and lay thick paper over this. Place the pans in a north frame or north house, where as cool conditions as possible can be had. Watch carefully for any signs of drying out, and do any watering with a fine rose. Just as soon as germination starts, remove coverings and give the little seedlings light, but keep the sun's rays off them.

Primulas.

Do not neglect the primulas during this hot, dry weather. They appreciate a

wetting overhead occasionally, and on these hot, sultry nights do much better if the sashes over them are removed entirely, so that they can get the refreshing night dews. Plants wanted for Christmas flowering should go into their flowering pots right away. Use plenty of leaf-mold in the compost, some well broken up old cow manure and sand, but no chemicals. Primulas will take chemical fertilizers at times, but in incautious hands their use often injures or ruins them. In potting the Chinese section, see that the plants are made firm. Those left too high are liable to snap off at any time. Do not, however, go to the opposite extreme and bury the leaf stalks, particularly as this will merely cause damping off.

Show Pelargoniums.

Show pelargoniums should have the wood well ripened now, and of a nutty brown color. If any additional cuttings are required, take them at once. Prune the plants back to within two or three inches of the previous year's growth, and stand closely together on a bed of ashes in a coldframe. As soon as they begin to break overhaul them by shaking the soil clean away from the roots and shortening back the latter. Then place in as small sized pots as they can be gotten into. As a rule, plants from 6-inch pots will go in 4-inch, and those from 7-inch and 8-inch pots in 5-inch. Be careful not to water much after pruning the plants. An excess of moisture is liable to cause them to rot. A frame is the best place for pelargoniums for the next six weeks.

Smilax.

If any bare beds or benches are still at disposal, it is not too late even now to plant a batch of smilax. As previously stated, any house which is too dark for carnations or roses will answer well for smilax. The early planted stock is now becoming well established and making rapid growth. We hope you have remembered to place the upright strings in position before the strings become entangled, for it is a heart-breaking task to loosen without damaging them.

Do not allow the surface soil to become baked or pasty. A loosening over once a week will keep the plants growing nicely. During hot weather apply ventilation freely, but keep a moist atmosphere. Use the sprayer on the plants to keep spider and thrips away. In case the latter should secure a foothold, use a nicotine solution and wet the foliage thoroughly.

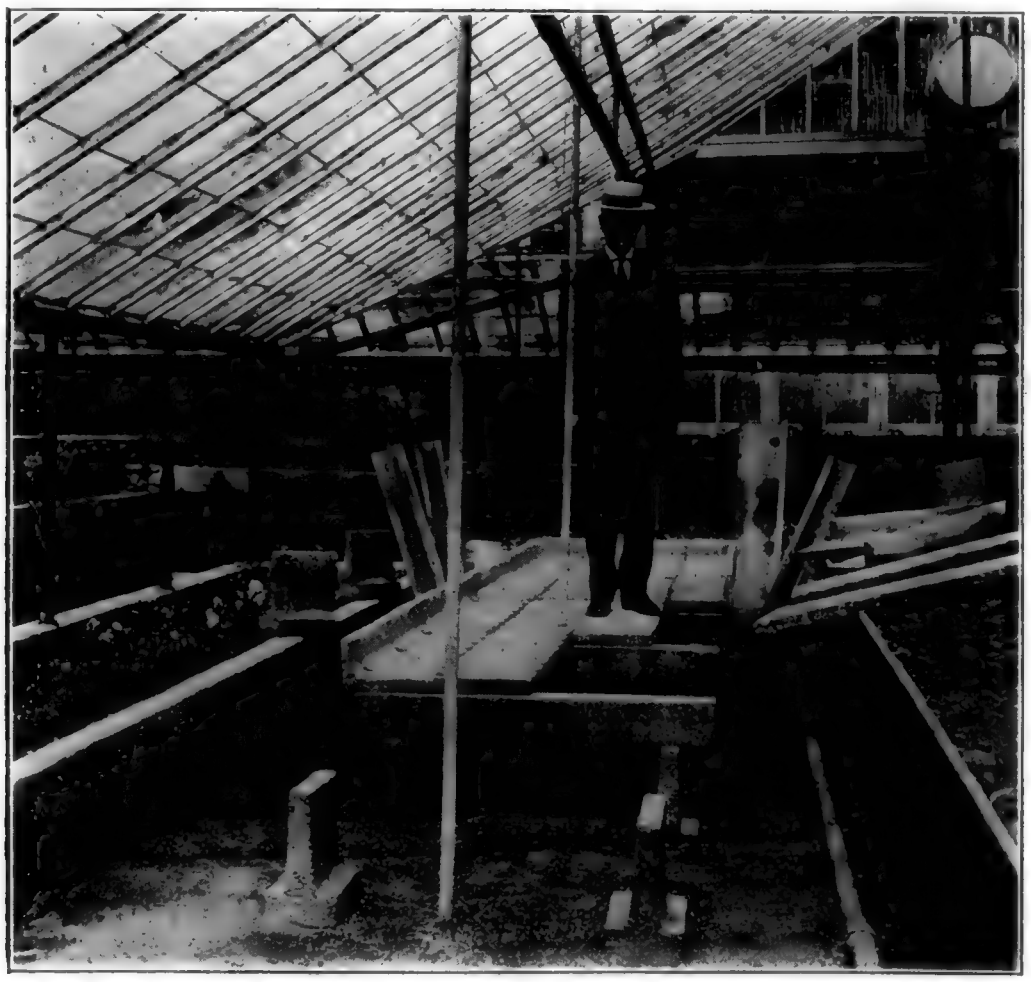
Schizanthus Wisetonensis.

Schizanthus Wisetonensis has jumped into great favor within the last two or three years, and has now become quite popular commercially. By making a sowing now you can get nice, bushy little stock for Christmas sales. Place four or five seeds in 3-inch pots. Thin out to three plants. Shade until the seedlings appear, and then give the fullest sunlight. Either a frame or light greenhouse will answer well; in fact, the plants can be grown outdoors until frost threatens. This keeps them much stockier. The shoots should be pinched to make the plants bushy, and as they grow fast, it will only be a short time before they will want a shift into 5-inch pots. A light, rich soil suits schizanthus.

Paper Whites and Romans.

Such French bulbs as Paper White narcissi and Roman hyacinths are now in importers' hands, and a batch of each should be placed in flats immediately on arrival. The flowers are sometimes a glut on the market, but the average country florist always finds them useful when he has calls for funeral work. Bulbs not wanted right away should be unpacked and placed in boxes in a cool, dry shed or cellar. French Trumpet Majors can be flowered for Christmas. As soon as received place them in flats four to five inches deep and stand on a cellar floor. If placed in frames, mulch well and cover with boards.

Bulb Compost.



Indications are that, owing to the cool, damp summer experienced in Europe, bulbs from Holland will arrive later than usual. It is not too early, however, to prepare the compost for them. Two-thirds fibrous loam, well decayed and chopped down, and one-third old cow manure, with a good addition of sand, will answer for about all bulbs. Spent hotbed or mushroom manure answers well for adding to bulb soil. What they like is a light, somewhat sandy and moderately rich compost. This should be mixed now, and it will be in readiness for use as soon as the bulbs arrive.

There are likely to be less vexatious delays in the custom houses this year. A specified duty per thousand bulbs is decidedly preferable to the previously existing ad valorem one. It will also give a big impetus to the importation of the newer and choicer varieties of narcissi and tulips.

The Cincinnati Convention.

All roads will shortly point to Cincinnati, and appearances now indicate a splendid convention. The number of S. A. F. members proportionate to the florists of the country is not what it should be. Perhaps an increased salary to a first-class, energetic secretary, which would enable him to take time to visit all important floricultural centers and thus keep in close touch with the members, might increase the membership. The good the S. A. F. has done for the trade can hardly be estimated, and it merits the loyal support of every florist in the land.

All who can should try to visit Cincinnati. No doubt most of us have already formed our plans, but it will be money well spent to see the trade exhibit and rub shoulders with so many of the leaders of the trade, to say nothing of the many fine sights to be enjoyed in the hospitable Ohio city. It does not pay to stay at home too much. It breeds a littleness and self pride, which a convention visit will speedily efface. Do not figure up the price of the tickets and hotels as money wasted. Think of the experience gained, the pleasant associations formed, which will linger as delightful memories with you, and the recreation from the constant wear and tear of life, which will far more than outweigh any dollars expended.

Concrete Bench at McCaslin Bros., Zanesville, Ohio.

ANOTHER CONCRETE BENCH.

The accompanying illustration shows a concrete bench in the course of erection in the houses of McCaslin Bros., Zanesville, O.

Zanesville is a pottery section; the principal industry of the town is the manufacture of earthenware—what more natural, then, than that the florists there should turn their attention to the manufacturing of this kind of greenhouse bench?

McCaslin Bros. adopted the sectional form of construction, manufacturing the four different pieces required during leisure moments in the winter, and having the sections ready to set up at time for replanting in the summer. They employ a separate mold for each piece, making the legs, the crossbars, the bottom sections and the bottom section with

sideboard attached. They say they realize that other florists have devised many good forms of concrete bench, but they believe their own idea meets the needs of the average florist at least as well as anything else they have seen.

Concrete benches are well known to be practically indestructible, to be economical in first cost, and cheap in the long run, but there is one point which it appears growers generally may have overlooked. Freedom from the necessity of expensive and laborious rebuilding is no greater advantage than the freedom concrete construction gives from those pests which inhabit decaying wood, and which are among the most difficult to exterminate of any the florist is called on to combat.

BLANCHE FERRY SPENCER PEA.

The trade at large, and the sweet pea world especially, owes a great deal to the originator of Countess Spencer. No variety ever did so much to revitalize interest in this ever-popular flower. The sportive character of Countess Spencer has led to the introduction of a great number of so-called Spencer varieties, each possessing the type of the original, with variations in color which have run almost the entire gamut. If some varieties closely alike in color have been disseminated under different names, and if some of the new sorts have proved inadequately fixed, it nevertheless is due to the variable character of the parent that so great an impetus has been given to sweet peas in recent years. Had the Spencer type possessed the staid qualities of the older sorts, the sweet pea and floricultural world would have missed a great deal these recent years.

Many of the seed catalogues for 1910 will feature new Spencer sweet peas, there being several new shades of color in these coming out this season. One of these is the Blanche Ferry Spencer, originated on the farms of the Routzahn Seed Co., in California, and shown in the accompanying illustration. The variety has pale rosy standard, with white wings.

New Blanche Ferry Spencer Sweet Pea.

CYCLAMEN.

Starting the Seedlings.

It is time to sow cyclamen seeds once more. Of course the operation may be deferred until as late as December, but by sowing thus early you can depend upon having excellent stock for sale by Christmas, 1910. Secure, if possible, the new crop of seeds which dealers should now have on hand. Do not purchase a cheap mixture, but the best possible strains. As a rule, white and pink are the best selling colors, but at the holidays reds always take well.

The seeds can either be sown singly, about an inch apart each way, in shallow flats, or more thickly in flats or pans. Some growers seem to prefer the thin sowing, claiming they get stronger plants. Whichever plan is adopted, the seeds should be dropped evenly. Too often we see pans with a crowded bunch of seedlings at the edges and nothing in the middle, often the result of careless watering. For compost use plenty of leaf-mold of a rather flaky nature; two-thirds of this to one-third of loam, to which is added some powdered charcoal and sand, will answer well. Make the surface smooth by using a light board before sowing, and cover the seeds with a thin coating of finely screened leaf-mold and sand.

Place the seed receptacles in a north house, or even a frame. After watering cover with paper and keep well shaded. Watch the soil carefully, and always water through a can with a fine rose. Never use the hose for these or any other seedlings. The soil should be kept uniformly moist, but not wet, and if you have secured good seeds you will soon see them swelling up into little bulbs.

Plant in Frames.

With the arrival of somewhat cooler nights, cyclamen plants in the frames are commencing to grow much faster. Keep the surface soil stirred, weeds and any decaying leaves removed and pinch out any buds which may be showing thus prematurely. It will be necessary to space the plants more frequently. Do not let the plants become crowded, or their symmetry will be spoiled. Half the charm of a well grown cyclamen is in its circle of clean, handsome foliage. Except when heavy rains threaten, the sashes need never be over the plants, but keep the lath or other shadings over the plants during bright sunshine.

Keep a sharp lookout for aphis and thrips. In dry weather the latter pest is liable to be destructive. The sashes once a week should be placed on the frames and a fumigation given. Between the fumigations spray the plants with a nicotine solution, and you will effectively control the insects. Attend to any necessary potting. The final shift for plants wanted for midwinter blooming should be given not later than September 1.

BROOKLINE, MASS.—William Almy has purchased from G. L. Stone a five-acre tract of land on Warren street, with a residence, stable and greenhouse.

GRAND ISLAND, NEB.—John Ellsworth, president of the Ellsworth Greenhouses, Inc., has commenced the erection of four greenhouses, one 22x140, one 80x125, and two 16x100 feet each. With this addition, the range will include 45,000 square feet of glass. He is using the Wittbold bench system and the Moninger ventilator.

wetting overhead occasionally, and on these hot, sultry nights do much better if the sashes over them are removed entirely, so that they can get the refreshing night dews. Plants wanted for Christmas flowering should go into their flowering pots right away. Use plenty of leaf-mold in the compost, some well broken up old cow manure and sand, but no chemicals. With this addition, the range will include 45,000 square feet of glass. He is using the Wittbold bench system and the Moninger ventilator.

CARNATION NOTES.—EAST.

Removing the Shade.

As soon as the plants show signs of having taken hold in the soil, removal of shade should begin and, under ordinary circumstances, the glass will be clear in about a week from planting. Spraying, however, will need to continue, although at less frequent intervals, being mostly confined to the midday hours, when the sun is hottest. Ventilation can be increased from day to day, until at last every ventilator and door in the house is wide open at all hours, except during storms.

The surface soil should be broken up by a light raking, and the depressions which were left around the plants when set should now be filled in.

Precaution Against Stem-rot.

During the first month after housing is when that dread disease, stem-rot, makes its appearance. The dampness incident to spraying, the closeness of atmosphere due to the inability to ventilate without wilting of foliage, and the check caused by lifting the plants, all combine to bring about conditions favorable to the development of this disease.

Once a plant is attacked, the sooner it is taken up and destroyed the better. Also a good quantity of the surrounding soil should be removed. If, when housing, a few plants of each variety are potted, these can be used later to fill the vacancies.

Overwatering of the soil is to be strictly guarded against, and the plan of watering in small furrows, made across the bench between the rows, is to be especially commended, as this prevents excess of water about the base of the plants. Spraying with Bordeaux mixture or ammoniacal carbonate of copper solution will serve as an aid in warding off this trouble.

The Question of Bone Meal.

In my notes of some weeks previous I recommended leaving out bone meal until after the plants are reëstablished, except in cases where a crop from some early blooming sort could be used to advantage. Our experience has been that plants become established equally well, and in many cases better, in soil containing no bone meal, and since this fertilizer is used principally for the phosphoric acid it carries, there seems to be no reason for supplying this element so far in advance of bud formation. In fact, I am inclined to think that an outbreak of stem-rot is somewhat aggravated by the presence of bone meal in the soil, especially if in excess.

To refer to all brands in a general way, and point out the merits or demerits of bone meal as a whole, would be manifestly unfair to the better grades, for as far as the benefit to be derived from some is concerned, they might as well be sown under the bench as on it. The value of any fertilizer is measured by the available plant food it contains, and while the analysis under which a certain fertilizer may be sold is perfectly correct, a large percentage of the different elements may be insoluble and therefore unavailable.

Some Differences in Bone Meal.

It would consume too much space to go into the details of the process through which bone passes during its manufacture into a fertilizer, but we may be assured that the grinding is but one feature of the work if the plant food therein is made available. Raw bone, simply ground, is of little use to the grower of cut flowers, as too much time would need to elapse before decomposition in the soil rendered the plant food available. Refuse from bone ornament factories is liable to contain more or less scraps of vegetable ivory, and at best would furnish but an inferior article.

When it comes to discontinuing the use of bone altogether, I would certainly hesitate to recommend such a proceeding. It is true that in some soils it may not be needed. In fact, I personally know one grower who claims never to have used a pound, but his advantage seems to be purely local.

We must study our soils and, when purchasing bone, we must insist on receiving the valuation in available plant food. In this way only will the question of bone meal be solved.

Geo. S. Osborn.

BENCHES VERSUS SOLID BEDS.

Will you kindly state what the comparative success has been in growing carnations on benches and in the ground?

G. R. G.

There are perhaps no exact records to be had which would show a comparison between carnations grown on benches and on solid or semi-solid beds. To get a true comparison between the two, the same varieties would have to be planted on the same place, where they would likely receive the same quality of culture. We conducted such an experiment some eight years ago on our place, but without keeping any record of blooms cut; we simply noted the results as we went along through the season, and formed our opinion in that way. The variety planted was White Cloud, and those grown on the solid bed, with cinder drainage, were so satisfactory that we never for a moment thought of putting in another raised bench.

We would not advise anyone to tear out good raised benches to replace them with the kind we use, but if you begin with a new house, we would most certainly recommend a bed such as we use now exclusively; that is, four inches of soil on a foot of cinders.

We also had experience, about four years ago, with carnations planted right in the ground, and can say that if the soil drains readily, first-class stock can be grown in that way. We do not like that method, however, because of the difficulty in working the crop. Everything that is done will require stooping, and if you think anything of your men's backs you will consider the cost of raising the soil up eighteen inches a good investment. Good drainage, however, is essential. There should be no danger of the soil retaining an excess of water for any length of time, or failure will surely follow.

In the latter experiment we had some 10,000 plants of various varieties, over which we built a new house. These plants began giving us fine blooms on long stems early in September, and continued right through the season. In November our Enchantress were the best out of six vases at the Indianapolis mum show. Our Belle were the best vase of white, and a bed of 900 Vesper was a surprise to every grower who visited us that winter.

We understand there are other prominent growers who use the same beds as we use, with good success. We also know that growers around here are putting in such beds, on account of our success with them. In time we confidently expect to see the raised bench discarded, for growing carnations, at least.

A. F. J. B.

Green Bay, Wis.—Charles De Clerc recently completed an addition to his greenhouses, near the Fort Howard cemetery. Including the new section, which is 60x235, he now has 42,000 square feet of glass. His store, at Adams and Walnut streets, is also being remodeled and enlarged, and will be one of the handsomest establishments of the kind in this part of the state.

SPECIOSUMS CARRIED OVER.

Will you kindly advise us as to the best disposition to make of Japan lily bulbs that have bloomed in pots? The varieties are pink and white. Can they be left in the pots and started again? If so, when? Or will it be best to put them in open ground and take them up again and pot them, and if this is all right, when shall it be done? B. F. C.

We suppose the Japan lilies referred to are speciosums. It will not pay you to carry these over in pots and force again. You can plant them in the open ground in good soil, covering the bulbs about eight inches for the best success. They will flower well another year for you, treated thus. We would advise you not to try lifting and forcing the bulbs again; far better purchase new ones. Both speciosums and auratums are to be had at moderate prices. The new crop from Japan usually arrives late in November. Get your bulbs early and pot right away. This will be far better than lifting any second rate, home-grown bulbs. C.

GARDENIAS FOR CHRISTMAS.

Will you kindly state what is the most satisfactory time to disbud gardenias, in order to make them flower around Christmas time? I live in Virginia. T. E. L.

To have a good crop of gardenias at Christmas requires considerable skill. You will have less trouble in getting them, however, than your fellow florists farther north. Presuming that your plants are benched and growing freely, you should pinch the shoots until the middle of August, after which date no further pinching must be done. It is well to rub off any early flower buds which may appear, unless you have some particular use for them. Keep the plants well syringed and close up with abundant moisture each afternoon. The night temperature now is easily kept in the seventies or higher. Later in the season do not allow it to fall below 65 degrees. Watch the cultural columns of the REVIEW for further hints from time to time. C. W.

Dendrobium Schneiderianum Giganteum.

ORCHIDS

SEASONABLE ORCHID NOTES.

Dendrobium Nobile.

This useful old dendrobe enjoys a hot, moist house at this season. The pseudobulbs are now being well made up, and the plants must have abundant supplies of moisture, both at the root and in the atmosphere. Only in the case of those which are much root bound should manure water be applied, and then in weak doses once a week. The plants, if grown in a house which can be syringed over and closed up tight about the middle of the afternoon, will be exactly in their element. After the end of August it may be possible to gradually reduce the water supply on the most advanced plants, but for a few weeks yet the plants should have warm, moist, tropical treatment. Such varieties as Wardianum, Phalænopsis and formosum giganteum like the same culture as D. nobile.

Cattleya Labiata.

What a gap we would have to fill were that easily grown and free flowering fall cattleya, the labiata, taken away! It seems hard to imagine that, but a few years ago, prior to its rediscovery, there was really no fall cattleya of any account, whereas now it is grown commercially by thousands.

The earliest plants now have bulbs pretty well made up, with sheaths showing. These will give some flowers by the last of September, a time when indoor flowers are just starting to sell again. The shade on these cattleyas should not be too heavy now, as, if the plants are far from the light, it will mean beautiful, dark foliage, large bulbs and half the flowers per sheath they should carry. Move such as are well made up close to the light. This will have the effect of hardening them. If every cattleya grown could be kept about two feet from the glass during the whole growing season, there would be fewer complaints about big bulbs showing only one or two flowers, instead of double or treble that number. The plants must still have a good water supply, and on hot days a light syringing early in the afternoon will help them. The foliage is better dry before nightfall.

Calanthes.

In order to keep the calanthes growing vigorously and to make up first-class bulbs, a warm, close house is absolutely necessary, which can be shut up about 3:30 p. m. each day. Do not syringe the plants over. This is liable to cause spotting of the foliage; but keep the atmosphere saturated with moisture. The pots are now becoming well filled with roots, and something more than clean water is wanted to build up strong bulbs. Cow or sheep manure water twice a week in moderate doses is the best food. Chemicals will only work injury. Be sure to keep on a little fire heat, except on the warmest nights, so that the house may never feel clammy in the morning. It should be warm and genial, or the plants will not thrive. C.

DENDROBIUM SCHNEIDERIANUM

Dendrobium Schneiderianum is one of the largest and showiest of all the hybrid dendrobiums. The flowers are fairly intermediate and characteristic of the two parents, D. Findlayanum and D. aureum, the rather wide, flat flowers containing a good deal of yellow. The illustration shows the form giganteum, in which the flowers are much larger than in the type, originally raised by Hardy. This is a winter bloomer, coming in with the various forms of nobile and requiring similar treatment to flower it well.

W. N. CRAIG.

DISBUDDING.

When to Do It.

Disbudding, as practiced by up-to-date growers, requires some study and care in order to get the best results from the operation. Some growers even yet, and especially where new varieties are in question, disbud by simply nipping out the bud as soon as it is formed. As the wood at this stage is soft and the eyes are far from ripe, the result is usually a crop of lateral buds of little or no use commercially, and incapable of forming eyes fit to produce long stems with good buds for a future crop. By allowing the bud to remain on the stem until it shows color, the stem becomes woody, and consequently the eyes have time to develop and ripen and attain a condition that by proper selection will produce long stems and good buds.

In selecting the eyes to be left, the variety of the stock must be considered, as it is not always profitable to treat all varieties alike in this respect. In soft wooded roses, such as Chatenay, where the growth is rank, it is better to leave five or six buds, while in such hard wooded varieties as Richmond and Liberty three eyes are sufficient.

A Crop For Thanksgiving.

To secure a crop for Thanksgiving, calculations should be made as to the time required to develop a crop after disbudding, so that the crop may be on time.

Where the plants are robust and a temperature of 56 to 58 degrees at night, with a day temperature of 75 to 80 degrees during bright weather, is maintained, it requires about six weeks to develop a crop on the varieties mentioned, and it is good policy to allow even a week more of a margin, to be certain.

As the nights begin to get cool, sometimes accompanied by showers, ventilation requires greater attention, and it is frequently advisable to resort to firing to keep the atmosphere in tone. By care and attention to ventilation and to the quality of the atmosphere in the house, a great many of the ills which the rose is heir to can be obviated. Ribes.

CARE OF OLD ROSE PLANTS.

I wish to ask for information in regard to caring for old plants. I have a few benches of Richmond, Killarney, Maid, Bride and Golden Gate, which I had planned to grow another year. I rested these during May, removed about one inch of soil from the benches and replaced with fresh soil, then cut the plants back and started them up about the middle of June. The buds have been pinched twice, and in some instances three times, and I think that I will let the next bud flower. About two weeks ago I gave all the plants a good mulching of well rotted cow manure.

Will it be advisable to apply the commercial fertilizer, dry blood, at this time to make better flowers? Please state the properties contained in dry blood and when it should be used on the young plants, as well as on the old ones. Also in regard to this budding of young roses, is it best to let the bud mature before cutting it out, or are there any evil effects from pinching it when it first appears? A. G. L.

So far these roses have been treated all right, although it might have been better to remove a little more of the top soil.

In regard to disbudding, that has to be regulated in a great measure by the time the first cut is required. From the time of the disbudding, it requires at this season at least six weeks to develop a crop.

There will be no need to apply any of the commercial fertilizers until the present feeding (mulch) has been partly exhausted. It would be better, while the first crop is maturing, to apply a little feeding in a liquid form.

Dried blood is a rich manure and should be applied sparingly, especially to plants under glass during hot weather. When thoroughly dried it contains: Carbon, 51.950; hydrogen, 7.165; nitrogen, 17.172; oxygen, 19.295; ashes, 4.418. The ashes contain various salts, as chloride of sodium and phosphate of lime, with a little oxide of iron. Ribes.

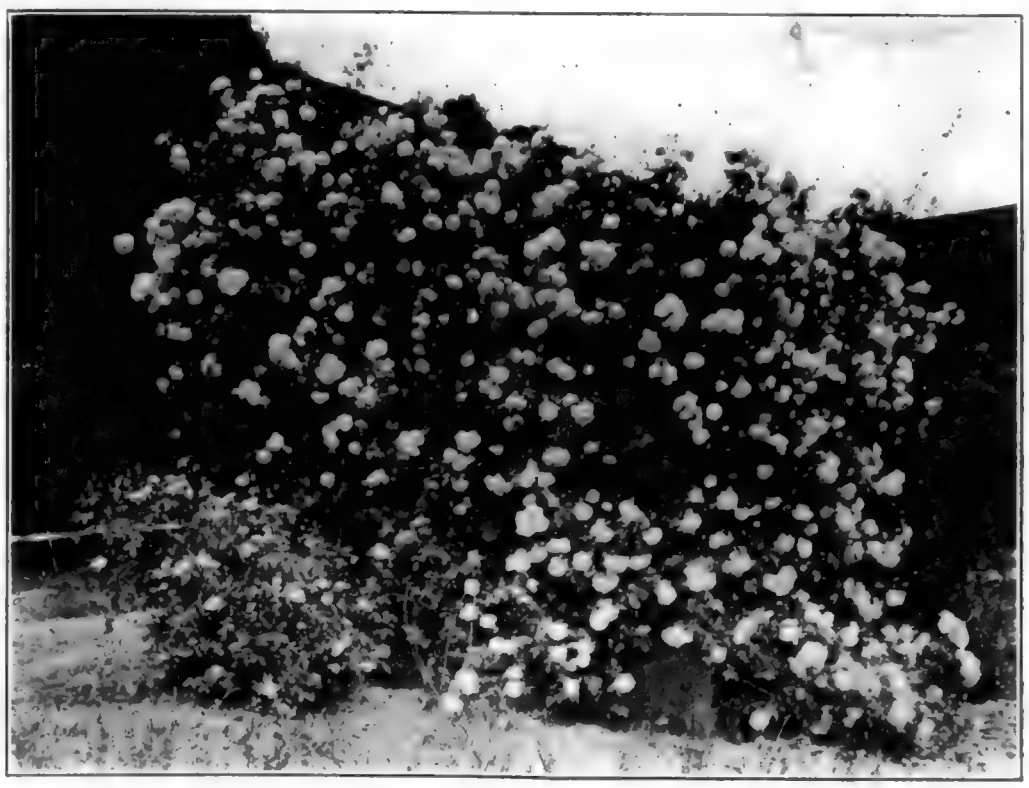
ROSE LAMARQUE.

Lamarque stands at the head of the list of climbing roses for California. It is not only a vigorous grower and free bloomer, but the flowers average high in quality. I have never seen blooms of Lamarque that were of finer quality than those on the plants shown in the photograph, not excepting those grown under glass in the east in past years. The plants shown have nearly covered my woodshed in five years from the cutting.

This rose propagates most readily here, around Monterey Bay. I inserted 114 cuttings in a row in the garden in January, and 102 rooted and made good plants without further attention.

G. L. G.

GLOXINIAS AFTER FLOWERING.



What should be done with gloxinias when they have finished blooming?

A. F. C.

Do not suddenly withhold all water, as is too often done, or you will ruin the plants. Gradually reduce the supply of moisture at the roots. Keep the plants where they can get plenty of sunshine, and after the foliage has all ripened, store the pots away in a dry shed or room where the winter temperature will not fall below 50 degrees. Often the pots are laid on their sides below benches. This is convenient, but decidedly slovenly. In such places such vermin as sow bugs are likely to burrow into the soil and destroy many of the tubers. If you wish to economize space, the tubers can be shaken out and stored in dry sand over winter. C. W.

Wickford, R. I.—Peter S. Byrnes is building two greenhouses at his place on West Main street.

Marshfield, Wis.—R. I. Macklin has enlarged office, store and boiler room and will add to his glass.

Rose Lamarque.

Establishment of Henry E. Reimers, Spokane, Wash.

A SPOKANE ESTABLISHMENT.

About five years ago Henry E. Reimers started what is today one of the most up-to-date greenhouse establishments in the Pacific northwest, at Spokane, Wash. The present range of glass consists of one house 30x240, one 26x240, two 16x100 and one 10x100. The accompanying illustration is from snapshots recently taken at the place. One view shows the admirable location, on a side hill with southern exposure, just outside of town —they call it Sunny Slope addition.

Mr. Reimers does an exclusively wholesale cut flower business in his well equipped plant. The crops grown are principally roses, carnations and chrysanthemums, with lilies taking the places made vacant by the cutting of the mums. A general line of pot plants also is grown.

Not many eastern members of the craft appreciate how fast the Pacific northwest is growing, floriculturally as well as otherwise.

THE OLDEST POTTER.

Christian F. Keller established in Norristown, nearly fifty years ago, the pottery business which is carried on so successfully by his sons today. When Mr. Keller first started in business glass and chinaware were so expensive that pottery was much in vogue for general purposes. After the war was over the prices on glass and china were reduced. Gradually the sale of pottery became restricted.

Mr. Keller's three sons, Edward, Charles and William, were admitted to the business when they reached manhood. It was decided a few years later to specialize on flower pots and pans, and on these lines a splendid business has been built up. The factory has been enlarged; new machinery has been installed; the business in all departments has kept abreast of the times.

Mr. Keller, hale and hearty, sometimes drops in at his sons' establishment, adding to the pleasure of visitors by his kindly greeting. PHIL.

SOUTH ROYALSTON, MASS. — A contractor with a gang of eight men is excavating for two greenhouses to be built by E. B. Hanson at this place.

EUROPEAN NOTES.

International Visits and Shows.

A large party of French horticulturists have been touring in Germany, visiting many of the leading nurseries. They returned to their respective homes early in August, in time to receive British horticulturists, who traveled in France from August 7 to 17, visiting all the principal nurseries in Caen, Ussy, Angers and Orleans, as well as places of interest in and around Paris. These international visits may be summed up in the words of the couplet:

Christian F. Keller.

"Behold in these what leisure hours demand,
Amusement and instruction hand in hand."

Among important international exhibitions, visitors to Europe should make a note of the exhibition now being held at Nancy, France, which runs until the end of September; the Zeist, Holland, exhibition, from August 25 to September 16; Haarlem, Holland, in March and April, 1910; Brussels, Belgium, which will be opened in May, 1910, and run on a gigantic scale. Then, for 1911, the Royal Horticultural Society of England has a movement on foot to hold an international exhibition in London, and preparations are being made at Florence, Italy, for 1911 also, including the following sections: Ornamental plants of recent introduction, colonial plants, landscape gardening, history of gardening, packing fruits, flowers, vegetables, seeds, etc., for transport.

After thirty years of active work, Paul Mann, a brother of the founder of the firm of Otto Mann, Leipzig, Germany, well known in the lily of the valley export trade, retires from the business on account of ill health, and Rudolf Mann, a son of the founder, becomes a partner.

Ernst Heupel has joined the firm of Herr Sievers, at Halstenbek, Germany, and the title of the firm is now altered to Sievers & Heupel, Halstenbek.

Among the Recent Introductions.

At a congress of German rose growers recently held at Sangerhausen, a diploma was awarded to Hermann Kiesse for Rose Leuchtfeur, a hybrid from Gruss an Teplitz, and on the proposition of H. Pfitzer, of Stuttgart, Lambert's rose, Frau Karl Druschki, was awarded a silver gilt medal. This award comes somewhat late in the day, but H. Pfitzer, in referring to the popularity of the variety, stated that its merits were not observed when it first came before the society. It was stated that the new Rosa canina hybrids obtained by crossing R. canina with R. Wichuraiana and other hardy species are expected to give splendid results.

The new nephrolepis which has been put into commerce by Herman Scholzel, namely, Nephrolepis Scholzeli, is a fringed sport from N. Scottii and is of erect, compact habit. On account of its many good qualities, it should become popular in Europe.

DISBUDDING.

When to Do It.

Disbudding, as practiced by up-to-date growers, requires some study and care in order to get the best results from the operation. Some growers even yet, and especially where new varieties are in question, disbud by simply nipping out the bud as soon as it is formed. As the wood at this stage is soft and the eyes are far from ripe, the result is usually a crop of lateral buds of little or no use commercially, and incapable of forming eyes fit to produce long stems with good buds for a future crop. By allowing the bud to remain on the stem until it shows color, the stem becomes woody, and consequently the eyes have time to develop and ripen and attain a condition that by proper selection will produce long stems and good buds.

In selecting the eyes to be left, the variety of the stock must be considered, as it is not always profitable to treat all varieties alike in this respect. In soft wooded roses, such as Chatenay, where the growth is rank, it is better to leave five or six buds, while in such hard wooded varieties as Richmond and Liberty three eyes are sufficient.

A Crop For Thanksgiving.

To secure a crop for Thanksgiving, calculations should be made as to the time required to develop a crop after disbudding, so that the crop may be on time.

Where the plants are robust and a temperature of 56 to 58 degrees at night, with a day temperature of 75 to 80 degrees during bright weather, is maintained, it requires about six weeks to develop a crop on the varieties mentioned, and it is good policy to allow even a week more of a margin, to be certain.

As the nights begin to get cool, sometimes accompanied by showers, ventilation requires greater attention, and it is frequently advisable to resort to firing to keep the atmosphere in tone. By care and attention to ventilation and to the quality of the atmosphere in the house, a great many of the ills which the rose is heir to can be obviated. Ribes.

Among the Recent Introductions.

At a congress of German rose growers recently held at Sangerhausen, a diploma was awarded to Hermann Kiesse for Rose Leuchtfeur, a hybrid from Gruss an Teplitz, and on the proposition of H. Pfitzer, of Stuttgart, Lambert's rose, Frau Karl Druschki, was awarded a silver gilt medal. This award comes somewhat late in the day, but H. Pfitzer, in referring to the popularity of the variety, stated that its merits were not observed when it first came before the society. It was stated that the new Rosa canina hybrids obtained by crossing R. canina with R. Wichuraiana and other hardy species are expected to give splendid results.

The new nephrolepis which has been put into commerce by Herman Scholzel, namely, Nephrolepis Scholzeli, is a fringed sport from N. Scottii and is of erect, compact habit. On account of its many good qualities, it should become popular in Europe.

Emile Vercanteren, Melle, Ghent, Belgium, is now putting into commerce his new variegated Dracæna Bruanti, under the name of Souvenir de Francois Buysse. It has been awarded silver gilt medals at Ghent, London and Berlin. The metallic green foliage is richly marked with variegations in white, orange and pink. The brilliant and unique coloring of the leaves and the constitution of Bruanti make the plant a most valuable one for decorative purposes.

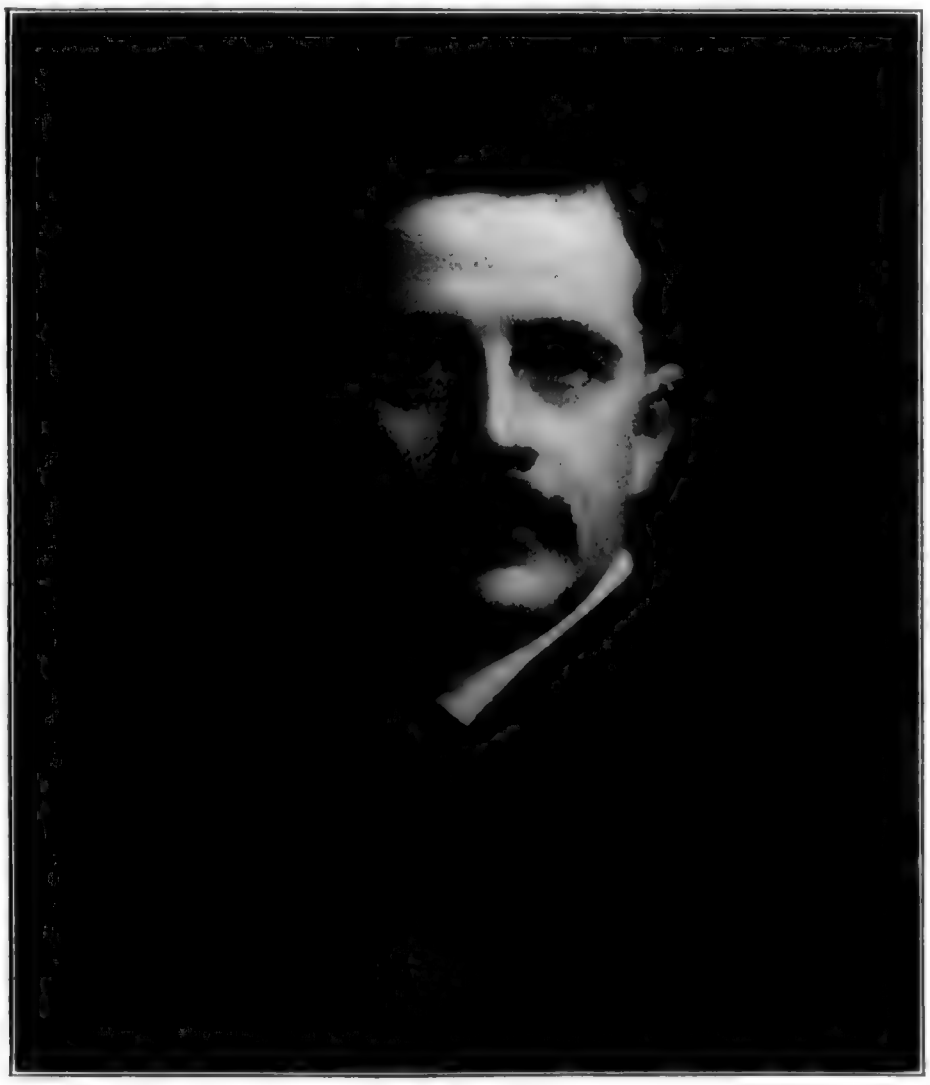
Carnations for Bedding Out.

Carnation enthusiasts in English gardening journals have for some time advocated the merits of American carnations for summer flowering outdoors, and go-ahead firms catalogue and recommend them as bedding out plants. At several exhibitions this summer, blooms cut from plants grown in the open have been shown. The Perpetual Flowering Carnation Society arranged early in the year to bed out a number of varieties. The trial is now being conducted by E. F. Hawes, at the Royal Botanic Gardens, London, and a special committee has been appointed to tabulate the results.

BEE.

SLUGS IN A LATH HOUSE.

Please tell me how to exterminate slugs in a lath house devoted to ferns and begonias. A. L. H.



Corn meal mixed with Paris green is sometimes an attractive bait for slugs, capture many of the slugs. A narrow band of dry slaked lime around the wall of the lath house will also prevent many of the slugs from entering the structure, the dry lime being very offensive to them.

W. H. T.

NEW DETROIT OFFICERS.

The Detroit Florists' Club is one of the most active and successful in the United States. It has been the good fortune of the organization to have the services, as officers, of some of the best men in the trade, several of whom have been called to perform similar duties in the national trade organizations. At the July meeting Charles Plumb, a charter member, was called to the chair and Hugo Schroeter and Robert Rahaley, two of the younger members, were elected secretary and treasurer respectively, with G. E. Browne vice-president.

Charles H. Plumb was born at Egham, Surrey, England, May 18, 1866, and spent his boyhood at Cobham. He commenced his horticultural career in 1879, working in private establishments. After seven years spent in the private gardens of Silvermere, Cobham and St. George's Hall, Weybridge, he entered the Royal Botanical Gardens, at Kew, in April, 1886. Here he took the full botanical course, and in September, 1889, was appointed by the British government as curator of the botanic stations of St. Kitts, Nevis, West Indies. Leaving the West Indies for the United States in 1893, he immediately entered the employ of the park and boulevard commissioners at Detroit. In 1896 he left their employ to enter into business for himself as a florist, at his present location.

Charles Plumb.

Hugo Schroeter was born in Detroit, October 21, 1878. After leaving school, in 1905, he entered the employ of the Edison Illuminating Co., working at the electrical business for three years. In 1908 he began working in his father's greenhouses, where he put in several years, finally ending up in the store end of the business, where he has been ever since. About four years ago he was asked to become Detroit correspondent for the REVIEW, which position he has filled most acceptably ever since. He says he must confess that it is this association with the REVIEW which has given him whatever fitness he may possess for holding the office of secretary of the Detroit Florists' Club. In the year 1902 he accepted a position with Siebrecht & Sons, in their New York store, and then went to Newport, R. I., where he put in a season among the four hundred, also in the employ of the Siebrechts. It was in Newport that he met the young lady who later became his wife, and, Mr. Schroeter adds, they have lived happily ever since."

Robert M. Rahaley is a native of Detroit, born October 29, 1880. He started in life as a bookkeeper for the Calvert Lithographing Co., of Detroit, in 1898, and left there after four and one-half years' service to enter the employ of the Michigan Cut Flower Exchange as bookkeeper seven years ago. When the park commissioner, Philip Breitmeyer, now mayor of Detroit, appointed William Dilger to the office of superintendent of parks and boulevards four years ago, Mr. Rahaley was appointed manager of the Michigan Cut Flower Exchange, which position he is now filling. Last April he decided to take unto himself a wife and is now managing two concerns. Mr. Rahaley is quite a diplomat and his pleasant smile acts as does oil upon water when the growers, retailers and fakers take opposite views of a situation.

George E. Browne, the new vice-president, is 39 years of age and has greenhouses at Greenfield, Mich., where he grows mainly carnations and mums for the Detroit market.

The club's new officers will be installed the first meeting in September.

OBITUARY.

John Snyder.

John Snyder, 58 years old, who for more than twenty years operated a flower store at 921 Walnut street, in Kansas City, died at 3:15 o'clock Thursday morning, August 5, from injuries sustained by being thrown from his market wagon near his home, Seventy-second and Oak streets, the previous afternoon. Mr. Snyder had sold some produce from his garden at the city market and was returning home when another wagon collided with him and he was thrown violently to the ground. Concussion of the brain resulted in hemorrhage and Mr. Snyder scarcely regained consciousness.

The dead man was born in Germany. Since giving up the flower store on Walnut street five years ago he visited that country, staying nearly a year. He had lived in Kansas City thirty-five years.

Besides his widow, Emma Snyder, three children survive: John and Mamie Snyder, of Seattle, Wash., and Henry Snyder, living at home.

Funeral services were conducted from the home at 2:30 o'clock Sunday afternoon, August 8, by the Rev. Louis J. Schwartz, pastor of the Lutheran church. Burial was in Forest Hill cemetery.

and crushed moth balls sprinkled about among the plants are offensive to these pests. Vegetable traps, in the form of cabbage or lettuce leaves, laid among the plants and examined two or three times a day and also in the evening, will help to

Robert M. Rahaley.

Edward M. Lyman.

Edward M. Lyman, founder of the firm of Edward M. Lyman & Son, seedsmen at Springfield, Mass., died Sunday, August 1, at the age of 84 years. He had been in fairly good health until two weeks previous to his death. He was engaged in the business of growing and selling seeds for about seventy years and had resided for more than half a century in Springfield.

He was born in South Hadley, Mass., May 13, 1825, the son of Israel Lyman, a farmer in that town. He was the youngest of twelve children, all of whom are now dead. He came of sturdy Puritan stock, his first American ancestor having sailed from England in 1631. He was related on his mother's side to Dwight L. Moody, the evangelist. His father died when he was a boy of 11, and he had to go to work for a living. He worked for seventeen years at the Shaker settlement in Enfield, Conn., where the Shakers made a business of raising and selling seeds. He received only his board and lodging and clothing for this work. He was employed in the department of raising and packing seeds for the market, and later became salesman for the community. With the Shakers he received the thorough training that proved to be the foundation for his successful business career as a seed raiser and packer.

He removed to Springfield in 1854 and started a seed business of his own on a small scale. His first store was at the corner of Main and Ferry streets, and he conducted a retail and wholesale department there. He soon found, however, that the retail department did not pay, as there was so much competition in town. He accordingly gave up the retail end of the business and moved to the present location on Charles street. Here the business grew under his direction, until it is now one of the leading seed establishments in the country. He gave special attention to the introduction of foreign seeds, and visited Europe, where he spent much time securing seeds for cultivation in this country. He was responsible for many of the improvements in the seed business that have been made in the last fifty years.

Mr. Lyman retired from active business several years ago, and the business has since been managed by his son, Albert E. Lyman. In November, 1908, the firm of E. M. Lyman & Son was incorporated.

April 1, 1854, Mr. Lyman married Caroline, daughter of Roswell Blodgett, of Holland. A second marriage, on June 9, 1886, was to Elizabeth, the daughter of John Bayliss. She survives him, as does the son, Albert E., the president of the company. He also leaves five grandchildren, Miss Ruth and Lyman Elmer, and the Misses Marjorie B. and Mildred E., and Albert E. Lyman, Jr., all of Springfield.

GREENFIELD, MASS. — The Greenfield Specialty Floral Co., of which G. J. Stark is manager, has shipped quantities of sweet peas and other flowers this season. The firm's gardens are particularly attractive.

WHEELING, W. VA.—John Dieckmann & Co., the florists on Raymond street, are building a range of greenhouses on the property they recently purchased at Park View. Two houses have been completed and two more are in process of construction.

ATHOL, MASS.—George W. Sutherland has nearly completed a fine brick smokestack, sixty feet high, in connection with his new steam plant for heating his greenhouses and residence, on South Main street. This completes a number of enlargements and improvements that have recently been made by Mr. Sutherland.

Hugo Schroeter.

Emile Vercanteren, Melle, Ghent, Belgium, is now putting into commerce his new variegated Dracæna Bruanti, under the name of Souvenir de Francois Buysse. It has been awarded silver gilt medals at Ghent, London and Berlin. The metallic green foliage is richly marked with variegations in white, orange and pink. The brilliant and unique coloring of the leaves and the constitution of Bruanti make the plant a most valuable one for decorative purposes.

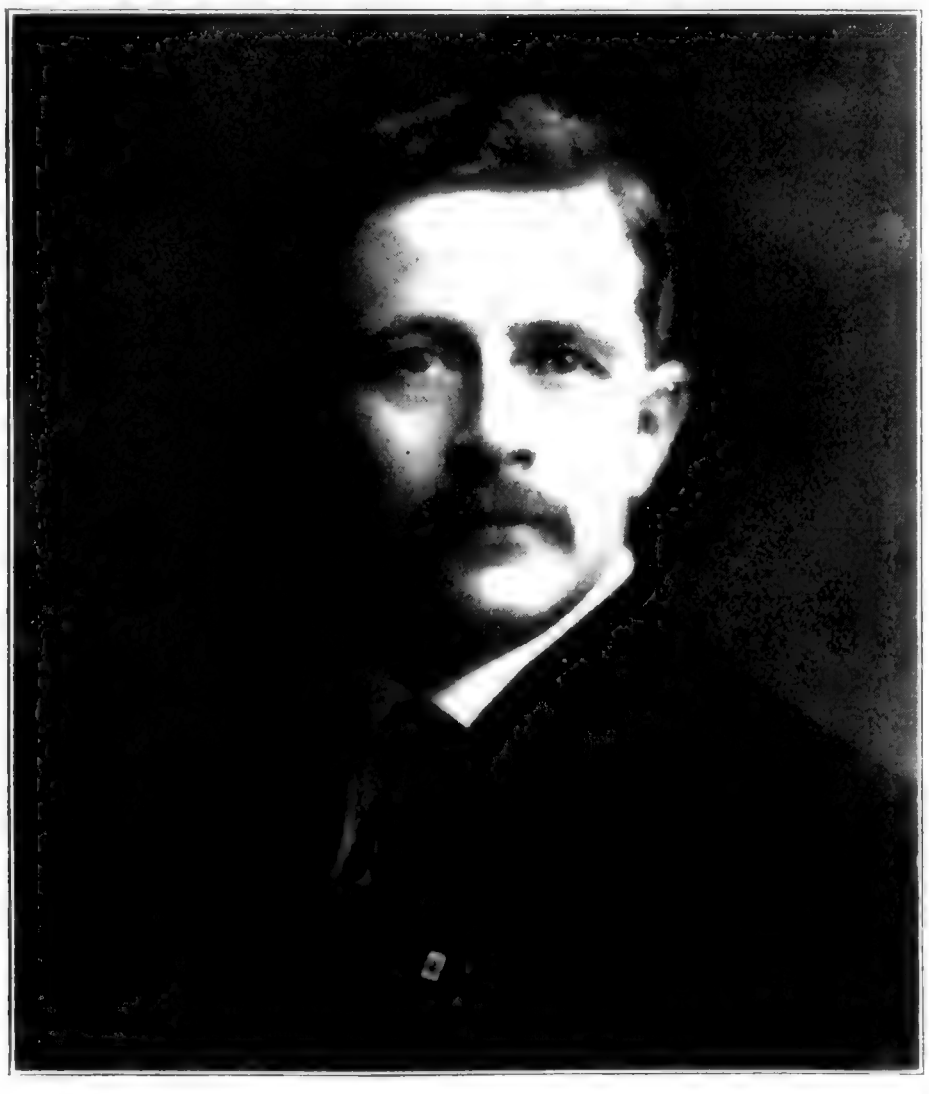
Carnations for Bedding Out.

Carnation enthusiasts in English gardening journals have for some time advocated the merits of American carnations for summer flowering outdoors, and go-ahead firms catalogue and recommend them as bedding out plants. At several exhibitions this summer, blooms cut from plants grown in the open have been shown. The Perpetual Flowering Carnation Society arranged early in the year to bed out a number of varieties. The trial is now being conducted by E. F. Hawes, at the Royal Botanic Gardens, London, and a special committee has been appointed to tabulate the results.

Bee.

SLUGS IN A LATH HOUSE.

Please tell me how to exterminate slugs in a lath house devoted to ferns and begonias. A. L. H.



Corn meal mixed with Paris green is sometimes an attractive bait for slugs, and crushed moth balls sprinkled about among the plants are offensive to these pests. Vegetable traps, in the form of cabbage or lettuce leaves, laid among the plants and examined two or three times a day and also in the evening, will help to capture many of the slugs. A narrow band of dry slaked lime around the wall of the lath house will also prevent many of the slugs from entering the structure, the dry lime being very offensive to them.

W. H. T.

NEW DETROIT OFFICERS.

The Detroit Florists' Club is one of the most active and successful in the United States. It has been the good fortune of the organization to have the services, as officers, of some of the best men in the trade, several of whom have been called to perform similar duties in the national trade organizations. At the July meeting Charles Plumb, a charter member, was called to the chair and Hugo Schroeter and Robert Rahaley, two of the younger members, were elected secretary and treasurer respectively, with G. E. Browne vice-president.

Charles H. Plumb was born at Egham, Surrey, England, May 18, 1866, and spent his boyhood at Cobham. He commenced his horticultural career in 1879, working in private establishments. After seven years spent in the private gardens of Silvermere, Cobham and St. George's Hall, Weybridge, he entered the Royal Botanical Gardens, at Kew, in April, 1886. Here he took the full botanical course, and in September, 1889, was appointed by the British government as curator of the botanic stations of St. Kitts, Nevis, West Indies. Leaving the West Indies for the United States in 1893, he immediately entered the employ of the park and boulevard commissioners at Detroit. In 1896 he left their employ to enter into business for himself as a florist, at his present location.

Charles Plumb.

Hugo Schroeter was born in Detroit, October 21, 1878. After leaving school, in 1905, he entered the employ of [illegible] Edison Illuminating Co., working at [illegible] electrical business for three years. [illegible] 1908 he began working in his fath[illegible]'s greenhouses, where he put in sev[illegible]al years, finally ending up in the store [illegible] of the business, where he has been [illegible] since. About four years ago he [illegible] asked to become Detroit correspond[illegible]t for the Review, which position he [illegible] filled most acceptably ever since. [illegible] says he must confess that it is this as[illegible]sociation with the Review which has gi[illegible]n him whatever fitness he may possess [illegible] holding the office of secretary of the [illegible]troit Florists' Club. In the year 19[illegible]2 he accepted a position with Siebrecht [illegible]c Sons, in their New York store, and th[illegible]n went to Newport, R. I., where he put [illegible] a season among the four hundred, a[illegible]s in the employ of the Siebrechts. It w[illegible]s in Newport that he met the young la[illegible] who later became his wife, and, [illegible]M Schroeter adds, they have lived ha[illegible]p pily ever since.''

Robert M. Rahaley is a native of [illegible]troit, born October 29, 1880. He starte[illegible]d in life as a bookkeeper for the Calve[illegible] Litnographing Co., of Detroit, in 189[illegible] and left there after four and one-ha[illegible]lf years' service to enter the employ [illegible]of the Michigan Cut Flower Exchange [illegible]as bookkeeper seven years ago. When th[illegible]e park commissioner, Philip Breitmeye[illegible]r, now mayor of Detroit, appointed Willia[illegible]m Dilger to the office of superintendent [illegible]of parks and boulevards four years ago, M[illegible]r. Rahaley was appointed manager of th[illegible]e Michigan Cut Flower Exchange, whic[illegible]h position he is now filling. Last Apri[illegible]l he decided to take unto himself a wife[illegible] and is now managing two concerns. M[illegible]r. Rahaley is quite a diplomat and his plea[illegible]s ant smile acts as does oil upon wate[illegible]r when the growers, retailers and fakers take opposite views of a situation.

George E. Browne, the new vice-pres[illegible]ident, is 39 years of age and has green[illegible]houses at Greenfield, Mich., where h[illegible]e grows mainly carnations and mums fo[illegible]r the Detroit market.

The club's new officers will be in[illegible]stalled the first meeting in September.

OBITUARY.

John Snyder.

John Snyder, 58 years old, who fo[illegible] more than twenty years operated a flowe[illegible]r store at 921 Walnut street, in Kansa[illegible] City, died at 3:15 o'clock Thursday morn[illegible]ing, August 5, from injuries sustained by being thrown from his market wagon near his home, Seventy-second and Oak streets, the previous afternoon. Mr. Snyder had sold some produce from his garden at the city market and was returning home when another wagon collided with him and he was thrown violently to the ground. Concussion of the brain resulted in hemorrhage and Mr. Snyder scarcely regained consciousness.

The dead man was born in Germany. Since giving up the flower store on Walnut street five years ago he visited that country, staying nearly a year. He had lived in Kansas City thirty-five years.

Besides his widow, Emma Snyder, three children survive: John and Mamie Snyder, of Seattle, Wash., and Henry Snyder, living at home.

Funeral services were conducted from the home at 2:30 o'clock Sunday afternoon, August 8, by the Rev. Louis J. Schwartz, pastor of the Lutheran church. Burial was in Forest Hill cemetery.

Robert M. Rahaley.

Edward M. Lyman.

Edward M. Lyman, founder of the firm of Edward M. Lyman & Son, seedsmen at Springfield, Mass., died Sunday, August 1, at the age of 84 years. He had been in fairly good health until two weeks previous to his death. He was engaged in the business of growing and selling seeds for about seventy years and had resided for more than half a century in Springfield.

He was born in South Hadley, Mass., May 13, 1825, the son of Israel Lyman, a farmer in that town. He was the youngest of twelve children, all of whom are now dead. He came of sturdy Puritan stock, his first American ancestor having sailed from England in 1631. He was related on his mother's side to Dwight L. Moody, the evangelist. His father died when he was a boy of 11, and he had to go to work for a living. He worked for seventeen years at the Shaker settlement in Enfield, Conn., where the Shakers made a business of raising and selling seeds. He received only his board and lodging and clothing for this work. He was employed in the department of raising and packing seeds for the market, and later became salesman for the community. With the Shakers he received the thorough training that proved to be the foundation for his successful business career as a seed raiser and seeker.

He removed to Springfield in 1854 and started a seed business of his own on a small scale. His first store was at the corner of Main and Ferry streets, and he conducted a retail and wholesale department there. He soon found, however, that the retail department did not pay, as there was so much competition in town. He accordingly gave up the retail end of the business and moved to the present location on Charles street. Here the business grew under his direction, until it is now one of the leading seed establishments in the country. He gave special attention to the introduction of foreign seeds, and visited Europe, where he spent much time securing seeds for cultivation in this country. He was responsible for many of the improvements in the seed business that have been made in the last fifty years.

Mr. Lyman retired from active business several years ago, and the business has since been managed by his son, Albert E. Lyman. In November, 1908, the firm of E. M. Lyman & Son was incorporated.

April 1, 1854, Mr. Lyman married Caroline, daughter of Roswell Blodgett, of Holland. A second marriage, on June 9, 1886, was to Elizabeth, the daughter of John Bayliss. She survives him, as does the son, Albert E., the president of the company. He also leaves five grandchildren, Miss Ruth and Lyman Elmer, and the Misses Marjorie B. and Mildred E., and Albert E. Lyman, Jr., all of Springfield.

GREENFIELD, MASS. — The Greenfield Specialty Floral Co., of which G. J. Stark is manager, has shipped quantities of sweet peas and other flowers this season. The firm's gardens are particularly attractive.

WHEELING, W. VA.—John Dieckmann & Co., the florists on Raymond street, are building a range of greenhouses on the property they recently purchased at Park View. Two houses have been completed and two more are in process of construction.

ATHOL, MASS.—George W. Sutherland has nearly completed a fine brick smokestack, sixty feet high, in connection with his new steam plant for heating his greenhouses and residence, on South Main street. This completes a number of enlargements and improvements that have recently been made by Mr. Sutherland.

Hugo Schroeter.

SOCIETY OF AMERICAN FLORISTS.

President Valentine has appointed the following committee on Discussion of the President's Address: P. O'Mara, chairman; W. J. Stewart, E. G. Hill, J. G. Esler, A. Gude, J. F. Ammann, J. F. Sullivan, W. N. Rudd.

W. N. Rudd, Sec'y.

August 9, 1909.

THAT SECRETARYSHIP.

Is the Salary Adequate?

I should like to be placed on record as most sincerely and emphatically indorsing the sentiment and much of the substance of Mr. Rudd's statement concerning the secretaryship of the S. A. F., published in the last issue of the Review. I also desire to express my appreciation of Mr. Rudd's high sense of public duty, and sincerely hope that all the members who may be present at the coming convention may be imbued with an equally high sense of that duty, and that when the time comes for making a choice of the men for the various offices, all will sink personal and selfish desires and consider the welfare of the society only.

Does not Mr. Rudd's statement, that "the right man can do $1,500 worth of work and then feel dissatisfied with himself that he has been unable to take up many things that would undoubtedly in the future advance the society's interest and increase its membership," raise a question as to the wisdom of the society paying $1,000 only? If, as Mr. Rudd states, "no man engaged in active business, either as proprietor or employee, can take up this work and carry it out so that the society may achieve the success which is within its grasp, unless he grossly neglects his own business," the only logical inference is that a man must give practically his entire time to the work. Now, can a man with the required energy, intelligence and ability afford to give his entire time to the work for the sum paid? I think that this is a phase of the subject that the society will do well to consider. I. L. Powell.

Approves Bunyard's Candidacy.

I have read with regret Mr. Rudd's letter, declining a renomination for secretary of the S. A. F. The wisdom of his remarks carries great weight and will doubtless set members thinking.

I note that our eastern friends have advanced Harry A. Bunyard for the position. I have known Mr. Bunyard for nearly twenty years, during which time I have known him to be a man of strict integrity, and a sincere and tireless worker. If Mr. Rudd had him in mind when writing his letter, he could not have outlined work more fitted for responsive result than to Mr. Bunyard. He meets everybody, is an all-round, practical horticulturist and knows how to "do things." Unless there is a stronger candidate put forward, I shall certainly do what I can to help his candidacy.

Philip Breitmeyer.

Regrets Rudd's Resolve.

Harry A. Bunyard, under date of August 7, sent out the following letter:

"All members of the S. A. F. will join with me in regretting the fact that Mr. W. N. Rudd will not allow his name to be used for reëlection as secretary of our society. His earnestness and strength as an organizer were never better demonstrated than while holding this responsible position.

"When my friends called and asked me to allow my name to be used as a candidate for secretary, it was with the full understanding that Mr. Rudd's decision was final. I appreciate the responsibility, the work and the necessary qualifications to hold the position as secretary, and have made up my mind that if elected the work of the society shall be done promptly and well.

"I take this opportunity of sincerely thanking my friends in advance for their interest in my behalf.

"Harry A. Bunyard."

THE CINCINNATI SOUVENIR.

The Cincinnati Florists' Society has issued a beautifully printed souvenir of the city. There is an article on the history of the city, one on the history of the S. A. F. by W. J. Stewart, one on the Cincinnati Florists' Society by Henry Schwartz, and then each right-hand page carries a beautiful halftone picture of some building or point of interest, with trade advertisements on the opposite page.

The committee in charge, D. Carmichael, J. W. Rodgers and Geo. S. Bartlett, has done its work well.

Don't Forget:—

THE SPECIAL CONVENTION NUMBER OF THE REVIEW

comes out August 19, with a full report of the 25th Annual Convention of the S. A. F. at Cincinnati. Advertisers should send "copy" at once if they do not want to miss

THE BEST ISSUE OF THE SEASON

ROCHESTER WANTS CONVENTION

Rochester is out after the 1910 convention of the Society of American Florists. Buttons were distributed during the last week to the delegations from New York, Baltimore, Cincinnati and other cities. A large delegation from Rochester promises to be on the ground during the Cincinnati convention.

Rochester is trying to get a reputation as a convention city. Last year a convention hall was built that would seat 4,000 persons. Not satisfied with this the city was importuned to build a one-hundred-thousand-dollar addition, which gives free to all conventions a combined convention and exhibition hall approximating 48,000 square feet of floor space. Of this space 14,000 feet is for the general assembly and 34,000 feet for trades displays.

In the circulars sent out by the Rochester Chamber of Commerce these immense halls are offered free to all visiting conventions, heat and light included. "We will get you sooner or later, so you might as well make it 'next time,'" is one of the terse sentences that strike the eye of the reader.

"Rochester owes much of her prosperity to the florists," writes Woodworth Clum, publicity secretary of the Chamber of Commerce. Her fame as the Flower City has been spread broadcast and we are shipping flowers, trees and plants to the corners of the earth.

"We are especially anxious to have the florists with us in 1910 and we will show them the time of their lives. We will have a delegation of 'live ones' in Cincinnati and if the convention does not come to Rochester in 1910, it will not be our fault."

A WORD FROM MONTREAL.

Montreal wants the Society of American Florists' convention next year. Will you please make a note of same in your next issue? Our population is now one-half million. Our magnificent harbor, Lachine rapids, Mount Royal park on Mount Royal, overlooking the city; trout and salmon fishing in vicinity. Splendid hotel accommodation and halls for convention and trade exhibit easy to procure. Only a night journey from New York, Boston, Buffalo, etc.

Hall & Robinson.

LADIES' S. A. F.

The Ladies' S. A. F. will give a reception Wednesday evening, August 18, from 9:30 to 11:30 at the Sinton hotel. Refreshments will be served.

Mrs. J. C. Vaughan, Pres.
Mrs. Chas. H. Maynard, Sec'y.

AMERICAN ROSE SOCIETY.

During the S. A. F. convention, at Cincinnati, by order of President August F. Poehlmann, there will be held a meeting of the American Rose Society. All members present at the convention will please make it a point to attend. Various matters of much importance will be brought up, and every person interested in any way in roses is invited to join this society. The preliminary schedule has been issued.

Benjamin Hammond, Secretary.

NOW FOR THE CONVENTION.

Cincinnati Extends a Welcome.

By the time that this issue of the Review is in the hands of its readers, many will already be packing their trunks and buying their tickets to Cincinnati. The more there are doing this, the better we will like it. It is to them especially that we address the following, but if at the same time someone should read this who has not yet been able to make up his mind to come, we hope that it may be likened to the straw that broke the camel's back and be the one thing that will turn his mind to decide to come to Cincinnati. We want to give a sort of idea of what the visitor may expect to see in this city and a faint idea of what the entertainments will be like. We hope that our little story will be of such influence that all those who

Omaha Florists on Their Recent Outing in Iowa.

are wavering or who have not yet made up their minds will be unable longer to resist the desire to be among that mighty throng of florists, from all parts of this great country, who will so soon be rushing toward this city.

In the first place we will say that Cincinnati, counting the little cities directly across the river which rightly are a part of us, has a population of over half a million. Our city is ideally located, the business districts being upon a level plateau and our residence districts upon the surrounding hill tops. We have a good electric car service, and a few minutes in any direction will take you to the hill tops and into the residence districts, where you will be surprised at the beauty that surrounds you and the ideal conditions for home life that prevail.

Our parks are fine, and in natural beauty they are without a peer in this country. Eden park, on the Gilbert avenue car line, and Burnet Woods, on the Vine-Clifton line, cover a large acreage. There are a great many smaller parks, such as Washington park, Lincoln park and many breathing spots in the thickly populated places, and also playgrounds in the tenement districts.

Amusements and How to Reach Them.

We have quite a number of amusement parks that are up-to-date in every respect. Coney Island is one of the best and is located on the Ohio river, ten miles from the city. Chester park is located on the Winton place or Clark street car lines.

In reference to our street cars, we had better tell you now that every car line in this city passes either directly around Fountain Square, touches one corner of it or comes within one square of it. No matter where you want to go, it is a safe thing to go to Fountain Square for your car. The Ludlow Lagoon is located near Ludlow, Ky. The Ludlow car goes direct to the gates. The Zoölogical Gardens constitute the headliner in the way of gardens. Besides the wonderful collection of animals and birds to be seen there, it has a fine club house, concerts twice daily by the most celebrated bands in the world and many other amusements. Then we have our innumerable gardens where the amber fluid flows and where German refreshments can be obtained. These are easily found, and further directions are deemed unnecessary. Just ask a local florist. There are quite a few from out of town who are equally well posted.

As to those who like to ride on the street cars, we will say that the longest rides are on the East End line, the Sedamsville line, the Norwood or the College Hill line. If you wish to see pretty suburban homes, take the Zoo-Eden Park, the Avondale or the Madison Road line. If you want to see how our cars climb the hills, take the Elberon avenue line. At the same time you will get a long ride through a pretty country. Do not forget that we have a liberal transfer system, and on returning from any of these rides you can get a transfer to continue to another one. But be sure to ask for the transfer at the time of paying fare, and also ask as to the transfer point.

If possible, make a visit to the Rookwood Pottery, on the Mt. Auburn car line, and also to the Art Museum, on the Zoo-Eden Park line. We might go on for some time and still not exhaust the list of places where it would be desirable for you to go, but it is doubtful whether

[Continued on page 24.]

OMAHA FLORISTS' OUTING.

The Omaha Florists' Club recently had its annual outing at Lake Manawa, in Iowa, where there are beautiful grounds and every facility for such affairs. It was among the most successful affairs ever held by the club. The accompanying illustration shows the members assembled at the club house where lunch was served. The other picture is from a photograph of a group of the lady clerks from the Omaha Flower Store.

Among the principal events of the day was the bowling contest, in which J. H. Bath had the highest score and won a prize consisting of a fine mirror offered by one of the Omaha glass houses. Miss Gretchen Swoboda won a 5-pound box of candy in the ladies' running race. Arnold Falk won the boys' race. Bathing in the lake was one of the popular events of the day.

ALFALFA.

The Omaha Florists' Club recently had its annual outing at Lake Manawa, in Iowa, where there are beautiful grounds and every facility for such affairs. It was among the most successful affairs ever held by the club. The accompanying illustration shows the members assembled at the club house where lunch was served. The other picture is from a photograph of a group of the lady clerks from the Omaha Flower Store.

Among the principal events of the day was the bowling contest, in which J. H. Bath had the highest score and won a prize consisting of a fine mirror offered by one of the Omaha glass houses. Miss Gretchen Swoboda won a 5 pound box of candy in the ladies' running race. Arnold Falk won the boys' race. Bathing in the lake was one of the popular events of the day.

Results bring advertising.
THE REVIEW brings results.

IF the carnation plants are not yet on the benches, see that they get there at once.

THE cement trust has marked up prices 10 cents a bag, two advances of 5 cents each having been made within a week.

IT is reported Edwin Lonsdale's friends purpose proposing his name at Cincinnati for secretary of the S. A. F.

FIELD-GROWN carnation plants are in good demand, in consequence of the unfavorable season for growth in the field—too dry almost everywhere.

THE new customs duties on bulbs and roots, in a majorty of cases making reductions, went into effect Friday morning, August 6, in exact accordance with the publication made on page 40 of the REVIEW for August 5.

THE better varieties of tulips cost less for duty on the bulbs than they did under the old law, which should work out to the advantage of dealers and public in this country, and also to the advantage of the growers in Holland.

THERE is one kind of plant insurance that everyone who owns a greenhouse should carry—a stock of insecticides constantly on hand, ready for immediate use, bearing in mind that "one ounce of prevention is worth a pound of cure."

WHEN people send photographs to a newspaper they should see to it that there is something on the package by which the sender can be identified. The REVIEW recently has received several photographs, some of them portraits, with nothing whatever by which they could be identified.

THE sixth annual meeting of the American Breeders' Association is called for December 8 to 10, at Omaha, Neb., in association with the National Corn Show held at that place December 6 to 18. A program of addresses by prominent breeders of live stock, prominent breeders of plants, and scientists prominent in the study of the heredity of plants, animals and men is being prepared.

THE READERS' VIEW.

The standing a publication has with its readers has a great deal to do with its value to its advertisers—if they like a paper, the advertisers also are liked:

I enclose $1 for the renewal of my subscription to the Review. It certainly is a fine paper, and no florist or nurseryman should be without it. I will do all in my power to advertise it.—Wm. G. A. Ede, Battle Creek, Mich., August 2, 1909.

I enclose $1, for which send us the Review for another year. It is as good to a man or firm as any paper he could possibly get to assist him.—Charles F. Cutting, Los Angeles, Cal., July 28, 1909.

THE CROPS.

A season of prosperity for the American farmer unequaled in the history of the country is foreshadowed by the present promise for all of the leading cereals, the government crop figures for August, given out August 9, confirming the optimistic early season outlook.

While the August estimate of the government did not equal the sensational promise indicated for corn and oats in the July report, the figures on winter wheat were raised about 35,000,000 bushels. The thrashing returns from the winter wheat belt have exceeded the most roseate hopes of the growers the fore part of the season, and the total crop now estimated—435,000,000 bushels—is practically the same as a year ago, notwithstanding the big decrease in acreage.

The July figures on corn showed a yield of 3,117,000,000 bushels, but the August estimate of 2,945,000,000 bushels, if secured, will be the largest yield on record, comparing with a total of 2,664,000,000 bushels in 1908. The condition showed a drop from 89.3 in July to 84.4, or nearly 5 points, due to drought in some sections and too much moisture in others.

The condition of miscellaneous crops August 1 was figured as follows:

Rice	84.5	Cantaloupes	77.0
Timothy	85.8	Oranges	86.3
Clover hay prod'c'n.	78.7	Lemons	87.0
Quality	89.3	Tomatoes	84.2
Alfalfa	94.4	Cabbages	85.3
Millet	86.7	Onions	88.8
Kaffir corn	85.0	Beans (dry)	89.1
Pastures	84.8	Beans (Lima)	85.7
Sweet potatoes	86.9	Peanuts	85.1
Apples	46.3	Broom corn	83.5
Peaches	45.4	Hemp	91.7
Pears	56.4	Hops	82.7
Grapes	89.7	Sorghum	83.0
Blackberries	79.6	Sugar cane	88.0
Raspberries	81.1	Sugar beets	90.4
Watermelons	75.6		

THE INFLUENCE.

There are many factors which may influence an advertiser part of the time, but it is actual results which influence him most of the time.

Please discontinue my steam trap advertisement in the Review. The Review certainly does the business. It found me traps all over the land. One insertion was sufficient to find a bargain. It is a lesson to me: ADVERTISE, if I want to buy or sell. The Review will bring the results. I put the same advertisement in another trade paper and no reply received yet. In all letters received they mentioned the Review.—Chas. A. Moss, Spartanburg, S. C., August 2, 1909.

CHICAGO.

The Great Central Market.

The last week was one of the poorest the market has experienced this summer, and yet most of the houses did fully as much as a year ago and a few were able to report some increase in the total money value of sales, due to larger supplies of stock than they had at this date in any preceding year.

The shipping demand for Beauties and first-class roses is all that could be expected at this date. The city demand is practically confined to funeral work, so that the local call is largely limited to flowers for work. The job lot buyers are little in evidence. It is hot on the street corners and the people who operate in the out-of-doors are not doing much. In their stead there are a half dozen big buyers from the amusement parks, who are using large quantities of flowers, paying about the same prices that the Greek salesmen are accustomed to paying.

Last week the market was severely glutted with poor asters and gladioli. Asters of common sorts sold for hitherto unheardof prices and the overstock of gladioli was so great that a number of houses report a large waste, while those that were able to clean out did so at such low prices that the average was extremely small. It is interesting to note that while a large number of carnation growers and other greenhouse operators have asters in the field, the gladioli practically all come from people who have no glass. In spite of the overstock there is a good business on gladioli of the best grade, especially America, Augusta and Mrs. Francis King, but the average returns to the growers, taking the receipts as a whole,

BEST SUMMER Beauties

LARGEST SUPPLY in the UNITED STATES

We can supply any quantity of any length, and the quality is excellent for mid-summer. This house is absolutely HEADQUARTERS on Summer Beauties and we want everybody to know it. ∴ ∴

Kaiserin—Killarney

If you want the best of white roses, order Kaiserin of us. It is **THE** hot weather rose. Our supply is large. Our Killarney are good. This is the best pink rose for summer, and we can take good care of every order.

MAID, BRIDE and RICHMOND, good as summer affords.

Gladioli

We have an enormous supply of the three varieties that are sellers—America, Augusta and Mrs. Francis King—each the best of its color. The stock is fine. We want to hear from every buyer who can use Gladioli in quantity if they're good, for ours are.

ASTERS

This has been an extremely unfavorable season for Asters—too dry and hot—so there are few growers whose Asters are as good as in other years. Also, the market is now just between the earlies and the mid-season sorts.

But OUR Asters are still the best the market affords.

We have a large supply that are good for the season. Let us have your orders.

Lilies

Order Easter or Auratum lilies. They are among the best flowers now in market. Our supply is adequate.

Green Goods

The best Ferns in the market, $1.00 per 1000. Long heavy strings of Smilax, Farleyense and Adiantum.

Fancy Valley Always on Hand

will not encourage the belief that fortunes are to be made on summer flowers. It is now just between seasons on asters. The earliest are pretty well gone and the midseason sorts are not yet ready. Also, the heat and drought have affected the quality, so that the asters now in market are nothing whatever to brag about; the average quality is distinctly inferior, so that the few good asters find a quick sale at fair prices.

The supply of Beauty has been light, but is again on the increase. There is much mildew on the other roses, but there are some fine Killarney, White Killarney and My Maryland. The carnations now arriving are practically all from the field and they cut little figure.

The market is abundantly supplied with Easter lilies, which are among the best flowers of the season, and there also are good auratums. Sweet peas are practically out of it. There still are a few peonies, but the demand has become little or nothing. Golden Glow chrysanthemums may be had on advance orders, but the supply is limited to a few dozens a day in any one house.

There is the usual market for green goods.

Hoerber Bros. Lease Store.

Hoerber Bros., who have just completed a range of ten houses 27x300 at Des Plaines, have leased the front half of the large vacant space at the north end of the hall on the second floor of the Atlas block, next to Zech & Mann. About September 15 they will open a well equipped wholesale store for the sale of their stock.

The firm has planted seven of its houses at Des Plaines with roses, principally Killarney, Richmond, Maid and Bride, and is now planting the other three to carnations. Frank Benthey is foreman. One of the brothers lives on the place at Des Plaines and the other will give his time to the store.

It is the plan to add to the glass as fast as circumstances warrant and it is expected this will soon be one of the big plants of the country.

Club Meeting.

There were just twenty-three members present at the meeting of the Florists' Club August 5, the first regular meeting the club has held in August in several years. President Asmus missed the meeting for the first time since his election, but Vice-president Waters was on hand and filled the chair most acceptably.

The following were elected to membership: Thomas C. Yarnall, 324 Dearborn street; James Curran, 2909 Archer avenue; August Dressel, 75 Southport avenue; F. A. Benthey, Des Plaines; Fred Hoerber, Des Plaines; W. F. Hoerber, Des Plaines. Mr. Yarnall made a neat speech of appreciation, stating that his best efforts would be at the command of the club and counseling harmony and fraternity among those in the trade.

New members proposed were B. Zima, 3053 West Twenty-second street, and A. W. Morgan, 588 East Forty-third street.

P. J. Foley described the arrangements for the trip to the convention. It is expected the special train will be well loaded when it pulls out of the Polk street station August 16 at 2:30. The president was instructed to appoint a committee of twelve to see that the train is properly decorated.

H. E. Philpot, the member from Winnipeg, was present.

The cooling refreshments were appreciated.

Various Notes.

W. N. Rudd states that President Valentine and a special carload of Denver florists will arrive in Chicago at 7:25 a. m., Monday, August 16, by the Rock Island road, on the way to the convention.

Carl E. Schmidt, at Maywood, thinks he has found the secret of successful aster culture. He does not tell what it is, but points to flowers three and one-half inches in diameter, with stems more than three feet long. He says he will be able to get them like this every year hereafter.

A. L. Vaughan is planning a reunion with his many southern friends at the Gibson House at Cincinnati next week.

Filfoley has issued a unique circular announcing the Florist Club's arrangements for the trip to Cincinnati. The train leaves the Polk street depot at 2:30 p. m., Monday, August 16, and is expected to carry the largest party that ever went from Chicago to a convention.

John Michelsen, of E. C. Amling's, is enjoying a fortnight's rest. Next week A. C. Kohlbrand will visit his old home in Cincinnati.

Burnet House

Cor. Third and Vine Sts.

Mention The Review when you write.

One of his varieties is Niagara, a novelty, buff in color with pencilings of pink, the flowers being of enormous size.

John Kruchten is busy this week re-enameling his ice-box and other fixtures.

E. F. Winterson, chairman of the sports committee for the Cincinnati convention, reports that W. W. Barnard Co. has placed a silver cup at his disposal and that Harry A. Bunyard has done the same. Wietor Bros. have given him five prizes, for which competition is to be limited to Chicago bowlers.

George Garland and his son will go to the convention by automobile, starting August 13.

Henry Payne, William Engbrecht and Joe Strauss, with some friends outside the trade, have gone to Clear Lake, Wis., for a fortnight's fishing.

Adam Heim, of Connersville, Ind., has had his wire twisting machine at E. H. Hunt's for several days, demonstrating what it could do. In twenty-three minutes he can put the self-tying twist on the end of 1,000 wire stakes.

Otto Goerisch is again on duty with A. L. Randall Co., after two weeks at Paw Paw Lake, where he left the wife and children.

Peter Reinberg will double his carnation planting this year, the addition to the glass on the farm just doubling the area.

A. J. Eckert, who is on the road for the A. L. Randall Co. in the southwest, reports business conditions there excellent.

E. E. Pieser, of the Kennicott Bros. Co., says the number of tickets made this summer is running far ahead of any previous season, but that the purchases average smaller.

Percy Jones has missed being on deck at the Flower Growers' Market only one day in seven years, and that was a Sunday.

Clifford Pruner is at home this week after a trip east and south for E. H. Hunt. He says the conditions everywhere indicates that when the season opens in the fall it will prove a record breaker for all florists.

Phil Schupp says the Budlong estate will begin to cut heavily of roses about September 1.

Zech & Mann say the shipping trade, especially on roses, is keeping up better than in any previous summer.

The residents of the part of Highland Park lying east of the railroad tracks have voted to place the territory under park jurisdiction, naming it the East Park District and have elected a board of commissioners. Wm. C. Egan, well and favorably known in the florists' trade, has been chosen president of the board.

L. C. Schelte, the Park Ridge carnation grower, having replanted early, took a trip to the exposition at Seattle and visited other Pacific coast points.

The latest novelties in chiffons, the best designs in silver and brassware will be a few of the many interesting "Trade Producers" we will have to show you.

Mention The Review when you write.

Among the week's visitors was John M. Sherwood, of Neosho, Mo. Mr. Sherwood is chief of the fire department there, as well as being superintendent of parks, a civil engineer and florist, now building one more greenhouse. He was on the way to the national firemen's convention at Lansing. Another visitor was S. S. Wonneman, of Webb City, Mo., on a vacation, and Ralph Tuttle and wife, of Momence, Ill., where Mr. Tuttle now has the Smith place.

Bowling.

The florist bowlers made the following scores August 6:

Player.	1st	2d	3d
A. Zech	151	174	166
Asmus	185	175	131
Yarnall	165	209	165
J. Zech	181	194	193
Winterson	161	131	105

NEW YORK.

The Market.

There is little to say of the cut flower market and the less said probably the better. There is nothing to lift it, even the summer society resorts with all their gaiety hardly causing a ripple in the placidity of the wholesale sea. Great quantities of short-stemmed roses are arriving, of splendid color, but too small to command the dignity of a quotation. Whole boxes of them go for a song. Beauties are improving fast, but perfect stock still comes high. Theater openings this week will have a good effect. Killarney especially is abundant. H. E. Froment receives 6,000 a day from L. B. Coddington's big new house. The White Killarneys, too, are here. F. R. Pierson's Scarboro crystal palaces are commencing to earn their board (and glass). The coming season's offerings of the two Killarneys should make every Irishman's breast swell with pride. The roses, more than lakes or the Blarney Stone, will make its name immortal.

When will the carnations become respectable again? Good ones are sadly needed. Most of those arriving now take us back to the memories of the last century. The scarcity of orchids is pronounced, but the prospects are encouraging. James McManus reports a grand variety of all the popular kinds will be ready shortly.

This is gladiolus week, if one may judge by the windows and tables of the wholesalers. There is now no limit to the supply, and most of them are sold at the bottom price. A few of the newer varieties, especially America, still declare the wisdom of growing the best always for the New York market. There cannot be too much stress laid on quality. There is never enough of any perfect stock for the demands of the big city.

The aster flood is approaching its high water mark. Another week will see the overflow. Even now only the best stock sells. For the common, think of $10 a thousand bunches!

Lilies are doing better. Sweet peas are short-stemmed and there are too many of them. Tritomas are of fine quality. J. K. Allen is handling a big lot of them, and had a vase of Monrovia chrysanthemums on sale Saturday, August 7, that were attractive and premonitory of the next great avalanche of bloom when the asters and gladioli are again forgotten.

Of green goods there is now no scarcity. Everybody and everything is getting ready for the inevitable prosperity of the coming season.

Various Notes.

This is the last call for volunteers to join the New York Florists' Club in the invasion of Cincinnati. Monday, August 16, at 12:40, the second Empire special leaves the Grand Central station at Forty-second street for the convention city. Already Secretary Young has booked over fifty berths. Then, all the outlying towns and cities are coming in the special, and we will pick up a lot of suburbanites as we go along all the way to Buffalo, Rochester alone contributing eight, with Charles Vick and the secretary of the Chamber of Commerce among them. The committee announces that it will not be necessary for anyone going to the convention on the New York special train to purchase tickets in advance, as they will be for sale on the train.

George Cotsonas & Son it is now. The genial winner of the fat men's race at the Greek outing was rejoicing Saturday,

August 7, because of the stork's first arrival at his home with a young Greek-American.

The Lewy Floral Co., with Harry Lewy as president, opens its store in the new Murray restaurant, corner Broadway and Forty-second street, September 1. The decorations will be unique. Mr. Lewy is a protege of Charles Thorley.

McKenzie Westwood, of Mengham & Westwood, and Mrs. Westwood are sumnering at their old home in Canada, their first visit there in twelve years.

George Orth, of H. E. Froment's, is back from his holiday, and Phil Dietzenberger, of the same house, is away with his family in Sullivan county. Mr. Froment leaves this week for his annual rest in the mountains. James Coyle is again on duty.

Thomas Martin, with Traendly & Schenck, is away where Rip Van Winkle slept in the Catskills, and Mrs. Savin, for fifteen years bookkeeper for this house, is enjoying her holiday in Canada. The head of the house will have his recuperation at Cincinnati.

Phil Kessler is trying the Maine woods for the renewal of his vitality.

Most of the gardeners' societies are having their outings and clam bakes now, preliminary to the fall exhibitions. The Nassau County show is scheduled for October 28 and 29. There will be one continuous round of exhibitions after September. It will take an automobile to keep in touch with all of them.

M. A. Bowe and several other leading retailers had big orders for baskets and Beauty bouquets for the initial performance of "The Florists' Shop" August 9.

The Southampton Horticultural Society will hold its annual exhibition next week. Here is where the Rickards brothers are much in evidence, and Frank M. Dugan managerial.

The Johnston Heating Co. has completed many large contracts during the present season, and is optimistic as to the outlook.

George Hildebrand, of John Young's force, is away with his family in the mountains. Mr. Young finds a perpetual outing where the 700-foot greenhouses are, at Bedford Station. These are yielding some fine Beauties already.

Emil Schloss will represent the Schloss Bros. Ribbon House at the convention.

Sydney Wertheimer will be at Cincinnati with the exhibit of Wertheimer Bros.

George Saltford has been fishing steadily for a week at the extremity of Long Island. There should be a new book forthcoming this winter on the "Violet," if the absorption of fish food has the popular effect, though in this case it is hardly necessary.

S. Jacobs & Sons, the greenhouse builders of Brooklyn, have had a big year, their new factory being already inadequate for the growing trade, especially large on Long Island.

Gunther Bros. are getting ready for the annual dahlia exhibit, for which they are famous. The new store will give them unequaled facilities this year.

William Ford is making his summer home at his Pennsylvania residence in the Alleghanies. Michael Ford says the prize-winning baby next year at the Asbury Park carnival is already a winner, and no contest will be necessary. There are a lot of proud young fathers this year in the wholesale district.

A. M. Henshaw, of Henshaw & Fenrich, is entertaining his father, who is here from Bristol, England. He has passed three score years and ten, but is an inveterate golfer, and champion of his home section.

J. J. Coan, manager of the Growers' Cut Flower Co., will celebrate his anniversary September 15, the date of the launching of this new and successful venture.

All the wholesalers are renovating, painting and beautifying their establishments, just as if there were no black-

hand societies and no boycotts. It looks as if harmony and common sense and fair play would all combine shortly, and that the old adage, "Let well enough alone," would prevail.

Bowling.

Captain Berry woke up the bowlers Friday, August 6, at the preliminary. Tuesday and Friday evenings of this week complete the tests of skill that decide the membership of the team to compete for those wonderful Cincinnati prizes. New York has some good bowlers. If Donaldson, Miesem, Wilson, Manda and Berry could bowl up to their records, this team would be invincible. But it looks now like a makeshift team, and some of the best bowlers will be in the individual contest. Here is the result of Friday's effort:

Player.	1st	2d	3d
Berry	135	160	169
Donaldson	218	158	182
Scott	109	108	142
Schreiner	146	157	185
Faulkner	129	109	132
Manda	118	173	182

A few others also ran. The practice of the next two nights will be a better story and draw a larger competition.

J. Austin Shaw.

NOW FOR THE CONVENTION.

[Continued from page 17.]

your limited stay in this city will allow you to get even this far, for you must not forget the program of entertainments that the Cincinnati Florists' Society has prepared. They have mapped it out so that you will have but little leisure time on your hands. The following will give you a little idea of this program, but the official program will be presented to you on your arrival here.

Program of Entertainments.

Tuesday, August 17 — The president's reception will be held at the Zoölogical Gardens from 7 to 8 p. m. Later there will be an open air concert by Brooke's celebrated band. The evening will be ended by a display of fireworks. To get to the Zoölogical Gardens, take Zoo-Eden, Mt. Auburn-Zoo or Mill Creek Valley cars direct to the gates.

Wednesday, August 18—At 1 p. m. the ladies' bowling contests will be rolled at Heidelberg, in the Kentucky highlands. Take Evergreen Cemetery cars to the gate.

Thursday, August 19—At 12, noon, the men's bowling contests will be rolled at the Grand bowling alleys, at the corner of Vine and Mercer streets, just two squares east from convention hall. These alleys have been put into the best possible condition for these contests, and, as C. E. Critchell says, if a fly happens to light on them it will be in danger of slipping and breaking its neck. At the same time the shooting contests will be begun at the Northern Kentucky Gun Club, Dayton, Ky. Take the Belleview-Dayton cars. Refreshments in keeping with the occasion will be served during all of the above events.

At 2 p. m. electric cars will be assembled on Third street, between Vine and Walnut streets, and all those not interested in bowling or shooting will be given a three-hour car ride about the city and suburbs. This will be a most enjoyable trip, and will give you a good idea of the extent of our city and the class of its citizens.

Friday, August 20—At 11 a. m. sharp, the river steamer Island Queen will leave the wharf boat at the foot of Broadway street for the ten-mile trip up the river to Coney Island. We trust that every delegate to the convention will be on board. The Island Queen is the largest boat on the river, and there will be plenty of room for everyone. Upon arrival at the island, a genuine Kentucky barbecue will be served. At 2 p. m. the ball game will be called. In the evening there will be a fireworks display which we trust will cause the closing scenes of the twenty-fifth meeting of the S. A. F. to be long remembered by all those present.

Some Final Instructions.

Now for a few final instructions. Remember that the headquarters for the S. A. F. will be at the Gibson house, located on Walnut street between Fourth and Fifth streets. The headquarters for the Cincinnati Florists' Society will be at the Sinton hotel, located on Fourth street and extending to the corner of

Florists' Favorite Cut Flower Boxes

Very neat manila boxes—white inside. The following sizes are carried in stock and immediate shipment will be made:

	Per 100.

Philadelphia's Leading Seed House

Our new additional store
518 MARKET ST.

OUR ever-increasing trade is an assurance that it will pay you to get in touch with us. See our Exhibit at the convention. Don't fail to get one of our Souvenirs. We will be represented there by Fred'k J. Michell and our traveler, Mr. I. Rosnosky, who will be pleased to book your order.

Our main store
1018 MARKET ST.

HENRY F. MICHELL CO.

TWO ESTABLISHMENTS: - 1018 and 518 Market Street, - PHILADELPHIA, PA.

Vine street. The McMicken-Elm car line passes both of these hotels and goes direct to the convention and exhibition halls. The Colerain avenue car line also passes these halls, and you can get this line at Fountain Square. The above mentioned halls are within fifty feet of one another, and just a short distance north of the corner of Elm and Twelfth streets.

All members of the S. A. F. can go direct to the exhibition hall and, upon registering with the secretary, will be provided with the necessary tickets, badges, etc. All those not members of the national society will be required to report to the Cincinnati Florists' Society headquarters in the Sinton hotel, where they will register, and will then be provided with a ticket that will admit them to the exhibition hall. There they will again register with the secretary of the Cincinnati Florists' Society, who will provide them with the necessary tickets, badges, etc., to admit them to the various entertainments.

Any further instructions and information we will have to leave till you arrive in this city. We just want to say, since this is our last chance, that we are ready and waiting for the biggest crowd that ever attended a national convention. We want to feel that every florist who could possibly get away from home is going to be with us. We take this last opportunity to extend a welcome to all, and we promise to do everything in our power to make their stay in this city a pleasant one and one long to be remembered. So come. Do not miss this opportunity. The florists' business is advancing rapidly now, and you must attend these conventions in order to keep pace with it. Again we say, come. C. J. OHMER.

PHILADELPHIA.

The Rising Eastern Market.

The cut flower market is in an unsatisfactory condition. The demand is not equal to the supply. Of course there are bright spots that one might as well look at to get some cheer. Kaiserins were in demand on several days. Cattleyas are scarce and have advanced in price. The same is true of Easter lilies to a lesser degree. Choice asters are more plentiful as the Ostrich Plume comes into season. The quantity of poor asters is still oppressive and their price painfully low. Gladioli are in oversupply; the fancy sorts sell, but the common do not and the reds least of all. Sweet peas continue excellent and valley plentiful, Beauties less so and in moderate demand.

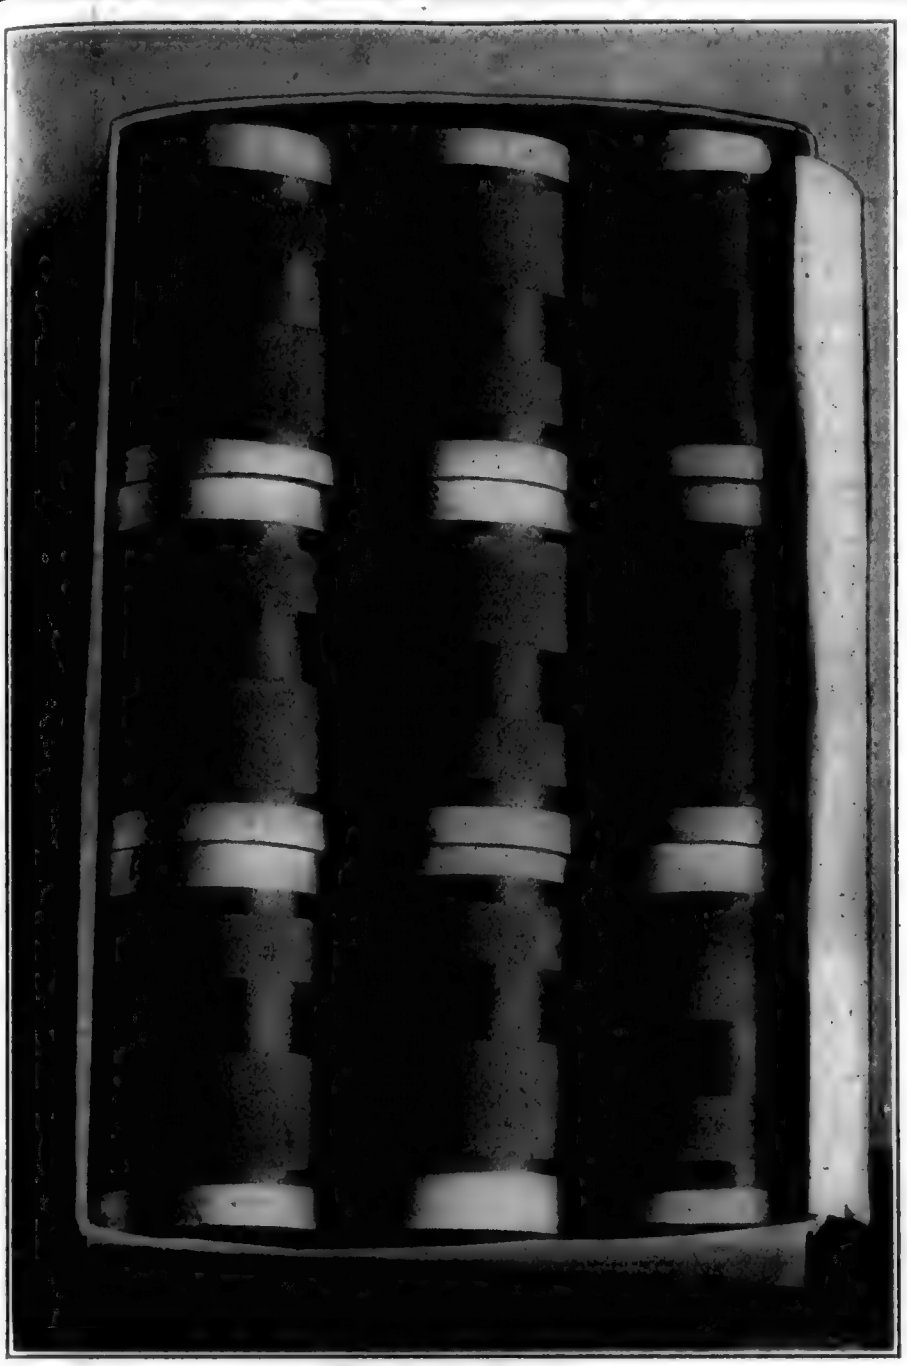
Greens are fearfully dull, spoiling, alas, on all sides. Outdoor flowers of miscellaneous sorts are reduced and impoverished by drought.

The Effect of the Tariff.

The chief points of interest to florists, seedsmen and nurserymen in the new bill that went into effect August 6 are the increase in duty on rose plants, whether grafted, budded or own-root, from 2½ cents to 4 cents each, and the change from twenty-five per cent ad valorem to $1 per thousand on most of the French and Dutch bulbs, with $2.50 per thousand on hyacinths. This latter change has been urged by the seedsmen in the interests of fairness, and will not, it is thought, affect the amount of duties paid.

The Supervisor's Views.

There were just two minutes before the up train was due, when I reached our local station and met the supervisor in charge of our section of the Pennsylvania railroad. The supervisor was stranded. A visit to the neighborhood of the station, where railroad property was injured by the opening of a new street, had filled most of his afternoon. Now, when he wanted to go back to the city, he could not do so. Hence he gladly joined me in a flying trip up the country, remarking that it would give him a good chance to look over his lines, anyway. The supervisor is an interesting chap; he has ideas, and is evidently climbing the ladder and comes in contact with some of the best railroad men.



You may think this is not particularly interesting floriculturally, but it certainly is, for florists depend on the railroads to a large extent for intake and output. But it was not of that I was thinking. The supervisor had been relaying heating pipes in the Pennsylvania's greenhouses at Newark, Del.—"a fearful hot job," as he frankly expressed it. Two or three of his men quit; 125 degrees down there under the benches; nothing but determination kept him at it. "The system worked like a charm," he added, with proper pride in the result; "we like hot water under pressure best."

"What do you grow in those greenhouses, Mr. Supervisor?" was asked. "We used to grow bedding plants, but we are giving them up; there is not sufficient return for the outlay." This seems worthy careful consideration, that the Pennsylvania railroad, which has been planting geraniums, coleus, etc., at all its suburban stations, now has these beds filled with shrubbery, with perennials, or they have been sodded over. The reports from the various sections of the country seem to indicate that the popularity of many of our standard bedding plants is on the decline, especially among the better class of flower lovers. If this is true, every florist should be on the alert and decrease the output of such varieties as are waning in popularity, putting the space into something that is wanted by his customers.

Various Notes.

Charles Keller, who will represent the Keller Pottery Co., of Norristown, at the Cincinnati convention, is taking with him a souvenir that will surprise and delight those who meet him there.

Among the visitors in this city lately were: Miss Rork and Miss Bailey, of D.

Pattern 926

OUR Mr. Fancourt will be at the Convention with a fine display of the latest novelties in Ribbons, Supplies, etc.

He will be very glad to welcome and show you some of our newer creations, leaders for the season of 1909-1910. Beautiful, exclusive new shades which have made our ribbons famous the country over.

E. Gorman, Williamsport, Pa.; Charles Crouch, Mrs. Crouch and Miss Crouch, Knoxville, Tenn.; Sydney Hoffman, Boston, Mass.; J. Quinn, Brookline, Mass.; Ernest Zieger, Pittsburg, Pa., and George Solomon, Boston, Mass.

Gillette Swearer, manager, Holland, Pa., has placed an order with the King Construction Co. for one house, 50x300, to be completed by October 1.

W. J. Sherry, of the Johnson Seed Co., leaves August 16 for a week by the sea.

Eugene Linn, for many years with Charles Fox, Sr., will on Monday, August 16, commence work with H. H. Battles.

Gilbert Baker is spending his Saturday afternoons fishing in favorite lakes in Jersey. No; you must ask him where. It won't do for me to tell.

M. Rice & Co. are busy working overtime despite August. The work is imperative and must be pushed.

Adolph Muller is running an attractive flower shop in Norristown, Pa.

Thornhedge defeated Chestnut Hill at baseball at Newton Square August 7, by a score of 14 to 9, or, to put it floriculturally, H. H. Battles versus George Burton.

Paul Berkowitz left August 10 on his vacation, to be spent among the Thousand Islands.

George Auegle is a hard worker, so you will understand why it is pleasant to record that he saw the Athletics down Detroit August 9.

C. Muller, gardener to Dr. Mattsen, will show a new carnation stake at Cincinnati, one support for every pair of plants.

H. Bayersdorfer & Co. report 400 cases by the steamer Moulton.

William C. Harrey will represent Charles Henry Fox at Cincinnati next week.

John Westcott will select a bowling team from the Philadelphia delegation in Cincinnati to represent the City of Brotherly Love.

The Robert Craig Co. will make a great display of foliage plants at the convention.

Robert Pyle, president of the Conard & Jones Co., West Grove, Pa., is going to Cincinnati.

William K. Harris, Jr., took a party of friends out to the banks from Ocean City, August 7; 300 pounds rewarded their efforts.

The new store of Robert Crawford, Jr., at Fifty-second and Market streets, has reached the second floor.

The Philadelphia delegation leaves Broad street station for Cincinnati Monday, August 16, at 12:30 p. m.

Fred Ehret has had an excellent July in his two stores. He looks for a steady improvement in business.

Charles Keller thinks the S. A. F. should adopt a standard bottom for all flower pots, thus preventing angles varying from 78 to 80 degrees and eliminating breakage in the bins when the same sizes are purchased from different factories and stacked together. PHIL.

JOPLIN, MO.—D. A. Graham has gone to Philadelphia for a vacation visit.

SPRINGFIELD, O.—The Springfield Florists' Club held its annual picnic at Eicholtz park July 20, about twenty members being present. The trip to the park was made at 7:40 o'clock and the return trip at about the same time in the evening. At noon a delightful lunch was served. Baseball games and quoit pitching were enjoyed in addition to the attractions at the park.

Are You Going To Cincinnati?

Don't know whether you can get away? Why, of course you can—you worked just as hard as you could early and late all winter and spring, you deserve a holiday if anybody does. You will meet some pleasant people, get some new ideas and get a good rest, so that you can do better work when you get home again. Now that's settled. We depend on seeing you at Cincinnati next week. When you get there, just as soon as you engage your room and leave your grip come to the Exhibition Hall and see

OUR MAGNIFICENT DISPLAY

of Novelties and Standard Florists' Supplies. We believe that the coming season will be the best in the history of the florists' business in America and we intend to show our confidence by making this exhibit of

The Florists' Supply House of America

stand without a rival, the greatest in the history of florists' supplies. We will show you everything you want to see, we will tell you everything you want to know, we will give you a souvenir with a glad hand.

Cordially yours,

H. BAYERSDORFER & CO.

Mention The Review when you write

DETROIT.

The Market.

Business was so good Monday morning that some of the florists could not get away to join the jolly excursionists. Still, there were no complaints heard on that score. The only complaints are about the scarcity of good stock. Everything good is scarce.

Annual Outing.

The Detroit Florists' Club's annual outing to Bois Blanc was a grand success. When the party embarked from Detroit the weather was threatening, but it turned out to be an ideal day, at least for the florists, for they do not mind 90 degrees in the shade. In some instances the whole family turned out, all having a splendid time.

Some of the winners of first prizes were: Myron Bloy, Beno Pautke, Olive Fry, Hugh Watson, Fred Pautke, Miss Watson, L. Beard, G. Vargo and Tracy Miller.

The tug of war was won by Captain Watson's team.

Of course the most exciting event of the day was the ball game, which was won by Louis Charvat's team, the final score being 15 to 14. Robert Rahaley captained the losing side, and, were it not for his catching, the score might have been less even.

Various Notes.

Mr. and Mrs. George Rackham returned last week from a three weeks' western trip. Seattle, Tacoma, Portland, Billings, Mont., and other large cities in the extreme west were visited. Mr. Rackham now has charge of the grounds connected with Detroit's public schools.

W. B. Brown is putting on a fine coat of tan. Mr. Brown has purchased some land near Birmingham, Mich.

Several weeks on the lakes have given Wm. Hielscher quite a rosy color. He says he made a wish at the wishing well in Mackinac, which he hopes will come true.

The Simonds Heating & Specialty Co. is now located at 104 Washington avenue. This is just across the way from their former place.

The show window of E. A. Fetters has been attractive all summer, with its tastefully arranged baskets and vases of flowers.

Miss Gentlemen gave up her position with E. A. Fetters and is now spending a few weeks in her home in Canada. From there she will travel to California, perhaps never to return to Detroit, where she is well known. There is a rumor that she is to be married, but this she positively denies. H. S.

Stay in Front Keep your business ahead. Pine Tree Ribbons are a big help. Taffetas, Satin Taffetas, Chiffons, rich toned lustrous effects, large range of colors. The best ribbons at lowest prices. Buy direct from the mill.

ST. LOUIS.

The Market.

There is not much to say for the market of last week. It was dull, and all the wholesalers had plenty of stock of everything in season. The hot weather had a telling effect on the quality of the stock, and prices were down lower. Fancy grade roses and carnations were limited to a few hundred, but in other grades they had them in thousand lots.

Gladioli and tuberose stalks are coming in heavily, with prices as low as 2 cents in hundred lots. Asters, too, are coming into the market in large quantities; in fact, many more than the trade can use up. Lilies, both auratum and longiflorum, had a good demand. There is some good lily of the valley in the market, with rather slow demand. Plenty of good, long smilax is to be had, as well as asparagus and fancy ferns.

Various Notes.

Miss Newman and Miss Armstrong left last week for a summer trip to Green Mountain, Colo. They will return the first week in September.

John B. Barnard, for the last year

Japanese Callas

Special! Sound! Free From Disease!

We have secured from Japan a fine lot of selected Japanese Callas that have proven sound and free from disease. As the supply is limited, we would advise you to order immediately.

with the W. C. Smith Wholesale Floral Co., has resigned his position on account of his wife's health. They left Monday, August 9, to make their future home in Denver, Colo. Mr. Barnard takes with him the best wishes of the local trade and letters of introduction to Phil Scott and J. A. Valentine.

Oscar Huettemann, of the Tower Floral Co., has returned from a ten days' vacation trip, which he spent around Lake Michigan. The elder Mr. Huettemann and his daughter will leave this week for a ten days' northern trip.

John L. Duffy, for the last ten years chief engineer of the city park department, has resigned his position to take charge of the construction department of the Board of Education. Mr. Duffy is well known in the local florists' trade.

W. C. Smith, D. Bova, G. H. Angermueller and Charles Schoenle took a day off last week for a fishing trip, and returned with a good mess. They forgot their bait, and had to use a net for their big catch.

George Ostertag is lying sick at the Baptist hospital. He was painfully hurt last week by falling out of his buggy. The doctors claim that by careful nursing he will be restored to health in about a month. His many friends in the trade hope it will be sooner.

Luther Armstrong and Charles A. Juengel, who attended the first meeting of the S. A. F., at Cincinnati, twenty-five years ago, will attend the coming convention and travel with the Florists' Club's special over the Big Four.

J. F. Ammann, of Edwardsville, has more friends in the trade here than any other one man. These friends have started a boom to nominate him for president of the S. A. F. at the Cincinnati convention. A more able man for the office could not be found among the members of the society.

Dr. F. J. Arzt, who has a fine private place at Twelfth and Lami, and who has a fine collection of plants of all kinds, last week had a night blooming cereus which produced eighty blossoms. The plant is ten feet high and twenty feet in circumference. Prof. W. Trelease, of the Botanic Garden, says it is a record for blooms, as sixty is the most to his personal knowledge.

Charles Young, the treasurer of the C. Young & Sons Co., came down the other morning all smiles. Mr. Young says it is a big boy, and all is well, and how happy grandpa and grandma will be when they return home next week from Atlantic City!

The Bentzen Floral Co. is moving its retail store to their new building at Grand avenue and Herbert street this week. This will be one of the best appointed flower stores on North Grand avenue.

From what can be learned this early, there will be a delegation of twenty-five or more from here to attend the S. A. F. convention next week. J. J. B.

A meeting of the stockholders of the proposed North St. Louis Trust Company was held the evening of July 28 in the new store of the Bentzen Floral Co., and a majority of the $100,000 capital stock subscribed. The new organization will conduct a general banking business.

DARBY, PA.—Edmondson & Fenton are building two greenhouses at 853 Main street and will carry on a business as florists and landscape gardeners.

KEARNEY, NEB.—The Kearney Floral Co., Downing & Son, managers, announce that Harry L. Hunt, formerly manager of that place and who a short time ago removed to Illinois, will return and again have charge of the greenhouses.

ALEXANDRIA, VA.—Daniel W. Wenk, a florist residing at 713 Gibbon street, was reported recently to be at the point of death as a result of a cutting affray which took place within a few feet of his home. He is about 50 years of age.

DENVER.

The Market.

Gladioli and asters now have the call. Both are of good quality and have a fair sale. Carnations are nearly out of the market, although a few of the growers are cutting a few new ones. New Beauties are coming in slowly, but there will be plenty of them a little later, and the stems are getting longer. My Maryland and Killarney are the other two best roses just now and they are uniformly good. Sweet peas are much in evidence and some sell for a song. Business has been quiet for the last week or so.

Colorado Florists' Organize.

The Colorado florists organized a society August 6, with a charter membership of seventy-three, all but a dozen of whom live in Denver. Its object is to get together those engaged in the florists' and allied trades in the state. All florists and professional gardeners, seedsmen, nurserymen, superintendents of parks and manufacturers of supplies for florists' use and others commercially interested in horticulture and floriculture, are eligible to membership. The following officers were elected:

President—J. A. Valentine.
Vice-president—T. D. Long.
Secretary—A. H. Bush.
Treasurer—John Berry.

Selection of trustees and the appointment of different committees will take place at the next monthly meeting, September 9.

It was a social gathering, with refreshments and speeches, the meeting being held in the new rooms which have been rebuilt for the Denver Wholesale Florists Co., 1435 California street.

Various Notes.

All the talk now is of going to the S. A. F. convention. Through the efforts of President Valentine a special Pullman car has been placed at our disposal from here to Chicago, with many other courtesies, which is going to make the trip thoroughly enjoyable. Stop-over privileges at different cities may be had should any of the party see fit.

The bowling team expects to practice in the aisle of the car going through Kansas and Nebraska. E. S. K.

HUMEA ELEGANS GIGANTEA.

Humea elegans was introduced from Australia, where it is a native, about a century ago. According to the Gardeners' Chronicle, it flowered in the garden of Lady Hume, Wormleybury, Hertfordshire, and was named in compliment of her by Sir James Edward Smith, who published a figure of it in his Exotic Botany in 1804. It is a robust-growing biennial, six to nine feet high, with tobacco-like leaves and an inflorescence which certainly does not suggest a member of the compositæ, the very small flowers arranged on a large, loose panicle, with gracefully pendulous branches clothed with red, involucral bracts, having more the appearance of the plume of the pampas grass. The plant is popular for conservatories and for sub-tropical bedding, the strong balsamic odor of the leaves and the elegance of the flower panicles being its chief attractions. It sets seeds freely under cultivation, and these should be sown not later than July.

About twenty years ago the late Baron Mueller, then director of the Melbourne Botanic Gardens, sent to Kew seeds of a humea which he thought was either a new species or a well-marked variety of H. elegans. Plants were raised, and they flowered in the temperate house, but, failing to set seeds, they were not perpetuated. Two years ago seeds of humea were again sent to Kew from the Melbourne Botanic Gardens, and the plants

raised from them flowered in the temperate house in July. Although scarcely distinct enough to rank as a species, this humea may well be named the gigantic variety of H. elegans, as it is about twenty feet high, with a stem an inch in diameter, and the largest leaves are fifteen inches by five inches. The panicles are correspondingly large, and there are dark red and pink forms. A humea of these proportions can be grown only in tall conservatories, except in sub-tropical countries, where it ought to prove very serviceable.

OUTLOOK FOR PLANT BREEDING

Record of the Past.

Dr. H. J. Webber, professor of experimental plant breeding in Cornell University, recently spoke before the Massachusetts Horticultural Society. His subject was "The Outlook for Plant Breeding," and he said in part:

The early history of our cultivated plants is shrouded in mystery. The wild types from which they sprung are in many cases entirely unknown, and the modifications which have taken place are so profound, in many cases, as to preclude the recognition of the wild prototypes if they are now living. Each century has inherited increasingly better and better sorts from the preceding century. It would seem to us today that we have nearly reached the limit of perfection, yet I am led to wonder, when I review the tremendous possibilities opened to me by my fifteen years of research in the field of plant breeding, if we are really doing all in this field of development which the world has a right to expect of us.

Some great economic problems await solution by the breeders of the future, but it is in the general improvement of all crops that one finds the most numerous problems. In no crop or in no place have we apparently exhausted the field of improvement.

Variations.

The fact that we can improve plants depends upon the occurrence of variations. No two plants are alike in all respects, and while the difference between individuals of the same species or variety is ordinarily slight, still there occasionally occurs a marked variation or sport which may be of an entirely different and new type.

Breeders now recognize three types of variations: Fluctuations, mutations and variations due to hybridization. Fluctuating variations are the slight individual variations which are not considered to be heritable, but which are doubtless in some degree transmitted. In the case of

mutations or sports, as gardeners call them, we have a variation of larger degree which in general reproduces its characters through the seed. A typical illustration of such a variation is found in the Dwarf Cupid sweet pea, which was suddenly produced from one of the ordinary tall sorts, and which reproduced its character in its progeny. It is the discovery of these striking variations or mutations which has given rise to the great majority of our new varieties of cultivated plants. This is particularly true in the cereals, vegetables, and all plants regularly propagated by seeds. Among fruits a large share of our standard varieties were found as accidental variations, but here in many cases accidental hybridization is probably responsible for the variation.

Hybridization.

The use of variations produced by hybridization is of the greatest importance, but is well understood by horticulturists and need not be discussed in detail.

One of the great practical problems before breeders is to learn how to produce variations, specially mutations, by artificial means. They are evidently the result of changed conditions of some sort, but what these conditions are which influence the changes should be understood, so that the breeder may force the variation and not be compelled to await the slow and uncertain action of natural causes. Experiments have indicated that mutations may be stimulated by injections into the plant, of chemical solutions such as zinc sulphate, calcium nitrate, and the like, and many experiments on this method are now in progress.

Producing Mutations Artificially.

Other experiments and observations indicate that very great changes in temperature at certain periods in the life of the plant may lead it to produce mutations. Experiments are being conducted also in feeding plants with different chemical solutions, and out of the mass of evidence now being accumulated it seems probable that some methods will be discovered by which we may induce plants to produce these marked changes or mutations which are of such value to the breeder. It does now seem probable that we will be able to guide the direction of the change, but if we can increase the number of the variations we will increase our chances of getting the ones showing desirable improvements.

The importance of breeders giving careful attention to bud variation should be emphasized. We know that occasionally a tree will produce on one branch a variety of fruit different from that on the rest of the tree, and the same is true with flowers. The cause of this is a change that takes place in the bud instead of through the seed and sexual reproduction. Every tree is of a complex nature and every bud on a tree differs from every other bud on the same tree. As simple and fundamental as this truth is, yet we pay almost no attention to the plants from which we select buds or cuttings. An orchard will last for a hundred years, and we plant largely for our children, yet we pay little heed to the selection of the buds which we use in propagation.

Breeding Should Be Fad.

In conclusion the speaker urged every horticulturist to adopt a breeding fad, to select some one plant which they will breed, as Jersey cows and Berkshire hogs are now bred. It costs a grower nothing to make a few hybrids of different varieties each year. Such experiments if made generally would unquestionably, in a short time, result in the discovery of many improved varieties and the names of their producers would go down in history as have the names of Colonel Baldwin, the originator of the Baldwin apple, and John Bull, the originator of the Concord grape.

Oil City, Pa.—Since the death of her husband, about a year ago, Mrs. Rose E. Reynders has been conducting a cut flower business in her own name.

SYRINGA JAPONICA.

Syringa Japonica is sometimes referred to as the tree lilac, for under favorable conditions it assumes tree-like proportions. It is a native of Japan, and differs considerably from any other syringa, the inflorescence and flowers reminding one more of those of a privet than a lilac. On free-growing examples the leaves are large, six inches or so long, wide in proportion, and more or less oval in shape. The inflorescences are in the form of large panicles, four to six inches long and as much through, the individual flowers being small and cream colored. Flowers are borne with remarkable freedom, and as the flowering time is the end of June and early July, it is a period when they are welcome on account of good flowering shrubs and trees being scarce.

As is the case with other lilacs, this one grows most satisfactorily in good, loamy soil. To assist it to assume a tree-

like habit, it is necessary to tie up the leading shoots occasionally, when young, and remove or cut in the side branches. If this is not done there is a tendency to develop a bushy head instead of a trunk. The Gardeners' Magazine says that, as is the case with the other lilacs, it is a good plan to remove the old flower heads as soon as the flowers fade.

GLOXINIAS.

In recent years gloxinias have shown wonderful development in regard to color and habit. The flowers range from pure white, pink and pale blue to deep reds, purples and blues, while the newer French spotted hybrids, though less robust in habit and more delicate in flower than the older type, are a most valuable addition. They are marked and spotted with colors varying from pink and mauve to dark blue, red, and even chocolate.

CARRYING PLANTS OVER.

Montagu C. Alwood, who is carnation grower for Stuart Low & Co., and the author of a book on carnation culture for English growers, contributes the following note to the Gardeners' Magazine:

"The American carnation growers until quite recently did not believe in carrying their flowering plants over to the second year, it being generally conceded that the quality of bloom produced during the second season was not so high as that of the first. With stock grown and planted out on benches there is much truth in this statement, but many growers of carnations in the States now carry over part of their stock annually.

"In the case of the British method of cultivation, in pots, the matter is different, the plants being so much easier to handle for the second year in the way of potting, and standing them out of doors for a short time during the summer. Consequently, many of our best growers do not throw away any of their flowering stock until after the second year, and the majority of varieties produce a higher grade of bloom and a larger crop during their second season.

"The main points to be borne in mind in carrying plants over are to grow them cool from the start, cut the flowers with long stems, so as to keep the plants dwarf, and not feed them with any kind of artificial manure you may have in stock, but use a good cool carnation fertilizer."

There Is a Splendid Chapter on
Greenhouse Heating
in The Florists' Manual
By WILLIAM SCOTT

A complete reference book for commercial florists. 253 large pages, fully illustrated. Treats on over 200 subjects concerning greenhouse building, heating, management, and plant culture. It tells you just what you want to know, in just the way you want to be told.

Second Edition, Price $5.00, Prepaid by Express or Mail.

FLORISTS' PUBLISHING CO.
334 Dearborn Street CHICAGO

BELOIT, WIS.—A. E. Frost, of Chicago, has located in this city, to conduct a general nursery business, and will probably bring his family here in a short time.

INDIANAPOLIS, IND.—Alfred Pahud, at 3403 North Senate avenue, has retired from business, leaving it in charge of his sons. The firm will be known as the Pahud Floral Co.

HOLYOKE, MASS.—G. L. Freeman is planning another trip to Central and South America on an orchid-collecting expedition.

ROCHELLE, ILL.—A. Caspers, the florist, has about completed the plans for a large double-apartment greenhouse on the lot just north of his residence on Sixth street. The building will be 36x80.

Middletown, Conn.—Samuel Russell, Jr., has let the contract for a greenhouse to be erected on his property at Wedgewood. The work is to be done by J. B. Young, of this city.

Winsted, Conn.—A balloon which had ascended at Pittsfield, Mass., made an unexpected landing recently at the greenhouses of Daniel O'Neil, and narrowly escaped settling down on one of the glass roofs.

Quincy, Mass.—Edward Arnold, who has conducted greenhouses on Hancock street, Wollaston, and a flower store in Music hall block, has gone out of business and has moved to Belmont, where he has accepted a position as head gardener on the Colonel Bentley estate.

HELP WANTED—An experienced florist to take charge of 10,000 ft. of glass; one who can grow roses, carnations, mums, lettuce and a general assortment of potted plants; please give references and state wages wanted. Fairbury Nurseries, Fairbury, Neb.

HELP WANTED—At once; a florist who understands growing roses, carnations, mums and bedding plants, and also had experience with steam and everything connected with a place of that kind; steady work and good wages to the right man. Address No. **131,** care Florists' Review, Chicago.

WANTED TO LEASE—At once; greenhouses in good repair; retail location; would buy later; no fancy price nor tumbledown shacks, as I am a practical man; state full particulars in first letter, size of houses, glass, land, rent, etc. L. H. Wise, 1 Montgomery St., Jersey City, N. J.

WANTED—A reliable man to take charge of up-to-date greenhouses and garden in good locality, with large quantity of stock plants, to run it for his own benefit; owner will furnish fuel the first year, also a good new cottage for the care of small flower garden and some plants for decoration; a splendid opportunity for gardener with little capital to go into business in large town with only one other florist; any amount of land can be had to cultivate. Address Mrs. M. Humes, Huntsville, Ala.

FOR SALE—2000 ft. 1½-in. pipe with couplings, 5½c per foot. The Pana Greenhouses, Pana, Ill.

FOR SALE—No. 3 Morehead return steam trap and receiver. Address I. O. Kemble, Marshalltown, Iowa.

FOR SALE—Greenhouse 50x22, including frame, glass and hot water pipes. Address P. O. Box 275, Glencoe, Ill.

FOR SALE—Two Wilks boilers, as good as new; too small for me; $60.00 for both. Cash. C. W. Anderson, Shawnee, Okla.

FOR SALE—Cut flower store; established business in a city of 50,000; good reason for selling. Address No. **152,** care Florists' Review, Chicago.

FOR SALE—About 2000 ft. of ¾-in. pipe in good condition, mostly full lengths; price, 2c per foot; would make good purlin posts, or could be used for other purposes. W. B. Davis & Co., Aurora, Ill.

FOR SALE—Retail florist store; only one in city of 20,000; southern Illinois; established 1895; sales last year, over $9000; bargain account death of owner. Address No. **144,** care Florists' Review, Chicago.

FOR SALE—Greenhouses, 10,000 ft. of glass, and leased land; lease 8 years to run; doing good business; or will take a partner with half interest in it. Mr. Jacob Russler, 114th St. and Avon Ave., Morgan Park, Ill.

FOR SALE—1 Wilks water heater, 42x42, self-feed, 3000 radiation; used 10 months; price was $215.00; $125.00 takes it; just as good as on the day of purchase; too small; am adding more houses. J. A. Sheaff, Fairbury, Ill.

FOR RENT OR SALE—4 greenhouses, 7000 ft., 3 nearly new; hot water heat; 16 acres; good house; 44 miles from Chicago on Fox River; 7½ miles from Aurora; cows, horses and wagons; $25.00 per month. A. L. Treman, Oswego, Ill.

FOR SALE—Boiler rated 5200; cost me $425.00; will sell for $150.00 f. o. b. Neenah; in good condition; reason for selling, too small for my use; it is a steel boiler made at the Depere Boiler Works, Wis. Address Louis Otto, Neenah, Wis.

FOR SALE—Near Chicago, 2 greenhouses, 5800 ft. of glass, built 3 years, in first-class shape; 4 blocks from depot; hot water heat; good home trade; land adjoining can be bought cheaply; reason for selling, owner wishes to go away. Address No. **77,** care Florists' Review, Chicago.

FOR SALE—On South Side of Chicago, near Auburn Park, choice residence with greenhouse and land; 10,000 sq. ft. under glass, together with remunerative floral business; price, $8000.00 clear; terms to suit; owner must leave city. John P. Foerster & Co., 151 La Salle St., Chicago.

FOR SALE—A large number of second-hand genuine Morehead steam traps, pressure reducing valves, and pipe and fittings; don't buy before asking us for prices; our boilers are nearly as good as new. Address Rollins Steam Specialty & Valve Co., 425 Dearborn St., Chicago, Ill.

FOR SALE—Greenhouse in a factory town of 4000; stocked with carnations and mums; no opposition; 4000 sq. ft. glass; steam heat; city water; near cemetery; 1 acre of land; 8-room house; barn; all in good condition; owner going in other business; this is your chance. A. Richter, Sturgis, Mich.

FOR SALE—One second-hand hot water boiler, nine section American Champion pattern, on iron base, with shaking grates; easy to set up; will heat 5000 feet glass easily; this boiler is in best of condition, will need new smoke box only; will dispose of it for $125.00, cash. Jno. A. Keller, Lexington, Ky.

FOR RENT—Greenhouse, 4000 ft. glass, 10 acres good land; residence in good condition; good sale for all greenhouse or garden stuff you can raise: cheap rent; only house in town of 4000; write for particulars; death of proprietor cause of rent. Address No. **139,** care Florists' Review, Chicago.

FOR SALE—In Illinois town of 5000, splendid market, no opposition, 4000 sq. ft. glass, steam heat; can use as much again glass; dwelling, barn, 2 acres, half in fruit, asparagus, etc.; $1400.00 cash, balance $1800.00 at $10.00 per month; this is your chance. Address No. **154,** care Florists' Review, Chicago.

FOR SALE—Market gardener's and florist's business; 5 greenhouses, 6045 feet glass; 50 hotbed sashes, dwelling, workroom, barn; good condition; hot water heat, tank pressure; 4 acres rich land; 1 mile from center of city with 25,000; market for all vegetables, flowers and plants you can grow, located in the southwest; good reason for selling; $1500.00 will swing the deal. Address No. **110,** care Florists' Review, Chicago.

FOR SALE—Hitchings No. 4 Saddle boiler, in good condition; will heat 1500 sq. ft. of glass; $20.00 cash. The Kaber Co., LaPorte, Ind.

FOR SALE—2 60-in.x16-ft. horizontal tubular boilers in first-class condition; complete with front and all castings; call at once. Midland Linseed Co., 56 W. Division St., Chicago.

FOR SALE—On account of other business, a florist's store and 2 greenhouses, 100x20, located in good neighborhood with good retail trade; long, favorable lease; no repairs; greenhouses planted in Boston ferns will bring price of place by first of November; also primroses, palms and other stock; reason for selling and full particulars will be given to parties interested. Address P. P., 920 N. Campbell Ave., Chicago.

FOR SALE—An up-to-date, 18 years established florists' business, located in a city of 250,000, 2½ miles from court house, 1 block from car line, adjoining a large cemetery; city water; steam heat; well stocked; the place has been rebuilt only 4 years ago and a 4-room house, office, 2 greenhouses and shed were put up new then, so the place is in splendid condition; a great opportunity for the right party; only $1500.00 cash required; balance on easy terms. For particulars apply to H. Fuchs, 556 4th Ave., Louisville, Ky.

FOR SALE—Two fire-box hot water boilers, used four years; will heat 6000 feet of 4-inch pipe each, in good condition, price $215.00 each on board car; 8000 feet of 4 inch pipe, 1000 feet of 5-inch pipe, as good as new, at 10 cents per foot; four No. 2 Morehead steam traps, used three years, in perfect working condition, $45.00 each; one high pressure steam pump, 3½ inch suction, 3-inch discharge, in good condition, price, $50.00. Address George Reinberg, 51 Wabash Ave., or call 301 Balmoral Ave., Chicago.

FOR SALE—Florist business cheap; $3800.00, part cash and the balance long time; easy payments; at the beautiful German Protestant cemetery at Walnut Hills; established since 1889; fine bedding plant and cut flower, private as well as cemetery cash home trade the year round; plenty space for greenhouses and hotbeds; good frame house of 6 rooms on the place; 3 greenhouses; plenty of hotbed frames and sash; possession given at once; reason for selling, sickness and death. Address 949 Churchill Ave., W. H., Cincinnati, Ohio.

I am giving up business and offer for sale

Very Cheap

my greenhouses (18,000 ft. of glass); houses to be removed from property, or will rent for one season with privilege of purchase. Houses were run at a profit the past season and are in good condition. Have been growing mainly cut flowers, but conditions are favorable for a vegetable grower; soil is good and ready for the benches. Address

Frank Huntsman

20 East 7th St., **Cincinnati, O.**

Assignee's Sale

The undersigned ASSIGNEE, in trust for the creditors of WILLIAM K. PARTRIDGE, FLORIST, will offer for sale at

Public Auction, on Friday, August 20, 1909, at 1 o'clock p. m.

on the premises in LOCKLAND, STATION R, CINCINNATI, OHIO, the entire plant and equipment of said Assignor, representing an investment of $75,000.00, and will be offered for $18,000.00, consisting of about fifty acres of land (five acres fee, forty-five acres lease with privilege of purchase); fifteen greenhouses, having a glass exposure of 75,000 square feet, equipped with steam heating plant of three batteries of boilers.

The houses and equipment are all practically new and the plant is one of the most modern and complete in the west. This sale is timed to meet The Florists' Convention to be held in Cincinnati during the week of August 20, 1909.

The plant is easy of access by traction line and for inspection take the Millcreek Valley cars, 5th and Walnut Sts., Cincinnati, Ohio.

For further particulars call or write

W. W. BELLEW, Assignee, 41 Wiggins Block, CINCINNATI, OHIO

Judicial Sale of Part of Assets of the Rosery Flower & Seed Company, Limited

Tenders will be received addressed to T. Harry Webb, Esquire, Liquidator of the Rosery Flower & Seed Company, Limited, New Nanton Building, Winnipeg, Manitoba, Canada, and marked "Tender re Rosery Flower & Seed Company Limited," up to four o'clock p. m. of the 15th day of September, 1909, for the purchase of the following property of the above named Company, namely:

That portion of the North West Quarter of Section thirty-two (32), in Township twelve (12), Range five (5) West of the fourth meridian in the City of Medicine Hat in the Province of Alberta, consisting of five (5) acres situate and abutting the South West corner of the City Park, purchased from one William R. Johnston,

together with all buildings and erections thereon and appurtenances thereto, including the following, namely: Greenhouses, store rooms, cold storage basement, piping, temporary heating apparatus, benches, pots, implements and usual accessories representing an investment of $15 000 or thereabouts.

The City of Medicine Hat, in the Province of Alberta, has made favorable arrangements as to taxation and for the supply of water and natural gas.

The above property offers a good opportunity, owing to the existence of natural gas, good sunny climate and good soil, for establishing a wholesale florist business with a market in Winnipeg, Regina and Calgary.

TERMS OF SALE: Twenty-five per cent in cash and the balance on terms to be arranged with, and secured to the satisfaction of, the liquidator.

A marked cheque payable to the liquidator for ten per cent of the amount of the tender must accompany each tender, which will be returned if tender is not accepted. The tenders will be opened by the Liquidator at his office aforesaid on the 16th day of September, 1909, at the hour of eleven o'clock a. m., and all who tender are requested to be then present.

The highest or any tender not necessarily accepted.

The above property will be sold subject to the following conditions:

1. The property will be sold subject to a reserve price.
2. The Purchaser shall be bound by the terms of an agreement with the City of Medicine Hat dated the 17th day of May, 1909, which provides amongst other things that the occupant for the time being shall maintain upon the said lands and premises the business of florists as a going concern for a period of five years from the date of the purchase, in default of which the lands will revert to the City on repayment of the sum of $1,000.00 and the owner shall have the right to remove his buildings and other improvements. The agreement further provides that in order to obtain reduced rates for natural gas the occupant must instal and maintain on the premises a steam heating plant.
3. The purchaser will be required to enter into an agreement with the City embodying the above terms.
4. The purchaser shall have the conveyance prepared at his own expense, and tender same for execution.
5. If the purchaser fails to comply with the conditions aforesaid or any of them, the deposit and all other payments made thereon, shall be forfeited, and the premises may be resold; and the deficiency, if any resulting from such re-sale, together with all charges attending the same, or occasioned by the defaulter, are to be made good by the defaulter.
6. The said property will be sold subject to the approval of the Court of King's Bench for the Province of Manitoba.

For further particulars apply to the Liquidator, or to Messrs. Andrews, Andrews, Burbidge & Bastedo, Barristers and Solicitors, Aikins Building, McDermott Avenue and Albert Street, in the City of Winnipeg, in the Province of Manitoba, his solicitors.

Dated at Winnipeg, this 28th day of July, A. D., 1909.

T. HARRY WEBB, Liquidator, No. 308-11 New Nanton Building, Winnipeg, Manitoba, Can.

BOSTON.

The Market.

The market has been overstocked with flowers during the last week, and as a consequence there has been considerable waste. The two predominant flowers now are the aster and sweet pea. The first named have fallen in value, being in overwhelming supply. The quality is unusually good, however, but 50 cents per hundred is a fair price now for good asters. Sweet peas are short stemmed and overabundant. Carnations now cut little figure in the market. Such as are arriving are small and poor and far inferior to asters. Roses of good quality are scarce and bring good prices. There are a lot of poor Bride and Maid which bring little. Some unusually fine Killarney are seen. Kaiserin is also in good request.

Gladioli are abundant, but only certain colors will sell, even good whites dragging. There are plenty of Lilium speciosum and auratum, in addition to longiflorum being abundant. Tuberoses, cosmos, dahlias, gypsophila, centaureas, candytuft and scabiosa have an uncertain call. A few gardenias only are now seen, but they are sufficient for the demand.

Exhibition.

Although there were no prizes offered August 7, the main exhibition hall at 300 Massachusetts avenue was filled with exhibits, hardy flowers being shown in great abundance and of unusually good quality, considering the excessive drought prevailing. Perennial phloxes filled many tables, extensive displays of these coming from T. C. Thurlow, F. J. Rea, Bellevue Nurseries, R. & J. Farquhar & Co., William Whitman, M. Sullivan gardener, W. W. Rawson & Co. and J. F. Flood & Co.

W. W. Rawson & Co. showed Rheingold, a large and handsome new white variety, suffused with delicate lavender. Bellevue Nurseries received honorable mention for Favorite, a fine red variety.

W. Whitman showed numerous annuals and perennials. Mrs. J. L. Gardner, William Thatcher gardener, had a fine table of annuals in about 100 varieties. Old Town Nurseries, Bellevue Nurseries, Farquhar & Co. and Walter Hunnewell, T. D. Hatfield gardener, had excellent collections of herbaceous plants. The last named exhibitor showed Lilium myriophyllum from northern China, grown outdoors over winter, splendid stiff stems six feet high, carrying seven to eight big, trumpet-shaped white flowers, a truly superb lily.

W. W. Rawson & Co. showed a large collection of dahlias. Among 1909 novelties the cactus varieties, Mrs. J. D. Colt and Mrs. Francis King, were the best. They also had Lilium Batmanniæ and many gladioli of fine quality. B. Hammond Tracy had a collection of choice gladioli. Farquhar & Co. showed such roses as Killarney, Captain Christy and Caroline Testout; also lilies in variety. A new variety from northern China received honorable mention. It carries pure white trumpet-shaped flowers, purplish without. The foliage is fine and grassy, shorter and denser than in the case of L. Philippinense. Mrs. E. W. Gill had a fine lot of dahlias and other seasonable flowers.

The Boston Mycological Club, in the small hall, had an interesting display of fungi. These displays are made each Saturday during the summer months, and attract many visitors.

Various Notes.

The directors of the two wholesale flower markets met August 7 at Park Street market and talked over plans for the new market in Winthrop Square. About four-fifths of the necessary capital is already subscribed, and there will be little difficulty in securing the balance.

Farquhar & Co. are making numerous alterations and improvements in their store. The second floor will be entirely devoted to office work hereafter.

W. H. Elliott had a narrow escape from a serious conflagration at his Madbury establishment August 2. He was much troubled with leaf rollers on his roses, and placed lamps in the houses at night to destroy the moths. His young son on the evening in question volunteered to assist in carrying a tray of lamps and stumbled with them. A burst of flame resulted, which severely scorched the roof of the shed. Fortunately, one of the workmen got a hose and good pressure of water on the fire at once, and soon extinguished it. Fortunately, no one was injured.

roses, and all handling them speak highly of them as excellent summer roses.

Boston delegates to the Cincinnati convention will leave Boston on the 10 a. m. express from South Terminal, Monday, August 16, which will connect with the New York party at Albany. Indications point to a small attendance from New England. W. N. Craig.

CINCINNATI

The Market.

Business last week was quiet. There was hardly so much as a ripple of demand. No one seemed to be doing any business and the wholesale houses were practically dead. The weather conditions are fine, though, just seasonably warm weather and the proper kind for crops, etc. This condition meant a heavy cut in all lines and the market was stocked to overflowing at all times. Outside of high-grade roses there was more than could be used in all lines. For the first time in many weeks Beauty roses were a drug and it was hard to move them at anything like a good price. Asters are coming strong and the price has slipped downward some. Gladioli are also seen in thousand lots and are moving slowly. Carnations are not overplentiful, but it is just as well, as there is little call for them. Lilies are fairly good property, but owing to the lack of funeral work they are not going as well as they should. Prospects for the coming week are not overly bright, but we would all be willing to close up till after the convention if it were possible to do so. Everything is convention now and we have little time to think of or do anything else.

Various Notes.

The last general meeting of the Florists' Society before the convention was held in the club rooms Saturday evening, August 7, at 8 p. m. It was well attended and a great deal of work was accomplished in a short time. All of the various committees made their final reports and it was certainly a pleasure for the officers of the society to see what hearty and earnest work had been done. All reports were about the same, that everything was in readiness, all details worked out to the smallest point, and that it was just a case of rest on your oars till the first delegate arrives. The reception committees to be on duty at the various depots were appointed and assigned to their respective places. They will wear badges and all strangers can be on the lookout for them. They will put you right on all matters with which you are unacquainted.

The souvenir book committee reported the book would be in the mails Monday, August 9. This will certainly be a great book and one that will be of interest to all who receive it. After a general discussion of various topics of special interest, the meeting adjourned. There will be one more meeting of the executive board at the Hotel Sinton, in order to be

Nashville, Tenn.—McIntyre Bros., on the Hillsboro road, expect in the near future to increase the capacity of their greenhouses. They have recently placed an order for 50,000 feet of glass preparatory to enlargement. Their business has expanded in a gratifying manner during the last few years and their facilities must be increased.

Seed Trade News.

AMERICAN SEED TRADE ASSOCIATION.

Pres., J. C. Robinson, Waterloo, Neb.; First Vice-pres., M. H. Duryea, New York; Sec'y and Treas., C. E. Kendel, Cleveland, O.

PANSY seed is selling well, and the trade regrets to hear that the crop in Germany is below the average.

THE dry season will neither increase the quantity nor improve the quality of the American-grown aster seed.

A. EDDY, 75 years of age, and for thirty years a grass seed dealer on the Chicago Board of Trade, died August 9.

WHILE the Western Seed and Irrigation Co., Fremont, Neb., was fumigating a warehouse August 1 a passerby turned in a fire alarm and the employees had the assistance of the entire fire department.

D. J. TAMMINGA, one of the onion set growers south of Chicago, August 10 said that "the crop is a fair one, some fields very good, but the late sowings do not amount to much. I doubt if there be more sets harvested in this vicinity than last year. There already is a good demand."

READERS of the REVIEW have been kept fully and promptly informed throughout the progress of the tariff bill that became law August 5, and which gave the seed trade the much wanted specific duties. At practically every stage of the bill's long journey through Congress the REVIEW has been a week ahead of all other sources of information with its reports on the status of the paragraphs affecting the seed trade.

THE increase in the call for sweet pea seed of the winter-flowering varieties is attracting the attention of all seedsmen who cater to the florists' trade. Since Zvolanek made the sweet pea an almost all-the-year-around flower, it has become one of the important crops under glass. Last winter the production of sweet pea blooms was almost everywhere heavier than it ever had been before, and, interesting to relate, they proved one of the most readily salable items in both wholesale and retail stores. The result is the present season's further increase in the number and size of orders for seeds of the winter varieties. The success of the Spencer sorts in the cut flower markets last spring promises to also result in an increased call for these sorts for later flowering. A good many florists know the Spencers only as the "butterfly" peas.

THE death of Edward M. Lyman, Springfield, Mass., is reported in the obituary column, page 15, of this issue.

THERE will be a good sale for cyclamen seeds this season, because nearly every grower of cyclamen could have sold more plants last spring.

THE new rates of duty on seeds and bulbs went into effect Friday, August 6, in exact accordance with the publication made on page 40 of the REVIEW of August 5.

THE opinion is held in certain quarters that the "streak" disease that is giving so much trouble to English growers of sweet peas is not a disease at all, but due to weakening constitution.

THE Routzahn Seed Co., Arroyo Grande, Cal., stated August 2 that as it entered into harvest, crop conditions were unusually good, especially on its 350 acres of sweet peas and flower seeds.

ENGLISH seedsmen have had a season to date almost the exact opposite of that with which those in the United States have had to contend. Where we have had it hot and dry for many weeks, England has had an unusually cool, rainy summer.

THE Garton-Cooper Seed Co., Warrington, England, has been incorporated (registered, they call it over there) to push the seed business of Gartons, Ltd., and the insecticide business of Wm. Cooper & Nephews, both of which firms have offices in the United States.

It is alarmingly dry in the Michigan and Wisconsin seed-growing sections.

George Gibbs, the Washington bulb grower, is contemplating forming a company with men of experience in the industry to go more extensively into the growing of Holland bulbs in west Washington.

L. A. Budlong Co., Chicago, began harvesting onion sets August 9. The weather has been extremely dry in the Chicago district, and the yield has been cut down materially. The harvest in the district south of Chicago was practically completed last week.

Lawrence S. Payn, traveler for Ets André Leroy & Cie., H. Lorin successor, wholesale seed growers, Angers, France, sails from New York for home August 12 by La Touraine, having finished his annual business journey in America for 1909. Mr. Payn reports business as having been excellent and is pleased with his trip.

HARRISII BULBS.

The steamer Bermudian, arriving at New York August 6, the day after the new tariff on lily bulbs, $5 per thousand, went into effect, had the following consignments:

Crossmond, L. D. & Co.	209
Elliott, Wm. & Sons	16
Maltus & Ware	17
Outerbridge, A. E. & Co.	52

THE SNOWFLAKE SWEET PEA.

The Snowflake sweet pea was introduced last season by W. W. Rawson & Co., Boston. As to its history, Mr. Fuld says: "It appeared with us as a sport on one of the Unwin sweet peas, several years ago, and as it was so distinct as a plant and for color, we sorted it, and really to our surprise we cannot find a single other sweet pea in our entire row other than the true variety."

Some blooms seen August 4 were from plants that have been in bloom since June 10, nearly seven weeks. The stems

were of good length and the number of flowers was up to the standard and the size of bloom was above the average. The great quality of this variety is said to be its absolute purity of color. Mr. Fuld says there is not the slightest suggestion of green or yellow, which is so prevalent in the best white sweet peas of today, and, furthermore, it is one of the freest blooming white sweet peas he has seen for the last three years.

PEA AND BEAN CROPS.

Burnet Landreth, Jr., of the D. Landreth Seed Co., has just returned from inspecting the pea and bean crops in New York, Ontario, Can., northern and central Michigan, and eastern Wisconsin, and he reports that beans are not yet far enough developed to permit any accurate estimates, but in every instance they are from ten days to two weeks late. The stand is good, but, as they are just coming into flower, it is difficult to tell what the result will be.

It seems evident to Mr. Landreth that beans will be scarce, as he found a great many bushels in the hands of farmers who had failed to plant them, and unless the beans which were planted yield much more than the average, we may look for a shortage in bush beans this coming year.

As to peas, in many instances the crop is light. Owing to the wet weather in the spring, the farmers were late in planting; consequently some Extra Earlies were being harvested while other patches were not even in bloom. The dry weather has shortened the vines a great deal, and the pods more so, many pods containing only two peas. In fact, he saw quantities of Extra Earlies and Alaskas with vines less than fifteen inches tall. From the appearance of the many fields which he inspected, he is of the opinion that White Extra Earlies certainly will not be more than fifty to sixty-five per cent of a crop, a great many fields not promising more than one and one-half bushels to each bushel sown, while it is doubtful if a number of farmers will get back their planting stock.

Alaskas, Mr. Landreth thinks, will be very short, unless everyone has overcontracted and the large growers have planted for a considerable surplus. American Wonders and Nott's Excelsiors will certainly be short, not more than fifty per cent of a crop. Horsford's and Advancers, and other peas of that class, may yield seventy-five per cent, while the tall varieties, such as Telephones and Duke of Albany, if the season is not unusually favorable from now on, will also be extremely short.

To sum up, the pea situation looks to Mr. Landreth anything but encouraging, and he will not be at all surprised if peas

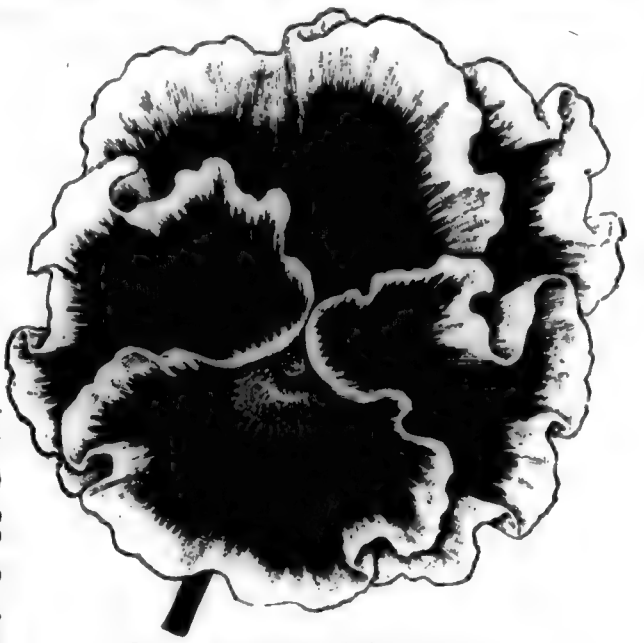
bring even higher prices than they did last year.

Reports from New Zealand and Germany also indicate short crops; consequently we cannot expect any surpluses, to amount to anything, to come from these countries.



In the districts which Mr. Landreth visited the canners report very unsatisfactory yields; consequently their pack will not be nearly as large as anticipated, and it therefore looks as if canner planting stock will be as much in demand this winter as it was last.

BEETS RUNNING TO SEED.

What is the cause of beets going to seed before they begin to make bottoms, and will they stand transplanting here, in the western part of the state of Washington? I have no success in transplanting them. C. J. J.

The cause of beets going to seed before they make bottoms is continued checks in their growth. Beets can be transplanted and will proceed to make a bulb, provided there has been only one check to their growth. This will be understood when we state that if plants were transplanted twice the chances are

that after the second transplanting they would run to seed. The same is true when they are in the garden bed and not transplanted. A second check, caused by rain coming after a continued drought, will cause them to run to seed. There is no reason why beets will not come on all right and make a big bulb when transplanted once at any point, whether in Washington or in any other part of the country where the climate gives a fairly uniform growing season. J. M. C.

ONION SEED IN ILLINOIS.

The publication in last week's Review of a field of onions growing for seed at the farm of the Livingston Seed Co., Columbus, O., has brought from H. W. Buckbee, Rockford, Ill., the photograph reproduced on this page and the comment that Illinois, as well as Ohio, can show some first-class fields of onion. The photograph was made August 2, and in the original picture it was possible to recognize Mr. Buckbee himself inspecting his prospective crop.

The reports from all the sections of the middle west where there are fields of onion growing for seed indicate that there is little blight, and with favorable weather from now to harvest a good yield of seed is to be expected. In none of these central western sections is the acreage large, two or three acres here and five or ten acres there, but in the aggregate a good crop will mean a considerable addition to the supply of onion seed for 1910.

SWEET PEAS.

W. Atlee Burpee, of Philadelphia, was not only a visitor at the big sweet pea show in London, July 23, but an exhibitor of flowers grown from his stocks over there, and was awarded a gold medal for a collection which contained fine bunches of the Spencer varieties of Senator, Apple Blossom, Flora Norton, New Prince of Wales, Mrs. Routzahn, etc.

The prizes offered by C. C. Morse & Co., for twenty-four bunches, were won by W. H. Ravonsley, Lincoln, first; A. Tigwell, Greenford, second. The Burpee challenge cup, for a display of sweet peas in a space 3x4 feet, was awarded for the second time to R. Bolton, Carn-

SOW NOW

forth; second, Silas Cole, Northampton.

For American varieties of sweet peas, prizes were offered by W. Atlee Burpee for twelve bunches and by C. C. Morse & Co. for six bunches, and the best varieties shown were of the Spencer type, Asta Ohn, Mrs. Routzahn, Ramona, Tennant, Beatrice and Mrs. Sankey.

Among the novelties shown which found favor with the public were Mrs. W. J. Unwin and Edna Unwin, from W. J. Unwin; Anglian Blue, Anglian Pink and Anglian Orange, from E. W. King & Co.; Mrs. Townsend, Ida Townsend and Mrs. Cawthorne, from Jarman & Co.; Orange King, from S. Bide & Sons, and Colleen, from W. Deal. There were rumors afloat that there would be yellow sweet peas in evidence. On the stands, however, they were non est, but some of the fraternity of a sportive character had yellow blooms of the deepest dye in their buttonholes, suggestive of the aniline bottle at home.

It will be remembered that the premier novelty of 1909 was George Stark, but the raisers, G. Stark & Sons, were unable to send it out on account of their limited stock. They have sold over 5,000 packets for next season's delivery, and their crop prospects at present are good.

This show was undoubtedly the largest ever held under the society's auspices, and altogether it was probably the best, certainly the best as regards the decorative effect.

Unfortunately, the names of the premier novelties of the year could not be announced at the show, as usual. The floral committee does not give awards to novelties as exhibited; they have to undergo a more stringent test, especially for fixity. The raisers send seeds in spring to the society's superintendent of trials, and they are grown under number without the raiser seeing them until the floral committee has done its work. The cold, sunless, rainy season militated against the flowers developing, and they were judged after a spell of three or four days' wind and rain. Consequently the committee deferred its decision, in order to make another inspection under more favorable auspices.

A few days prior to the show, between fifty and sixty members of the society visited the sweet peas growing for seed on the farms of Cooper, Taber & Co., Essex, W. Deal, Kelvedon, and E. W. King & Co., Coggeshall, and the large acreage and purity of stocks generally were favorably commented on. The crop prospects at present are good, but a long spell of sunny weather is now required, as this alone will determine whether there will be a full or a short crop.

In consequence of a controversy in one of our journals last winter, in which E. W. King & Co. were guaranteeing ninety per cent fixity of their Spencer types, R. Sydenham, Birmingham, one of the largest mail-order houses in sweet peas, challenged the King firm to prove its statement by an independent trial, the loser to pay the trial expenses and £10 to the gardening charities. E. W. King promptly accepted the challenge, and seeds of ten varieties were sent to the society's trial grounds, where they were scrupulously tested, and judged a few days ago. The result was altogether in King's favor. Twenty seeds of each variety were sown, and I believe seven varieties were quite true and three varieties had one rogue each. E. W. King has received numerous congratulations upon his pluck in accepting the challenge, and upon the result, also. Bee.

Majesty Mignonette

Boddington's Majesty Mignonette

Recognized by the growers as the **best paying and finest fancy** Mignonette grown. In the market it always brings **top prices.** Seed saved from selected spikes (only) under glass.

CATALOGUES RECEIVED.

Little River Nurseries, Little River, Fla., orange and grapefruit trees, tropical fruits, ferns, palms and miscellaneous plants; Jackson & Perkins Co., Newark, N. Y., some nursery necessities, such as knives, spades, pruning shears, etc., also the J. & P. tree counter; the Livingston Seed Co., Columbus, O., a "Picture Pamphlet"; Stuart Low & Co., Bush Hill Park, Middlesex, England, new and choice roses; Peterson Nursery Co., Chicago, Ill., wholesale and retail catalogues of peonies and iris; Burnett Bros., New York, fall bulb book.

GLEN COVE, N. Y.

The Nassau County Horticultural Society held its regular monthly meeting in Pembroke hall, Wednesday, August 4. President Everett occupied the chair. There was not a large attendance, owing to weather conditions. There was a heavy rain, which was welcomed by gardeners and farmers alike.

The secretary read communications from E. Earnshaw, of the Bon Arbor Co., and Mrs. A. Young, of Glen Cove, donating $10 each toward the fall show. Mrs. Young requested that her prize be awarded to the best collection of outdoor roses. A letter was read at the previous meeting, July 14, from Stumpp & Walter Co., N. Y., offering $10 for the fall show.

Messrs. Holloway, Garrett and Mense acted as judges at the monthly exhibition. The awards in the points competition were as follows: D. Reul, vase of gladiolus, Mrs. Francis King, 93⅓; V. Cleres, vase of poppies, 85; G. Wilson, Comet tomatoes, 81⅔; H. Gaut, antirrhinum, 81.

G. Wilson staged a collection of vegetables for exhibition, and was awarded a cultural certificate. The same exhibitor also got an honorable mention for a vase of White Spencer peas. The sweet peas were exceptionally good for this time of year.

FLORISTS' PUBLISHING CO.
334 Dearborn St. Chicago

J. Dombrosky and J. W. Barton received the thanks of the society for an exhibit of asters and Marguerite carnations, respectively.

The gladioli shown by D. Reul were fine. Several elderly members remarked that they were among the finest they had ever seen.

J. Millar, of Oyster Bay, Mr. Marshall, of Glen Cove, and J. Peterson, of Wheatley Hills, were elected to active membership. W. H. M.

TYLER, TEX.—Among the principal retail florists in this city are James Whitten, Mrs. Frank Hewitt and Mrs. George Hill. Mr. Whitten says that business during the last season was excellent, in spite of the fact that roses are grown outdoors here nine months of the year and neighbors give the blooms to one another. "We florists," he says, "don't have an easy time, by any means."

ALLEGAN, MICH.—A local newspaper, in referring to a greenhouse to be built at Plainwell, made the erroneous statement that it would be the only one of its kind in Allegan county. At Allegan are the greenhouses of Conklin & Hudson, who are adding four more houses this year and putting up a new boiler house, 16x22. A. J. Tozer, of Otsego, three miles from Plainwell, has a greenhouse, and J. J. Utter, of Bravo, has an establishment.

NURSERY NEWS.

AMERICAN ASSOCIATION OF NURSERYMEN.
Officers for 1909-10: Pres., F. H. Stannard, Ottawa, Kan.; Vice-Pres., W. P. Stark, Louisiana, Mo.; Sec'y., Geo. C. Seager, Rochester, N. Y.; Treas., C. L. Yates, Rochester, N. Y.

JOS. HACKETHAL has purchased the south half of the Harrison nursery property, north of the city of York, Neb., for $2,300.

VISITED CHICAGO: B. H. Farr, Reading, Pa., president of the American Peony Society, en route to Iowa for a visit with his father.

STORRS & HARRISON CO., Painesville, O., is building another winter storage cellar, 112x240 feet, on the south of its present large brick cellar.

THERE have been few seasons in the east in which the value of persistent cultivation of the soil has been so apparent as it has been in this unusually dry season.

THE new customs duties on nursery stock went into effect Friday morning, August 6, in exact accordance with the publication on page 40 of the REVIEW of August 5.

THE mail vote taken to determine the next meeting place of the American Association of Nurserymen indicated that Denver was the choice by a good majority, 197 for Denver to 163 for St. Louis.

J. H. DAYTON and T. B. Meehan have returned from their trip to the Pacific northwest, much impressed with the prosperous condition and evident rapid growth of the nursery interests in that section.

F. H. STANNARD, president of the American Association of Nurserymen, has appointed C. L. Watrous, of Des Moines, Ia., as the nurserymen's representative on the National Council of Horticulture.

J. H. PROST, Chicago's new city forester, is getting busy. He has issued two bulletins during the last month, the first one a description of the tussock moth and its ravages, with suggestions for its extermination; the second a call for the planting of more trees.

WM. A. PETERSON, Chicago, has been making automobile trips this summer to visit the nurseries in Indiana, Michigan, Wisconsin and even as far as Mayfield, Minn. He says the general state of business with the nurseries of the middle west never was better.

NEW YORK NURSERY LAW.

The nurserymen's committee on legislation has expressed the opinion that "the New York nursery law is one which might well be copied by other states of the Union." Other authorities have made commendatory references to the New York law. And it is natural that many nurserymen should be curious to learn more about a law which is so favorably regarded. Space, therefore, is willingly given in the REVIEW for the publication of a complete copy of the law.

The first section of the law, which has special reference to the prevention of disease and pests, is given herewith. The second section, which provides for the application of remedies and for the issuance of certificates, will appear in a later issue of the REVIEW.

§ 304. The prevention of disease in trees, shrubs, plants and vines and the extirpation of insect pests that infest the same.—No person shall knowingly or willfully keep any plum, peach, almond, apricot, nectarine or other trees affected with the contagious disease known as yellows. No person shall knowingly or willfully keep any peach tree affected with the disease known as little peach. Nor shall any person knowingly or willfully keep any trees or plants affected with the contagious disease or fungus known as black knot, nor any tree, shrub, plant or vine infested with or by the San Jose scale or other insect pest dangerously injurious to or destructive of the trees, shrubs or other plants; every such tree, shrub, plant or vine shall be a public nuisance, and as such shall be abated and no damage shall be awarded for entering upon premises upon which there are trees, shrubs, plants or vines which may be infected with yellows, little peach or black knot or infested with San Jose scale or other insect pest, for the purpose of legally inspecting the same, nor shall any damage be awarded for the destruction by the commissioner of agriculture or his duly authorized agents or representatives of such trees, shrubs, plants or vines, if necessary or proper to suppress such disease or pest, if done in accordance with the provisions of this article, except as otherwise herein provided.

Every person, when he becomes aware of the existence of such disease or insect pest in any tree, shrub, plant or vine owned by him, shall forthwith report the same to the commissioner of agriculture at Albany, New York, and the said commissioner shall take such action as the law provides. If in the judgment of said commissioner of agriculture or the person or persons representing him, the trees, shrubs, plants, vines, boxes, containers or packing material so infected, infested or diseased should be destroyed, or there is reasonable ground to believe that such trees, shrubs, plants, vines, containers or packing material are or may be so infected, infested or diseased that they should be destroyed, then such destruction shall be carried on and completed under the supervision of the commissioner of agriculture or the person or persons duly appointed by him and authorized so to do, without unnecessary delay, but the owner of the trees, shrubs, plants, vines, boxes, containers or packing material shall be notified immediately upon its being determined that such trees, shrubs, plants, vines, boxes, containers or packing material should be destroyed, by a notice in writing signed by said commissioner or the person or persons representing him, which said notice in writing shall be delivered in person to the owner of such trees, shrubs, plants, vines, boxes, containers or packing material or left at the usual place of residence of such owner, or if such owner be not a resident of the town, by leaving such notice with the person in charge of the premises, trees, shrubs, plants, vines, boxes, containers or packing material or in whose possession they may be; such notice shall contain a brief statement of the facts found to exist whereby it is deemed necessary or proper to destroy such trees, shrubs, plants, vines, boxes, containers or packing material, and shall call attention to the law under which it is proposed to destroy them, and the owner shall within ten days from the date upon which such notice shall have been received, or such shorter time as the commissioner of agriculture may designate, remove and burn all such diseased or infested trees, shrubs, plants, vines, boxes, containers or packing material.

If, however, in the judgment of the commissioner of agriculture, any trees, shrubs, plants, vines, boxes, containers or packing material infected with any such disease or infested with dangerously injurious insects can be successfully treated with remedies, he may direct such treatment to be carried out by the owner under the direction of the commissioner's agent or agents; any person refusing or failing to comply with the directions of the commissioner of agriculture or his duly authorized agents in carrying on the work of extirpating dangerously injurious insect pests and fungus or other diseases shall be guilty of a misdemeanor.

In case of objections to the findings of the inspector or agent of the commissioner of agriculture, an appeal shall be made to the commissioner of agriculture, whose decision shall be final. An appeal must be taken within three days from service of said notice, and shall act as a stay of proceedings until it is heard and decided.

When the commissioner of agriculture or the person or persons appointed by him shall determine that any tree or trees, shrubs, plants, boxes, containers or packing material must be treated or destroyed forthwith, he may employ all necessary assistants for that purpose, and

such person or persons, agent or agents, employee or employees, may enter upon any or all premises in any city or town necessary for the purpose of such treatment, removal or destruction. The commissioner of agriculture shall ascertain the value of all boxes or containers destroyed and all trees, shrubs and plants destroyed on the ground that there was reasonable cause to believe they were or might be infected, infested or diseased as provided herein, by having an agent of the department appraise the same. If the owner thereof is not satisfied with the value as fixed in such appraisal, then two arbitrators shall be appointed, one by the owner and one by the commissioner of agriculture or his duly authorized representative, and the value fixed by such arbitrators shall be final when duly approved by the commissioner of agriculture. But if such arbitrators fail to agree, then each arbitrator shall make a report to the commissioner of agriculture setting forth the values as determined by him, and the said commissioner shall thereafter fix a value upon the articles so appraised, which value shall be final. The commissioner of agriculture shall thereafter make to the comptroller of the state of New York a detailed statement in which he shall set forth the boxes and containers thus destroyed and the trees, shrubs and plants destroyed on the ground of reasonable cause to believe that they were or might have been infected, infested or diseased, and the value thereof determined as provided herein. The comptroller shall thereafter draw his warrant on the treasurer for the amounts certified by the commissioner of agriculture as the value thereof, and the treasurer shall pay to the owner or owners of the said boxes, containers, trees, shrubs and plants so destroyed the value thereof from any money in the treasury specifically appropriated therefor.

The provisions of this section shall apply to all boxes, containers, trees, shrubs and plants hereafter or heretofore destroyed, except as to such boxes, containers, trees, shrubs and plants as were brought into the state illegally, and such as are known to be infected or infested with such disease or pests.

MANSFIELD, PA.—Mrs. Robert Crossley is rebuilding and adding to her plant, so that when finished she will have 22,000 feet of glass in good shape, besides coldframes.

FAIRPORT, IA.—Mr. and Mrs. George Fuestal have just completed an unusual trip. They started from Dubuque in a houseboat and floated down as far as Muscatine. They were a week on the way and report a most enjoyable trip.

Seasonable Stock

LICE ON CAULIFLOWER.

What can be used on cauliflower to drive away lice? H. G. N.

For lice on cauliflower I have never used anything but the tobacco products, diluted in water according to directions for spraying. All the different named extracts of tobacco will kill all the lice they touch, but not any that escape the wetting. H. G.

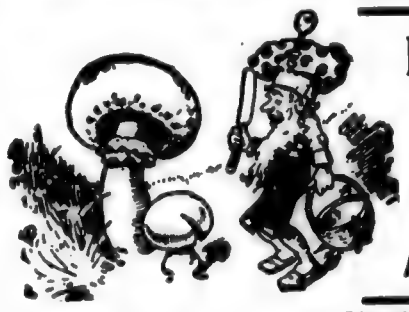
WORMS ON CABBAGE.

What would you recommend for use on cabbage to keep off worms? H. G. N.

Use one ounce of saltpeter to a gallon of water and apply with a whisk broom, in much the same way as small gardeners used to apply Paris green on potatoes. This saltpeter solution is quite effective in keeping down the cabbage worms. If some method of catching the moths could be invented, it would be a great boon to cabbage growers in some localities. In rainy seasons and good growing weather cabbages grow so fast that they are not much injured by the worms, but in dry seasons they are often ruined, as the worms eat them faster than they grow. H. G.

PESTS IN CUCUMBER HOUSE.

We are sending you a few cucumber leaves that are attacked by a small maggot. Nearly every leaf was affected the same way in a house 120x140. We have burnt tobacco stems regularly once a week, and three different times we used a little Cayenne pepper on the burning tobacco stems, but neither of these seemed to check the trouble any. We first discovered it three seasons ago, but it was not bad then. We are located in California.



Can you advise us what to use to destroy this pest without injuring the plants? G. B. & S.

The samples were so badly rotted and mashed together when received that it is difficult to tell much about them, but I am satisfied that in all my experience I have never before seen such a pest in a cucumber house. It must be an insect that eastern growers are not troubled with, probably an outdoor pest of your California climate that has happened to get a foothold in the greenhouse and is hard to dislodge.

I would suggest that you send specimens to your state entomologist at once. You will probably not be able to save this crop now, but may learn how to prevent future losses from the same pest.

John J. Davis, of the Illinois Department of Entomology, Urbana, Ill., has just sent out a thorough bulletin on the fumigating of greenhouses with hydrocyanic acid gas. Complete directions have also been published in the Review within the last year. I think that the use of this gas would probably be a good way to clean your houses of the pests.

Do not let the matter drop. We would be interested in having more information, hearing your state entomologist's opinion, and also learning of what success you have in getting rid of them. H. G.

PACIFIC COAST.

SPOKANE, WASH.

The Market.

Neither amateur nor professional flower circles have been particularly dull this last week. Considerable funeral work was called for, owing to several accidental deaths. A city fireman was killed and all of the floral firms had orders from the various departments at the City hall. Noticeable among the pieces were gates ajar, picture panel and large wreaths. On account of the wreck on the Spokane & Coeur d'Alene Electric Railway, which resulted in the deaths of fifteen people, funeral work was called for steadily this week.

Roses are almost an unknown quantity. Carnations are to be had in limited quantities and in quality not to be boasted of. Peas continue plenty and of very fine quality.

Various Notes.

Windows are showing good average stock. The Spokane Florist Co. had a large basket of auratum lilies, with a tie of Nile green ribbon as its leading attraction.

The Sanders store has a fine lot of peas.

M. Armstrong's window feature was a large arch of peas and gypsophila.

Hoyt Bros. Co. displayed a group of sweet pea baskets with cocos and smilax garlands.

A recent prominent church wedding had decorations of palms, smilax and pink peas. Armful bunches of Countess Spencer peas with adiantum were used for the bridesmaids; armful bunches of Enchantress and Crocker carnations with empire tie of pink satin ribbon and the usual shower of white peas for the bride's bouquet.

An interesting annual event in the shape of a sweet pea fair was held by the ladies of the Universalist church. Much time and pains were consumed in preparing schemes for display and some designs were exhibited which would have done

No Grower of Vegetables under glass can afford to do without the Wittbold system of

credit to a professional. Twenty-five entries were made. First award for design went to a rainbow whose many tints and shades were well blended. Absence of foliage was the most noticeable fault of this design. A merry widow hat of peas, with a plume of gypsophila, came in for a share of favorable comment. A ladder design took second prize. Purely artistic arrangement was best shown in a wooden shoe, filled with peas and set on a mirror. Another similar arrangement was a large brilliant shell filled with flowers of harmonious colors. An American flag was also worked out, as is usual in shows. Good workmanship, but lack of originality, was the verdict on the latter piece. Honorable mention was made of a basket of King Alfred peas with ribbon to match, the work of a ten-year-old girl. Quality of the stock exhibited was judged as especially fine.

Everything is in shape for the National Irrigation Congress. Delegates are already arriving. The Hotel Spokane has been decorating with some artistic baskets both in cork and wire, the work of Hoyt Bros. Co.

Visitors from the east were Arthur Zirkman, of M. Rice & Co.; L. C. Schelte, of Park Ridge, Ill.; Mr. and Mrs. Will, of Minneapolis, Minn.; J. S. Medary, president of Oak Grove Cemetery Association, of La Crosse, Wis.

Mr. and Mrs. C. P. Kipp, of the Spokane Florist Co., are home from their California trip and Mrs. Minnie Schaeffer has been relieved from duty for a month, to visit the Seattle fair and spend the remainder of her vacation at a lake resort in Idaho.

Miss Effie Goodale, bookkeeper for Hoyt Bros. Co., is leaving for a vacation trip to Seattle and Tacoma. S.

SAN FRANCISCO.

The Market.

There was a slight improvement in business last week and, with the schools resuming their sessions, appearances are more promising. There has been a slight stiffening in prices on carnations and roses, although everything is still at low water mark. The growers have already commenced the change of stock in the houses and this assists in making a slight shortage in the supply. The weather is the most favorable one could wish for work of this kind and before long we shall have quantities of new stock on the market.

Asters are the rage at present. They have taken the entire attention of the flower loving public and, although prices are low, they are used in such great quantities that up to this time there has been no glut noticeable. Sweet peas are of such short stem they are now practically worthless for anything except funeral work. Advices from the chrysanthemum growers give assurance the crop will be larger and better than ever this season, judging from present indications. Gladioli of the newer sorts move well. They cost the retailers from $3 to $5 per hundred spikes and have entirely taken the place of the old-fashioned sorts. Dahlias gave promise early in the season that they would be one of the popular summer flowers, but with the exception of some of the white sorts, for funeral work, they have not been in as good demand as they should be.

Funeral work has been very well divided up during the last week. It has probably been the best in that line of any time during the summer.

Various Notes.

Domoto Bros. have finished their new plant house at Elmhurst, Cal. It is one of the largest in the country.

The May Seed Co. is busy with the preparation of its new fall bulb catalogue as well as the general catalogue for next season.

F. Ludemann has returned from his trip to the country considerably improved in health.

E. L. Werner has gone on a month's trip to the Seattle exposition. He will inspect most of the northern nurseries before he returns to San Francisco.

The Fillmore Street Florists have opened an establishment on Fillmore street, in the Hotel Dale building.

Joseph Stark, of San Jose, is in Berkeley, Cal., for the summer and will leave for his home town next month.

Geo. E. Chesley, of Los Angeles, is in town for a few days. G.

HARTFORD, CONN.

Two flower shows will be given this fall by the Connecticut Horticultural Society. The first exhibition will be the dahlia show, at Unity hall, September 23 and 24. The chrysanthemum show will be held at Putnam Phalanx hall, November 3 and 4.

There will be thirty-five classes in the dahlia show, of which twenty-five will be for professional growers and ten for amateurs. Suitable cash prizes will be given.

The chrysanthemum show will comprise a free-for-all class, in addition to the professional and amateur classes. There will be a separate class for commercial growers and another for private gardeners only.

Besides the prizes offered by the society, there are promises of special prizes from various individuals.

ROCHDALE, MASS.—The greenhouses at Greenville are being thoroughly renovated, and Walter E. Draper, the junior member of the firm, says that the business will be enlarged and will be pushed energetically. Hereafter the establishment will be known as the Maple Ridge Greenhouses.

NEPHROLEPIS ELEGANTISSIMA COMPACTA

Another New Fern originating with us

To be introduced fall, 1909

Of all the valuable introductions in Ferns that we have sent out, beginning with the Pierson (Nephrolepis Piersoni), we consider Elegantissima Compacta the most valuable of all, particularly from a commercial standpoint.

While this resembles Elegantissima in a general way, it is far superior to that variety, on account of its perfect habit. Yet it can hardly be compared with Elegantissima except in a general way, because it occupies a place by itself, and is as distinct from Elegantissima as that variety is from Piersoni. In fact, it bears the same relation to Elegantissima that Scottii does to Bostoniensis.

Elegantissima Compacta has an ideal habit. The fronds are considerably shorter than those of Elegantissima, and it is a more compact plant. It throws a great many more crowns naturally, making a very bushy, dwarf, compact plant. The difference between the two varieties can be seen at a glance.

Fine, strong plants, 2¼-inch pots, $5.00 per dozen; $35.00 per 100; 4-inch pots, $7.50 per dozen; $50.00 per 100; 6-inch pans, $1.50 each; 8-inch pans, $3.00 each.

We make a specialty of all kinds of Nephrolepis, carrying a large stock of all sizes at all times—Piersoni, Elegantissima, Superbissima, Bostoniensis, Scottii, Whitmani, Amerpohlii, etc.

See our exhibit of this at the Cincinnati Convention.

CHAS. D. BALL, Holmesburg, Phila., Pa.

LEXINGTON, KY.

The Market.

Except for funeral work, there is practically nothing doing. Roses are good for this season of the year and they retail for $1 per dozen. Carnations are about over for this season. Asters are now the main cut flowers and they retail for 50 cents per dozen. Outdoor flowers are abundant and sell slowly at present. The market is well supplied with the hardy hydrangeas and there are some excellent flowers among them. There is little demand for them, except for funeral and decorative purposes. Some of the growers are sending good lilies to the downtown stores. Gladioli have been coming in of fairly good quality, but they are not as plentiful as they were.

Various Notes.

H. G. Evans, one of Honaker's designers, is away on his vacation.

Miss Bessie Le Clere has returned from a short visit in Frankfort, Ky.

The boys at the J. A. Keller estate are progressing rapidly with the work on the new carnation house. Their roses, carnations and mums look well.

John Ballow, of Frankfort, was a recent visitor here and called on Lucien Le Clere.

Everybody is preparing for the convention. BLUE GRASS.

BRIDGEPORT, CONN.—Charles Pflomm's Sons furnished the decorations for the lawn fete which was recently given by the Masonic Building Asssociation at the Rohde residence. The verandas and several booths were handsomely decorated with cut flowers, palms and other plants.

The Market.

Trade has been quiet here for the last two weeks, with little stock coming in. Roses are in good supply off of young stock, and of good color and good foliage. Carnations are scarce in this market at present, and what few good ones do come are picked up on short notice. Gladioli have been plentiful and go fairly well, but at low figures. Asters are plentiful, such as they are, but there are no real good ones to be seen here. So far they are short stemmed and not up to the standard. All growers are complaining about them.

There are quite a few rubrum lilies coming in, and they go fairly well. Ferns seem to take the lead on the plant end, and they have moved nicely. Some good valley is being received, but the demand is slow.

Various Notes.

At the club meeting, held July 27, a resolution was drawn up in appreciation of the merits of our late associate, J. R. Hellenthal, and the club sent a wreath lettered "Columbus Florists' Club." The funeral services were largely attended, though there were few florists there, as about twenty-five of them went to the house in a body the evening before. There were loads of flowers, and some beautiful designs were among the number.

Mrs. E. M. Krauss passed through here from the west last week and stopped off long enough to look up a new location for fall.

The Fifth Avenue Floral Co. is sending in some good Maids and Valley at present. They have all their carnations benched, and all are looking fine.

The Munk Floral Co. is busy this week getting its carnations housed. O. Munk was overcome by the heat last week, and was not able to be around much for a few days.

The Livingston Seed Co. is busy moving its seed department to East Chestnut street. J. M.

VIENNA, ILL.—W. E. Galeener is away on a trip to the west, where he will visit various points of interest, including the exposition at Seattle.

POMPON MUMS

We have a few thousand Pompon Mum plants which we would like to close out at $15.00 per 1000; 500 for $8.00. Our selection of varieties, but only strictly first-class sorts and fine plants. Order these at once. We have white, pink and yellow colors.

DES MOINES, IA.

Current Comment.

J. S. Wilson Floral Co. is busy rebuilding two greenhouses, one 20x185 feet and the other 24x200 feet, and is also remodeling and enlarging the office and salesroom. The company reports the first year's business, ending July 1, as more than satisfactory, and the business of last July as more than double that of July of last year.

Alex H. Wilson, of the J. S. Wilson Floral Co., left Saturday evening for a vacation trip to Seattle, Wash., stopping at Denver, Salt Lake and Twin Falls, Idaho, on his way out.

William Trillow is overhauling his greenhouses, getting in shape to plant carnations next week. He reports a good increase in business over last year.

The Guthrie-Lorenz Co. has moved its store from Sixth street to the corner of Seventh street and Grand avenue, where the firm has double its former space, to accommodate its fast increasing trade in seeds and cut flowers.

Lozier's is putting in a new plate glass front on the east side store and reports business as good.

Charles McAniff has left the employ of Lozier's and is now doing carpenter work at the fair grounds.

Those going to the convention from here, so far as now known, are J. S. Wilson and wife, and J. D. Fulmer, wife and daughter. BOOSTER.

EL CAMPO, TEX.

A storm in the last part of July destroyed much property in this neighborhood. Most of the buildings in town were damaged more or less. Trees were broken down and all sorts of plants were laid flat on the ground. The storm continued with unabated fury for about four hours, and after an interval of an hour it returned, blowing in the opposite direction.

Mrs. J. C. Wheeler's two greenhouses, one of them a new, modern building, shared in the general destruction. Both houses were badly smashed, and the new one, being more exposed, was a total wreck. The stock, consisting of carnations, chrysanthemums and a general line of plants, was also completely ruined. Mrs. Wheeler had just been long enough in the business to get well started, and she says, courageously, that she has saved a little of the smaller greenhouse and will start again.

Lorraine Begonias

LESS THAN MARKET PRICE

6000 Lorraine Begonias, 2-inch stock, strong healthy plants, full of shoots, $10.00 per 100. Don't pass up this opportunity, it's a bargain.

GERANIUMS

A customer wrote this week when ordering 150 Jean Oberle Geraniums to be shipped at the Special Price of $3.00 per 100 prepaid, that: "In this connection we wish to state that the Geraniums we bought of you last October gave the utmost satisfaction to our customers, and incidentally to our pocket book; we will probably need to double our order next season; kindly send us special prices for fall delivery." Not a bad letter, was it? And don't you know that such a letter means something to you as well as to us? Get your Geraniums from selected stock, and you will please your customers. Ours represents the highest type of perfection.

On some kinds we are still making special prices for orders booked now for November and December delivery. Special offer for immediate shipment: 1000 in 20 varieties, from 2-inch pots, $18.50; from 3-inch pots, $25.00. Cash with order.

MILWAUKEE.

The Market.

Owing to the "Homecoming," which took place last week, August 3 to 7 inclusive, the florists' business, from the wholesalers' standpoint, was practically at a standstill. Shipping trade, however, kept up well and helped to move some of the good stock on hand. Carnations are the only scarce article just now, and there would not be any call for them if asters amounted to anything. As it is, the early varieties with most growers are a failure and the midseason and late ones have suffered from drought all through July, so that prospects in that direction are not any too bright. Sweet peas are also shorter stemmed than in previous seasons. The rose supply is fair, both in quality and quantity; too many gladioli of the darker shades were also evident.

Various Notes.

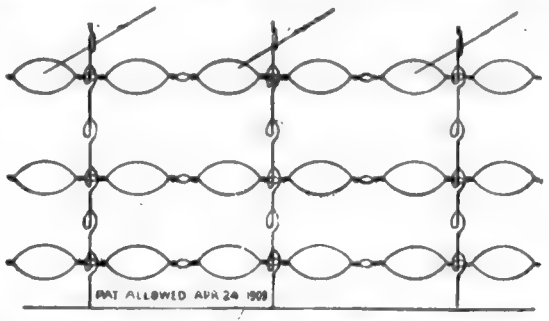
Thinking that the Homecoming spirit prevailed among most of our florists, President C. Dallwig postponed the club meeting from last Thursday to this week.

Nic Zweifel, state vice-president of the S. A. F., mailed a lot of circulars last week Saturday, calling attention to the coming convention at Cincinnati and soliciting new members. At this time the following have signified their intention of attending: F. H. Holton, Nic Zweifel, C. C. Pollworth and H. V. Hunkel.

Tickets for the Florists' Club's annual picnic, to be held August 22, at Crystal Spring park, are in the hands of the entertainment committee, consisting of Gust Rusch, Will Zimmerman and Gene Oestreicher; all arrangements have been completed and it is now up to the members and their friends to make it the most enjoyable affair to date.

Gust Rusch, manager at the Holton & Hunkel salesroom, is spending his vacation this week fishing.

The parades, both floral and historical, last Wednesday and Friday afternoon, during the Homecoming, proved that Milwaukee people and florists are still behind the times in putting forth any efforts to promote their own interests, or to show their love for natural flowers. In the auto parade artificial flowers only were used and in the parade Friday, Wm. Zimmerman was the only florist with a turnout, but it was a credit to all concerned, consisting of one of his fine delivery wagons, trimmed with sword ferns in pots, Asparagus plumosus, asters, gladioli, doves and ribbon. It shows there is at least one man in the trade who believes in advertising.



Last week the preliminary premium lists for the Milwaukee flower show, to be held at the new Auditorium, November 11 to 14, were sent out. Same may be had by addressing H. V. Hunkel, chairman, 462 Milwaukee street, Milwaukee, Wis.

Complete and revised premium lists and rules with entry blanks will be mailed October 1.

Bertrand H. Farr, Reading, Pa., president of the Peony Society, was the guest of his cousin, Fred Holton, a few days last week.

Other visitors were: Mrs. Guillaume and son, La Crosse, Wis., and Mr. and Mrs. Adam Zender, Rogers Park, Ill.

Most of the Racine florists and many others from neighboring towns took a look at our city while in its holiday attire for the Homecoming, which was a success and directly benefited all except the florists. E. O.

DON'T MISS

Looking over our adv. in April 22 and May 6 issues.
We offered some great values. Some fine Rubbers offered at $3.00 and $4.00 doz.

Our Flowering Begonias are fine.

THE REESER FLORAL CO, Urbana, Ohio

Look! Prosperity is Everywhere

And is Now Knocking at Your Door
WHY NOT GET YOUR SHARE OF IT?

This is our 25th anniversary. For 25 years we have been importing, growing and shipping that so well-known decorative plant the **Araucaria Excelsa, Excelsa Glauca** and **Robusta Compacta,** of which we are specialists. Convince yourself of the immensity and quality of our stock by coming to the spot—to our greenhouses—and see it growing. It will do you good.

On account of death in the family, and now sickness of one of my sons, we are prevented making an exhibit at the convention in Cincinnati.

Stopover privileges make us expectant, therefore we'll kindly invite our customers and friends, in going to or returning from the convention, to stop over at Philadelphia and pay us a visit. Our greenhouses are only 25 minutes' ride by trolley from 8th, 13th and Market Sts. to Ontario. In getting off the car at Ontario St walk two squares east to our greenhouses. We will gladly receive and entertain you and show you all the beauty spots for which Philadelphia is famous.

Four Houses Filled with the Best. With What? Sure, with ARAUCARIAS, His Specialty

Empty houses! That won't do. What shall I plant? What is the most profitable? Listen to what your neighbor florist has to say. Mr. McGinty to George Know Nothing: "I filled a reasonable portion of my greenhouses last year with Godfrey Aschmann's Araucarias, and I tell you straight out I was only sorry I did not buy more. In two weeks, just when the demand was the biggest, my stock was nearly exhausted. This year I shall be smarter. Last week my order to Aschmann called for just double the amount. I never can lose anything on such an investment as that. Every dollar put in Araucarias yields three to four times the value while we're asleep."

We are one of the largest importers of these well-known and beautiful evergreen decorative plants, the **Araucaria Robusta Compacta, Excelsa Glauca and Excelsa.**

Florists should bear in mind that no home, garden, lawn, etc., is complete without the Araucaria; therefore, if you wish to make money, recommend the Araucaria to your customers. Introduce this noble plant to your trade. We give you a special price, and it will pay you to handle them.

Araucaria Robusta Compacta, Glauca and Excelsa. Our reputation of being one of the largest importers and shippers of this beautiful evergreen decorative plant is so well known, dating far back into the 19th century, that our name, as well as the Araucaria itself, shall never die out, and is still fresh in people's minds, same as when we first started. Why the Araucaria is so popular is because it is an ancient plant, kept by Greeks and Romans as a special favorite in their household, as a good omen.

Araucaria Robusta Compacta and Excelsa Glauca, new importation, 3 tiers, 3-year-old, $1.00, $1.25 and $1.50.

Araucaria Excelsa Glauca. This is a beautiful blue variety, very graceful and beautiful. Specimen plants, 6-in., 7-in., 8-in. pots, 4 and 5 years old, 4, 5 and 6 tiers, 20, 25, 30 and 32 in. high, same in width, $1.50, $1.75, $2.00, $2.50 to $3.00 each.

Araucaria Excelsa, April (1909) importation, 2 to 3-year-old plants, 5, 5½ to 6-in. pots, 3, 4 and 5 tiers, 12, 14, 16 to 18 in. high, 35c, 40c, 50c, 60c to 75c.

Sago Palm, or Cycas Revoluta, 5½, 6, 7 and 8-in. pots, from 5 to 20 leaves to a plant, 10c per leaf.

Kentia Belmoreana, 4-in., 18c, 20c to 25c; 6 to 7-in., 6 good leaves, 75c, $1.00, $1.25 to $1.50.

Kentia Forsteriana, 8-in. pots, made up, 1 large, 4 ft. high in center, with 3 small around, price $4.00; single plants, 6 to 7-in. pots, 30, 35, 40 to 48 in. high, $2.00, $2.50 to $3.00.

Areca Lutescens, 4-in., made up of 3 plants, 25c.

Cocos Weddelliana, 3½-in., 18 to 20 in. high, 20c to 25c; 3-in., 15 in. high, 18c.

Ferns. Nephrolepis Whitmani, Todeaoides and Boston, 5, 5½ and 6-in. pots, 35c, 40c, 50c. Whitmani, large, 4-in. pots, fit for 6-in., 25c.

Adiantum Hybridum, very valuable for cutting, 6-in. pots, 25c, 35c, 50c.

Asparagus Plumosus Nanus. 2½-in. pots, $3.00 per 100; 4-in. pots, $10.00 per 100.

Asparagus Sprengeri. 2½-in. pots, $3.00 per 100.

Dish Ferns. Best assortment, 2½-in. pots, $3.00 per 100.

Jerusalem Cherries. We offer the best, new improved variety, already laden with large, orange-colored berries, 2½-in. pots, $5.00 per 100.

Begonia Gloire de Lorraine a specialty; also own new improved strain, introduced last Xmas is still well in the minds of florists. We have both the deep pink and the light pink variety (Lonsdale), 4-in. pots, 30c.

Cineraria Hybrida, Aschmann's well-known strain, at one-half price, tall, 2 in. pots, $3.00 per 100, ready September 1.

All goods must travel at purchaser's risk. Cash with order, please.

Please state if you want stock shipped in or out of pots.

Godfrey Aschmann, West 1012 Ontario St. **Philadelphia, Pa.**

To insure early delivery of our unexcelled rubber plants you should place your order now; first come, first served.
A. C. Oelschig & Sons, Savannah, Ga.

SEEDS.

COBURN'S SELECTED PANSY SEED.
BEST MARKET STRAIN GROWN.
Our seed is saved from about 12,000 plants, carefully selected, when in bloom, from the 500,000 we grow for our spring sales.
Each plant is carefully selected, color, size, form and substance being taken into consideration, and the proportion of each color is properly balanced.
As a result of over 25 years' work along these lines, we feel justified in claiming to have the best strain of pansies on the market, and we invite trial and comparison.
Growing our stock in this manner, we have only a limited amount of seed to spare, and in order to distribute as widely as possible, we offer it in packets of 1,000 seeds. Price $1.00 per packet (only one to each customer).
I. E. COBURN, 291 Ferry St., Everett, Mass.

Seed packets and bags. Catalogue, clasps and commercial envelopes, printed or plain. "If it's a Spangler bag, it's a good one." Estimates furnished.
E. J. Spangler Co., N. Howard St., Phila.

SEEDS—Continued

BUCKBEE'S "FULL OF LIFE" PANSY SEED.

New crop now ready, our MAMMOTH SUNRISE STRAIN unsurpassed for size, perfect form, rich colors and beautiful markings; the very finest gilt-edged stock for particular growers who want the best. 1000 seeds, 75c; ⅛ oz., $3.00; oz., $5.00. Giant Mme. Perret, rich wine and red shades, 1000 seeds, 50c; ⅛ oz., $1.75; oz., $3.00. Giant White, improved strain, 1000 seeds, 40c; ⅛ oz., $1.25; oz., $2.00. Improved Giant Yellow, dark center, 1000 seeds, 30c; ⅛ oz., $1.15; oz., $1.90. Improved Giant Black Prince, 1000 seeds, 35c; ⅛ oz., $1.20; oz., $2.00. Prompt shipment. Cash with order.
H. W. BUCKBEE,
Rockford Seed Farms, Rockford, Ill.

It is an absolute certainty and conceded by leading European growers, who have seen our pansies and theirs growing side by side in our gardens, that pansies grown from American seed will produce larger, earlier, finer blooms than foreign-grown seed of the same strain. We supply over 100 cities and towns in the west with blooming plants at a higher average price than any grower on the western continent. We sow and sell from the same bag. 1800 seeds, $1.00. Write for "Points on Pansies."
Steele's Giant Pansy Gardens, Portland, Ore.

HORTICULTURAL BOOKS

We can supply any of the following books at the prices noted, postpaid, and any other book at publishers' price.

Pronouncing Dictionary.
A list of plant names and the botanical terms most frequently met with in articles on trade topics, with the correct pronunciation for each. **25 cents**

Handy Manual.
By J. W. JOHNSON. Illustrated with plans for greenhouse heating and ventilating, by a practical steam and hot water engineer of long experience. 125 pages. **$1.00**

The American Carnation.
By C. W. WARD. Invaluable to the carnation grower. All departments of the business are treated in a thoroughly practical manner. This book is the work of a careful, studious grower of ripe experience. Fully illustrated. **$3.50**

Hardy Perennials and Old-fashioned Garden Flowers.
By J. WOOD. Describing the most desirable plants for borders, shrubberies, etc., foliage and flowering. Illustrated. **$2.00**

The Forcing Book.
By L. H. BAILEY. In this work the author has compiled in handy form the cream of all the available information on the subject of forcing vegetables under glass. In addition to this, the experience of many practical growers in different localities is furnished. **$1.25**

Bulbs and Tuberous Rooted Plants.
By C. L. ALLEN. A complete history, description, methods of propagation and full directions for the successful culture of bulbs in the garden, dwelling or greenhouse. The illustrations which embellish this work have been drawn from nature, and have been engraved especially for this book. Cloth. **$1.50**

Gardening for Profit.
By PETER HENDERSON. The standard work on market and family gardening. The successful experience of the author for more than 30 years, and his willingness to tell, as he does in this work, the secret of his success for the benefit of others, enable him to give most valuable information. The book is profusely illustrated. 376 pages. Cloth. **$1.50**

Insects and Insecticides.
By CLARENCE M. WEED, D. SC. A practical manual concerning noxious insects and the methods of preventing their injuries. Profusely illustrated. A generally useful handbook on noxious insects. It covers the whole field of insect pests very thoroughly and is especially valuable for its complete and up-to-date methods of fighting insects. The work is intensely practical. All the important insect pests are described and remedies for them, and methods of preventing their injuries described in detail. Cloth. **$1.50**

Handbook of Plants and General Horticulture.
By PETER HENDERSON. This new edition comprises about 50 per cent more genera than the former one, and embraces the botanical name, derivation, natural order, etc., together with a short history of the different genera, concise instructions for their propagation and culture, and all the leading local or common English names, together with a comprehensive glossary of botanical and technical terms. Plain instructions are also given for the cultivation of the principal vegetables, fruits and flowers. Cloth. **$3.00**

The Florists' Manual.
By WM. SCOTT. A practical guide for the florist, covering the successful management of all the usual florists' plants; including many topics, such as greenhouse building, heating and floral decorating, etc. Written so you can understand it and profit by its guidance. Fully illustrated. **$5.00**

Fumigation Methods.
By WILLIS G. JOHNSON. An up-to-date book on the practical application of the new methods for destroying insects with hydrocyanic acid gas and carbon bisulphid, the most powerful insecticides ever discovered. It is indispensable to the florist, nurseryman and gardener. Cloth. 313 pages. Illustrated. **$1.00**

Greenhouse Construction.
By PROF. L. R. TAFT. A complete manual on the building, heating, ventilating and arrangement of greenhouses, and the construction of hotbeds, frames and plant pits. Lucid descriptions and 118 diagrams and illustrations make every detail clear to the amateur and professional gardener and florist. Cloth. 218 pages. **$1.50**

Gardening for Pleasure.
By PETER HENDERSON. An illustrated guide to the amateur in the fruit, vegetable and flower garden, with full directions for the greenhouse, conservatory and window garden. Technical terms and phrases professional gardeners use in writing or speaking on matters relating to horticulture have been avoided as far as possible. 404 pages. Cloth. **$1.50**

Mushrooms—How to Grow Them.
By WM. FALCONER. This is the most practical work on the subject ever written, and the only book on growing mushrooms published in America. The author describes how he grows mushrooms and how they are grown for profit by the leading market gardeners, and for home use by the most successful private growers. Engravings drawn from nature expressly for this work. Cloth. **$1.00**

Cabbage, Cauliflower and Allied Vegetables.
By C. L. ALLEN. An explanation of the requirements, conditions, cultivation and general management pertaining to the entire cabbage group. The chapter on seed raising is probably the most authoritative treatise on this subject ever published. Insects and fungi are given due attention. Illustrated. 128 pages. Cloth. **50 cents**

The History and Culture of Grafted Roses for Forcing.
By ALEX. MONTGOMERY, JR. The most important contribution to the modern literature of the rose. Of much interest to every rose grower and of utmost value to growers of grafted roses. Containing practical description of the process of grafting, with full details of planting and culture; also directions for treatment to carry the plants a second year. **25 cents**

Water Gardening.
By PETER BISSET. This work supersedes all other books that have previously been written on the subject of aquatics and their surroundings, and gives in full detail all the practical information necessary to the selection, grouping and successful cultivation of aquatic and other plants required in the making of a water garden and its environments, and covering all conditions from that of the amateur with a few plants in tubs, to the large estate or park. **$2.50**

Greenhouse Heating.

HAVE you bought your winter's coal yet? If not, you would better get at it right away.

THE REVIEW will answer in this column any question relating to greenhouse heating, but please don't ask which is the best boiler—all those advertised are good boilers.

LOCATION OF EXPANSION TANK.

Where should the expansion tank be placed in a downhill system? On the flow or on the return pipe? J. B.

The best place for your expansion tank, in a downhill system with hot water, is in conection with the flow pipe, right over the boiler. Keep the tank as high as possible. An expansion tank should be placed at the highest point in the system, whether downhill or up.

G. T. E.

TWO SMALL HOUSES.

I have two greenhouses, 11x30, running north and south. The walls are made of concrete, with both gables of glass. The houses are seven feet to the ridge. The boiler house is at the south end. I want to use hot water to heat the houses. How many pipes will it take to heat it in zero weather to 55 degrees? I am located in Pennsylvania.

G. H. P.

It will take six lines of 2-inch pipe in each house; that is, a 2-inch return and a 2-inch flow counting as two pipes. This will be three circulations to each house. You can run these in pairs to suit yourself. G. T. E.

STARTING FIRE IN MIDWINTER.

Is it possible in this Minnesota climate, where one is not sure of mild days in January or February, to start a fire in a hot water boiler at that season?

I have a small house which I have found unprofitable to use during the dark months of November, December and a portion of January. The house runs north and south, and neither it nor its heating plant is connected with any other house. It is good for indoor pansies, and other plants which freezing does not injure. My only problem is, how can one fill the pipes if it is freezing? L. D.

Your letter is a little hard to answer, but I will give you as much information as I can. The better way is to start the water running into the boiler until it is, say, three-fourths full, then start your fire to heat up that water and then put in more water from time to time until your system is full. Putting in a small quantity at a time gives the water a chance to heat up before it gets into the system. Be careful, when you are doing this, to watch your fire and water. Increase the fire as you increase the water.

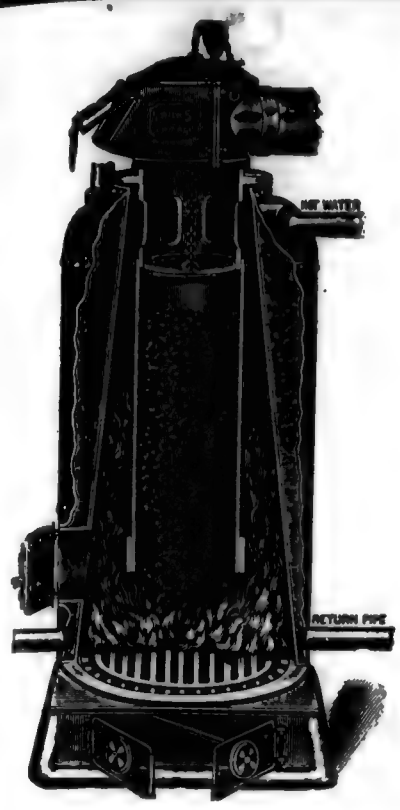
PROVIDENCE, R. I.



Trade Conditions.

Business here has been dull—duller than usual, even for the summer time. The only relief afforded has been from funeral work, which has been brisk and well distributed. The supply of asters more than equals the demand, and this has given the street merchants an opportunity to hawk their wares to good advantage. Carnations are small and unsatisfactory, and there is little else in the market.

Much anxiety has been felt by the growers on account of the long continued drought, less than an inch of rain having fallen for forty-six days previous to last Friday morning. This is the longest and driest period in seventy-seven years, according to statistics in this vicinity. Young carnation cuttings in the field have suffered, and other stock for benching has also felt the disastrous effects of the dry spell. The J. A. Budlong & Son Co., of Auburn, which has one of the largest farm and greenhouse estates in the state, has suffered especially in connection with its produce. It is estimated that the firm will lose fully $20,000 on the onion crop alone.

An Elaborate Decoration.

One of the most pretentious decorations seen in this vicinity in a long time was that furnished by Peter Byrnes, of Wickford, for the reception tendered by Mr. and Mrs. John H. Hanan, at the Casino at Narragansett Pier, on the evening of August 6. Blue and gold were the prevailing colors, in conformity with the colors of the Rhode Island state seal. The guest of honor was Governor A. J. Pothier, who was accompanied by his staff in full uniform. They were received beneath an immense arch of purple asters, more than 10,000 being used, from which was suspended an anchor of Golden Glow backed by a bank of palms

WILKS HOT WATER BOILERS

Are Best for SMALL GREENHOUSES, Etc.

Hundreds of Florists Are Now Using Them

READ WHAT THEY SAY OF THE WILKS BOILERS

Gentlemen: FERGUS FALLS, Minn., May 12, '06.
I cannot say anything but good about the two Wilks boilers I bought from you in 1904. They have given me the best of satisfaction; would have no others.
Yours truly,
S. N. MEHLIN.

Gentlemen: DALLAS, Texas, Dec. 1, 1904.
I find that one of the best boilers I have is one of your Wilks No. 24. What can you sell me one more for? I use it for soft coal and it is simply fine.
Yours truly,
HASKELL AVENUE FLORAL CO., Per Seth Miller.

and ferns. Galleries and walls were hidden under southern smilax, while large shields of blue asters with knots of Golden Glow blossoms held the graceful loopings of the festooned smilax. Small incandescent lights in blue and yellow added radiance and brilliancy to the general effect.

Various Notes.

William H. Tarbox, the "dahlia king," was one of the guests at the complimentary dinner given by the historic Kentish Guards, at East Greenwich, on the evening of August 5.

The J. A. Budlong & Son Co. has established headquarters at 64 to 66 South Water street, for the more advantageous handling of its produce.

Joseph Kopelman has got one greenhouse nearly ready to commence benching. It is 28x150 feet. This is to be the size of all the houses in the range, which will be placed side by side, with an 8-foot wall between them. He expects to begin benching 2,000 carnation plants in a short time.

Robert Johnston has returned from his vacation trip to New Jersey.

Louis Barker, of Warren, had a funeral order recently which amounted to between $75 and $100, including a gates ajar, standing wreath and standing anchor.

The regular monthly meeting of the Florists' and Gardeners' Club of Rhode Island will be held on Monday evening, August 16.

A number of the local florists are arranging a day's outing to Newport in about a fortnight, for the purpose of visiting some of the large gardens there.

Charles H. Hunt is talking of erecting

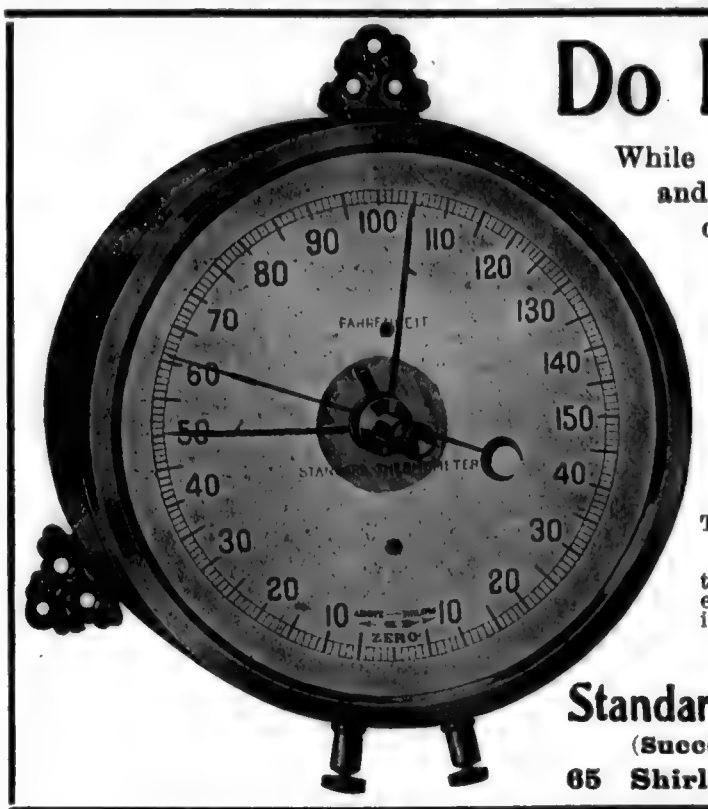
PITTSBURG.

The Market.

Persons traveling around the wholesale houses last week did not ask about business, if they were wise. The usual amount of trade was there, and it would have been quite satisfactory, had there been less stock. However, there is the "pinch," as all hands were compelled to hustle all day handling asters and gladioli, for which there was little demand, and what were sold went at unsatisfactory prices.

I hear many remarks about the men who foolishly ship in little, short-stemmed asters at this season, when there are more of the better grades than the market can possibly dispose of. These shippers could at least save the express charges by throwing away the poor stuff, and the good stock would naturally bring more money if the tables were not so badly crowded. But no doubt things will continue as they are, though the only persons making any money are the express companies.

Among the retailers things are generally quiet.



A Disastrous Storm.

The people in this section have been praying for rain, and got some Thursday evening, August 5, in a shape which they did not like.

Thursday evening, about 5:30 p. m., sections around this city were visited by a terrific wind and hail storm. The storm was peculiar in a way—first a light rain and hail, then it stopped a moment or two, and the heaviest rain and hail seen in years commenced and continued about forty minutes. One peculiar thing was that the sun was shining in from the west beautifully most of the time. The storm was coming in from the opposite direction.

Randolph & McClements were the worst sufferers, as their Stanton avenue houses were in the direct path of the storm. They lost three-fourths of their glass. A. R. Peacock, of Highland avenue, lost all of his, and H. J. Heinz and H. C. Finch were also heavy losers. Flower beds were mined, and cannas looked as if they had been shredded. Vegetable gardens were simply ruined. Lima beans were cut to pieces, and everything else was beaten into the ground. Here is the official weather man's report: "A very heavy rain and hail storm occurred in the east end Thursday afternoon, moving from the north to the south. The rain began at 5:40 p. m. and ended 6:40 p. m. Some of the hail stones were quite large, measuring at least one-half to three-quarters of an inch in diameter. It is estimated that about two inches of rain and hail fell during the storm in the Point Breeze neighborhood."

Mr. McClements, who is quite a chicken fancier, was trying to keep his young chickens under cover, but the bright sunshine fooled the chickens, and after the storm he gathered about a bushel of chicks which the hail killed. One of

STUTTLE'S CLAMPS BEST and Cheapest means of joining old boiler flues for heating coils. Quickly put together, tight joint, and quickly taken off. Free sample if you pay express.
Henry Stuttle, Inventor and Patentee, Batavia, Ill.
H. MUNSON, 68 N. State St., CHICAGO AGENT.

Randolph & McClement's men says he measured one of the largest hail stones, which was somewhat flattened, and found it to be one and three-eighths inches in diameter.

Various Notes.

Mr. Beaumont, of Chicago, was a visitor.

The Zieger Co. has contracted for a handsome delivery auto with the Chase Motor Co., which is to be delivered soon.

W. A. Clarke, of the Pittsburg Cut Flower Co., with his wife and daughter, will take a trip from Baltimore to Boston by steamer next week.

The S. A. F. convention delegation from Pittsburg is trying to get the crowd together, that they may have their own car. Those so far reported are: Fred Burki, Fred Kocher, E. C. Reineman and family, E. C. Ludwig and family, John Jones and William Loew, with several whose names we did not secure.

Hoo-Hoo.

Mr. McCallum, of the McCallum Co., recently spent a vacation at Burleigh Falls, in company with Mrs. McCallum and a party of friends. While Mr. McCallum and another member of the party were attempting to run the rapids, their canoe was upset and the two men thrown into the water. They held onto their canoe until assistance arrived, and were brought to shore.

ANSONIA, CONN.—At a recent meeting of the Inter-town Dahlia Association, held at the home of P. E. Carmody, on Jackson street, plans were discussed for the holding of the annual dahlia show. It is believed that this year, for the first time since its organization, the association will be able to give a formal show, at the city hall. The shows heretofore have been informal, and there has been no judging of the merits of the flowers exhibited, partly for the reason that the seasons have not been favorable.

What is the Most Vital Point in Grate Construction?

Grate makers and users agree that the most important point is to keep the air spaces open as long as possible under all conditions.

We guarantee to keep the air spaces of the

Martin Anti-Friction Rocking Grate

open longer under any conditions than can be done by any other grate in existence.

The hottest fire you can build will not warp a "Martin," and it can be installed without disturbing the brick work.

We refer to Peter Reinberg, Emil Buettner, Bassett & Washburn, Wietor Bros., Adam Zender, Sinner Bros., Albert Dickinson Co., and many others.

Write for testimonials and full particulars.

BUFFALO.

The Market.

Business last week was considerably better. Asters have arrived in abundance, as have gladioli. They are not as good in quality as we like to handle, but in the absence of carnations it is a big help to have them.

Various Notes.

W. J. Palmer has taken to the tall timber for his vacation. He is spending his time in Canada about 500 miles back of Toronto.

J. Benson Stafford has created several clever ideas in the line of window decorations, the latest being a miniature pond, carried out complete in every detail. The effect is beautiful, and attracts the attention of every passerby. The feature of the decoration is a lot of small ducks swimming about in the miniature pond.

S. A. Anderson also made a big feature of a windmill scene. R. A. S.

ERIE, PA.

The Market.

We are having a dry spell; have not had rain for several weeks. Business keeps up well for this season of the year. Gladioli, asters and golden glow are among the popular outdoor flowers. Gloxinia and valley sell well in potted plants.

Various Notes.

Robert Bernie and T. Hanna, formerly employed at Baur Floral Co., left for New York August 7.

Mr. and Mrs. Lewis B. Perkins, of Welland, Ontario, are the guests of Mr. and Mrs. A. J. Baur.

W. Green, representing Bayersdorfer & Co., Philadelphia, was in the city on business August 9.

Miss Lipsett, saleslady at John V. Laveis' store, has returned from her vacation.

Mr. and Mrs. Adolph Baur and their little daughter Ruth, of Indianapolis, Ind., are visiting friends and relatives in the city. B. P.

WINCHESTER, VA.—Jack Muff opened a flower store here July 31.

CAMBRIDGE, MASS. — Frank Howard Oransky, a florist of this city, has petitioned the Middlesex Probate Court for the right to lop off "Oransky" and be known hereafter as Frank Howard. He asserts that his present surname is "a business disadvantage, a cause of social prejudice, a financial detriment and a personal inconvenience."

LOUISVILLE, KY.

The Market.

Business continues quiet, and summer prices prevail. The only thing worth mentioning was the funeral of Harry G. Pulliam, the president of the National League of Baseball Clubs. More flowers were seen at this funeral than at any other in the last year. All designs were large and attractive. Asters are the one best bet. Roses are about equal to the demand, but have short stems. Carnations are about all in for this summer. Hardy hydrangeas are in full bloom, and are plentiful. Other summer flowers are abundant.

Various Notes.

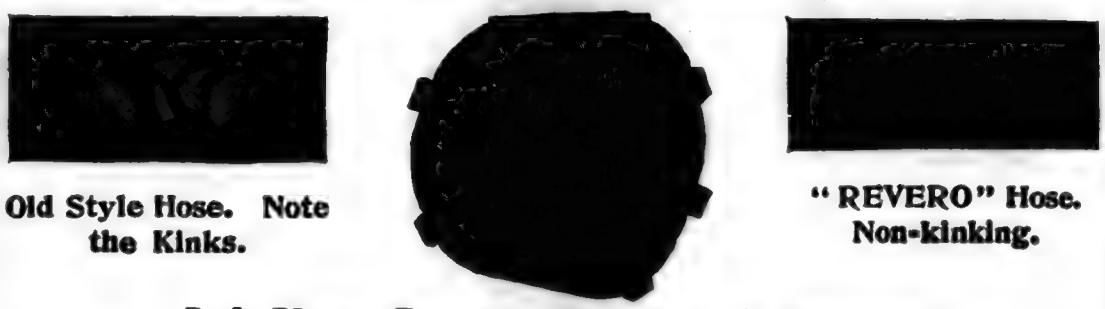
William Walker has all of his carnations and roses planted, and the place is in tip-top shape. All the stock is looking fine. Mr. Walker has a bench each of My Maryland and Killarney, and a few White Killarney on trial, and they are looking fine. His mums are also looking thrifty.

Jacob Schulz has his carnation houses planted, and the stock is looking well. Some good mums are also to be seen there.

A visit at the place of Anders Rasmussen, in New Albany, Ind., showed the young stock looking fine. Mr. Rasmussen has about 75,000 feet of modern glass devoted to roses and carnations. The boys are still busy planting, but will finish in two weeks. About 25,000 carnations are grown there, the three Enchantress varieties leading. Beacon is the best red; O. P. Bassett, Lawson and Winsor are also grown. Mr. Rasmussen grows his carnations in beds. He puts up boards about six inches high, digs out about six inches of soil, and puts in cinders, then places boards on top of cinders and then about five inches of soil, and finally puts in the plants about six inches apart. When lifting, he cuts between the rows with a sharp knife and raises the plants with a nice ball and all of the roots. The plants wilt little when benched, and taking hold in a few days, keep on growing.

The Wittbold system is used for watering. Mr. Rasmussen has been growing carnations in this way for three years, and thinks it the ideal way. Besides carnations, 3,000 Killarney, 4,000 Richmond, 2,000 Beauties, 3,000 Maids, 2,000 Brides, 1,000 Golden Gate, 1,000 Ivory and 500 My Maryland are grown. A few White Killarney will also be given a trial. Mr. Rasmussen disposes of most of his cut in Louisville and nearby points. He also has a nice retail trade in his home town. Only a few mums are grown for his own trade.

There will be a big crowd going to the convention from here. The packet boat, which leaves the foot of Third street, Monday, August 16, will carry most of them.



Adam Heitz, Geo. Remmiesen, Karl Rabe and a party of friends spent their vacation camping on Floyd's Fork and had a jolly good time.

Mention The Review when you write.

Buckskin Greenhouse Hose

¾-inch, 15c per foot, coupled, f. o. b. Detroit.

Furnished in continuous lengths of 500 feet, without seam, joint or connection, in ½ and ¾ inch sizes only. An exceptionally high-grade Florists' hose; with a double woven jacket insertion instead of cotton duck, and with specially selected rubber in the inner tube and cover.

The double woven jacket construction makes a stronger hose than can be obtained from cotton duck, and absolutely precludes the possibility of cover opening at seam—a common cause of failure of garden hose made on cotton duck. This construction also gives a more flexible hose and reduces the possibility of kinking.

Buckskin Hose is guaranteed to stand a pressure of 500 pounds per square inch, although its bursting pressure is far in excess of this.

KENNETH ANDERSON MFG. CO., Detroit, Mich.

MINNEAPOLIS.

The Market.

Continued hot weather keeps trade quiet, funeral work only occasioning demand. The thermometer registered between the 90 and 100 degree mark for the last two weeks, with but little relief from rain. Roses are fairly plentiful in the market. Carnations are still scarce. Asters and sweet peas are a glut.

Various Notes.

The Minneapolis Floral Co. is cutting some fine Kaiserin and a good quantity of Richmond and Killarney.

James Souden finds business fairly good for the season. Mr. Desmond is contemplating a trip to the Iron Range, to endeavor to regain his health.

Rice Bros. are getting some nice Enchantress, but find white carnations scarce.

R. A. Latham is still cutting some fine sweet peas and succeeds in disposing of them readily. M. E. M.

At a recent meeting of the park commissioners, the committee on improvements submitted recommendations for the work to be done with the fund derived from the sale of $100,000 of park bonds. One of the proposed improvements is an addition to the greenhouses at Lyndale Farmstead, to cost $10,000.

EVANSVILLE, IND.

The Market.

There is little to be said in regard to the condition of the market. The word quiet tells the whole story. Roses and carnations are poor, while asters are nothing to brag about. Prices are low. After lasting sixty-nine days, the street car strike ended Saturday. Of course the florists, as well as everybody else, are glad of it.

Various Notes.

Ben Kramer has been selling a lot of asters lately.

Henry Seymour is rebuilding one of his old houses. His mums and carnations are coming nicely and he has a bench of asters that are looking fine. E. L. F.

Des Moines, Ia.—The Society of Iowa Florists will hold its annual meeting in the rooms of the State Horticultural Society, in the capitol building, Wednesday evening, September 1. The state fair, which continues for one week, will then be in progress.

MINNEAPOLIS.

The Market.

Continued hot weather keeps trade quiet, funeral work only occasioning demand. The thermometer registered between the 90 and 100 degree mark for the last two weeks, with but little relief from rain. Roses are fairly plentiful in the market. Carnations are still scarce. Asters and sweet peas are a glut.

Various Notes.

The Minneapolis Floral Co. is cutting some fine Kaiserin and a good quantity of Richmond and Killarney.

James Souden finds business fairly good for the season. Mr. Desmond is contemplating a trip to the Iron Range, to endeavor to regain his health.

Rice Bros. are getting some nice Enchantress, but find white carnations scarce.

R. A. Latham is still cutting some fine sweet peas and succeeds in disposing of them readily. M. E. M.

At a recent meeting of the park commissioners, the committee on improvements submitted recommendations for the work to be done with the fund derived from the sale of $100,000 of park bonds. One of the proposed improvements is an addition to the greenhouses at Lyndale Farmstead, to cost $10,000.

EVANSVILLE, IND.

The Market.

There is little to be said in regard to the condition of the market. The word quiet tells the whole story. Roses and carnations are poor, while asters are nothing to brag about. Prices are low. After lasting sixty-nine days, the street car strike ended Saturday. Of course the florists, as well as everybody else, are glad of it.

Various Notes.

Ben Kramer has been selling a lot of asters lately.

Henry Seymour is rebuilding one of his old houses. His mums and carnations are coming nicely and he has a bench of asters that are looking fine. E. L. F.

Des Moines, Ia.—The Society of Iowa Florists will hold its annual meeting in the rooms of the State Horticultural Society, in the capitol building, Wednesday evening, September 1. The state fair, which continues for one week, will then be in progress.

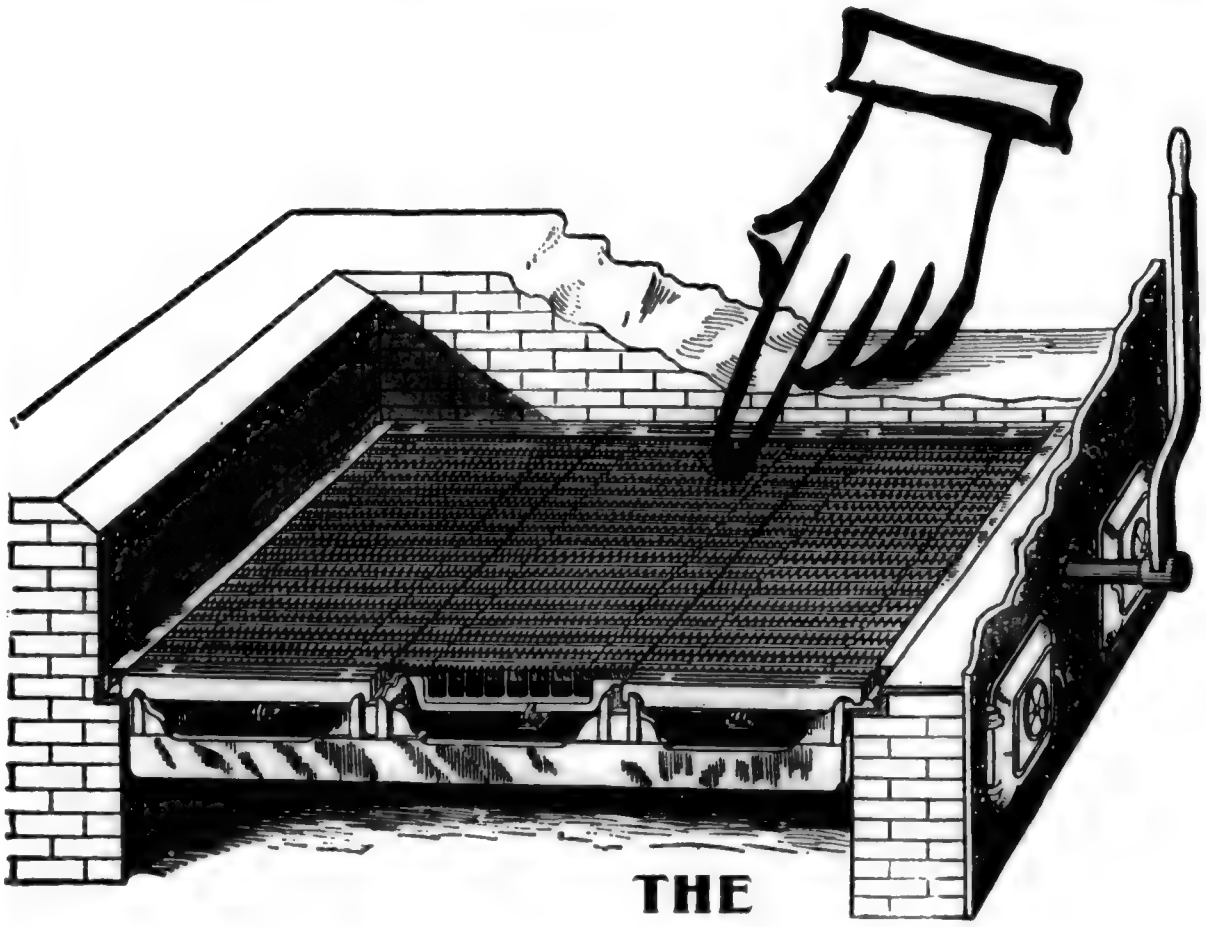
12, at the home of the bride at [illegible] hurst, Ill.

Great Grates.



As fast as old grate bars are burned out many growers are putting in the Martin rocking grate. The call for this grate is largely increased by the fact that the growers who have used it for one or more seasons are almost without exception equipping other boilers with it. The grate costs considerably more than the stationary bars, but is figured to make a decided saving in fuel, and that is what all the growers are after.

Various Notes.

[illegible] Florists' Club held a fairly well attended meeting July 12. A goodly [illegible]ation is promised for Dayton. [illegible]th reached home July

Palms, Ferns and Plants

With the addition of our plant at Edgebrook, where we have over 70,000 square feet of glass, we now have about 150,000 square feet of glass, and thirty-two acres devoted exclusively to growing all kinds of nursery stock. You know that in Plants there can be a great variation in quality and yet strictly be up to specifications. Knowing this, we want you to feel that you will get good value from us, as well as having every shipment strictly up to specifications. We believe that such a policy will appeal to every prospective purchaser. We have been raising and selling plants to the florists for fifty-two years. And in all this time we have had but one policy, and that is: "Good value given on every purchase." Here is a fact that you should not lose sight of: Chicago, being centrally located, has the best railroad facilities in the United States. You will find that you will make a saving in express and freight rates and have the advantage of quick service if you place your order with us.

Palms

We have a very fine stock of palms, embracing all the leading varieties. All of them are in very vigorous growth.

Areca Lutescens

J. K. ALLEN

The oldest established wholesale Cut Flower business in New York

106 West 28th Street

New York City

1887

1909

Twenty-two eventful years in the history of Floriculture in the greatest city in the world—nearly as long a record as the S. A. F. & O. H., to which we here send fraternal greeting.

The stream of PROSPERITY is coming in again. Let's share in its ever widening flow.

I have seen the beginning and the progress and now the fruition of the Cut Flower business in New York. "Every morning at 6" for nearly a quarter of a century, is a record to be justly proud of.

Growers, retailers, out-of-town florists, I am here to serve you faithfully in the future as in the past. There is inspiration in stability.

Stay with the Old Reliable and reap your part of the reward for Loyalty and Square Dealing

...INVITATION...
TO THE TRADE

VISIT our New Wholesale Store—after several years in other quarters we were fortunate in securing a large, light, airy double store at 52-54 Wabash Avenue, Chicago. This space, though in almost the exact center of the wholesale cut flower district, had not previously been occupied by a Florist. We have fitted it up as one of

The Best Equipped Stores

in this market. Call, inspect our facilities and get acquainted. We think you will be interested in this addition to the market.

GROWERS

OUR OUTLET for good stock is increasing at a very rapid rate, and we have the facilities for handling to good advantage the output of a number of additional growers whose stock is of shipping grade. Growers of Roses, Carnations, Mums, Violets or any other good stock, if not satisfied with their present market, will do well to correspond with us. We have both the shipping and local demand and facilities for taking the best of care of stock, and can offer it in the most attractive shape. Write today.

BUYERS

THE NEW SEASON is close at hand and we want to emphasize the fact that you need look no farther for a reliable source of supply for all cut flowers. We handle great quantities of stock—everything in season—and can supply all grades.

If there is any item on which we are sold out at time of receipt of an out of town order, we shall not fail to visit every house in this market in the effort to get it for you. We are here to see that you get what you want.

We are in a position to Supply

GUARANTEED FERTILIZERS

at prices that cannot be beaten by any house that sells pure goods.

VAUGHAN & SPERRY

ESTABLISHED 1904 L. D. PHONE, CENTRAL 2571

52-54 Wabash Avenue CHICAGO

WE ARE BUSY DAY AFTER DAY—ALWAYS

PROVING OUR ABILITY

To fill orders to the satisfaction of our customers. We do not claim to have the largest supply of stock in Chicago, but on quality we take no second place.

A good many houses have wished they had our Killarneys, Maids, Brides and Richmonds this summer.

It is no more the stock than the service that counts—we give personal attention to every order, and—

THIS IS WHAT WE ASSERT:

That no house in this market can make greater effort to fill every order as wanted. That's what counts. If we haven't got just the grade that's wanted, we don't send some other grade—**we get the stock that's wanted.** If that is the kind of service you want, we shall be pleased to handle your standing order this season.

WE BILL ALL STOCK AT MARKET RATES. YOU ARE SAFE WITH US.

..FINEST..

Summer Roses

OUR young **Beauties** are coming on very fine, and give promise of a splendid crop. We are cutting now from short to 36 and 40-inch stems. Our **White Killarney** are doing fine and promise to fill the want of a good white rose during the summer months. We are cutting a big supply of them now; also fine **My Maryland, Killarney** and **Richmond.** We are cutting heavy crops and can supply **any** demand.

You can always get your orders filled for what you want in all grades of the above stock. If there is anything you want, ask us about it before you refuse orders. We keep our "factory" going Summer and Winter. It is never entirely shut down. Always ready for business. Send in an order and see how quickly we can fill it, and with such good stock as would be a credit in the winter season.

We are keeping busy all summer because we have the good stock to do business with. Our customers keep busy all summer because they know they can get the stock and therefore work for the business and get it. It is only a matter of time when all Florists will come to realize that they can do business all summer if they can get the stock. Let the community in which you live know that you can supply them with good stock any time and watch the business come to you.

Winterson's Seed Store

45-47-49 Wabash Ave., CHICAGO, ILL.

A Lily House at the A. S. Burns, Jr., Place, Spring Valley, N. Y.

This house contains 12,000 Horseshoe Brand Cold Storage Multiflorum, size 6x8 inches, from which 35,000 blooms were marketed; loss about 5%. At the same time he had another house containing 12 000 Giganteum, 6x8, with a loss of less than 5%. This shows the productive quality of Horseshoe Brand bulbs in the hands of an expert. Mr. Burns, Jr., is the largest lily bulb forcer in America and one of the most successful. Last season he forced 300,000 Horseshoe Brand bulbs and this season he will have more. His favorite for all-round purposes is Giganteum, 7x9, which he uses in large quantities.

Horseshoe Brand Japan Lily Bulbs are grown and cultivated with the greatest care, to insure a high standard of merit. They are identical with the best in England, the S. A. Brand. The grower, Mr. Seitaro Arai, is personally in the fields throughout the season, superintending the planting, cultivation, harvesting and packing. The quality is controlled by the fact that Mr. Arai furnishes the planting or seed bulbs taken only from the healthiest and best specimens of plants in the fields. These seed bulbs are grown under contract, planted under his supervision, deep down in good soil (not near the top to make size quickly, regardless of strength), and properly cultivated from time to time. He does not permit the bulbs to be raised until they are fully ripened. During all this time the business at Yokohama is conducted by other members of his family under the leadership of Mr. Inosuki Arai, a very capable man.

You cannot tell by the looks of a lily bulb whether it is diseased or not, nor from what field it came. Many diseased bulbs are marketed because they do not produce seed bulbs. They generally come to the open market in the cities. There it is easy to buy bulbs, and cheap. Now, you might buy a cheap lot which are good, and you might get the bad ones. On the average it does not pay—the risk is too great. It is cheaper in the end to pay a little more and have a better average.

Get the habit of buying the best you can buy. This habit marks the difference between the grower who grows good lilies and the other fellow who has no luck. Give the Horseshoe Brand a trial? Write for prices.

Jute Corrugated Design Box.

WHY use heavy wooden boxes for shipments of flowers and plants when you can get a box better adapted to your needs, weighing about one-half as much? Our box which measures 48x14x8 weighs about 4 lbs.—Weigh a wooden box of the same size.

Our boxes are made to fold flat; this insures economy in storage space and enables the commission merchant to knock them down and return them in bundles. This reduces the return charges on "empties" to the minimum. You can use our box over and over again.

The arched construction of corrugated fibre board gives the strength to a box with the least weight and also provides a dead air cell which helps to preserve the flowers.

We are exclusive manufacturers of the K. D. Tin Corner Corrugated Boxes, and we furnish them in all sizes; also the Tape Corner Box.

We solicit your inquiries, and your requirements will be given prompt attention.

NEPHROLEPIS ELEGANTISSIMA COMPACTA

Another New Fern originating with us **To be introduced fall, 1909**

Of all the valuable introductions in Ferns that we have sent out, beginning with the Pierson (Nephrolepis Piersoni), we consider Elegantissima Compacta the most valuable of all, particularly from a commercial standpoint.

While this resembles Elegantissima in a general way, it is far superior to that variety, on account of its perfect habit. Yet it can hardly be compared with Elegantissima except in a general way, because it occupies a place by itself, and is as distinct from Elegantissima as that variety is from Piersoni. In fact, it bears the same relation to Elegantissima that Scottii does to Bostoniensis.

Elegantissima Compacta has an ideal habit. The fronds are considerably shorter than those of Elegantissima, and it is a more compact plant. It throws a great many more crowns naturally, making a very bushy, dwarf, compact plant. The difference between the two varieties can be seen at a glance.

Fine, strong plants, 2¼-inch pots, $5.00 per dozen; $35.00 per 100; 4-inch pots, $7.50 per dozen; $50.00 per 100; 6-inch pans, $1.50 each; 8-inch pans, $3.00 each.

We make a specialty of all kinds of Nephrolepis, carrying a large stock of all sizes at all times—Piersoni, Elegantissima, Superbissima, Bostoniensis, Scottii, Whitmani, Amerpohlii, etc.

2¼-inch pots ..... $4.00 per 100; $35.00 per 1000
3-inch pots ..... 7.00 per 100; 65.00 per 1000

PANDANUS UTILIS

4-inch pots ..... $25.00 per 100

DRACAENA FRAGRANS

5-inch pots ..... 35c and 50c each

DRACAENA MASSANGEANA

This handsome plant is the best of all Dracaenas for houses.

6-inch pots ..... $18.00 and $24.00 per doz.
8-inch pots ..... $2.50 and $3.00 each
9-inch pots ..... 4.00 and 5.00 each

DRACAENA TERMINALIS

We will have a fine stock of the above variety, well colored plants, for delivery December 1st.

4-inch pots ..... $25.00 per 100
5-inch pots ..... $6.00 and $9.00 per doz.
6-inch pots ..... 9.00 per doz.

Let us have your order early.

ARECA LUTESCENS

Our plants are in splendid condition.

5-inch pots ..... Delivered Nov. 1, $6.00 and $7.50 per doz.
5-inch pots ..... 3 plants, 24-26 in. high, $9.00 per doz. Ready now.
6-inch pots, 3 plants, 28-30 in. high, $12 and $15 per doz. Ready now.
7-inch pots ..... 3 plants, heavy, 30 in. high, $18 per doz. Ready now.
7-inch pots, 3 plants, very heavy, 36 in. high, $24 per doz. Ready now.

KENTIA FORSTERIANA

7-inch pots ..... 6 and 7 leaves, 36-40 inches tall, $2.00 each

PANDANUS PACIFICA

6-inch pots ..... $1.00 each
7-inch pots ..... 1.50 each

PHOENIX ROEBELENII

4½-inch pots ..... $7.50 per doz.

This is a most satisfactory plant.

BEGONIA GLOIRE DE LORRAINE

We have the largest and finest stock of this grand Christmas plant in America.

2½-inch pots ..... $15.00 per 100; $140.00 per 1000
4-inch pots ..... 30.00 per 100; 250.00 per 1000
5-inch pots ..... $50.00 per 100
6-inch pots ..... $7.50 and $9.00 per doz.

We also have a large stock of the Light Lonsdale Sport at same prices. This variety we consider far superior to the original type, it making a finer shaped plant as well as holding the flowers much better, while the color is a little lighter than that of the original Lorraine.

OTAHEITE ORANGES

Our stock is unusually fine this year. We can supply plants with from 4 to 25 fruit. When shipped prior to Oct. 1st, 15 cents per fruit in green state; when fully ripened 25 cents per fruit—for Christmas.

CYCLAMEN

Our stock at this time is better than we have ever had it and sure to be a money maker for anyone buying now. The prices at Christmas will be just double those quoted below.

2¼-inch pots ..... $6.00 per 100; $50.00 per 1000
4-inch pots ..... $25.00 per 100
5-inch pots ..... 50.00 per 100
6-inch pots ..... 75.00 per 100

GARDENIA VEITCHII

4-inch pots, strong ..... $20.00 per 100

BOUGAINVILLEA SANDERIANA

An exceptionally fine lot of shapely specimens at $1.00, $1.50, $2.00, $2.50 and $3.00 each.

THE SILVER JUBILEE CONVENTION

MOST SUCCESSFUL ANNUAL MEETING OF THE SOCIETY OF AMERICAN FLORISTS.

THE NEXT MEETING WILL BE HELD AT ROCHESTER.

OFFICERS FOR 1910:

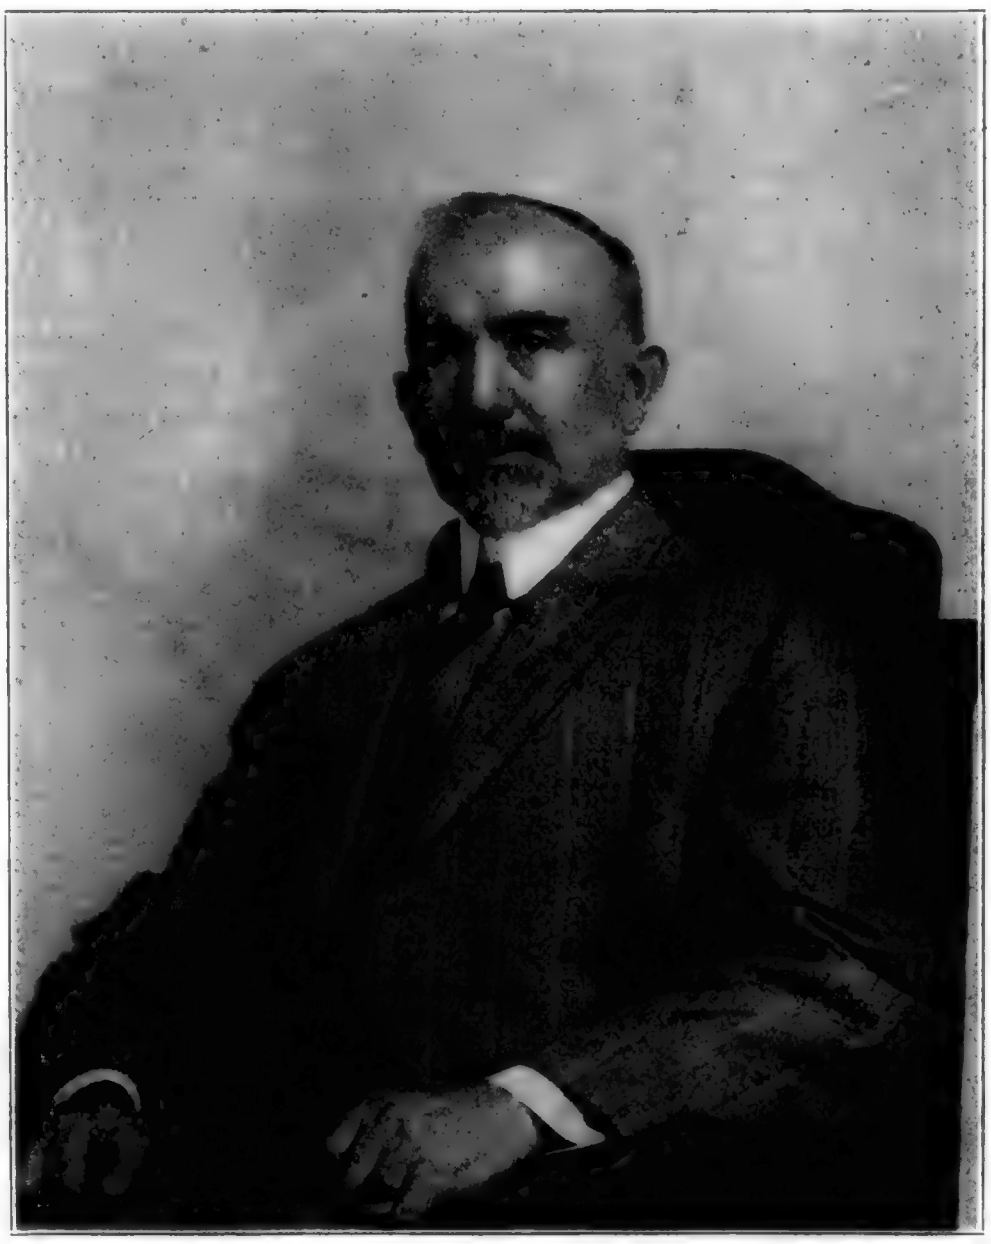
President, F. R. PIERSON, Tarrytown, N. Y.
Vice-president, FRED W. VICK, Rochester, N. Y.
Secretary, H. B. DORNER, Urbana, Ill.
Treasurer, H. B. BEATTY, Oil City, Pa.

After an absence of twenty-five years the Society of American Florists returned to Cincinnati this week to celebrate its silver jubilee.

The society held its first meeting in August, 1884, in a second-story room in the old portion of Music Hall, in one of the big newer wings of which the trade's display was staged. Not many of the old-timers who attended the first convention were present, but among those who were on hand were E. G. Hill, J. D. Carmody, J. C. Vaughan, B. P. Critchell, W. J. Stewart, Luther Armstrong, F. R. Pierson, W. W. Coles, J. T. Temple, Albert McCullough, J. Chas. McCullough, J. A. Peterson, Jacob Schulz, H. H. Ritter, W. G. Matthews, D. B. Long, C. D. Ball, Robert Kift, Antoine Wintzer, E. W. Guy, and a few others.

In view of the exceptional interest which attached to the twenty-fifth anniversary it was expected that all records would be broken. The attendance, while large, did not come quite up to sanguine expectations, but in other respects nothing whatever was left to be desired. The hall for trade exhibits was abundantly large and well ventilated; the meeting place next door, in the Odeon, was commodious and contained a splendid pipe organ, on which Miss Alma Roberta Sperling, one of Cincinnati's most charming and talented daughters, gave a half hour's concert before each session.

The members of the Cincinnati Florists' Society, headed by President Peterson, had one and all done yeoman service and the arrangements were as perfect as it is possible for such things to be. The hospitalities were lavish.



President Valentine believes in punctuality and began on time at each session. He made an admirable chairman and the business was put through promptly.

The Routine Work.

It is in a way unfortunate that ordinary parliamentary procedure brings the routine work of the convention into the initial session, at which the attendance usually is largest and in which there should be most of interest, to hold the members, and induce them to come back for later sessions. However important the routine reports of officers and committees may be, and they are, of course, vital to the society, yet even the most imaginative of reporters could not cull from them much that makes a "story," nor can the members find in them much to hold the interest on a hot afternoon. It should be otherwise. In this respect an admirable departure was made this year in cutting out the addresses of welcome and the responses, which permitted getting down to business the moment the gavel fell in the Odeon.

President Valentine's address was a well considered paper, which will be found in full on another page of this issue. What he had to say was to the point and he was given close attention. There was much applause when he referred to the large increase in membership in Colorado this year and the fact that he was escorted to the convention by a delegation of sixteen members.

At Mr. Rudd's own suggestion the reading of the secretary's report and those of the treasurer were cut down to the most essential parts. The reports are published in this issue of the Review. Mr. Rudd supplemented his report as secretary by a statement of the work of the members in securing new accessions to the ranks. It appeared that N. A. Benson, vice-president for Colorado, had during the year gathered up $150, representing thirty new members. Wm. Miller, of Bar Harbor, Me., had remitted $85, for eleven new annual members and one life member. H. Cheeseman, a traveler for Vaughan's, had obtained two life members at $30 each, thereby winning the second prize offered to travelers for this work by President Valentine; first was not awarded. F. H. Meinhardt, of St. Louis, secured one new annual and two new life members.

F. R. Pierson, President-elect Society of American Florists.

THE SILVER JUBILEE CONVENTION

MOST SUCCESSFUL ANNUAL MEETING OF THE SOCIETY OF AMERICAN FLORISTS.

THE NEXT MEETING WILL BE HELD AT ROCHESTER.

OFFICERS FOR 1910:

President, F. R. PIERSON, Tarrytown, N. Y.

Vice-president, FRED W. VICK, Rochester, N. Y.

Secretary, H. B. DORNER, Urbana, Ill.

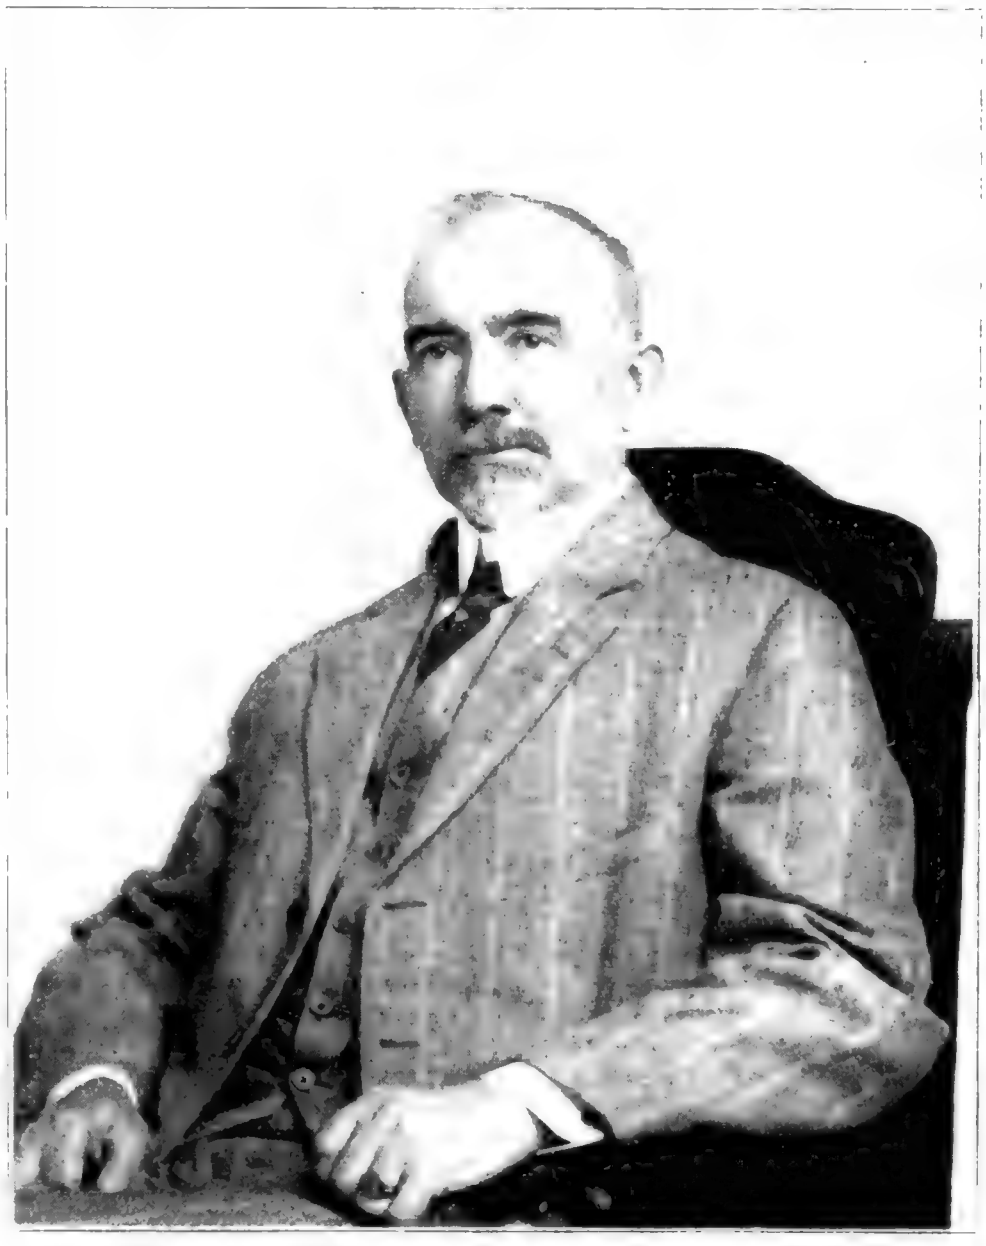
Treasurer, H. B. BEATTY, Oil City, Pa.

After an absence of twenty-five years the Society of American Florists returned to Cincinnati this week to celebrate its silver jubilee.

The society held its first meeting in August, 1884, in a second-story room in the old portion of Music Hall, in one of the big newer wings of which the trade's display was staged. Not many of the old-timers who attended the first convention were present, but among those who were on hand were E. G. Hill, J. D. Carmody, J. C. Vaughan, B. P. Critchell, W. J. Stewart, Luther Armstrong, F. R. Pierson, W. W. Coles, J. T. Temple, Albert McCullough, J. Chas. McCullough, J. A. Peterson, Jacob Schulz, H. H. Ritter, W. G. Matthews, D. B. Long, C. D. Ball, Robert Kift, Antoine Wintzer, E. W. Guy, and a few others.

In view of the exceptional interest which attached to the twenty-fifth anniversary it was expected that all records would be broken. The attendance, while large, did not come quite up to sanguine expectations, but in other respects nothing whatever was left to be desired. The hall for trade exhibits was abundantly large and well ventilated; the meeting place next door, in the Odeon, was commodious and contained a splendid pipe organ, on which Miss Alma Roberta Sperling, one of Cincinnati's most charming and talented daughters, gave a half hour's concert before each session.

The members of the Cincinnati Florists' Society, headed by President Pierson, had one and all done yeoman service and the arrangements were as perfect as it is possible for such things to be. The hospitalities were lavish.



President Valentine believes in punctuality and began on time at each session. He made an admirable chairman and the business was put through promptly.

The Routine Work.

It is in a way unfortunate that ordinary parliamentary procedure brings the routine work of the convention into the initial session, at which the attendance usually is largest and in which there should be most of interest, to hold the members, and induce them to come back for later sessions. However important the routine reports of officers and committees may be, and they are, of course, vital to the society, yet even the most imaginative of reporters could not cull from them much that makes a "story," nor can the members find in them much to hold the interest on a hot afternoon. It should be otherwise. In this respect an admirable departure was made this year in cutting out the addresses of welcome and the responses, which permitted getting down to business the moment the gavel fell in the Odeon.

President Valentine's address was a well considered paper, which will be found in full on another page of this issue. What he had to say was to the point and he was given close attention. There was much applause when he referred to the large increase in membership in Colorado this year and the fact that he was escorted to the convention by a delegation of sixteen members.

At Mr. Rudd's own suggestion the reading of the secretary's report and those of the treasurer were cut down to the most essential parts. The reports are published in this issue of the REVIEW. Mr. Rudd supplemented his report as secretary by a statement of the work of the members in securing new accessions to the ranks. It appeared that N. A. Benson, vice-president for Colorado, had during the year gathered up $150, representing thirty new members. Wm. Miller, of Bar Harbor, Me., had remitted $85, for eleven new annual members and one life member. H. Cheeseman, a traveler for Vaughan's, had obtained two life members at $30 each, thereby winning the second prize offered to travelers for this work by President Valentine; first was not awarded. F. H. Meinhardt, of St. Louis, secured one new annual and two new life members.

F. R. Pierson, President-elect Society of American Florists.

F. W. Vick, Vice-president-elect Society of American Florists.

W. J. Stewart, Boston, and F. H. Traendly, New York, each recruited one new life member; S. R. Lundy, four annual members; A. Miller, four; C. E. Critchell, three; W. L. Rock, three; Chas. Ebeling, two; I. Bertermann, two, and quite a number secured one each.

Treasurer Beatty had so bad a cold that even a round of applause did not encourage him to read his report; the duty fell to Mr. Rudd. The report, as printed in another column of this issue, showed a balance the first day of the year of an even $10,000. Since then, and up to August 12, the general fund has received $1,895.85 and the permanent fund $669.77, a total of $2,565.63. The expenditures to August 12 were $2,475.82, leaving a balance of $10,089.81, and Mr. Rudd explained that $530 advanced for rent would come back from the trade exhibition and that the secretary had over $1,000 that had not been turned over to the treasurer, so the society is on a better financial footing than ever before.

W. J. Stewart called attention to the fact that the receipts for 1908, as compared with 1907, in the treasurer's report, were not fairly representative, due to the fact that the secretary's office had not turned over receipts as they came in and carried a considerable sum from one year to the next. Mr. Rudd stated that the facts were made clear in the complete report that would appear in the published record.

The reports of state vice-presidents were presented but not read. They were ordered printed in the annual report and were referred to a committee consisting of E. H. Cushman, E. Wienhoeber and J. S. Wilson for consideration and report at a later session.

The secretary read the minutes of the March meeting of the executive board, which related largely to routine matters connected with the arrangements for the present convention and which were published in the Review at the time. He also read the minutes of a meeting held at the Gibson House August 17, at which an appropriation was recommended of $100 for the expense of transferring the secretary's office, and $150 for the use of the National Council of Horticulture. On motion of W. J. Stewart, seconded by P. O'Mara, the society approved the first recommendation but not the second, although Mr. Rudd stated he had a report from the secretary of the National Council of Horticulture showing the use made of previous contributions to its publicity fund. Of the $483.17 the S. A. F. received as its share of the profits of the national flower show, $400 was set aside for use in connection with a second show.

Tariff and Legislation.

Benj. Hammond, secretary of the tariff and legislation committee, presented two separate reports, one dealing with the work in connection with the new tariff law and the other with the work with express companies to secure an allowance for the weight of ice used in cut flower shipments. In the matter of the tariff the report told of the various meetings of the committee and of a joint meeting with J. C. Vaughan, of the Seed Trade Committee, and Irving Rouse, of the Nurserymen's Committee, at Buffalo in March, all of which were reported at the time in the Review. Mr. Hammond stated that F. R. Pierson, chairman of the committee, made two trips to Washington, the last one no other member of the committee being able to accompany him. On this occasion he submitted paragraph No. 263 as it now stands in the law, providing for the old rate of twenty-five per cent ad valorem on plants and providing the much wanted specific duties on bulbs. It was stated that while the new law makes some increase in the cheapest and least desirable varieties, the general result is to effect a reduction of about thirty per cent in the tariff on bulbs. That specific duties were secured, Mr. Hammond gave all credit to Mr. Pierson's work, and stated that the trade's wishes had been achieved without cost to the society, Mr. Pierson having paid his own expenses and declined to accept reimbursement from the committee's funds. The Nurserymen's Committee stood for higher duties and secured one change affecting florists' interests, in that rose plants were advanced from 2½ cents to 4 cents each in the new law.

In the matter of the claim for an allowance for the weight of ice used in express shipments, Mr. Hammond reported that the subject had been given thorough consideration, on the representations of the committee, but, as reported in the Review at the time, the officials declined to act favorably on the request. Mr. Hammond stated that legal advice had been sought, but that opinion had been that the facts at hand did not warrant bringing a test case. The appropriation for this work had remained untouched.

Commenting on the report, President Valentine said that it did not convey any adequate idea of the great amount of work the committee had done on these two matters. On motion of E. H. Cushman, the reports were adopted with a vote of special thanks to the committee.

P. O'Mara said that because of the death of E. V. Hallock, chairman, the committee on school gardens was not ready with a report.

A letter was read from Secretary Kendel, of the American Seed Trade Association, announcing the appointment of J. C. Vaughan, Leonard Vaughan and G. B. McVay as a committee to act with similar committees of the S. A. F. and the Nurserymen's Association on matters affecting mutual interests.

H. Brown, vice-president for Virginia, transmitted a letter received from O. W. D'Alcorn, of Portsmouth, with regard to bulb growing in that section. The letter, which was read by the secretary, gave some account of the beginning of bulb culture in Virginia, its present status, and the extent of the business of marketing outdoor bulb blooms in England. The writer stated his belief that the bulb men in the south are not calling away buyers for carnations and roses; on the other hand, are educating the plain people to become flower lovers and flower buyers. He predicted that the bulb business in Virginia is on the eve of a boom.

P. O'Mara presented, by request, statement regarding the status of the parcels post matter and offered a simple resolution endorsing the Bennett bill now in congress in so far as it relates to the parcels post. F. R. Pierson said that if there is any one thing the trade wants it is a parcels post, but said he feared the opposition of the express companies makes it impossible of attainment just yet. C. B. Whitnall said the society ought to set all its machinery in motion. E. G. Hill said he thinks the opposition of the country merchants all over the land makes the case hopeless for the present. Mr. Rudd told about getting a shipment of echeverias from the City of

Mexico that came by mail in market baskets at a less cost for postage than would have been charged for the shortest haul by the express companies. On motion of W. J. Vesey, further discussion of the matter was postponed.

An invitation was received to visit Spring Grove cemetery, which Mr. Rudd said is the model of all lawn-plan cemeteries in this country.

President's Reception.

The annual reception by the president of the S. A. F. was held Tuesday evening, August 17, at the club house at the Zoölogical Gardens, one of Cincinnati's show places. It was a delightful evening up on the hills, where the cool breezes blow, and President Valentine, with Mrs. Valentine and his official family, greeted a long line of members, a line that moved for more than an hour up the steps and along the veranda of the club house. Albert McCullough made the presentations. In the line were Secretary and Mrs. Rudd, J. C. Vaughan and Mrs. Vaughan, president of the Ladies' S. A. F.; Treasurer and Mrs. Beatty, and several ex-presidents and their ladies.

Before the reception was concluded a band concert was under way, to be followed by a display of fireworks and the Indian play, "Hiawatha." Refreshments were served in the club house and, although the members kept arriving all evening, there was ample provision for all. It was a pleasant ride to strangers in the city, in trolley cars, up the steep hills or the inclines to the park, and the first social feature of the week was a most pronounced success.

Value of Work in Heredity.

Following the half hour's organ recital which opened each session, Wednesday morning Jesse B. Norton, of the U. S. Department of Agriculture, Washington, D. C., delivered a lecture on "The Value of the Recent Work in Heredity to the Practical Flower Breeder." It was a beautiful morning outside and it is a matter of regret that, after inviting Mr. Norton, the society could not give him a better audience. The scientist spoke extemporaneously and what he had to say was entertaining as well as instructive.

He used a chart on which he illustrated the law of chance which gives nature's results in the disposition of pollen cells in fertilizing flowers. He said that the chance, in crossing a blue and white variety, would be for an intermediate light blue progeny. Going to the second and subsequent generations, he illustrated Mendel's law as it has worked out in Mr. Norton's own experiments. By his charts he showed how in the second and subsequent generations of seedlings of the light blue flower, one-fourth would go back to the original dark blue and one-fourth to the original white, with half like the light blue intermediate flower of the first generation. Continuing the experiment in subsequent generations, he illustrated how Mendel deduced his law of heredity and showed the great number of ramifications when the subjects of the experiments include a considerable number of characteristics which it is wished to retain, eliminate or modify. The ratio of one to three he showed to hold good, one-fourth the progeny showing each of the characteristics. Carrying the experiment far enough, and accurately enough, the speaker intimated that any combination of characters could be arrived at and fixed. He showed how the different results vary as the square of the number of characteristics considered, two characters giving four different combinations, four characters giving sixteen different combinations of characters, and so on up. He therefore advised florists to consider only the least possible number of characteristics in the subjects of their cross breeding as vastly simplifying the work. On motion of E. G. Hill, seconded by P. O'Mara, a vote of thanks was given Dr. Norton for his illustration of the Mendelian theory.

Rochester Next.

Mr. Rudd reported a number of invitations from city convention bureaus, but only those which were in the nature of supporting invitations of florists' clubs were considered.

Chas. H. Vick, on behalf of the Rochester Florists' Club, presented the invitation of the trade interests there to come to Rochester next year, and Mr. Crum, of the Chamber of Commerce, told of the facilities that would be provided. Geo. A. Hart also spoke for Rochester.

Wm. Gammage presented the invitation of the Montreal Gardeners' and Florists' Club. Mr. Robinson, of Hall & Robinson, backed up all that Mr. Gammage said and spoke of the plans proposed.

The ballot, polls open one hour, stood: Rochester, 163; Montreal, 62. Joe Hill and A. H. Bush were tellers.

Nomination of Officers.

J. F. Cowell, Buffalo, nominated Frank R. Pierson for president in 1910, seconded by W. F. Gude, P. O'Mara, W. J. Vesey and E. G. Hill, each of whom spoke briefly in appreciation of Mr. Pierson's work for the society.

W. F. Gude nominated Fred W. Vick, president of the Rochester Florists' Club, for vice-president, endorsed by Rochester representatives.

P. O'Mara, New York, nominated Harry A. Bunyard for secretary, and J. J. Beneke, St. Louis, seconded. Wm. R. Smith, of Washington, nominated Edwin Lonsdale. E. G. Gillett, of Cincinnati, nominated Herman B. Dorner, enthusiastically seconded by Joseph Heacock, J. D. Carmody and Irwin Bertermann.

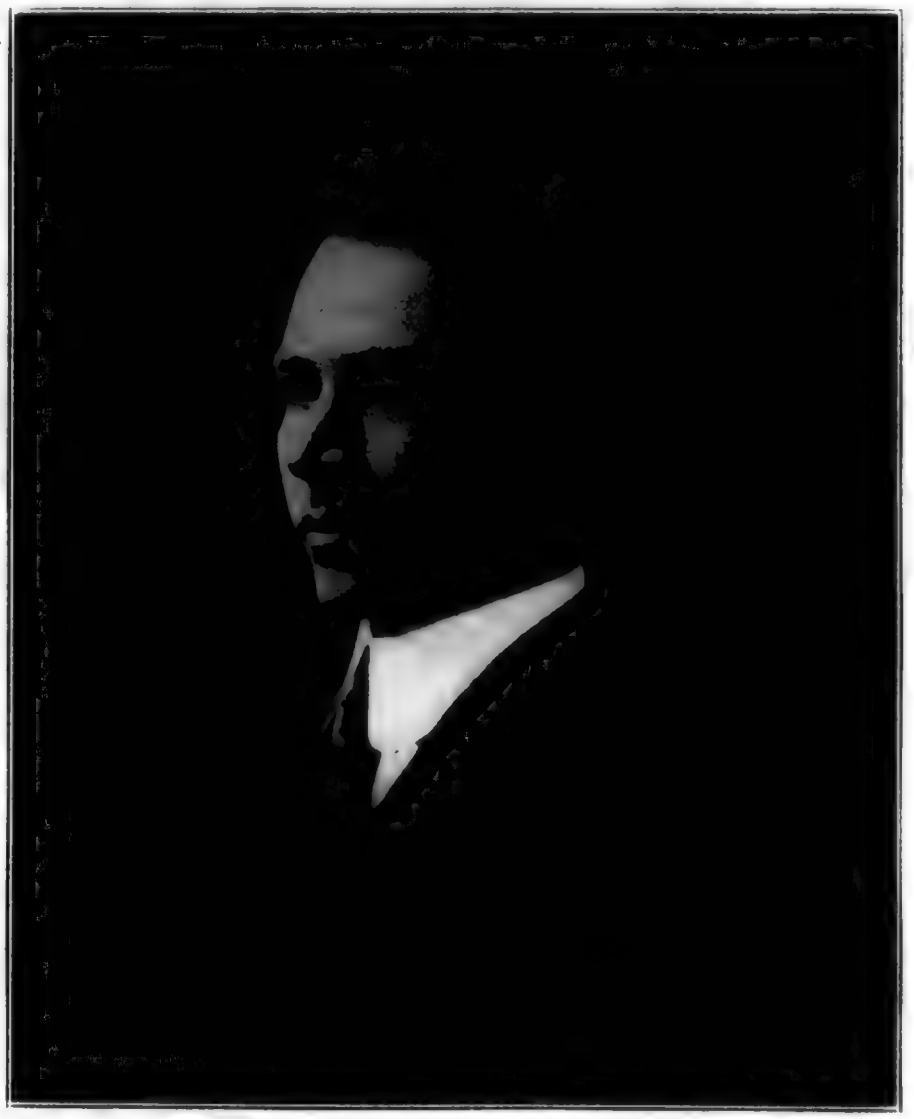
Col. W. W. Castle, Boston, nominated H. B. Beatty to succeed himself as treasurer. John Westcott and W. N. Rudd seconded. W. J. Vesey stated he realized the difficulty of getting another so capable a man as Mr. Beatty, but said he would like to give the members a chance to vote for a working florist for the position, and nominated Adam Graham, of Cleveland, but Mr. Graham refused to permit his name to stand.

Judges' Report.

The judges of the trade exhibition were J. F. Ammann, M. Bloy and Otto Koenig. Under the rules they could consider only novelties that had been specially entered by the exhibitors. The awards were:

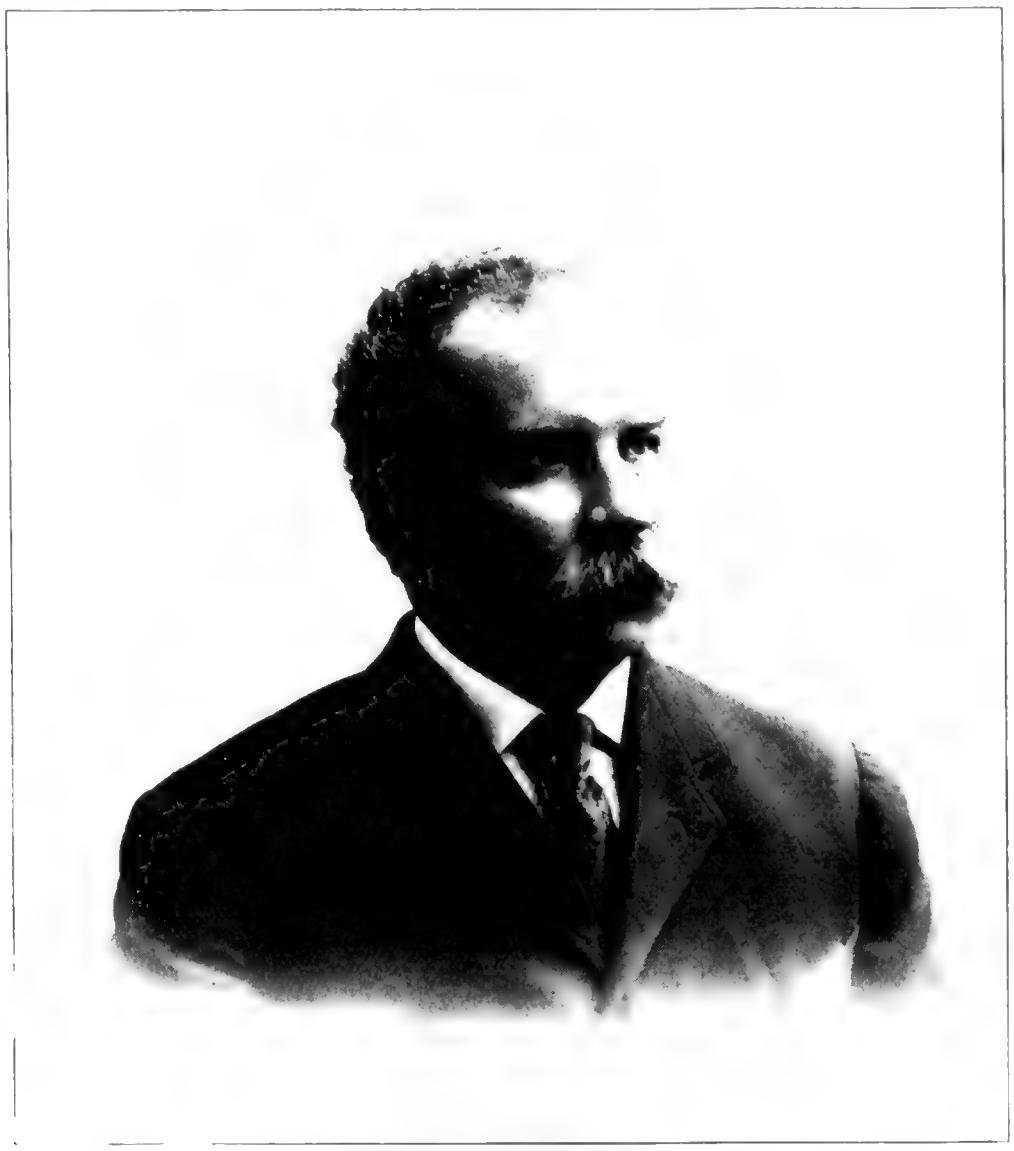
Wilson Plant Oil and Fertilizer Co., Chatham, N. J., honorable mention for pot washer and turf carrier.

R. E. Wilson, Brooklyn, corsage holder, highly commended.



J. M. McCullough Sons Co., Cincinnati, Taft rose and Paragon sprayer, highly commended.

Thomas Jackson, Latonia, Ky., new yellow alternanthera, honorable mention.



Wm. Moll, Cleveland, pipe mender, honorable mention.

A. C. Brown, Springfield, Ill., Carnation Sangamo, honorable mention.

Henry A. Dreer, Philadelphia, Nephrolepis Scholzeli, certificate of merit. As

Herman B. Dorner, Secretary-elect Society of American Florists.

F. W. Vick, Vice-president-elect Society of American Florists.

W. J. Stewart, Boston, and F. H. Traendly, New York, each recruited one new life member; S. R. Lundy, four annual members; A. Miller, four; C. E. Critchell, three; W. L. Rock, three; Chas. Ebeling, two; L. Bertermann, two, and quite a number secured one each.

Treasurer Beatty had so bad a cold that even a round of applause did not encourage him to read his report; the duty fell to Mr. Rudd. The report, as printed in another column of this issue, showed a balance the first day of the year of an even $10,000. Since then, and up to August 12, the general fund has received $1,895.85 and the permanent fund $669.77, a total of $2,565.63. The expenditures to August 12 were $2,475.82, leaving a balance of $10,089.81, and Mr. Rudd explained that $530 advanced for rent would come back from the trade exhibition and that the secretary had over $1,000 that had not been turned over to the treasurer, so the society is on a better financial footing than ever before.

W. J. Stewart called attention to the fact that the receipts for 1908, as compared with 1907, in the treasurer's report, were not fairly representative, due to the fact that the secretary's office had not turned over receipts as they came in and carried a considerable sum from one year to the next. Mr. Rudd stated that the facts were made clear in the complete report that would appear in the published record.

The reports of state vice-presidents were presented but not read. They were ordered printed in the annual report and were referred to a committee consisting of E. H. Cushman, E. Wienhoeber and J. S. Wilson for consideration and report at a later session.

The secretary read the minutes of the March meeting of the executive board, which related largely to routine matters connected with the arrangements for the present convention and which were published in the REVIEW at the time. He also read the minutes of a meeting held at the Gibson House August 17, at which an appropriation was recommended of $400 for the expense of transferring the secretary's office, and $150 for the use of the National Council of Horticulture. On motion of W. J. Stewart, seconded by P. O'Mara, the society approved the first recommendation but not the second, although Mr. Rudd stated he had a report from the secretary of the National Council of Horticulture showing the use made of previous contributions to its publicity fund. Of the $183.17 the S. A. F. received as its share of the profits of the national flower show, $400 was set aside for use in connection with a second show.

Tariff and Legislation.

Benj. Hammond, secretary of the tariff and legislation committee, presented two separate reports, one dealing with the work in connection with the new tariff law and the other with the work with express companies to secure an allowance for the weight of ice used in cut flower shipments. In the matter of the tariff the report told of the various meetings of the committee and of a joint meeting with J. C. Vaughan, of the Seed Trade Committee, and Irving Rouse, of the Nurserymen's Committee, at Buffalo in March, all of which were reported at the time in the REVIEW. Mr. Hammond stated that F. R. Pierson, chairman of the committee, made two trips to Washington, the last one no other member of the committee being able to accompany him. On this occasion he submitted paragraph No. 263 as it now stands in the law, providing for the old rate, twenty-five per cent ad valorem on plants and providing the much wanted specific duties on bulbs. It was stated that while the new law makes some increase in the cheapest and least desirable varieties the general result is to effect a reduction of about thirty per cent in the tariff on bulbs. That specific duties were secured, Mr. Hammond gave all credit to Mr. Pierson's work, and stated that the trade's wishes had been achieved without cost to the society, Mr. Pierson having paid his own expenses and declined to accept reimbursement from the committee's funds. The Nurserymen's Committee stood for higher duties and secured one change affecting florists' interests, in that rose plants were advanced from $2\frac{1}{2}$ cents to 4 cents each in the new law.

In the matter of the claim for an allowance for the weight of ice used in express shipments, Mr. Hammond reported that the subject had been given thorough consideration, on the representations of the committee, but, as reported in the REVIEW at the time, the officials declined to act favorably on the request. Mr. Hammond stated that legal advice had been sought, but that opinion had been that the facts at hand did not warrant bringing a test case. The appropriation for this work had remained untouched.

Commenting on the report, President Valentine said that it did not convey any adequate idea of the great amount of work the committee had done on these two matters. On motion of E. H. Cushman, the reports were adopted with a vote of special thanks to the committee.

P. O'Mara said that because of the death of E. V. Hallock, chairman, the committee on school gardens was not ready with a report.

A letter was read from Secretary Kendel, of the American Seed Trade Association, announcing the appointment of J. C. Vaughan, Leonard Vaughan and G. B. McVay as a committee to act with similar committees of the S. A. F. and the Nurserymen's Association on matters affecting mutual interests.

H. Brown, vice-president for Virginia, transmitted a letter received from O. W. D'Aleorn, of Portsmouth, with regard to bulb growing in that section. The letter, which was read by the secretary, gave some account of the beginning of bulb culture in Virginia, its present status, and the extent of the business in marketing outdoor bulb blooms in England. The writer stated his belief that the bulb men in the south are not calling away buyers for carnations and roses; on the other hand, are educating the plain people to become flower lovers and flower buyers. He predicted that the bulb business in Virginia is on the eve of a boom.

P. O'Mara presented, by request, a statement regarding the status of the parcels post matter and offered a similar resolution endorsing the Bennett bill now in congress in so far as it relates to the parcels post. F. R. Pierson said that if there is any one thing the trade wants it is a parcels post, but said he feared the opposition of the express companies makes it impossible of attainment just yet. C. B. Whitnall said the society ought to set all its machinery in motion. E. G. Hill said he thinks the opposition of the country merchants all over the land makes the case hopeless for the present. Mr. Rudd told about getting a shipment of echeverias from the City of

Mexico that came by mail in market baskets at a less cost for postage than could have been charged for the short haul by the express companies. On motion of W. J. Vesey, further discussion of the matter was postponed.

An invitation was received to visit Spring Grove cemetery, which Mr. Rudd said is the model of all lawn-plan cemeteries in this country.

President's Reception.

The annual reception by the president of the S. A. F. was held Tuesday evening, August 17, at the club house at the Zoological Gardens, one of Cincinnati's show places. It was a delightful evening up on the hills, where the cool breezes blow, and President Valentine, with Mrs. Valentine and his official family, greeted a long line of members, a line that moved for more than an hour up the steps and along the veranda of the club house. Albert McCullough made the presentations. In the line were Secretary and Mrs. Rudd, J. C. Vaughan and Mrs. Vaughan, president of the Ladies' S. A. F.; Treasurer and Mrs. Beatty, and several ex-presidents and their ladies.

Before the reception was concluded a band concert was under way, to be followed by a display of fireworks and the Indian play, "Hiawatha." Refreshments were served in the club house and, although the members kept arriving all evening, there was ample provision for all. It was a pleasant ride to strangers in the city, in trolley cars, up the steep hills or the inclines to the park, and the first social feature of the week was a most pronounced success.

Value of Work in Heredity.

Following the half hour's organ recital which opened each session, Wednesday morning Jesse B. Norton, of the U. S. Department of Agriculture, Washington, D. C., delivered a lecture on "The Value of the Recent Work in Heredity to the Practical Flower Breeder." It was a beautiful morning outside and it is a matter of regret that, after inviting Mr. Norton, the society could not give him a better audience. The scientist spoke extemporaneously and what he had to say was entertaining as well as instructive.

He used a chart on which he illustrated the law of chance which gives nature's results in the disposition of pollen cells in fertilizing flowers. He said that the chance, in crossing a blue and white variety, would be for an intermediate light blue progeny. Going to the second and subsequent generations, he illustrated Mendel's law as it has worked out in Mr. Norton's own experiments. By his charts he showed how in the second and subsequent generations of seedlings of the light blue flower, one fourth would go back to the original dark blue and one fourth to the original white, with half like the light blue intermediate flower of the first generation. Continuing the experiment in subsequent generations, he illustrated how Mendel deduced his law of heredity and showed the great number of ramifications when the subjects of the experiments include a considerable number of characteristics which it is wished to retain, eliminate or modify. The ratio of three to three he showed to hold good, one fourth the progeny showing each of the characteristics. Carrying the experiment far enough, and accurately enough, the speaker intimated that any combination of characters could be arrived at and fixed. He showed how the different results vary as the square of the number of characteristics considered, two characters giving four different combinations, four characters giving sixteen different combinations of characters, and so on up. He therefore advised florists to consider only the least possible number of characteristics in the subjects of their cross breeding as vastly simplifying the work. On motion of E. G. Hill, seconded by P. O'Mara, a vote of thanks was given Dr. Norton for his illustration of the Mendelian theory.

Rochester Next.

Mr. Rudd reported a number of invitations from city convention bureaus, but only those which were in the nature of supporting invitations of florists' clubs were considered.

Chas. H. Vick, on behalf of the Rochester Florists' Club, presented the invitation of the trade interests there to come to Rochester next year, and Mr. Crum, of the Chamber of Commerce, told of the facilities that would be provided. Geo. A. Hart also spoke for Rochester.

Wm. Gammage presented the invitation of the Montreal Gardeners' and Florists' Club. Mr. Robinson, of Hall & Robinson, backed up all that Mr. Gammage said and spoke of the plans proposed.

The ballot, polls open one hour, stood: Rochester, 163; Montreal, 62. Joe Hill and A. H. Bush were tellers.

Nomination of Officers.

J. F. Cowell, Buffalo, nominated Frank R. Pierson for president in 1910, seconded by W. F. Gude, P. O'Mara, W. J. Vesey and E. G. Hill, each of whom spoke briefly in appreciation of Mr. Pierson's work for the society.

W. F. Gude nominated Fred W. Vick, president of the Rochester Florists' Club, for vice-president, endorsed by Rochester representatives.

P. O'Mara, New York, nominated Harry A. Bunyard for secretary, and J. J. Beneke, St. Louis, seconded. Wm. R. Smith, of Washington, nominated Edwin Lonsdale. E. G. Gillett, of Cincinnati, nominated Herman B. Dorner, enthusiastically seconded by Joseph Heacock, J. D. Carmody and Irwin Bertermann.

Col. W. W. Castle, Boston, nominated H. B. Beatty to succeed himself as treasurer. John Westcott and W. N. Rudd seconded. W. J. Vesey stated he realized the difficulty of getting another so capable a man as Mr. Beatty, but said he would like to give the members a chance to vote for a working florist for the position, and nominated Adam Graham, of Cleveland, but Mr. Graham refused to permit his name to stand.

Judges' Report.

The judges of the trade exhibition were J. F. Ammann, M. Bloy and Otto Koenig. Under the rules they could consider only novelties that had been specially entered by the exhibitors. The awards were:

Wilson Plant Oil and Fertilizer Co., Chatham, N. J., honorable mention for pot washer and turf carrier.

R. E. Wilson, Brooklyn, corsage holder, highly commended.

J. M. McCullough Sons Co., Cincinnati, Taft rose and Paragon sprayer, highly commended.

Thomas Jackson, Latonia, Ky., new yellow alternanthera, honorable mention.

Wm. Moll, Cleveland, pipe mender, honorable mention.

A. C. Brown, Springfield, Ill., Carnation Sangamo, honorable mention.

Henry A. Dreer, Philadelphia, Nephrolepis Scholzeli, certificate of merit. As

Herman B. Dorner, Secretary-elect Society of American Florists.

the variety already had received the society's silver medal, the above was cancelled under the rules.

Kroeschell Bros. Co., Chicago, piping system, fittings and pipe clutch, honorable mention.

Herendeen Mfg. Co., Geneva, N. Y., improved Furman boiler, highly commended.

E. H. Hunt, Chicago, Delwood ware, honorable mention.

E. E. Stewart, Rives Junction, Mich., frame greenhouse construction, curved eave highly commended, pipe hangers highly commended.

Wertheimer Bros., New York, honorable mention for Sprinkleproof chiffon and other ribbon novelties and ties.

National Flower Show.

National flower shows past and prospective were a special order for Wednesday afternoon. W. F. Kasting, chairman of the general committee in charge of the Chicago show, reported the financial success and said the show would have been well worth while because of its great advertising value had there been no money profit. J. C. Vaughan, chairman of the local management committee, said he thought nothing more need be said of the first national show except that it was perhaps more fortunate than others might be in having a good base to work on. He said he hoped to see these shows become annual and advised not waiting too long for another. Mr. Rudd said much time must necessarily be consumed and that once in three years is often enough for a national show. Mr. Kasting said to lay aside all jealousies and get busy.

F. R. Pierson, chairman of the committee appointed by President Valentine to consider the time and place for the second national show, read a report designating Boston as the proper city and the spring of 1910 the right time, with the reasons for the conclusions of the committee.

W. A. Manda moved the acceptance of the report and the continuation of the committee, and B. Hammond said he wanted to start the guarantee fund with $100. In a few minutes over $2,000 was raised, the following subscribing $100 each: B. Hammond, Florists' Exchange, Horticulture, Florists' Review, W. A. Manda, Fernwood Nurseries, Peter Fisher, M. A. Patten, E. G. Hill, W. J. Vesey, Bertermann Bros. Co., Joseph Heacock, Peter Henderson & Co., F. H. Traendly, J. F. Cowell, W. N. Rudd, W. F. Kasting, J. A. Valentine, F. R. Pierson, Gude Bros. Co., J. F. Ammann, Fred Meinhardt.

J. A. Valentine.
(President Society of American Florists.)

Gladiolus Fairy Queen, Lucille, Golden Queen, Pres. Taft, honorable mention.

H. F. Michell Co., Philadelphia, new hose mender, honorable mention; lamp for fumigating, highly commended.

J. A. Peterson, Cincinnati, Dracæna Victoria, certificate of merit.

W. W. Castle, Boston, automatic water circulator, certificate of merit.

M. Rice & Co., Philadelphia, honorable mention for Etruscan gold ware.

Hubert Bulb Co., Portsmouth, Va., certificate of merit for American-grown narcissus and tulip bulbs.

F. R. Pierson Co., Tarrytown, N. Y., honorable mention for Nephrolepis Viridissima.

Heim Support Co., Connersville, Ind., honorable mention for self-tying rose stake.

Schloss Bros., New York, honorable mention for six novelties in ribbons and ties.

Reed & Keller, New York, honorable mention for Florentine bronze ware, new wire designs, etc.

King Construction Co., North Tonawanda, N. Y., certificate of merit on iron

The Public and the Conventions.

W. A. Manda said he wanted to say a few words about the public feature, or lack of it, at the August conventions. He gave it as his opinion that the affair as now conducted is too commercial in its character and fails to take advantage of the opportunity for the advancement of horticulture. He wanted, he said, to offer a silver cup, not for bowling, but for the best plant or flower exhibited at Rochester, the executive board to determine the exact terms of the competition.

P. O'Mara spoke in support of Mr. Manda's idea and said he hoped to see a public display for prizes in connection with the trade's display; he recommended that the board of directors do something in a general way for the advancement of horticulture at the next convention. Mr. Manda offered a resolution directing the executive committee to confer with the Rochester club to see if it is not possible to give a public exhibition apart from the trade's display next year. F. R. Pierson said it was an admirable idea in every way and that it had his hearty approval. The resolution was adopted.

Reverting to the subject of the national flower show, Irwin Bertermann spoke for the appointment of a retailer as superintendent at Boston, saying he believed it might supply the missing link between public and grower. This led to a number of references to places where the Chicago show might have been strengthened, and W. A. Manda raised a laugh when he said the awarding of the gold medal, which was offered but not placed, might have helped some.

E. G. Hill said the retailers simply won't compete for fear of loss of prestige if they lose out. W. F. Kasting, who is becoming the apostle of brotherly love, said the only trouble with the retailers is jealousy. W. F. Gude said it is true the retailers everywhere sit back, although given every proper encouragement to get into the game.

A resolution was adopted giving the committee on national flower show instructions and full power to form a permanent organization and hold an exhibition in Boston in the spring of 1910, under the auspices of the society, provided that the necessary funds be guaranteed from outside sources, but half the profit to be paid to the society. The committee consists of F. R. Pierson, F. H. Traendly, W. J. Stewart, Robert Craig, J. K. M. L. Farquhar and Edwin Lonsdale.

Propose to Appoint Secretary.

The committee of seven on the consideration of the recommendations in the president's address was reported for by J. G. Esler, ex-President Kasting taking the chair. The committee unanimously endorsed the suggestion relative to the creation of special sections within the society and recommended the appoint-

ment of a committee of three to work out a plan and report next year; the suggestion with regard to applying to the Secretary of Agriculture for information on foreign cultural conditions that will aid in establishing certain similar industries in this country; the suggestion with regard to securing state aid in the study of florists' problems; and the statements regarding sports. But the committee was not unanimous on the suggestion to change the by-laws so as to provide for the election of directors and the appointment of secretary and treasurer by the board instead of as at present. Patrick O'Mara and W. J. Stewart presented a minority report, failing to concur in this recommendation.

There were straightway lively times, but it developed that W. F. Gude, E. G. Hill, J. F. Ammann, J. G. Esler, Mr. Phillips, of Brooklyn, F. R. Pierson, W. R. Smith and others were almost unanimously in favor of the change, with Wm. Rudd in favor of appointing directors as now and also appointing the secretary and treasurer by the board of directors. After a half hour's discussion the majority report was adopted. Mr. Esler then offered an amendment to the by-laws, which under the rules must lay over until the Rochester meeting, providing for the changes recommended by President Valentine. There will be a year for consideration; if the amendments prevail at Rochester the convention will thereafter elect a president, vice-president and two directors each year, but the secretary and treasurer will be chosen by the board of directors.

Meeting of Ladies' S. A. F.

On Wednesday, at 11 a. m., the Ladies' S. A. F. met at the Sinton hotel, in its handsome assembly hall on the ninth floor, nearly fifty being present, with President Mrs. J. C. Vaughan in the chair. The new officers for 1910 were elected, as follows: President, Miss Matilda Meinhardt, of St. Louis, Mo.; first vice-president, Mrs. John V. Phillips, of Brooklyn, N. Y.; second vice-president, Miss Margaret Vesey, Fort Wayne, Ind.; secretary, Mrs. Chas. Maynard, Detroit, Mich.; treasurer, Mrs. Albert M. Herr, Lancaster, Pa.

There were interesting discussions, with a view to larger membership. Various changes in the by-laws were suggested, to be voted on at the next meeting. The meeting was very harmonious and the majority of the ladies present took part in the discussions. The meeting adjourned at noon, after the announcement of the reception tendered by the society to the members and to the S. A. F. in the Hotel Sinton at 9:30 Wednesday evening. The majority of the ladies then journeyed to Heidelberg, Ky., to demonstrate their bowling expertness, which would have to be of a high order to compare with the ability shown in their excellent business capacity at their annual meeting.

Wednesday Evening's Entertainment.

Wednesday evening O. P. Beckley took the place of J. Horace McFarland at the Odeon and delivered an instructive and highly interesting lecture on color photography, using a specially constructed stereopticon to show the colored pictures on the screen.

Following the lecture the Ladies' S. A. F. gave a largely attended reception in the parlors of the Sinton hotel. Mrs. J. C. Vaughan, Miss Meinhardt, Mrs. Charles Maynard and Mrs. J. A. Valentine received, assisted by the gentlemen, reversing the positions held at the S. A. F. president's reception the evening before. Music and refreshments added to the pleasure of the affair.

Wednesday afternoon the ladies who did not care for bowling were taken for a street car ride, for a visit to the Art Museum and the Rookwood pottery. To those who never had visited the city, street car riding is much like riding on the scenic railway at amusement parks.

During the reception at the Sinton the ladies presented a handsome cut glass dish to Mrs. Vaughan as a souvenir of her year in the presidency of their flourishing society, which now has over 200 members.

The Suckling Pig Club.

The Suckling Pig Club was in session about the banquet board at the Gibson House Wednesday night. W. N. Rudd presided, with every member present except Theo. Miller, of St. Louis, who is in Europe. Those present were J. A. Valentine, W. F. Kasting, Otto Koenig, Fred Meinhardt, Ed. Hauswirth, W. W. Coles, Leonard Kill and George Asmus. The club initiates one new member at each meeting. E. F. Winterson was the candidate.

Dr. Galloway's Paper.

Dr. B. T. Galloway, chief of the Bureau of Plant Industry in the Department of Agriculture, was not able to be present and his paper descriptive of the work of his bureau was read by Mr. Norton. The paper was followed by considerable discussion. J. Guille described the pioneer work being done by the bulb growers in Virginia. F. R. Pierson said the government is doing excellent work for floriculture and that the trade should make greater use of the facilities provided. He said Dr. Galloway's conclusion regarding the results with solid beds coincided with his own experience and that he believed solid beds will rapidly increase in favor with carnation growers. President Valentine said that he felt strongly that the only fault with the floricultural work of the Department of Agriculture is that florists hold aloof; individually and as a society the trade should get in close touch with the officers of the department.

Dorner is Secretary.

At the opening session Thursday morning President Valentine announced the appointment of George Asmus, F. H. Traendly and Irwin Bertermann as tellers for the election. A telegram from Edwin Lonsdale announced that he would not be a candidate for secretary. The polls were open two hours. The result was: Total vote cast, 295; for president, F. R. Pierson, 250; for vice-president, Fred W. Vick, 235; for secretary,

Balcony in Which a Large Part of the Supply Houses had Space.

(H. D. Mann Co., Schloss Bros., A. Herrmann, Wertheimer Bros. and Lion & Co. are on the left, and on the right, Pennock-Meehan Co. and M. Rice & Co.)

The variety already had received the society's silver medal, the above was cancelled under the rules.

Kroeschell Bros. Co., Chicago, piping system, fittings and pipe clutch, honorable mention.

Herendeen Mfg. Co., Geneva, N. Y., improved Furman boiler, highly commended.

E. H. Hunt, Chicago, Dehvood ware, honorable mention.

E. E. Stewart, Rives Junction, Mich., frame greenhouse construction, curved eave highly commended, pipe hangers highly commended.

Wertheimer Bros., New York, honorable mention for Sprinkleproof chiffon and other ribbon novelties and ties.

National Flower Show.

National flower shows past and prospective were a special order for Wednesday afternoon. W. F. Kasting, chairman of

J. A. Valentine.
President Society of American Florists.

the general committee in charge of the Chicago show, reported the financial success and said the show would have been well worth while because of its great advertising value even if there had been no money profit. J. C. Vaughan, chairman of the local management committee, said he thought nothing more need be said of the first national show except that it was perhaps more fortunate and otherwise might be in having a good base to work on. He said he hoped to see these shows become annual and advised not waiting so long for another. Mr. Rood said much time must necessarily be consumed over that once in three years is often enough for a national show. Mr. Kasting said to lay aside all jealousies and help Chicago.

F. R. Pierson, chairman of the committee appointed by President Valentine to consider the time and place for the second national show, read a report designating Boston as the proper city and the spring of 1910 the right time, with the reasons for the conclusions of the committee.

W. A. Manda moved the acceptance of the report and the continuation of the committee, and B. Hammond said he wanted to start the guarantee fund with $100. In a few minutes over $2,000 was raised, the following subscribing $100 each: B. Hammond, Florists' Exchange, Horticulture, FLORISTS' REVIEW, W. A. Manda, Fernwood Nurseries, Peter Fisher, M. A. Patten, E. G. Hill, W. A. Vesey, Bertermann Bros. Co., Joseph Heacock, Peter Henderson & Co., E. Trendly, J. F. Cowell, W. N. Rudd, W. F. Kasting, J. A. Valentine, F. R. Pierson, Gude Bros. Co., J. F. Ammann, Fred Meinhardt.

The Public and the Conventions.

W. A. Manda said he wanted to say a few words about the public feature, or lack of it, at the August conventions. He gave it as his opinion that the affair as now conducted is too commercial in character and fails to take advantage of the opportunity for the advancement of horticulture. He wanted, he said, to offer a silver cup, not for bowling, but for the best plant or flower exhibited at Rochester, the executive board to determine the exact terms of the competition.

P. O'Mara spoke in support of Mr. Manda's idea and said he hoped to see a public display for prizes in connection with the trade's display; he recommended that the board of directors do something in a general way for the advancement of horticulture at the next convention. Mr. Manda offered a resolution directing the executive committee to confer with the Rochester club to see if it is not possible to give a public exhibition apart from the trade's display next year. F. R. Pierson said it was an admirable idea in every way and that he had his hearty approval. The resolution was adopted.

Reverting to the subject of the national flower show, Irwin Bertermann spoke for the appointment of a retailer as superintendent at Boston, saying he believed it might supply the missing link between public and grower. This led to a number of references to places where the Chicago show might have been strengthened, and W. A. Manda raised a laugh when he said the awarding of the gold medal, which was offered but not placed, might have helped some.

E. G. Hill said the retailers simply won't compete for fear of loss of prestige if they lose out. W. F. Kasting, who is becoming the apostle of brotherly love, said the only trouble with the retailers is jealousy. W. F. Gude said it is true the retailers everywhere sit back although given every proper encouragement to get into the game.

A resolution was adopted giving the committee on national flower show instructions and full power to form a permanent organization and hold an exhibition in Boston in the spring of 1910, to meet the wishes of the society with that the necessary funds be guaranteed from outside sources but half the profit to be paid to the society. The committee consists of F. R. Pierson, F. H. Traendly, W. J. Stewart, Robert Craig, J. K. M. L. Farquhar and Lee Lonsdale.

Propose to Appoint Secretary.

The committee of seven on the consideration of the recommendations in the president's address was reported for by J. G. Esler, ex-President Kasting taking the chair. The committee unanimously endorsed the suggestion relative to the creation of special sections within the society and recommended the appo-

Glaetonos Fairy Queen, Lucille, Golden Queen, Pres. Taft, honorable mention.

H. P. Michell Co., Philadelphia, new rose model, honorable mention; lamp for fumigating, highly commended.

J. A. Peterson, Cincinnati, Directoire Victoria, certificate of merit.

W. W. Castle, Boston, automatic watering device, certificate of merit.

M. Rice & Co., Philadelphia, honorable mention for Etruscan gold ware.

Hubert Bobo Co., Portsmouth, Va., certificate of merit for Anderson's grow-cattissie tea, Cairo Belles.

F. R. Pierson Co., Tarrytown, N. Y., honorable mention for Nephrolepis Amerpohlii.

Dean Support Co., Cincinnati, O., honorable mention for self-tying rose stake.

Schloss Bros., New York, honorable mention for six novelties in ribbons and ties.

Reed & Keller, New York, honorable mention for Florentine bronze ware, new ware designs, etc.

King Construction Co., North Tonawanda, N. Y., certificate of merit on iron

nt of a committee of three to work a plan and report next year; the ggestion with regard to applying to the cretary of Agriculture for information foreign cultural conditions that will in establishing certain similar indus- es in this country; the suggestion with ard to securing state aid in the study florists' problems; and the statements garding sports. But the committee was unanimous on the suggestion to ange the by-laws so as to provide for election of directors and the appoint- nt of secretary and treasurer by the rd instead of as at present. Patrick Mara and W. J. Stewart presented a ority report, failing to concur in this ommendation.

There were straightway lively times, it developed that W. F. Gude, E. G. H. J. F. Ammann, J. G. Esler, Mr. ehips, of Brooklyn, F. R. Pierson, R. Smith and others were almost nimously in favor of the change, with . Rudd in favor of appointing direct as now and also appointing the secre- and treasurer by the board of direct

After a half hour's discussion the ority report was adopted. Mr. Esler en offered an amendment to the by- s, which under the rules must lay er until the Rochester meeting, pro ing for the changes recommended by esident Valentine. There will be a er for consideration; if the amend nts prevail at Rochester the convention thereafter elect a president, vice- esident and two directors each year, the secretary and treasurer will be sen by the board of directors.

Meeting of Ladies' S. A. F.

On Wednesday, at 11 a. m., the Ladies' A. F. met at the Sinton hotel, in its delsome assembly hall on the ninth or, nearly fifty being present, with esident Mrs. J. C. Vaughan in the air. The new officers for 1910 were cted, as follows: President, Miss Ma a Meinhardt, of St. Louis, Mo.; first e president, Mrs. John V. Phillips, of ooklyn, N. Y.; second vice-president, ss Margaret Vesey, Fort Wayne, Ind.; secretary, Mrs. Chas. Maynard, Detroit, Mich.; treasurer, Mrs. Albert M. Herr, Lancaster, Pa.

There were interesting discussions, with a view to larger membership. Various changes in the by-laws were suggested, to be voted on at the next meeting. The meeting was very harmonious and the majority of the ladies present took part in the discussions. The meeting ad- journed at noon, after the announcement of the reception tendered by the society to the members and to the S. A. F. in the Hotel Sinton at 9:30 Wednesday evening. The majority of the ladies then journeyed to Heidelberg, Ky., to demon- strate their bowling expertness, which would have to be of a high order to com- pare with the ability shown in their excel- lent business capacity at their annual meeting.

Wednesday Evening's Entertainment.

Wednesday evening O. P. Beckley took the place of J. Horace McFarland at the Odeon and delivered an instructive and highly interesting lecture on color pho- tography, using a specially constructed stereopticon to show the colored pictures on the screen.

Following the lecture the Ladies S. A. F. gave a largely attended recep- tion in the parlors of the Sinton hotel. Mrs. J. C. Vaughan, Miss Meinhardt, Mrs. Charles Maynard and Mrs. J. V. Valentine received, assisted by the gen- tlemen, reversing the positions held at the S. A. F. president's reception the evening before. Music and refreshments added to the pleasure of the affair.

Wednesday afternoon the ladies who did not care for bowling were taken for a street car ride, for a visit to the Art Museum and the Rookwood pottery. To those who never had visited the city, street car riding is much like riding on the scenic railway at amusement parks.

During the reception at the Sinton the ladies presented a handsome cut glass dish to Mrs. Vaughan as a souvenir of her year in the presidency of their flour- ishing society, which now has over 200 members.

The Suckling Pig Club.

The Suckling Pig Club was in session about the banquet board at the Gibson House Wednesday night. W. N. Rudd presided, with every member present ex- cept Theo. Miller, of St. Louis, who is in Europe. Those present were: J. A. Valen- tine, W. F. Kasting, Otto Koenig, Fred Memhardt, Ed. Hauswirth, W. W. Coles, Leonard Kill and George Asmus. The club initiates one new member at each meeting. E. F. Winterson was the can- didate.

Dr. Galloway's Paper.

Dr. B. T. Galloway, chief of the Bureau of Plant Industry in the Department of Agriculture, was not able to be present and his paper descriptive of the work of his bureau was read by Mr. Norton. The paper was followed by considerable dis- cussion. J. Grille described the pioneer work being done by the bulb growers in Virginia. F. R. Pierson said the govern- ment is doing excellent work for flori- culture and that the trade should make greater use of the facilities provided. He said Dr. Galloway's conclusion re- garding the results with solid beds coin- cided with his own experience and that he believed solid beds will rapidly in- crease in favor with carnation growers. President Valentine said that he felt strongly that the only fault with the floricultural work of the Department of Agriculture is that florists hold aloof; in- dividually and as a society the trade should get in close touch with the officers of the department.

Dorner is Secretary.

At the opening session Thursday morn- ing President Valentine announced the appointment of George Asmus, F. H. Traendly and Irwin Bettermann as tellers for the election. A telegram from Ed- win Lonsdale announced that he would not be a candidate for secretary. The polls were open two hours. The result was: Total vote cast, 295; for presi- dent, F. R. Pierson, 250; for vice-presi- dent, Fred W. Vick, 25; for secretary

(H. Baversdorfer & Co., The Madison Basketcraft Co., L. Baumann & Co. and J. G. Neidinger & Co. had their displays in this room.)

H. B. Dorner, 173; Harry A. Bunyard, 110; for treasurer, H B. Beatty, 238.

Miscellaneous Business.

On motion of W. J. Vesey, the board of directors was authorized and instructed to invest the funds of the society in such securities as it might approve. The proposed change in the by-laws increasing the life membership fee from $25 to $50 provoked an hour's warm discussion. Mr. Esler proposed a scheme for basing the life membership fee on the age of the applicant. Mr. Rudd made the point that this was out of order. The president ruled that Mr. Esler's amendment was in order, but an appeal to the society resulted in failure to sustain the ruling of the chair and all amendments to the original proposal were declared out of order. When put to a vote, the amendment increasing the fee to $50 was lost.

The committee on state vice-presidents reported that the documents submitted showed a general condition of high prosperity in the trade and that the low price of glass was causing a large extension of greenhouse area. Many of the reports regretted inability to secure new members. A notable exception was the report of Wm. Miller, vice-president for Maine, which was read in full as part of the committee's report. He said the way to get members is by personal solicitation.

Superintendent Murphy reported that the trade display occupied 14,467 square feet of space, with receipts of $2,183 and an apparent profit to the society of $600.

A standing committee of three was provided for, to act in conjunction with similar committees of the seed and nursery associations on matters affecting mutual interests.

A resolution endorsing the parcels post was adopted by a rising vote of 15 to 5.

A report of the secretary of the National Council of Horticulture was read. The recommendation of the board of directors appropriating $150 for the work of the council was concurred in.

Anniversary Session.

The Thursday evening meeting was designated as the anniversary session. E. G. Hill, the first secretary, was on the program with a paper descriptive of the first meeting of the society in Cincinnati, in 1885. J. C. Vaughan was down for a paper on what the society had accomplished in a quarter century.

There was a roll call of ex-presidents and of those who were present at the first meeting, and many interesting reminiscences were given.

Cincinnati Day.

Friday was designated as Cincinnati day and the convention was the guest of the local club on a trip on the Ohio river to Coney Island, where a barbecue was held, with a ball game and other sports, and fireworks in the evening.

THE TRADES' DISPLAY.

An Exposition of Progress.

The trades' display at the twenty-fifth convention was certainly the equal in size of any in the previous history of the S. A. F., larger than most meetings have seen, and in many features excelling all previous records. The plantsmen turned out stronger than ever before, at least three exhibitors coming with solid carloads, and all had excellent stock; it doesn't do nowadays to put up mediocre plants. The gladiolus growers had places at the entrance to the hall and put up larger exhibits than ever before, but the quality of much of the stock showed the effects of the unfavorable growing season. The greenhouse construction and heating section was well set up, but was minus one or two exhibits of special extent in previous years, notably Lord & Burnham Co. The pots and pottery section was larger than usual and of the latter some fine ware was shown. The bulb houses were represented as usual.

The florists' supplies, which are a leading feature of all later-day conventions, were larger than ever before and showed the rapid advance that is being made in this section of the trade; the supply people have ransacked the ends of the earth for taking novelties, but it is interesting to note that some of the best things were of home origination and manufacture. The ribbon displays were more numerous and larger than ever and showed how important a department of the trade the ribbon business has become.

Music hall was admirably adapted to the purpose. There was room for all and space to spare. The plants and heavy exhibits occupied the ground floor, with the supplies in the balcony and second floor rooms.

Superintendent Murphy had his work well in hand at all times, and it was a big task, of infinite detail, and seemed to please everybody. It was specially gratifying to find the trades' display practically complete the evening before the opening.

Nearly all the exhibitors succeeded in selling their exhibits to local buyers, thereby saving the trouble of repacking and adding largely to their satisfaction with the convention.

Cut Flowers.

E. E. Stewart, Rives Junction, Mich., staged a table of 100 vases of gladioli, all different, about sixty of them seedlings of his own raising, and forty of the older varieties. Among the novelties were: President Taft, delicate pink with a maroon blotch in the throat, said to be a high grower; Fairy Queen, flesh pink, some flowers blotched and some without blotch in the throat, a lighter shade than America; Golden Queen, rich cream with a deep carmine blotch; Shirley, rose pink with blotch; Lucille, light pink, lower petal orange, no blotch, but a white line through each petal. Mr. Stewart was personally in charge.

John Lewis Childs, Floral Park, N. Y., had enough gladioli so that twelve barrels of vases were shipped to stage them in, but only two barrels arrived, so there was trouble for I. Hendrickson and his assistant, S. Parnell. The exhibit contained seventy-five named varieties; America still is the leader, in their estimation. Among the best seedlings raised by Childs were: Contrast, red with white throat; Sulphur King, yellow; Melrose, light pink with blush throat; Cardinal, red; Attraction, red with white throat; Wild Rose, rose pink. Lycoris squamigera or Amaryllis Halli was new to many. A couple of plants of the Wonderberry, full of fruit, were a center of interest.

E. H. Cushman, Sylvania, O., staged some forty vases of gladioli and a group of Lilium Philippinense, the latter new to many. Notable among his gladioli were Princeps, America, Mrs. King, and white and light for florists' use. Mr. Cushman was in attendance.

Vick & Hill Co., Rochester, N. Y., staged fifty-one varieties of cut aster blooms, but made no claim for special quality because of the extremely dry season, although it was said the prospects

for seed crop are not bad. Many sorts that are new were shown, including a seventh member of the firm's Daybreak family. This is Light Blue Daybreak, to go out in 1911. Yellow Daybreak, Salmon Daybreak and Rose Daybreak, which were shown, are to go out in 1910. Foreign novelties included Queen of Spain, chamois yellow center with flesh outer petals, and Orchid Plume Scarlet, which is a distinct new color in this class. F. W. Vick and A. F. Vick accompanied the exhibit.

Plants.

Henry A. Dreer, Philadelphia, had one of the largest displays the house has yet made, occupying 600 square feet of space. Nephrolepis Scholzeli, recently introduced by the firm, had the place of honor; there also were Bostons and representatives of most of its variations. Cocos Weddelliana was shown up to 10-inch pots, plants over five feet high. Cocos plumosus, kentias up to the decorating sizes, Ficus pandurata, araucarias, ferns for dishes, and stock of the sizes for growing on were shown in quantity. The bulb table had French stock, tulips and Harrisii. Glazing points, tubs and hose were there as usual. The exhibit was in charge of J. J. Karins and J. A. Ruppert, who have been with the house twenty-three years each, and J. J. Goudy, whose term of service is now twenty years.

Robert Craig Co., Philadelphia, had the bright spot with its display of eighty-five varieties of crotons; it grows 120 varieties and propagates 5,000 a month. Notable sorts were Edwin Lonsdale and Robert Craig, both of which are popular sellers. There was a table of fine Lorraines, another of cyclamens, a variety of Boston and its sports, variegated rubbers, kentias that were well finished, oranges, large Ficus pandurata, dracænas, asparagus and many others. The display was in charge of Wm. P. Craig and Duncan Macaw. J. M. McCullough Sons Co. bought the entire exhibit.

Vaughan's Seed Store, Chicago, showed azaleas just arrived direct from Ghent, probably the first time that azaleas have been shown at an August convention in this country. In the plant line, the firm had samples of the commercial sizes of palms and ferns, asparagus and similar greenhouse stock. Dieffenbachias and phœnix, with crotons, were included. A new plant was Begonia Rex Adolph Mengel. A display of cut blooms of gladioli was maintained throughout the week, including Princeps, America, Mrs. King, and a sport from the latter not yet named. There also were cut blooms of new hardy phlox and of new dahlias. A large table was filled with bulbs, including French and Dutch stock, Harrisii, and freesias. Among the supplies shown was a new sprayer. An exhibit was made of five varieties of peonies. The exhibit was in charge of Horace Cheesman, Guy Reuburn, and Alex Henderson.

Julius Roehrs Co., Rutherford, N. J., shipped an entire carload, including thirty varieties of evergreens in large tubs, bay trees, boxwood, some large plants of Phœnix Canariensis and Phœnix Roebelenii, kentias in many sizes, large dracænas, a table of crotons, Pandanus Veitchii and that now seldom seen palm, Livistona rotundifolia. They also had a group of camellias, which are reported again coming into favor, and a table of freshly imported and established orchids. Some fine plants of Adiantum Farleyense were a feature. The exhibit was in charge of Julius Roehrs, Jr., and J. Muller.

F. R. Pierson Co., Tarrytown, N. Y., made a comprehensive display of the Boston fern family. Beginning with the original type, they showed the following variations: The new elegantissima compacta, superbissima, Piersoni, Amerpohlii, elegantissima, and the newest, veridissima. On the bulb table this firm showed French and Dutch stock, Harrisii and freesia, from Bermuda, and candidums. J. R. Fotheringham and Theodore Trevellian were in charge.

Bobbink & Atkins, Rutherford, N. J., had one of the largest displays in the hall. They shipped a solid carload of plants, valued at more than $1,500. In the exhibit were 100 different varieties of evergreens in tubs. There were some large ivies in tubs, trained to cover balloon trellises. The kentias ranged up to large sizes. There were some large bay trees and Phœnix Canariensis, with araucarias, ficus and many other plants. Victor Morgan was in charge.

J. A. Peterson, Cincinnati, showed a striking novelty in Dracæna Victoria, with pronounced deep yellow variegation; Mr. Peterson picked this up while in Europe two years ago. In begonias he showed nice plants of Lorraine, Light Pink Lorraine, Agatha, and his new variety, President Taft. He also had the usual fine plants of Farleyense, Bos-

Notable sorts were Edwin Lonsdale and Robert Craig, both of which are popular sellers. There was a table of fine Lorraines, another of evelamens, a variety of Boston and its sports, variegated rubbers, kentias that were well finished, oranges, large Ficus pandurata, draceenas, asparagus and many others. The display was in charge of Wm. P. Craig and Duncan Macaw. J. M. McCullough Sons Co. brought the entire exhibit.

Vaughan's Seed Store, Chicago, showed azaleas just arrived direct from Ghent probably the first time that azaleas have been shown at an August convention in this country. In the plant line, the firm had samples of the commercial sizes of palms and ferns, asparagus and similar greenhouse stock. Dieffenbachias and phoenix with crotons, were included. A new plant was Begonia Rex Adolph Mengel. A display of cut blooms of gladioli was maintained throughout the week, including Princeps, America, Mrs. King and a sport from the latter not yet named. There also were cut blooms of new hardy phlox and of new dahlias. A large table was filled with bulbs, including French and Dutch stock, Harrisii, and freesias. Among the supplies shown was a new sprayer. An exhibit was made of five varieties of peonies. The exhibit was in charge of Horace Cheesman, Guy Reuburn, and Alex Henderson.

Julius Roehrs Co., Rutherford, N. J., shipped an entire carload, including thirty varieties of evergreens in large trees, bay trees, boxwood, some large plants of Phoenix Canariensis and Phoenix Roebelenii, kentias in many sizes, large draceenas, a table of crotons, Pandanus Veitchii and that now seldom seen palm, Livistona rotundifolia. They also had a groups of cycas [illegible] ...ported ... table of trees [illegible] ... Peterson Co., [illegible] ... he supplies were on the bale ay at the left and in the rooms at the front, the pots and pottery were under the ca... and the heating apparatus and building material on the main floor back of where the camera stood.

ton and Scottii fern. Mr. Peterson personally was on hand.

Lager & Hurrell, Summit, N. J., had a table of orchids, including about 100 established plants and four or five cases of freshly imported stock. In the center of the display was a particularly good plant of Epidendrum Vitellinum, the scarlet star-flowered orchid, in bloom. J. E. Lager was on the ground, with George W. Strange in charge of the exhibit.

Thomas Jackson, Latonia, Ky., exhibited a new yellow alternanthera.

J. D. Pruessner, Galveston, Tex., sent a specimen plant of his new Nephrolepis Pruessneri in a 5-inch pot, with photographs of other sizes.

it consisted of Phœnix Roebelenii, grown out of doors, for the plant is perfectly hardy in New Orleans and can be brought to salable size outdoors more quickly than in a greenhouse in the north. C. W. Eichling was in charge.

A. C. Brown, Springfield, Ill., showed twenty-five plants of his carnation, Sangamo, in pots. The color is a glistening pink, and several of the plants showed good bloom, although the display was intended to show the character of growth rather than the quality of flower, which of course could not be representative at this season. Mr. Brown was always hovering around.

Ordonez Bros., Madison, N. J., had a table of both established and freshly imported cattleyas. Manuel Ordonez was in charge.

Boddington's Long Table of French, Dutch and Bermuda Bulbs.

C. D. Ball, of Philadelphia, practically confines himself to kentias and showed well finished plants in all commercial sizes, also a few latanias and cocos. Mr. Ball had with him his son, C. D. Ball, Jr.

W. A. Manda, South Orange, N. J., had great variety in his exhibit. There was a case of orchids, and a number of varieties of roses, with samples of all the commercial palms and decorative plants. Among the specialties were Asparagus elongatus, golden privet, a large collection of evergreens in tubs, Dracæna Mandaiana, D. Black Beauty, D. Bronze Beauty, D. Rothiana, Pachysandra terminalis, Ficus pandurata, and Pteris tremula cristata. Robert Karlstrom was in charge.

Storrs & Harrison Co., Painesville, O., had a table of field-grown roses for forcing, araucarias, kentias, primulas, asparagus and genistas for growing on, adiantums and small ferns. S. R. Welch and C. H. Shumaker were in charge.

The Springfield Floral Co., Springfield, O., exhibited a new nephrolepis, named Springfield. It is the most erect growing of the crested ferns. L. Bradford was in charge.

Jackson & Perkins Co., Newark, N. Y., had a table of field-grown roses, tree hydrangeas, lilacs, clematis and phlox. C. H. Perkins II was in charge.

Lemuel Ball, Philadelphia, had a group of well grown kentias, crotons, Panax Veitchii, Phœnix Roebelenii, Ficus pandurata and other plants and was himself in charge, as usual.

Charles Eble, New Orleans, had the only exhibit of plants from the far south;

Bulbs and Sundries.

Henry F. Michell, Philadelphia, had Japanese callas as the central feature of his bulb exhibit, which included Dutch, French and Bermuda stock as well. He showed a large line of sundries, including pots, insecticides, sprayers, mowers, tools of all sorts, and a reel of 500 feet of Electric hose on which the label was attached every six inches; one of the salesmen cut off a labeled sample for any who were interested. Israel Rosnosky and Fred J. Michell were in charge. They had a souvenir, "Watch us jump."

Arthur T. Boddington, New York, had a large display of bulbs; "Quality Bulbs," the sign said in large letters. There was a full line of French stock and a few cases of Dutch bulbs just in, for shipments are late this year. The Harrisii included all sizes from 5 to 7 up to 13 inch. There also was a display of seeds of winter-flowering sweet peas, of which Mr. Boddington has made a specialty. The exhibit was in charge of Harry A. Bunyard and F. W. Creighton.

The Hubert Bulb Co., Portsmouth, Va., staged fifteen varieties of narcissi and fifteen of tulips, all home grown, and were not without an interested group of growers at any hour the hall was open. The display was in charge of J. Guille and his son, W. Guille.

D. A. Rusconi, Cincinnati, showed French bulbs, Harrisii and freesia bulbs just received from Bermuda, candidums and some cold storage giganteums. He also showed some giganteum plants in flowers from his cold storage stock. Tobak-ine and spray pumps, grass seeds and plant tubs were also on his stand. Mr. Rusconi personally greeted visitors.

J. M. McCullough's Sons Co., Cincinnati, had a large display, including French and Dutch bulbs, insecticides, Mastica, pumps and sprayers, brass bound oak tubs, Fibrotta ware, etc. They also had a number of bay trees and kentias, the latter in large sizes. The same firm also supplied stock for decorative purposes about the secretary's office. W. J. Kennedy was in charge.

Florists' Supplies.

M. Rice & Co., Philadelphia, have frequently taken larger lines to conventions than was the case this year, but they never have shown anything better than the novelties of the current season. Principal among these are the Etruscan gold baskets of their own designing and manufacture. These are either metal lined for plants or in handle shapes for cut flowers. They also make a tall American Beauty vase in this line that is especially graceful. Natural willow baskets for both plants and cut flowers are an attractive line. Airships and balloons are included, and it was reported quite a number of sales were made on them. One line of twig hampers and baskets was in a gray-blue effect. A new line of prepared fern foliage was in autumn colors. The display of ribbons included several new effects and there were many new shapes and colors in baskets. A large line of mats was shown. The entire exhibit was sold Monday to Fred Gear. B. Eschner was in charge as usual, with F. J. Farney and George Tromey and two assistants.

H. Bayersdorfer & Co., Philadelphia, never have showed a larger or more varied line than at this convention. In addition to a display which embraced practically all the staple articles, they had a number of new things. Occupying a conspicuous place was a line of Imperial china, for table decorations and for small plants. They also showed an assortment of cut glass fern dishes. A new line of baskets in a variety of shapes is colored in imitation of the well-known toneware this house has featured. Another new line of baskets was in delicate tints of pink, green and red. The wall was covered with a large new line of metallic wreaths and there also was a line of natural perpetuated woods foliage wreaths. Brass flower receptacles were featured. The exhibit was in charge of S. H. Bayersdorfer, Martin Reukauf, W. Greene and two of the boys from the store. Paul Berkowitz was inquired for by many.

Pennock-Meehan Co., Philadelphia, had a long table of ribbons, including samples of almost all the staple articles. Among the novelties was a line of chameleon effects in wide widths for funeral work and narrower widths for corsage flowers, etc. A moire ribbon of satin stripes was shown for basket work. A two-tone silver green ribbon for use with valley and Farleyense was noted. Another new thing was a ribbon to match the My Maryland rose color. E. J. Fancourt, as usual, had charge of this display.

Wertheimer Bros., New York, showed a large line of ribbons, chiffons and violet ties, including their last year's success, the Sparkling Dewdrop chiffon, but the principal feature was the article described by its name, Sprinkleproof chiffon, which they have trade-mark registered. They say it will repell moisture

and can be used with impunity where designs must be sprinkled. A novelty ribbon is given the name Radium, and a corsage ribbon has what is called petal edge. The display was in charge of S. B. Wertheimer, assisted by George W. Cohn. A souvenir given the visitors was a squeaking Japanese doll with parasol. A page in uniform was on duty.

L. Baumann & Co., Chicago, took 400 square feet of space, but had quite a little difficulty in getting anything to fill it with, for the Pennsylvania railroad lost in the yards the car containing their shipment of fifteen cases and the goods were only found at the eleventh hour. There was the usual large line of wreaths of metal and natural perpetuated foliage, with a few nice pieces of wax goods, and artificial flower decorations. Several lines of baskets also were shown. Among the novelties not heretofore shown by this firm were preserved fern leaves in autumn colors, and fern dishes in porcelain and bronze for table decoration. The exhibit was in charge of L. Baumann, G. Reising and L. Biedermann.

J. G. Neidinger, Philadelphia, exhibited a large line of wax designs. There has been advance in this department as well as others in recent years, and the designs are now much more natural than formerly. Many are made up with natural preserved greens and some pieces in the exhibit were entirely made of perpetuated foliage and flowers made from a special cloth brought from Japan. Artificial poinsettias have for some years been a special feature with Neidinger's. The exhibit this year included baskets, plant stands, wheat sheaves, cycas leaves, etc. It was in charge of Mr. Neidinger, assisted by George Hampton.

Lion & Co., New York, had a large line of staple ribbons, chiffons, and violet ties, and several novelties. Among the latter were: Hand dotted snowflake netting, gauze striped corsage ribbon, three toned ribbon, Pekin striped netting, and chenille cords for violet, orchid and other corsages. The exhibit was in charge of E. Shattls and Julius Berg.

Reed & Keller, New York, had a large line of staple supplies and special designs in wirework. One of the notable things was a piece made to scale, representing the Lusitania, the Half Moon, and the first steamship, Robert Fulton. A new line of jardinieres, fern dishes, and baskets was styled metal relief ware. Florentine gold ware in a large variety of forms was shown. There were many new table decorations of brass or wire to hold glass vases. The exhibit was in charge of W. N. Reed, A. L. Barnett and August Martial.

Schloss Bros., New York, in addition to their regular line of ribbons, chiffons, and violet ties, had an unusual number of novelties. One of these was a fringed and novelty tie in chiffon and ribbon. Another was a new fern pattern in chiffon. There also were new designs in bridal scarfs. A shower effect for a violet corsage was shown, also a combined dress shield and corsage holder in all colors. A new ribbon combined fiber and silk for durability without sacrifice of appearance. Emil Schloss was in charge, assisted by Julius Dilloff. A silk ribbon bookmark was their souvenir.

E. H. Hunt, Chicago, is exclusive sales agent for the new Dellwood ware, an alabaster-like decoration on wood, metal lined for plants; the line includes window-boxes, ferneries and many similar articles, bronzed. The exhibit also included the well-known To-bak-ine products, cut flower boxes and Noxall brand hose. The exhibit was in charge of Clifford Pruner and A. F. Longren.

C. E. Critchell, Cincinnati, arranged an artistic booth for a large display of artificial poinsettias and had also several vases of excellent gladioli, commercial stock consigned to his wholesale house by a grower at New Madison, O. Mrs. A. C. Heckman was in charge of the booth.

The Madison Basketcraft Co., Madison, O., showed a large line of its willow novelty baskets. They had three large sample cases, including nearly 100 styles of plant and cut flower baskets, or about half the line. The two tables were in charge of D. D. Smead and J. F. Dayton.

A. L. Randall Co., Chicago, had a neatly equipped office just inside the main entrance, with a line of samples of ribbons, chiffons and florists' supplies in charge of Frank Johnson and Miss A. L. Tonner. Their souvenir was a pocket rule.

H. D. Mann Co., Syracuse, N. Y., a comparatively new house in florists' supplies, had a large variety of staple articles, including ribbons and chiffons. The special feature of the line was art brass and silver novelties. They also showed a line of baskets. F. W. Bannister was in charge.

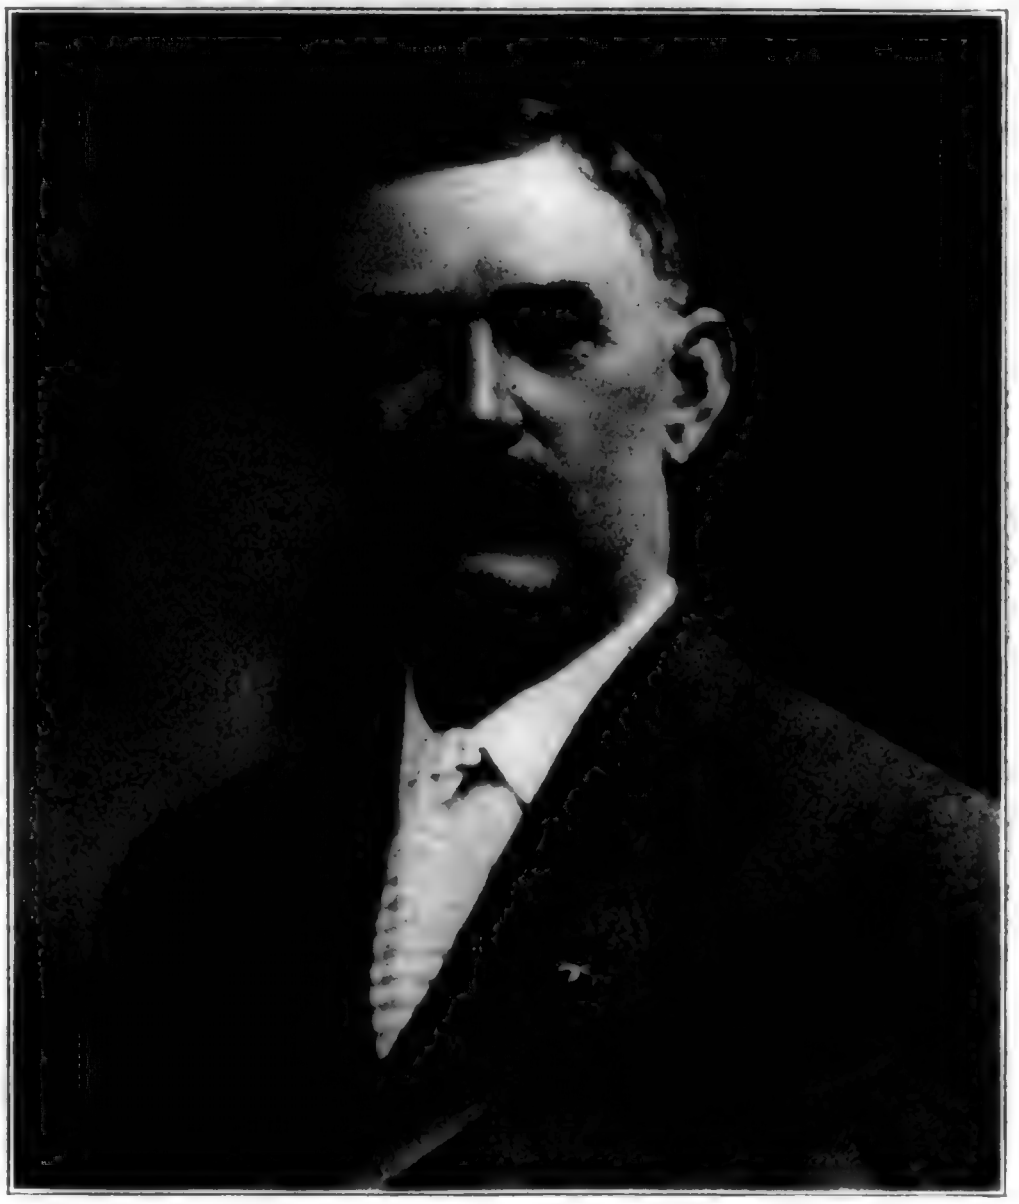
Robert Kift, Philadelphia, had an attractive display of his well-known fairy flower vases, partridge-berry globes and fernery globes and was himself on deck as genial as ever.

Chas. Apelt, Comfort, Tex., was personally in charge of a table of armadillo baskets, plain, waterproofed, metallized and silk lined, all sizes, from baby armadillos to grandfathers.

Charles Henry Fox, Philadelphia, exhibited his line of photographs of funeral designs for retailers' albums. W. Cleave Harry was in charge. He gave out souvenir postals.

A. Herrmann, New York, was represented by a large line of metallic designs, baskets, pot covers, wheat sheaves, etc. C. S. Ford was in charge.

Gillett & Ohmer, Cincinnati, had a line of wirework, including many special pieces, baskets, raffia, etc. The display was in charge of C. J. Ohmer, assisted by some attractive young ladies.



Ball & Betz, Cincinnati, had a display of wirework, principally special pieces, but also the standard frames. Represented by Frank W. Ball and R. A. Betz.

Pottery and Pots.

The Roseville Pottery Co., Zanesville, O., made a larger exhibit than ever before, and they have been heavy exhibitors for years. They call their line Rozane art pottery. It embraces an infinite variety of shapes and sizes in a wide range of colors, decorations and finishes. The pieces specially for florists have been largely added to in the last year. The display was in charge of B. F. Feldner, but Chas. D. Frauenfelter, general sales manager, also was present.

The A. Radford Pottery Co., Clarksburg, W. Va., was a new exhibitor, with a large line of jardinieres and pedestals in glazed and matt green ware, Ruko art vases, ferneries and grass growing pigs. C. S. Yeagle, formerly with the Roseville Pottery Co., was in charge.

Zanesville Stoneware Co., Zanesville, O., green glazed stoneware, cut flower

J. A. Peterson.
(President Cincinnati Florists' Society.)

ton and Scottii fern. Mr. Peterson personally was on hand.

Lager & Hurrell, Summit, N. J., had a table of orchids, including about 100 established plants and four or five cases of freshly imported stock. In the center of the display was a particularly good plant of Epidendrum Vitellinum, the scarlet star-flowered orchid, in bloom. J. E. Lager was on the ground, with George W. Strange in charge of the exhibit.

Thomas Jackson, Latonia, Ky., exhibited a new yellow alternanthera.

J. D. Pruessner, Galveston, Tex., sent a specimen plant of his new Nephrolepis Pruessneri in a 5-inch pot, with photographs of other sizes.

it consisted of Phœnix Roebelenii, grown out of doors, for the plant is perfectly hardy in New Orleans and can be brought to salable size outdoors more quickly than in a greenhouse in the north. C. W. Eichling was in charge.

A. C. Brown, Springfield, Ill., showed twenty-five plants of his carnation, Sangamo, in pots. The color is a glistening pink, and several of the plants showed good bloom, although the display was intended to show the character of growth rather than the quality of flower, which of course could not be representative at this season. Mr. Brown was always hovering around.

Ordonez Bros., Madison, N. J., had a table of both established and freshly imported cattleyas. Manuel Ordonez was in charge.

Boddington's Long Table of French, Dutch and Bermuda Bulbs.

C. D. Ball, of Philadelphia, practically confines himself to kentias and showed well finished plants in all commercial sizes, also a few latanias and cocos. Mr. Ball had with him his son, C. D. Ball, Jr.

W. A. Manda, South Orange, N. J., had great variety in his exhibit. There was a case of orchids, and a number of varieties of roses, with samples of all the commercial palms and decorative plants. Among the specialties were Asparagus elongatus, golden privet, a large collection of evergreens in tubs, Dracæna Mandaiana, D. Black Beauty, D. Bronze Beauty, D. Rothiana, Pachysandra terminalis, Ficus pandurata, and Pteris tremula cristata. Robert Karlstrom was in charge.

Storrs & Harrison Co., Painesville, O., had a table of field-grown roses for forcing, araucarias, kentias, primulas, asparagus and genistas for growing on, adiantums and small ferns. S. R. Welch and C. H. Shumaker were in charge.

The Springfield Floral Co., Springfield, O., exhibited a new nephrolepis, named Springfield. It is the most erect growing of the crested ferns. L. Bradford was in charge.

Jackson & Perkins Co., Newark, N. Y., had a table of field-grown roses, tree hydrangeas, lilacs, clematis and phlox. C. H. Perkins II was in charge.

Lemuel Ball, Philadelphia, had a group of well grown kentias, crotons, Panax Veitchii, Phœnix Roebelenii, Ficus pandurata and other plants and was himself in charge, as usual.

Charles Eble, New Orleans, had the only exhibit of plants from the far south;

Bulbs and Sundries.

Henry F. Michell, Philadelphia, had Japanese callas as the central feature of his bulb exhibit, which included Dutch, French and Bermuda stock as well. He showed a large line of sundries, including pots, insecticides, sprayers, mowers, tools of all sorts, and a reel of 500 feet of Electric hose on which the label was attached every six inches; one of the salesmen cut off a labeled sample for any who were interested. Israel Rosnosky and Fred J. Michell were in charge. They had a souvenir, "Watch us jump."

Arthur T. Boddington, New York, had a large display of bulbs; "Quality Bulbs," the sign said in large letters. There was a full line of French stock and a few cases of Dutch bulbs just in, for shipments are late this year. The Harrisii included all sizes from 5 to 7 up to 13 inch. There also was a display of seeds of winter-flowering sweet peas, of which Mr. Boddington has made a specialty. The exhibit was in charge of Harry A. Bunyard and F. W. Creighton.

The Habert Bulb Co., Portsmouth, Va., staged fifteen varieties of narcissi and fifteen of tulips, all home grown, and were not without an interested group of growers at any hour the hall was open. The display was in charge of J. Guille and his son, W. Guille.

D. A. Ruseoni, Cincinnati, showed French bulbs, Harrisii and freesia bulbs just received from Bermuda, candidums and some cold storage giganteums. He also showed some giganteum plants in flowers from his cold storage stock. T bak-ine and spray pumps, grass seeds a plant tubs were also on his stand. M Ruseoni personally greeted visitors.

J. M. McCullough's Sons Co., Cincinna had a large display, including French a Dutch bulbs, insecticides, Mastica, pum and sprayers, brass bound oak tubs, I brotta ware, etc. They also had a nu ber of bay trees and kentias, the latt in large sizes. The same firm also su plied stock for decorative purposes abo the secretary's office. W. J. Kenned was in charge.

Florists' Supplies.

M. Rice & Co., Philadelphia, have frequently taken larger lines to convention than was the case this year, but the never have shown anything better tha the novelties of the current season. Principal among these are the Etruscan gol baskets of their own designing and manu facture. These are either metal lined fo plants or in handle shapes for cut flow ers. They also make a tall American Beauty vase in this line that is especially graceful. Natural willow baskets for both plants and cut flowers are an attractive line. The exhibit as in charge of L. Baumann, G. Reising and L. Biedermann.

J. G. Neidinger, Philadelphia, exhibted a large line of wax designs. There as been advance in this department as well as others in recent years, and the lesigns are now much more natural than ormerly. Many are made up with natral preserved greens and some pieces in he exhibit were entirely made of perpetated foliage and flowers made from a special cloth brought from Japan. Artificial poinsettias have for some years been a special feature with Neidinger's. The exhibit this year included baskets, plant stands, wheat sheaves, cycas leaves, tc. It was in charge of Mr. Neidinger, ssisted by George Hampton.

Lion & Co., New York, had a large line f staple ribbons, chiffons, and violet ties, and several novelties. Among the atter were: Hand dotted snowflake netting, gauze striped corsage ribbon, three oned ribbon, Pekin striped netting, and henille cords for violet, orchid and other corsages. The exhibit was in charge of E. Shattls and Julius Berg.

Reed & Keller, New York, had a large ine of staple supplies and special designs in wirework. One of the notable hings was a piece made to scale, representing the Lusitania, the Half Moon, nd the first steamship, Robert Fulton. A new line of jardinieres, fern dishes, nd baskets was styled metal relief ware. Florentine gold ware in a large variety f forms was shown. There were many ew table decorations of brass or wire to old glass vases. The exhibit was in harge of W. N. Reed, A. L. Barnett nd August Martial.

Schloss Bros., New York, in addition o their regular line of ribbons, chiffons, nd violet ties, had an unusual number of ovelties. One of these was a fringed nd novelty tie in chiffon and ribbon. Another was a new fern pattern in chifon. There also were new designs in ridal scarfs. A shower effect for a vio-t corsage was shown, also a combined ress shield and corsage holder in all olors. A new ribbon combined fiber nd silk for durability without sacrifice f appearance. Emil Schloss was in harge, assisted by Julius Dilloff. A silk ibbon bookmark was their souvenir.

E. H. Hunt, Chicago, is exclusive sales gent for the new Dellwood ware, an alaaster-like decoration on wood, metal ined for plants; the line includes win low boxes, ferneries and many similar rticles, bronzed. The exhibit also included the well-known To-bak-ine products, cut flower boxes and Noxall brand hose. The exhibit was in charge of Clifford Pruner and A. F. Longren.

C. E. Critchell, Cincinnati, arranged an artistic booth for a large display of artificial poinsettias and had also several vases of excellent gladioli, commercial stock consigned to his wholesale house by a grower at New Madison, O. Mrs. A. C. Heckman was in charge of the booth.

The Madison Basketcraft Co., Madison, O., showed a large line of its willow novelty baskets. They had three large sample cases, including nearly 100 styles of plant and cut flower baskets, or about half the line. The two tables were in charge of D. D. Smead and J. F. Dayton.

A. L. Randall Co., Chicago, had a neatly equipped office just inside the main entrance, with a line of samples of ribbons, chiffons and florists' supplies in charge of Frank Johnson and Miss A. L. Tonner. Their souvenir was a pocket rule.

H. D. Mann Co., Syracuse, N. Y., a comparatively new house in florists' supplies, had a large variety of staple articles, including ribbons and chiffons. The special feature of the line was art brass and silver novelties. They also showed a line of baskets. F. W. Bannister was in charge.

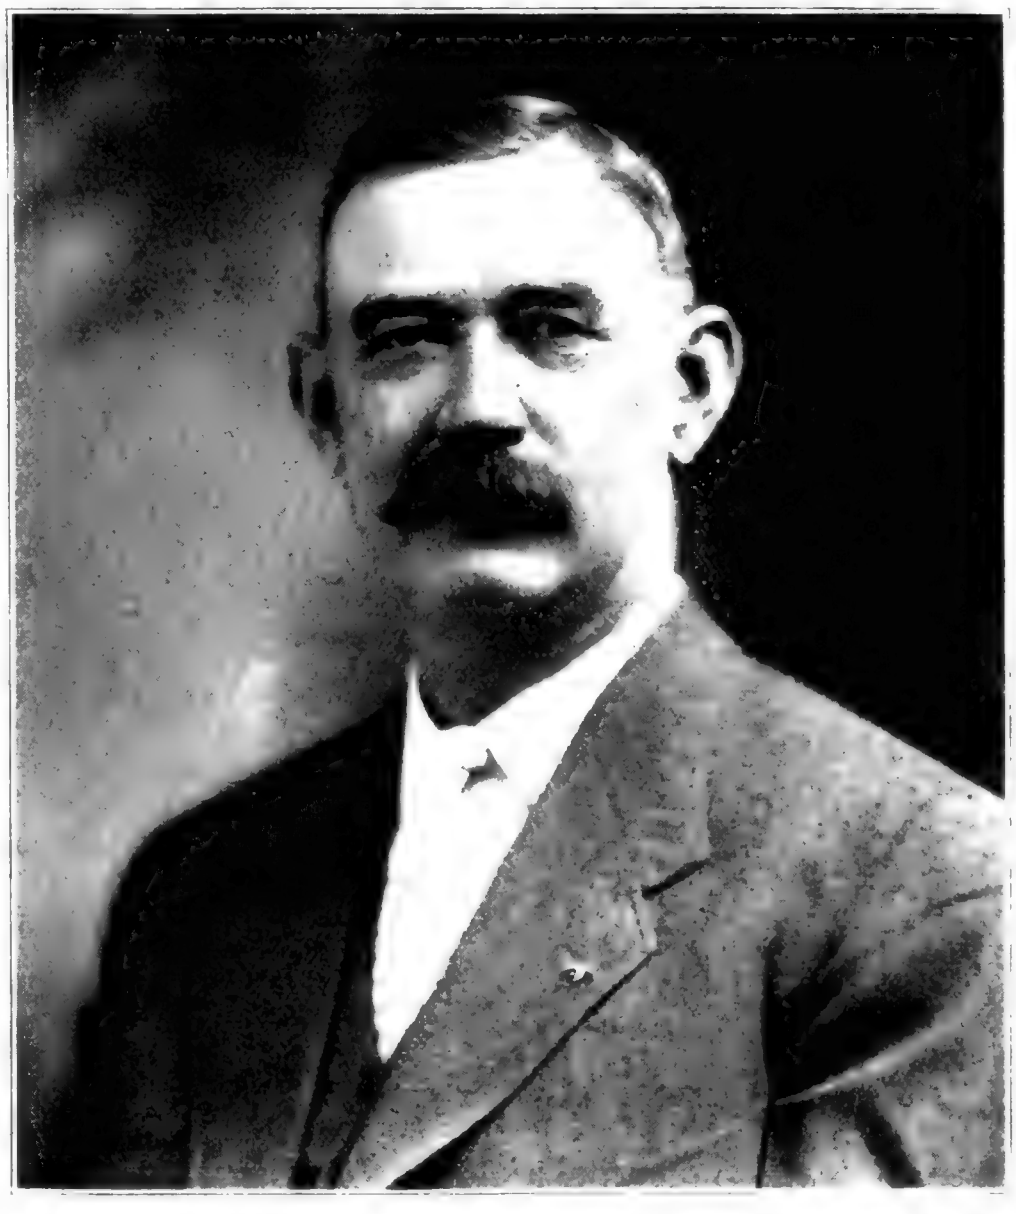
Robert Kift, Philadelphia, had an attractive display of his well-known fairy flower vases, partridge-berry globes and fernery globes and was himself on deck as genial as ever.

Chas. Apelt, Comfort, Tex., was personally in charge of a table of armadillo baskets, plain, waterproofed, metallized and silk lined, all sizes, from baby armadillos to grandfathers.

Charles Henry Fox, Philadelphia, exhibited his line of photographs of funeral designs for retailers' albums. W. Cleave Harry was in charge. He gave out souvenir postals.

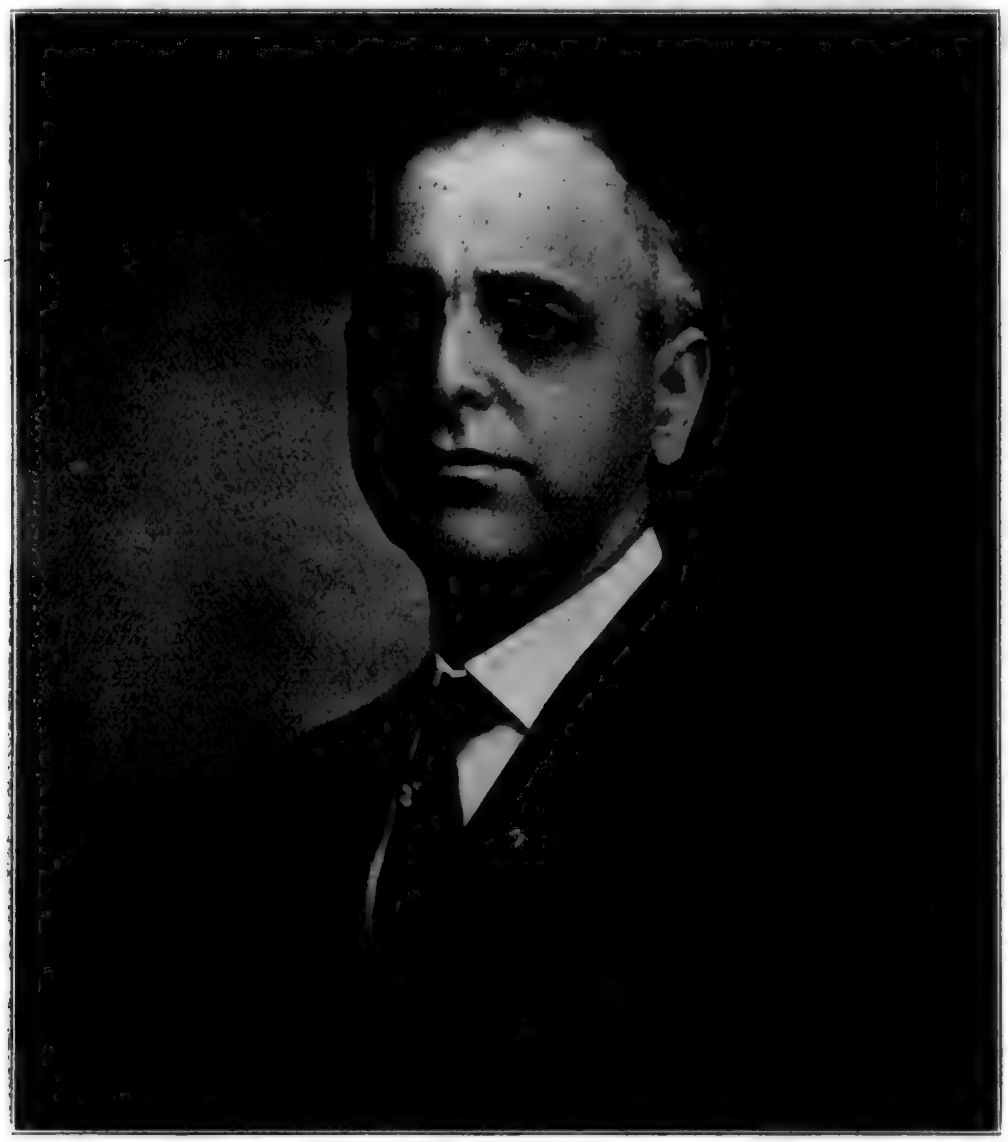
A. Herrmann, New York, was represented by a large line of metallic designs, baskets, pot covers, wheat sheaves, etc. C. S. Ford was in charge.

Gillett & Ohmer, Cincinnati, had a line of wirework, including many special pieces, baskets, raffia, etc. The display was in charge of C. J. Ohmer, assisted by some attractive young ladies.



Ball & Betz, Cincinnati, had a display of wirework, principally special pieces, but also the standard frames. Represented by Frank W. Ball and R. A. Betz.

Pottery and Pots.



The Roseville Pottery Co., Zanesville, O., made a larger exhibit than ever before, and they have been heavy exhibitors for years. They call their line Rozane art pottery. It embraces an infinite variety of shapes and sizes in a wide range of colors, decorations and finishes. The pieces specially for florists have been largely added to in the last year. The display was in charge of B. F. Feldner, but Chas. D. Frauenfelter, general sales manager, also was present.

The A. Radford Pottery Co., Clarksburg, W. Va., was a new exhibitor, with a large line of jardinieres and pedestals in glazed and matt green ware, Ruko art vases, ferneries and grass growing pigs. C. S. Yeagle, formerly with the Roseville Pottery Co., was in charge.

Zanesville Stoneware Co., Zanesville, O., green glazed stoneware, cut flower

J. A. Peterson.
(President Cincinnati Florists' Society.)

E. G. Gillett.
(Vice-president and Chairman of the Committee on Ladies' Entertainments.)

vases, porch vases, ferneries, and jardinieres. J. C. Mattingly was in charge.

W. H. Elverson Pottery Co., New Brighton, Pa., which has been making flower pots since 1862, had a table of red pots in sizes from 1-inch to 16-inch, bulb pans, orchid baskets, and a new porch pot for boxwood and similar plants. W. H. Elverson was in charge, as usual.

The Ionia Pottery Co., Ionia, Mich., had a large showing of its white pots from 1-inch to 16-inch, azalea pots, white lawn vases, porch pots, hanging baskets and a full line of wirework. The display was in charge of Harvey E. Kidder and Geo. Dysinger.

The Springfield Clay Mfg. Co., Springfield, O., staged samples of its line of flower pots, fern pans, etc.

Keller Pottery Co., Norristown, Pa., showed samples of its line of red pots and bulb pans, from 1-inch to 14-inch, each size marked. In charge of Wm. Keller.

Detroit Flower Pot Mfy., Detroit, a line of red pots on the round bottom molds. Harry Balsley was in charge.

The Underwood Machine Co., Cincinnati, showed its flower pot "renovator," a washing machine operated by an electric motor. Thomas Underwood was in charge.

Building Material.

The King Construction Co., North Tonawanda, N. Y., put up twenty feet of a full sized greenhouse to show its truss construction, embodying light bars, a steel gutter with a steel drip pan underneath, and the firm's new light angle iron eaves. The King self-locking double worm gear ventilating apparatus was shown in the house. The display included brackets, pipe hooks, etc. Photographs and printed matter further illustrated the firm's style of construction. The exhibit was in charge of R. O. King, C. H. Twin and J. C. Luff.

John C. Moninger Co., Chicago, sections showing details of greenhouse construction, placed for convenient examination; ventilator hinge, gutter and gable corner construction, bar and gutter lock splice, ridge caps, etc. N. J. Rupp was in charge. Souvenirs were a mirror and pocket piece.

The Foley Mfg. Co., Chicago, put up a 10-foot section, full size, of a house twenty feet wide. The construction embodied all the features of the firm's method of construction, including the Foley ventilating apparatus. F. J. Hartwick was in charge.

A. Dietsch Co., Chicago, had several sections of greenhouse roof, on a table for easy examination, showing the firm's new header and new ventilator hinge. Alfred Dietsch was in charge.

The Advance Co., Richmond, Ind., erected a section of a greenhouse to show its ventilating apparatus in operation. Greenhouse fittings also were exhibited. The booth was in charge of J. E. Jones and H. R. Parker.

The Wolf Machine Co., Dayton, O., put up a model greenhouse for the purpose of showing its ventilating apparatus in operation. A dump sieve soil sifter also was shown. The exhibit was in charge of Earl Kinney and William Hood.

The Camp Conduit Co., Cleveland, had a section of its two styles of tile bench, in charge of Guy Bate.

Quaker City Machine Works, Richmond, Ind., section of a greenhouse, embodying the Challenge ventilator; also a line of iron fittings. John Evans was on deck.

McCaslin Bros., Zanesville, O., showed a small concrete bench made in their mold, and the wood molds for making the full sized bench. C. H. McCaslin was in charge.

The Wm. Glenny Glass Co., Cincinnati, had an exhibit of Columbus brand glass in greenhouse sizes, in charge of H. S. Campbell.

Heating Apparatus.

Kroeschell Bros. Co., Chicago, showed two steel hot water boilers, which were sold for local delivery; one was capable of heating 36,000 square feet of glass. The firm's heat generator, through pressure, was shown attached to one. There also was an example of the new system of threaded boiler tube piping. As a souvenir, the new Lincoln penny, mounted on an appropriately painted card, was handed out. Fred Lautenschlager was in charge.

The Castle Co., Boston, exhibited its automatic circulator in operation, propelled by an electric motor. This is for accelerating the circulation in hot water heating systems; the new model works automatically. Col. W. W. Castle was present, but J. L. Congdon had charge of the apparatus.

The American Blower Co., Detroit, exhibited a Detroit steam trap, for returning the condensation from pipes to boiler. The trap was actuated by air pressure in this instance and was carrying water from a pipe to an elevated tank. G. D. Millspaugh was in charge.

The Morehead Mfg. Co., Detroit, exhibited one of its steam traps for returning condensation from steam pipes to boilers. A small boiler was shown with a double trap installation, electrically operated, to show the method under the low pressure steam system. M. L. Abrams was in charge.

The Herendeen Mfg. Co., Geneva, N. Y., had three sizes of its sectional boiler for steam and hot water heating. F. W. Herendeen was in charge. A souvenir badge that read on one side, "How to Keep Warm," seemed superfluous, in view of the weather, until one found the boiler adv. on the back.

William Moll, Cleveland, showed the Ideal pipe clamp, for stopping leaks in pipes. In charge of T. W. Moll.

Carnation Supports.

Albert Bell, Connersville, Ind., showed the Heim carnation support and safety clip. The support is a two-ring on each standard, so that each support holds two plants. The safety clip attaches wire stakes to overhead wires. Represented by H. G. Hershey.

Heim & Son Support Co., Connersville, Ind., showed the new model carnation support and the self-tying rose stakes, with the machine in operation putting the tie twist on the latter. Adam Heim was in charge.

O. A. Muller, Ambler, Pa., exhibited a new carnation support, a double loop, so that one support, with one, two or three double loops as needed, suffices for two plants. In charge of William Keller.

The Eagle Machine Works, Richmond, Ind., showed its Richmond carnation support, using plants growing in a bench to

give a practical demonstration of the method of moving the circle wires.

Miscellaneous.

Benjamin Hammond, Fishkill-on-Hudson, N. Y., made an attractive display by his method of staging articles not in themselves attractive. At his space he had Twemlow's Old English putty, Hammond's Greenhouse White paint, Slugshot, copper solution, Bordeaux mixture, Grape Dust, lawn fertilizer, kerosene emulsion, sheep dip, and thrips juice, an insecticide for practically every purpose; in addition he had brushes and glazing tools. Mr. Hammond was present, but the exhibit was in charge of C. H. Hudson.

The Standard Pump & Engine Co., Cleveland, had taken space for a large exhibit of its pumping apparatus in operation, but found pressure of orders too great to permit getting the display ready, so had to content itself with a table of photographs, printed matter, etc. J. M. Marty, Jr., manager of the company, was in charge.

The Wilson Plant Oil & Fertilizer Co., Chatham, N. J., exhibited a recently patented tub carrier, its pot washing machine, Acme hose, Wilson's plant oil, and a general line of fertilizers. Andrew Wilson was in charge. He had a case of match boxes, filled, as souvenirs.

The Bradford Belting Co., Cincinnati, exhibited several reels of its No Kink brand of greenhouse hose. The booth was in charge of B. Moody, who handed visitors a neat watch fob souvenir.

The Thompson & Noyes Co., Brooklyn, N. Y., was a new exhibitor. The firm showed photographs of its factories in six cities and four countries, manufacturing nothing but corrugated paper boxes. The boxes themselves were shown in all sizes. W. D. Bradt, P. F. Randolph and J. H. Wilson were in charge.

The Hinode & Dauch Paper Co., Sandusky, O., showed a large line of corrugated paper boxes, in charge of W. A. Lawrence and Sam Friedman.

The Ohio Box and Board Co., Springfield, O., had a table of cut flower boxes, mailing and express boxes, and twines, in charge of J. D. Murry.

E. A. Beaven, of Evergreen, Ala., was on hand with a table of his fadeless sheet moss and an inclination to talk about wild smilax.

The Shaw Fern Co., Pittsfield, Mass., had a table of hardy cut fancy and dagger ferns, neatly arranged in balls of sphagnum moss. L. E. Shaw was in charge and gave out souvenir postals showing scenes in the Berkshires.

I. L. Pillsbury, Galesburg, Ill., was on hand with a display of his well known staple for mending split carnation calyxes.

Glen St. Mary Fish Farm, Amelia, O., showed an aquarium of fancy varieties of goldfish. Charles Pommert was in charge.

The J. Horace McFarland Co., Harrisburg, Pa., made an attractive display of autocromes, the French system of color photography; also printed matter turned out in connection with the McFarland Publicity Service. Jefferson Thomas was in charge.

A. T. De La Mare Printing and Publishing Co., New York, had a table of horticultural books, including a new edition of George W. Oliver's "Plant Culture." In charge of Mr. De La Mare.

The Muncie Floral Co., Muncie, Ind., had a table of its advertising booklet for general florists, "In and Outdoor Floriculture." S. Humfeld was in charge.

D. B. Long, Buffalo, had a table of florists' printed matter and advertising literature and was on hand personally.

The trade papers were represented by subscription stands, and banners.

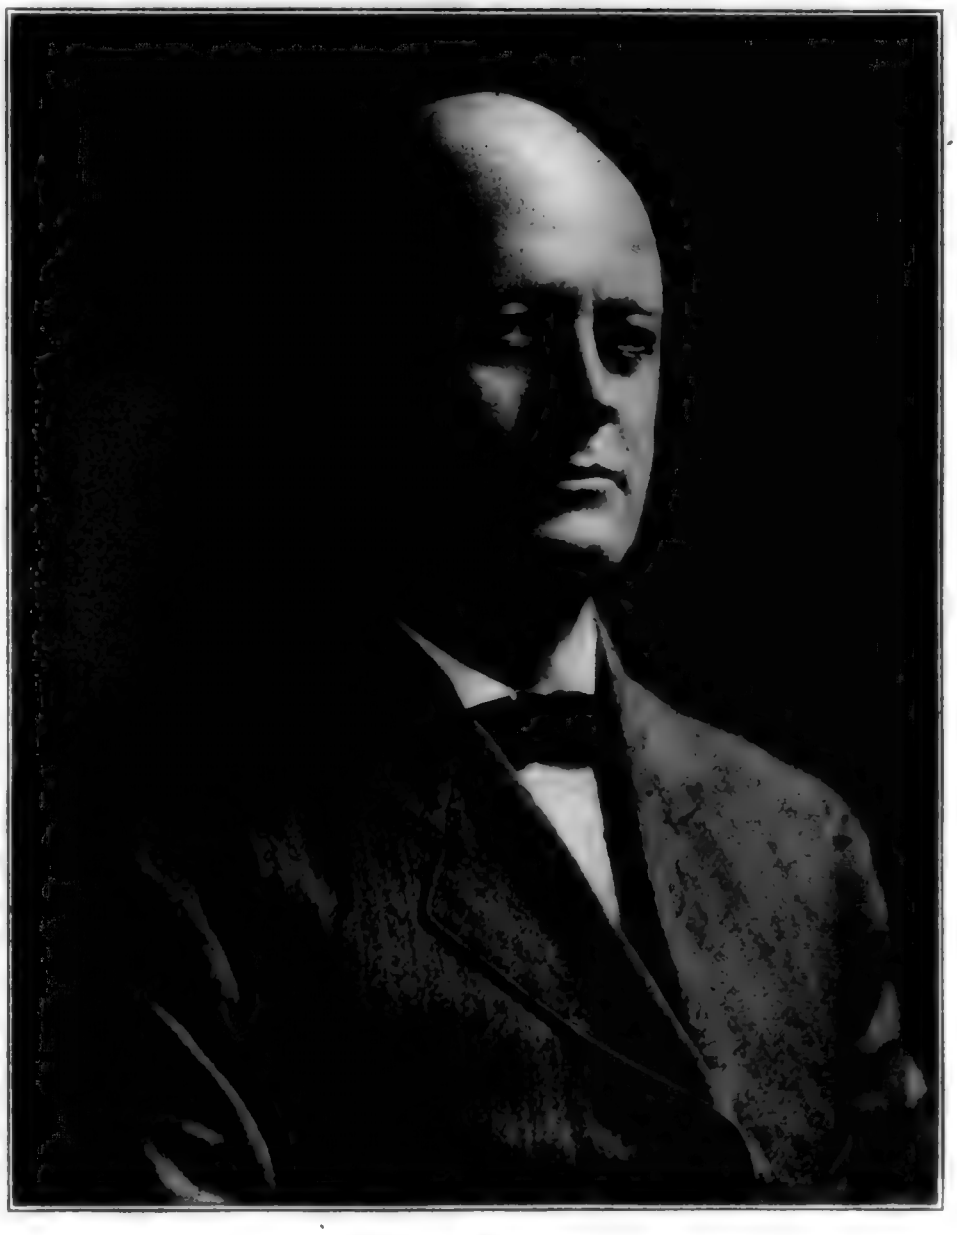
The Fernwood Nursery, Stamford, Conn., had a table of catalogues.

Z. D. Blackistone, Washington, brought some large photographs of automobiles decorated for a parade.

The following were represented by signs: A. L. Randall Co., Chicago; E. F. Winterson Co., Chicago; Weiland & Olinger, Cincinnati and New Castle; Vaughan & Sperry, Chicago; C. E. Critchell, Cincinnati; Kennicott Bros. Co., Chicago; Michigan Cut Flower Exchange, Detroit, Mich.; C. W. McKellar, Chicago; Bassett & Washburn, Chicago; Peter Reinberg, Chicago; Stumpp & Walter Co., New York; W. W. Barnard Co., Chicago.

PRESIDENT'S ADDRESS.

[The following is the address delivered by President J. A. Valentine before the S. A. F., in convention at Cincinnati, August 17 to 20, 1909.]



I take great pleasure in addressing you at this twenty-fifth meeting of the society, and I am able to assure you that the past year has shown an increase in membership and that our financial condition is also stronger than a year ago.

Societies, like human beings, suffer the greatest mortality in infancy, so that on its twenty-fifth birthday this society may be congratulated on having passed its period of greatest peril and being reasonably certain of reaching a good old age.

But fullness of years is not necessarily an evidence of usefulness, and we must take care that youthful complacency does not make us forget that we have the only charter ever granted to a similar organization by these United States, and that such distinction carries with it unusual responsibilities. We should, therefore, take heed to our conduct, so that the work intrusted to us by congress shall be well and faithfully performed on the broad lines contemplated by our charter. The next twenty-five years must show a record of work accomplished upon ever broadening lines, if we are to uphold the traditions of the old guard who started this work a quarter of a century ago.

I had hoped that we would at this meeting have the encouragement and the prophetic voice of our first president, but instead we are called upon to pay tribute to his memory. I shall leave to others, better equipped, the task of doing honor to those we have lost, but if this society can become imbued with the enthusiasm and the optimism of John Thorpe, no work can be too great for it to undertake with reasonable hope of success. If a knowledge of the things done here can penetrate to the Great Beyond, the thought that his efforts were bearing fruit in a wider usefulness for this society would bring great happiness to the soul of that remarkable man.

A few members of this society have been continuously faithful to it since its organization and have never failed to send their dues to the secretary. It seems eminently fitting that some special recognition should be made of their many years of loyal support, and I suggest

William Murphy.
(Superintendent Trades' Display at the Cincinnati Convention.)

E. G. Gillett.

(Vice-president and Chairman of the Committee on Ladies' Entertainments.)

vases, porch vases, ferneries, and jardinieres. J. C. Mattingly was in charge.

W. H. Elverson Pottery Co., New Brighton, Pa., which has been making flower pots since 1862, had a table of red pots in sizes from 1-inch to 16-inch, bulb pans, orchid baskets, and a new porch pot for boxwood and similar plants. W. H. Elverson was in charge, as usual.

The Ionia Pottery Co., Ionia, Mich., had a large showing of its white pots from 1-inch to 16-inch, azalea pots, white lawn vases, porch pots, hanging baskets and a full line of wirework. The display was in charge of Harvey E. Kidder and Geo. Dysinger.

The Springfield Clay Mfg. Co., Springfield, O., staged samples of its line of flower pots, tem pots, etc.

Keller Pottery Co., Norristown, Pa., showed samples of its line of red pots and bulb pans, from 1-inch to 14-inch, each size marked. In charge of Wm. Keller.

Detroit Flower Pot Mfy., Detroit, a line of red pots on the round bottom molds. Harry Balsley was in charge.

The Underwood Machine Co., Cincinnati, showed its flower pot "renovator," a washing machine operated by an electric motor. Thomas Underwood was in charge.

Building Material.

The King Construction Co., North Tonawanda, N. Y., put up twenty feet of a full sized greenhouse to show its truss construction, embodying light bars, a steel gutter with a steel drip pan underneath, and the firm's new light angle iron eaves. The King self-locking double worm gear ventilating apparatus was shown in the house. The display included brackets, pipe hooks, etc. Photographs and printed matter further illustrated the firm's style of construction. The exhibit was in charge of R. O. King, C. H. Twin and J. C. Luff.

John C. Moninger Co., Chicago, sections showing details of greenhouse construction, placed for convenient examination; ventilator hinge, gutter and gable corner construction, bar and gutter lock splice, ridge caps, etc. N. J. Rupp was in charge. Souvenirs were a mirror and pocket piece.

The Foley Mfg. Co., Chicago, put up a 10-foot section, full size, of a house twenty feet wide. The construction embodied all the features of the firm's method of construction, including the Foley ventilating apparatus. F. J. Hartwick was in charge.

A. Dietsch Co., Chicago, had several sections of greenhouse roof, on a table for easy examination, showing the firm's new header and new ventilator hinge. Alfred Dietsch was in charge.

The Advance Co., Richmond, Ind., erected a section of a greenhouse to show its ventilating apparatus in operation. Greenhouse fittings also were exhibited. The booth was in charge of J. E. Jones and H. R. Parker.

The Wolf Machine Co., Dayton, O., put up a model greenhouse for the purpose of showing its ventilating apparatus in operation. A dump sieve soil sifter also was shown. The exhibit was in charge of Earl Kinney and William Hood.

The Camp Conduit Co., Cleveland, had a section of its two styles of tile bench, in charge of Guy Bate.

Quaker City Machine Works, Richmond, Ind., section of a greenhouse, embodying the Challenge ventilator; also a line of iron fittings. John Evans was on deck.

McCaslin Bros., Zanesville, O., showed a small concrete bench made in their mold, and the wood molds for making the full sized bench. C. H. McCaslin was in charge.

The Wm. Glenny Glass Co., Cincinnati, had an exhibit of Columbus brand glass in greenhouse sizes, in charge of H. S. Campbell.

Heating Apparatus.

Kroeschell Bros. Co., Chicago, showed two steel hot water boilers, which were sold for local delivery; one was capable of heating 36,000 square feet of glass. The firm's heat generator, through pressure, was shown attached to one. There also was an example of the new system of threaded boiler tube piping. As a souvenir, the new Lincoln penny, mounted on an appropriately painted card, was handed out. Fred Lautenschlager was in charge.

The Castle Co., Boston, exhibited its automatic circulator in operation, propelled by an electric motor. This is for accelerating the circulation in hot water heating systems; the new model works automatically. Col. W. W. Castle was present, but J. L. Congdon had charge of the apparatus.

The American Blower Co., Detroit, exhibited a Detroit steam trap, for returning the condensation from pipes to boiler. The trap was actuated by air pressure in this instance and was carrying water from a pipe to an elevated tank. G. D. Millspaugh was in charge.

The Morehead Mfg. Co., Detroit, exhibited one of its steam traps for returning condensation from steam pipes to boilers. A small boiler was shown with a double trap installation, electrically operated, to show the method under the low pressure steam system. M. L. Abrams was in charge.

The Herendeen Mfg. Co., Geneva, N. Y., had three sizes of its sectional boiler for steam and hot water heating. F. W. Herendeen was in charge. A souvenir badge that read on one side, "How to Keep Warm," seemed superfluous, in view of the weather, until one found the boiler adv. on the back.

William Moll, Cleveland, showed the Ideal pipe clamp, for stopping leaks in pipes. In charge of T. W. Moll.

Carnation Supports.

Albert Bell, Connersville, Ind., showed the Heim carnation support and safety clip. The support is a two-ring on each standard, so that each support holds two plants. The safety clip attaches wire stakes to overhead wires. Represented by H. G. Hershey.

Heim & Son Support Co., Connersville, Ind., showed the new model carnation support and the self tying rose stakes, with the machine in operation putting the tie twist on the latter. Adam Heim was in charge.

O. A. Muller, Ambler, Pa., exhibited a new carnation support, a double loop, so that one support, with one, two or three double loops as needed, suffices for two plants. In charge of William Keller.

The Eagle Machine Works, Richmond, Ind., showed its Richmond carnation support, using plants growing in a bench to

e a practical demonstration of the hod of moving the circle wires.

Miscellaneous.

enjamin Hammond, Fishkill-on-Hud N. Y., made an attractive display by method of staging articles not in nselves attractive. At his space he . Twemlow's Old English putty, Ham d's Greenhouse White paint, Slug , copper solution, Bordeaux mixture, pe Dust, lawn fertilizer, kerosene lsion, sheep dip, and thrips juice, an ecticide for practically every purpose; addition he had brushes and glazing ls. Mr. Hammond was present, but exhibit was in charge of C. H. Hud-

The Standard Pump & Engine Co., veland, had taken space for a large ibit of its pumping apparatus in op- tion, but found pressure of orders too at to permit getting the display ready, had to content itself with a table of tographs, printed matter, etc. J. M. rty, Jr., manager of the company, in charge.

The Wilson Plant Oil & Fertilizer Co., atham, N. J., exhibited a recently pat- ed tub carrier, its pot washing ma- ine, Acme hose, Wilson's plant oil, and general line of fertilizers. Andrew lson was in charge. He had a case of atch boxes, filled, as souvenirs.

The Bradford Belting Co., Cincinnati, hibited several reels of its No Kink and of greenhouse hose. The booth s in charge of B. Moody, who handed sitors a neat watch fob souvenir.

The Thompson & Noyes Co., Brook- , N. Y., was a new exhibitor. The m showed photographs of its factories six cities and four countries, manu facturing nothing but corrugated paper xes. The boxes themselves were shown all sizes. W. D. Bradt, P. F. Ran- lph and J. H. Wilson were in charge.

The Hinode & Dauch Paper Co., San- sky, O., showed a large line of corru- ted paper boxes, in charge of W. A. wrence and Sam Friedman.

The Ohio Box and Board Co., Spring- ld, O., had a table of cut flower boxes, ling and express boxes, and twines, charge of J. D. Murry.

E. A. Beaven, of Evergreen, Ala., was hand with a table of his fadeless sheet ss and an inclination to talk about d smilax.

The Shaw Fern Co., Pittsfield, Mass., d a table of hardy cut fancy and gger ferns, neatly arranged in balls sphagnum moss. L. E. Shaw was in rge and gave out souvenir postals wing scenes in the Berkshires.

L. L. Pillsbury, Galesburg, Ill., was on d with a display of his well known ple for mending split carnation ves.

Glen St. Mary Fish Farm, Amelia, O., wed an aquarium of fancy varieties goldfish. Charles Pommert was in rge.

The J. Horace McFarland Co., Harris- g, Pa., made an attractive display of eromes, the French system of color tography; also printed matter turned in connection with the McFarland dicity Service. Jefferson Thomas was charge.

W. T. De La Mare Printing and Pub ng Co., New York, had a table of ticultural books, including a new edi- n of George W. Oliver's "Plant Cul ." In charge of Mr. De La Mare.

The Muncie Floral Co., Muncie, Ind., a table of its advertising booklet for eral florists, "In and Outdoor Flori ture." S. Dornfeld was in charge.

D. B. Long, Buffalo, had a table of florists' printed matter and advertising literature and was on hand personally.

The trade papers were represented by subscription stands, and banners.

The Fernwood Nursery, Stamford, Conn., had a table of catalogues.

Z. D. Blackistone, Washington, brought some large photographs of automobiles decorated for a parade.

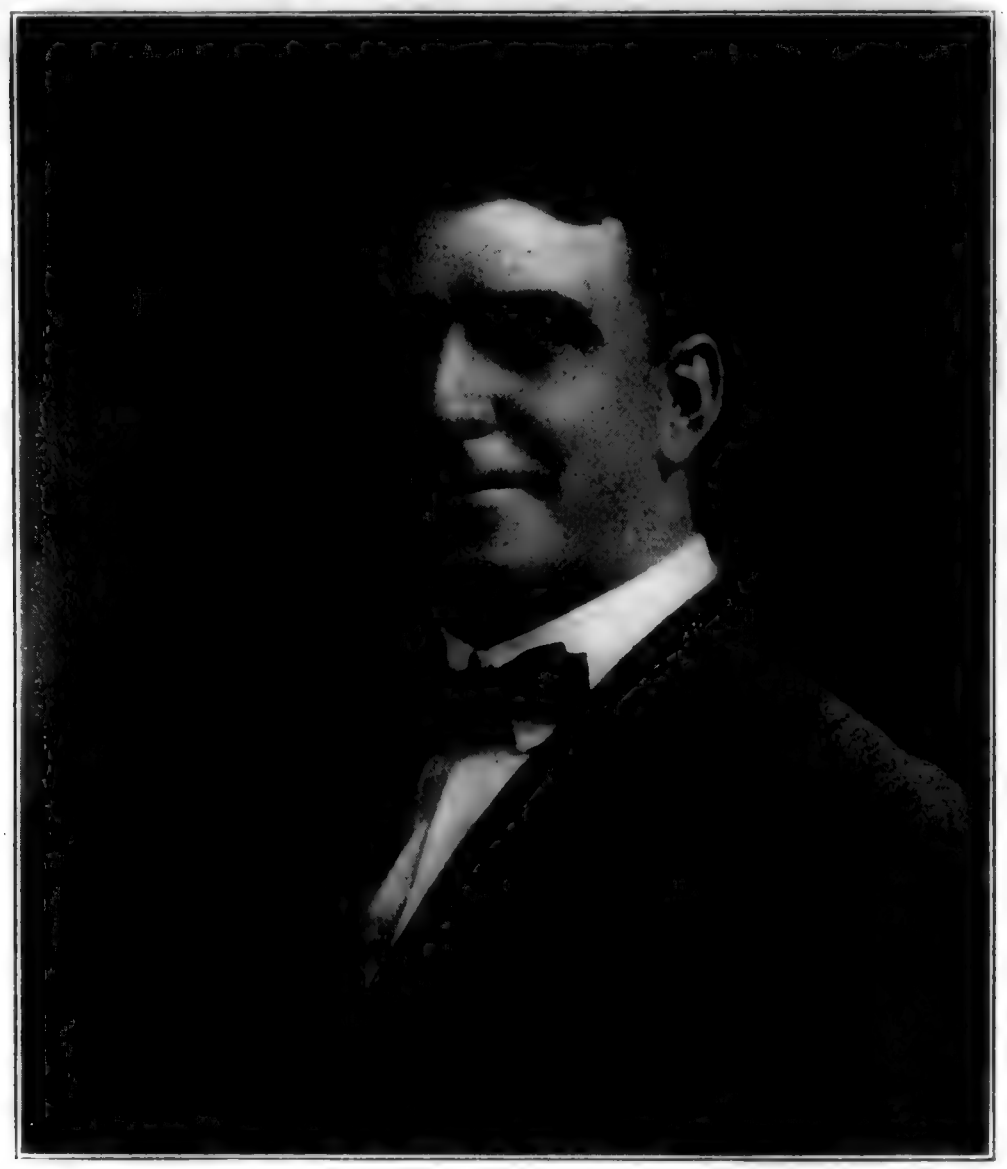
The following were represented by signs: A. L. Randall Co., Chicago; E. F. Winterson Co., Chicago; Weiland & Olinger, Cincinnati and New Castle; Vaughan & Sperry, Chicago; C. E. Critchell, Cincinnati; Kennicott Bros. Co., Chicago; Michigan Cut Flower Exchange, Detroit, Mich.; C. W. McKellar, Chicago; Bassett & Washburn, Chicago; Peter Reinberg, Chicago; Stumpp & Walter Co., New York; W. W. Barnard Co., Chicago.

PRESIDENT'S ADDRESS.

[The following is the address delivered by President J. A. Valentine before the S. A. F., in convention at Cincinnati, August 17 to 20, 1909.]

I take great pleasure in addressing you at this twenty-fifth meeting of the society, and I am able to assure you that the past year has shown an increase in membership and that our financial condition is also stronger than a year ago.

Societies, like human beings, suffer the greatest mortality in infancy, so that on its twenty-fifth birthday this society may be congratulated on having passed its period of greatest peril and being reasonably certain of reaching a good old age.



But fullness of years is not necessarily an evidence of usefulness, and we must take care that youthful complacency does not make us forget that we have the only charter ever granted to a similar organization by these United States, and that such distinction carries with it unusual responsibilities. We should, therefore, take heed to our conduct, so that the work intrusted to us by congress shall be well and faithfully performed on the broad lines contemplated by our charter. The next twenty-five years must show a record of work accomplished upon ever broadening lines, if we are to uphold the traditions of the old guard who started this work a quarter of a century ago.

I had hoped that we would at this meeting have the encouragement and the prophetic voice of our first president, but instead we are called upon to pay tribute to his memory. I shall leave to others, better equipped, the task of doing honor to those we have lost, but if this society can become imbued with the enthusiasm and the optimism of John Thorpe, no work can be too great for it to undertake with reasonable hope of success. If a knowledge of the things done here can penetrate to the Great Beyond, the thought that his efforts were bearing fruit in a wider usefulness for this society would bring great happiness to the soul of that remarkable man.

A few members of this society have been continuously faithful to it since its organization and have never failed to send their dues to the secretary. It seems eminently fitting that some special recognition should be made of their many years of loyal support, and I suggest

William Murphy.
(Superintendent Trades' Display at the Cincinnati Convention.)

Charles E. Critchell.
(Chairman of the Cincinnati Club's Committee on Bowling at the Convention.)

that their names be carried in the annual report during their lives under the heading of "Pioneers," and that no further annual dues shall be collected from them.

To Increase the Membership.

The present membership of our society does not include more than ten per cent of the commercial men who are owners and operators of some kind of a floral establishment, and this indicates that something has been wrong somewhere. We have either not followed the right method in canvassing for new members, or the conduct of the society has not been such as to interest outsiders and bring them into the fold.

Our membership is especially weak among the retail florists and we have few members in the south or on the Pacific coast. It is well worth while to consider whether there is not some more effectual way of canvassing for new members in those states, and we should try to devise some means of interesting the owners of retail flower stores so that they will find something in our society and at our conventions of especial interest and benefit to them.

There are thousands of these retailers in the country and their most crying need at present is some form of organization whereby they can, with confidence, exchange orders by mail or telegraph. If some such organization could be effected, confining its membership to the members of this society, I believe the retailers would flock to our standard in large numbers.

The members of this society are engaged in so many different lines of work that it is hard to arrange a program which will hold the interest of a large proportion of its members. We claim to hold the door open for the admission of all persons interested in horticulture and to manufacturers of and dealers in horticultural supplies, but, having come in through our open door, many fail to find anything of personal interest within our home and so allow their membership to lapse. The manufacturer or the dealer may join and attend as a matter of policy, but he cannot be expected to take any great personal interest in the life history of the aphis or in the Mendelian theory; nor can the man who devotes his whole place to growing cut flowers be presumed to take a keen interest in landscape gardening.

Convening in Sections.

While our membership is much smaller than it ought to be and than we hope it will be, it is now large enough so that the work of the convention could be successfully divided into sections, as is done in many societies. One section might take up matters of interest to all importers of bulbs and plants; another section, as I have already indicated, might profitably be devoted to the interests of the retailers.

We might have a section devoted to the interests of the private gardeners and ornamental horticulturists, and so justify that portion of our name. If the organizing and conducting of such a section should prove to be of interest to any considerable number of private gardeners and park men, we would get an accession of valuable members from a direction where we have heretofore awakened but little interest.

In pursuance of such a policy, section programs would be prepared of special interest to those engaged in some particular branch of work. These different sections would hold their meetings in different rooms and no one would be obliged to listen to a class of papers that did not interest him; neither would an interesting discussion have to be abridged to prevent its taking the time set down on the program for a topic of a different nature.

A number of the members of this society have been interested in cross-fertilizing. Ten or a dozen men devoted to that class of work could get into a small room and hold a very interesting session. Perhaps a half dozen similar meetings might be in session at one time in different rooms and it would be necessary to devote to them at least one day of the convention, so that on that day no general business session would be held. These sessions, being composed of a much smaller number of men than the large convention, would be much more frank and men too diffident to speak in a large convention would gladly take part in the proceedings. The most valuable points we get at these conventions are often obtained in the informal talks in hotel lobbies or in private rooms, and there are few who fail to pick up something of interest and value on such occasions.

A Retailers' Section.

The retailers' section would receive the reports of the officers of the delivery association and its arbitration committee would adjust controversies. They would discuss the best methods of drawing and holding trade; the best methods of bookkeeping and of collecting accounts; protection against dead beats; claims for commission put forward by mercenary servants; the adoption of uniform charges for the rental of decorative plants; the proper policy to pursue toward churches and societies asking for donations. All these and many other subjects would furnish fruitful topics for discussion. So many and such substantial benefits would be offered that the retailers simply could not afford to stay out. The resultant gathering together of retailers would induce larger and more profitable displays by those concerns who cater to that trade.

These are possible means for strengthening and upbuilding our society among the classes at present included in our membership, and I recommend them to your careful consideration. It is my firm conviction that if some such plan as this had been followed, we would have had a Rose Section, a Carnation Section and a Chrysanthemum Section instead of separate societies, which are doing commendable work but are to some extent depleting our ranks.

We must admit that in the past this society has been conducted as a trade organization, without any pretense of occupying that broader and larger field which includes the flower-loving public. It is not my intention to criticise that attitude, for it may have been the only one which would have carried the society safely through the perils which beset it; but the time has surely come when we should assume that high place in horticultural councils to which our national charter entitles us.

Societies of Amateurs.

The amateur will never find much of interest in a convention of florists and I do not assume that any merging of the two elements into one convention would be acceptable to either, but our interests

should induce us to systematically encourage the organizing of amateur societies, meeting in annual convention on the delegate plan, under the encouragement of the S. A. F., until such time as the amateurs preferred to release the helping hand and walk alone. Our secretary ought to have the time and the means at his disposal so that he could help actively in promoting and organizing such societies. The National Council of Horticulture, which is partly maintained from the treasury of this society, does great good through the publication of articles of a horticultural character intended to meet the needs of amateurs. This same organization could do much to stimulate the growth of such an association of amateur flower growers.

It would be impossible to calculate the increased demand for our products as the result of such an organization, if it could be made to catch the popular fancy. The greatest good resulting from such a movement, however, would be the adorning of places now barren and the stimulating of the love for nature's beauties among the people of this great land of ours.

Countless small societies and clubs are but waiting the heat of enthusiasm to fuse them into a mighty force which shall remove the ugly scars from our landscape and convert thousands of dreary towns into the abiding places of beauty. Shall we be faint-hearted and say this is too much to accomplish, or shall we say that the fulfillment of this noble purpose is both our duty and our rightful prerogative?

I recommend the appointment of a committee with authority to take up this work in a preliminary way and report progress at our next convention.

The business affairs of a society like ours are varied in character, and the proper handling of them calls for energy, experience and good judgment. The man upon whom the chief responsibility rests in these matters is the secretary of the society. In the past you have been exceedingly fortunate in the men who have been selected for this important work and I, therefore, feel perfectly free to express my opinion, since none can consider it as personal criticism.

Method of Chosing the Secretary.

I am firmly of the opinion that the convention of this society should not elect its secretary, but should leave that important duty to be undertaken by the board of directors, who will closely scrutinize the qualifications of such men as seem available and will select the man they think best suited for the position. In the privacy of the board room such matters can be fully discussed, whereas such a discussion on the floor of the convention would be unwise. Large business concerns do not allow their stockholders to elect the active head of the concern, but that important matter is settled in directors' meeting.

Under our present arrangement each convention brings the peril that some popular but incompetent man will be boosted into this office on a temporary wave of enthusiasm. Any man who has held the office of president of this society will gladly testify how much he has been compelled to turn to the secretary for guidance and how completely the welfare of the society is in his keeping.

What I have said concerning the election of secretary applies also, but with less force, to the election of a treasurer. In my judgment the business conduct of the society should be under the control of the board of directors. I, therefore, recommend such a change in our by-laws as will provide for the convention electing two directors each year for a term of three years, instead of their appointment by the president as at present, and for the election of the secretary and treasurer by the board of directors, subject to removal at their discretion.

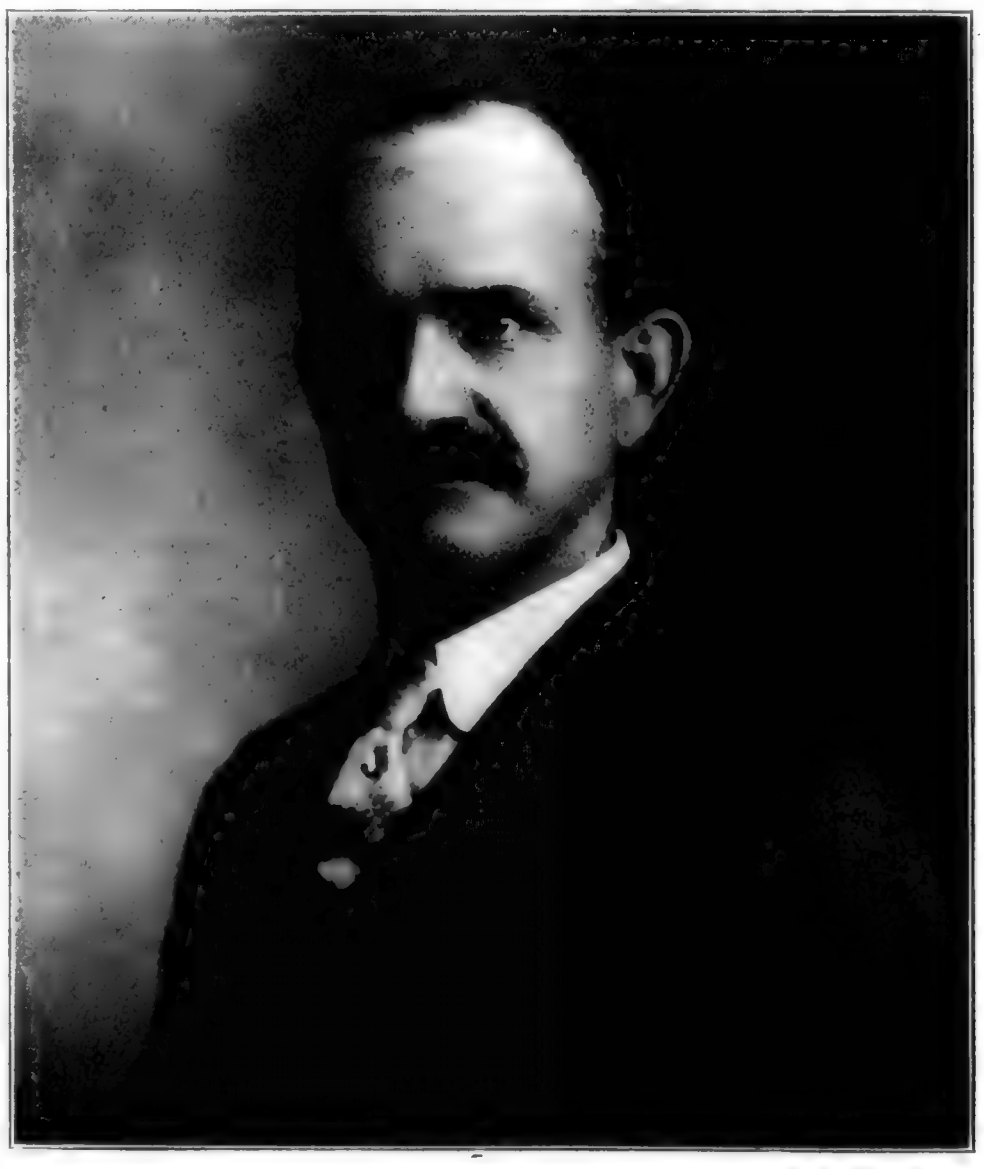
The Secretary's Entire Time.

If our society is to expand its field of usefulness or properly cultivate the field it now occupies, it must be able to secure the entire time of a capable man as secretary. The year would be all too short in which to do the many helpful things such a man would find to do in visiting and encouraging local clubs, both professional and amateur. In addressing meetings in villages where it was desired to awaken an interest in horticulture, our present secretary has been able to do some good for the cause, but under our present plan the time devoted to such things must be taken at the expense of private interests.

It is the conscientious conception of the work that a secretary ought to do which has forced our present efficient officer to decide that he must not continue in the work, in justice to his own interests and the interests of his business associates.

The undertaking of ambitious projects with hope of success necessitates expenditures. This society ought to be in a position to spend money for the things which would ultimately profit its members and promote the objects for which it is conducted. At present our income is too limited to permit of anything but the most necessary expenditures.

It is lamentable that a society of a thousand florists banded together cannot collectively spend money for desirable ends when it has hundreds of men within its ranks who would not hesitate to individually incur the expense in their own interest. Whether some means cannot successfully be devised for largely increasing the funds at the disposal of the society is a subject which should have the careful attention of an energetic and able committee.



The most important incident since our last convention was the national flower show, held under the auspices of this and kindred societies in Chicago last November. What was accomplished will be reported to you at this meeting by the chairman of the executive committee.

Another committee has been appointed to take up the matter of a similar show in some eastern city and will also report to you at this meeting.

It is encouraging to know that the Chicago show was held with profit to the guarantors and to this society, for that fact alone makes the success of future shows more probable.

A Suggestion as to Imports.

Many articles, notably azaleas, bulbs and palms, are imported into this country in immense numbers and the impression is general that a large part of these importations might be profitably grown in the United States. In order to judge as to the merit of such an enterprise, the fullest and most detailed knowledge of foreign methods is desirable. It seems likely that if this society made application to the Secretary of Agriculture, that official would order an investigation and would secure and furnish to us all the

Gustave Adrian.
(Chairman of the Cincinnati Club's Committee on S. A. F. Transportation.)

Charles E. Critchell.
(Chairman of the Cincinnati Club's Committee on Bowling at the Convention.)

that their names be carried in the annual report during their lives under the heading of "Pioneers," and that no further annual dues shall be collected from them.

To Increase the Membership.

The present membership of our society does not include more than ten per cent of the commercial men who are owners and operators of some kind of a floral establishment, and this indicates that something has been wrong somewhere. We have either not followed the right method in canvassing for new members, or the conduct of the society has not been such as to interest outsiders and bring them into the fold.

Our membership is especially weak among the retail florists and we have few members in the south or on the Pacific coast. It is well worth while to consider whether there is not some more effectual way of canvassing for new members in those states, and we should try to devise some means of interesting the owners of retail flower stores so that they will find something in our society and at our conventions of especial interest and benefit to them.

There are thousands of these retailers in the country and their most crying need at present is some form of organization whereby they can, with confidence, exchange orders by mail or telegraph. If some such organization could be effected, confining its membership to the members of this society, I believe the retailers would flock to our standard in large numbers.

The members of this society are engaged in so many different lines of work that it is hard to arrange a program which will hold the interest of a large proportion of its members. We claim to hold the door open for the admission of all persons interested in horticulture and to manufacturers of and dealers in horticultural supplies, but, having come in through our open door, many fail to find anything of personal interest within our home and so allow their membership to lapse. The manufacturer or the dealer may join and attend as a matter of policy, but he cannot be expected to take any great personal interest in the life history of the aphis or in the Mendelian theory; nor can the man who devotes his whole place to growing cut flowers be presumed to take a keen interest in landscape gardening.

Convening in Sections.

While our membership is much smaller than it ought to be and than we hope it will be, it is now large enough so that the work of the convention could be successfully divided into sections, as is done in many societies. One section might take up matters of interest to all importers of bulbs and plants; another section, as I have already indicated, might profitably be devoted to the interests of the retailers.

We might have a section devoted to the interests of the private gardeners and ornamental horticulturists, and so justify that portion of our name. If the organizing and conducting of such a section should prove to be of interest to any considerable number of private gardeners and park men, we would get an accession of valuable members from a direction where we have heretofore awakened but little interest.

In pursuance of such a policy, section programs would be prepared of special interest to those engaged in some particular branch of work. These different sections would hold their meetings in different rooms and no one would be obliged to listen to a class of papers that did not interest him; neither would an interesting discussion have to be abridged to prevent its taking the time set down on the program for a topic of a different nature.

A number of the members of this society have been interested in cross-fertilizing. Ten or a dozen men devoted to that class of work could get into a small room and hold a very interesting session. Perhaps a half dozen similar meetings might be in session at one time in different rooms and it would be necessary to devote to them at least one day of the convention, so that on that day no general business session would be held. These sessions, being composed of a much smaller number of men than the large convention, would be much more frank and men too diffident to speak in a large convention would gladly take part in the proceedings. The most valuable points we get at these conventions are often obtained in the informal talks in hotel lobbies or in private rooms, and there are few who fail to pick up something of interest and value on such occasions.

A Retailers' Section.

The retailers' section would receive the reports of the officers of the delivery association and its arbitration committee would adjust controversies. They would discuss the best methods of drawing and holding trade; the best methods of bookkeeping and of collecting accounts; protection against dead beats; claims for commission put forward by mercenary servants; the adoption of uniform charges for the rental of decorative plants; the proper policy to pursue toward churches and societies asking for donations. All these and many other subjects would furnish fruitful topics for discussion. So many and such substantial benefits would be offered that the retailers simply could not afford to stay out. The resultant gathering together of retailers would induce larger and more profitable displays by those concerns who cater to that trade.

These are possible means for strengthening and upbuilding our society among the classes at present included in our membership, and I recommend them to your careful consideration. It is my firm conviction that if some such plan as this had been followed, we would have had a Rose Section, a Carnation Section and a Chrysanthemum Section instead of separate societies, which are doing commendable work but are to some extent depleting our ranks.

We must admit that in the past this society has been conducted as a trade organization, without any pretense of occupying that broader and larger field which includes the flower-loving public. It is not my intention to criticise that attitude, for it may have been the only one which would have carried the society safely through the perils which beset it; but the time has surely come when we should assume that high place in horticultural councils to which our national charter entitles us.

Societies of Amateurs.

The amateur will never find much of interest in a convention of florists and I do not assume that any merging of the two elements into one convention would be acceptable to either, but our interests

ould induce us to systematically encourage the organizing of amateur societies, meeting in annual convention on the elegate plan, under the encouragement f the S. A. F., until such time as the mateurs preferred to release the helping nd and walk alone. Our secretary ght to have the time and the means his disposal so that he could help actively in promoting and organizing such cieties. The National Council of Horculture, which is partly maintained from e treasury of this society, does great ood through the publication of articles a horticultural character intended to eet the needs of amateurs. This same rganization could do much to stimulate e growth of such an association of amaeur flower growers.

It would be impossible to calculate the ncreased demand for our products as e result of such an organization, if it ould be made to catch the popular fancy. The greatest good resulting from such a ovement, however, would be the adorning of places now barren and the stimuating of the love for nature's beauties mong the people of this great land of urs.

Countless small societies and clubs are ut waiting the heat of enthusiasm to use them into a mighty force which shall remove the ugly scars from our landscape and convert thousands of dreary owns into the abiding places of beauty. Shall we be faint-hearted and say this is oo much to accomplish, or shall we say hat the fulfillment of this noble purpose s both our duty and our rightful prerogative?

I recommend the appointment of a committee with authority to take up this work in a preliminary way and report progress at our next convention.

The business affairs of a society like urs are varied in character, and the proper handling of them calls for energy, experience and good judgment. The man upon whom the chief responsibility ests in these matters is the secretary f the society. In the past you have been exceedingly fortunate in the men who have been selected for this important work and I, therefore, feel perfectly free to express my opinion, since none an consider it as personal criticism.

Method of Chosing the Secretary.

I am firmly of the opinion that the convention of this society should not elect its secretary, but should leave that important duty to be undertaken by the board of directors, who will closely scrutinize the qualifications of such men as seem available and will select the man they think best suited for the position. In the privacy of the board room such matters can be fully discussed, whereas such a discussion on the floor of the convention would be unwise. Large business concerns do not allow their stockholders to elect the active head of the concern, but that important matter is settled in directors' meeting.

Under our present arrangement each convention brings the peril that some popular but incompetent man will be hoisted into this office on a temporary wave of enthusiasm. Any man who has held the office of president of this society will gladly testify how much he has been compelled to turn to the secretary for guidance and how completely the welfare of the society is in his keeping.

What I have said concerning the election of secretary applies also, but with less force, to the election of a treasurer. In my judgment the business conduct of the society should be under the control of the board of directors. I, therefore, recommend such a change in our by laws as will provide for the convention electing two directors each year for a term of three years, instead of their appointment by the president as at present, and for the election of the secretary and treasurer by the board of directors, subject to removal at their discretion.

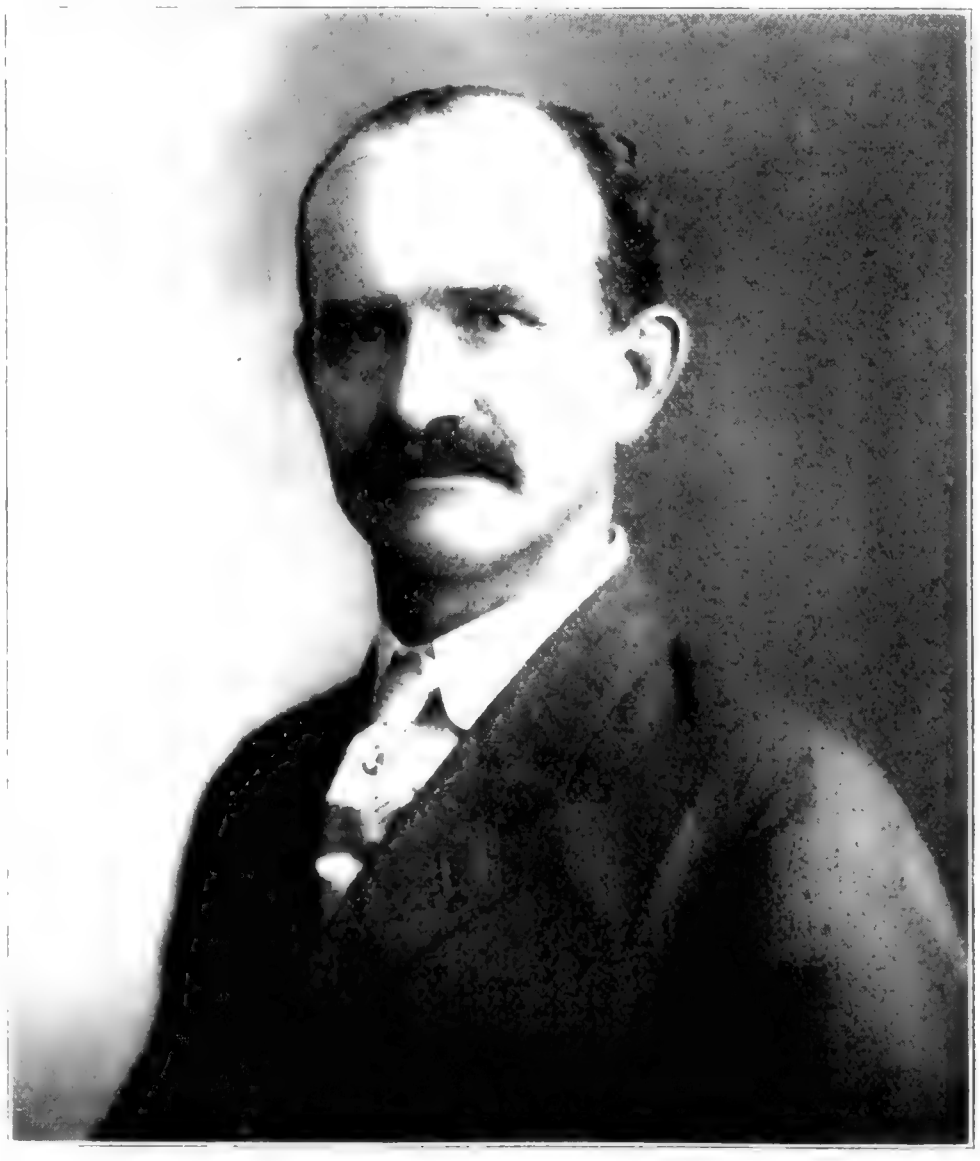
The Secretary's Entire Time.

If our society is to expand its field of usefulness or properly cultivate the field it now occupies, it must be able to secure the entire time of a capable man as secretary. The year would be all too short in which to do the many helpful things such a man would find to do in visiting and encouraging local clubs, both professional and amateur. In addressing meetings in villages where it was desired to awaken an interest in horticulture, our present secretary has been able to do some good for the cause, but under our present plan the time devoted to such things must be taken at the expense of private interests.

It is the conscientious conception of the work that a secretary ought to do which has forced our present efficient officer to decide that he must not continue in the work, in justice to his own interests and the interests of his business associates.

The undertaking of ambitious projects with hope of success necessitates expenditures. This society ought to be in a position to spend money for the things which would ultimately profit its members and promote the objects for which it is conducted. At present our income is too limited to permit of anything but the most necessary expenditures.

It is lamentable that a society of a thousand florists banded together cannot collectively spend money for desirable ends when it has hundreds of men within its ranks who would not hesitate to individually incur the expense in their own interest. Whether some means cannot successfully be devised for largely increasing the funds at the disposal of the society is a subject which should have the careful attention of an energetic and able committee.



The most important incident since our last convention was the national flower show, held under the auspices of this and kindred societies in Chicago last November. What was accomplished will be reported to you at this meeting by the chairman of the executive committee.

Another committee has been appointed to take up the matter of a similar show in some eastern city and will also report to you at this meeting.

It is encouraging to know that the Chicago show was held with profit to the guarantors and to this society, for that fact alone makes the success of future shows more probable.

A Suggestion as to Imports.

Many articles, notably azaleas, bulbs and palms, are imported into this country in immense numbers and the impression is general that a large part of these importations might be profitably grown in the United States. In order to judge as to the merit of such an enterprise, the fullest and most detailed knowledge of foreign methods is desirable. It seems likely that if this society made application to the Secretary of Agriculture, that official would order an investigation and would secure and furnish to us all the

Albert McCullough.
(Chairman Committee on President's Reception, S. A. F. Convention.)

data obtainable. I recommend that our secretary be instructed to ask for this information in the name of this society.

The work of committees is often made harder because it is the custom to make them consist of three or more members, and to have the members hail from different sections. My judgment is that for many purposes only one man should be appointed on a committee, except such committees as are expected to do their work during the time of the convention. Have it thoroughly understood that the committeeman can temporarily call to his assistance any other member or number of members, but that wherever he goes he is the committee and does not need to await the action of any other member.

The secretary of the society and the president ought to be kept advised of the progress being made by all committees. When it can be done without interference with the work of the committee, such progress should be reported to the trade press by the secretary.

The florists of Illinois have succeeded in getting substantial recognition from the legislature, with an appropriation that permits the maintenance of a florists' department of the State Experiment Station. A like result could doubtless be obtained in other states if the florists there worked for it as energetically as did the florists of Illinois. Our retiring secretary, Mr. Rudd, has taken a keen personal interest in this movement, and I suggest that if he were made a committee of one to follow up this work, the trade at large might be induced to pull together for greater recognition of their needs and their strength, with great resulting benefits to florists generally.

Sports at Conventions.

The matter of sports at our conventions has been referred to by many of my predecessors. I am firmly of the opinion that any clean, healthful sport is a good thing for any man who gives the most of his time to work. Bowling and shooting contests have enough of an attraction so that they often turn the scale and bring to the convention some men who otherwise would not attend. Local bowling clubs do much to bring the florists of a community together and, in the enjoyment of contests of skill, petty quarrels are forgotten, so that a friendly feeling generally exists among those attending.

The time has gone by, if it ever was, when a man must be a rowdy in order to enjoy or participate in a trial of physical skill. These matters must be kept in their proper place and not be allowed to interfere with or overshadow the convention itself, but, as at present conducted, I look upon them as both useful and desirable.

There is much in this address which is not new, but has been urged by my predecessors. I offer no apology for again pressing these things upon you, but if you will take the time to review our annual reports you will find many useful suggestions that have been brought forward by other presidents and which would make this address too long if I were to review them here.

Before closing I wish to assure the members of this society that not myself alone, but the florists of Colorado also, keenly appreciate the recognition you have given them by the selection of one of their number to preside over this convention. At the close of our last convention, Colorado had seven names enrolled as members of the society and seldom more than one or two have been in attendance at the convention. At the present time Colorado has over forty members enrolled and many are here today.

That her thanks have taken this substantial form is largely due to the untiring energy of N. A. Benson, state vice-president.

SECRETARY'S REPORT.

[The following is the report of Secretary W. N. Rudd, read before the Society of American Florists, in convention at Cincinnati, August 17 to 20, 1909.]

Starting out with bad conditions and dismal prospects financially, greatly increased general interest in the society since January 1, and the consequent large accessions of new members and reinstatement of old ones in default, have converted what looked almost sure to be a year of stationary or backward conditions into a decidedly successful one.

From the financial point of view, the convention at Niagara Falls was a decided failure. Many causes led to this. Of course, the general business depression through which we had passed had a strong effect, and it is doubtful whether a very successful convention could have been held last year at any place. The writer believes, however, that it is a serious mistake to hold conventions of this society in any location where there are not large trade interests. In the first place, we lose the enthusiastic work of a good, strong body of local florists. The difference between conditions in this respect at Niagara Falls and what they are here, will, I am sure, be noticed by every member who attended both conventions. In addition to that loss, which is so great that it can hardly be overestimated, there was the lack of drawing power to our members. The bulk of the florists in this country are not wealthy men, but they are shrewd, prudent business men, and the trip to the convention for them must be shown advantageous to the highest degree in a business way; and unless they can have added to the pleasures and the advantages of the convention proper, a chance to examine and inspect greenhouse establishments, successful retail flower shops, wholesale establishments and other like supplementary things which they all consider of great value to them in a business way, many will not feel justified in giving the time and going to the expense of a trip to the convention. In short, many of our members do not care enough for scenery to pay much money for it, and it seems to your secretary that never again, unless conditions are exceptional, should this society go to outlying cities like Niagara Falls or Asheville. At Niagara Falls we only received fifty new members, while the writer will be disappointed if we do not add 250 to our membership roll at this place. Fortunately, the national flower show was an event which attracted great interest (in fact, I think by it we lost the attendance of a good many people at the Niagara Falls convention), and we were, during the progress of the show, enabled to take in nearly as many new members as at Niagara Falls.

Investment of the Permanent Fund.

The financial statements attached to this report, as well as the treasurer's report, will show a gratifying increase in the general fund and an unusually good increase in the permanent fund. The custom of adding all interest received on both funds to the permanent fund has been continued, and the latter fund has now reached so large an amount that the interest on it is quite an item. Steps are being taken to make permanent investments of this fund, which will secure larger interest returns than are obtained at present. Starting out twenty-five years ago with no pattern to follow, except foreign horticultural societies, which were organized to fit different conditions, our society has had to try many experiments and abandon many of them. We are now just beginning to get our bearings and to see clearly the work which lies before us.

Personally the writer believes that we shall never really and truly come to our own, except through the nursing into a rapid growth of our permanent fund. The society will never be what it should be and can never accomplish what it should accomplish for the floricultural interests, until it has a permanent home of its own, with ample glass structures for the testing of new varieties and for the growing and maintaining in the best condition of a large and representative collection of subjects adaptable to American conditions. This is going to take an enormous amount of money, and we must not be impatient and attempt to start this sort of work until the funds at our disposal are sufficient to make a reasonably good beginning. At that time the writer hopes that the strength and influence of the society will be so great that the national government can be induced to assist directly in the work.

Sources of Revenue.

There are three sources, aside from government assistance, to which we can look for strengthening our permanent fund. First, of course, in fact the only one which has up to date been of much effect, has been the life memberships and the compounding of the interest, which has been steadily going on.

Second is the trade exhibition, which has grand possibilities, but which we seem to have largely overlooked heretofore. The present method of taking the entire trade exhibition matter directly into the hands of the society itself, is a move in the right direction, and I believe will show excellent results this year. The charges for space have been experimentally fixed very low. The writer is convinced that they are altogether too low and that, unlike the tariff, they should be revised upward. Careful handling of this matter, your secretary is convinced, will shortly produce an income greater than your entire present revenue, both general fund and permanent.

The third source of income is one that has never been exploited, so far as I know; namely, bequests and donations. In the twenty-five years of the existence of our society no money has been left to it by will and no gift has been made which could be added to the permanent fund and which would in any way assist us to arrive at the permanent home. It seems to your secretary that we have been sadly neglectful in this respect, and that a proper placing before our members of the vast good to be accomplished by such bequests would soon produce results.

Getting and Keeping Members.

Of course, we must continue to use every effort to increase our membership in the way of annual members, because our ability to carry on our present work depends largely on the income from that source. However, too much stress has been placed on the getting of new members, or, perhaps, it would be better to say that not enough stress has been placed on the necessity of keeping the members we have. We must at all times carefully consider and carry out every possible means of retaining the interest of the members we already have. The man who deliberately sends in his application in the middle of the year because a study of the conditions has led him to believe that membership in the society will be valuable to him, is a continuing source of gain, because he will stick, if the handling of the society work is such as not to disappoint him in his expectations. The man who joins under the excitement of the convention, or through the strong solicitation in a personal way of officers or members, is often worth just $5 and no more. His interest is only a fleeting one, and if he does not attend the next convention he fails to renew his membership and drops out.

In the past we have been neglectful in the matter of getting into close and continuous touch with our individual members; we have not shown them that this is their society, and that the whole strength of the society is at their disposal at all times, to every reasonable degree. They should be encouraged to submit their problems to the secretary and should be led to expect, and should be given, prompt help. Many of the inquiries coming in relating to the difficulties of our members, especially the ones just starting in business, can be readily attended to by the secretary, while for those questions of a more serious nature we have hundreds of able men in the society who will, I am sure, be glad to help solve the problems of their brother members.

The Experiment Stations.

The writer has for many years been much interested in the matter of experiment station work, and has believed that the florists were not getting their dues, largely because they failed to appreciate the importance of the work and to ask for what they wanted. The work of the experiment stations, in comparatively a few years, has revolutionized farming, dairying, live stock breeding and fruit culture. It has done nothing for us, comparatively speaking. The work at Illinois, being a combination of the best scientific skill with the close scrutiny and advice of members of the trade, is going to be of enormous value, and the writer believes that the same conditions can be brought about in nearly every state in the Union.

In order to lay before you the facts, your secretary some time since took up correspondence with the experiment stations in the country, hoping to be able to tabulate the facilities at the various stations and the work they were doing, and to urge upon you an active campaign for securing better things. Unfortunately, the correspondence has dragged out and the information has come in so slowly that the data cannot be given to you at this time. I hope to complete it, however, and ask your permission to publish it in the forthcoming volume. The results will be so dis-

appointing to everyone that I hope it will arouse us all to the necessity of promoting an organization in each state to secure better things, and also to appoint a central committee of the society to advise with and to aid the different state organizations.

Medals.

Medals have been delivered during the last year as follows:

Silver medal—Henry A. Dreer, Inc., for Nephrolepis Scholzeli, offered through the St. Louis Horticultural Society and awarded at its annual exhibition, November, 1908.

National Flower Show Medals.

The medals listed below were awarded at the National Flower Show, Chicago, November, 1908:

Silver gilt medals—Elmer D. Smith & Co., for display of cut chrysanthemums; Julius Roehrs Co., three heliconias; Halfdan Skjoldager, private gardener winning most premiums.

Silver medals—Thomas Proctor, private gardener winning second number premiums; W. A. Manda, four medals, for collection of orchid cut blooms, Kentia Mandaiana, Dracaena Black Beauty, improved, and Polypodium Mandaianum; E. Oechslin, collection of greenhouse plants; Vaughan's Seed Store, educational exhibit of outdoor planting; Martin A. Ryerson, one chrysanthemum plant; W. J. Smyth, vase of roses; M. Calvat, seedling chrysanthemums; Harry Turner, Celosia Pride of Castle Gould; C. H. Totty, sweepstakes, best of six blooms chrysanthemums.

Bronze medals—W. A. Manda, for Manda's Golden Privet; Henry Eichholz, Carnation Alvina; J. A. Peterson, Begonia Agatha; E. G. Uihlein, two medals, for one cattleya and for one orchid plant; John Reardon, private gardener winning third number premiums; Thomas Roland, cyclamen plants; J. J. Mitchell, best flowering plant.

Carnation Medals.

The following were offered through the American Carnation Society and awarded at their annual meeting in Indianapolis, January, 1909:

Silver medal—F. Dorner & Sons Co., for Carnation Hoosier Lad.

Bronze medal—A. C. Brown, for Carnation Superba.

Various Awards.

The following awards were made at the National Flower Show, Chicago, November, 1908:

Certificates of Merit.

W. A. Manda, three certificates, for Dracaena Mandaiana, Anthurium Cuttingianum and Yucca Menandii.

F. R. Pierson Co., two certificates, for Nephrolepis elegantissima compacta and Nephrolepis superbissima.

Julius Roehrs Co., Croton Fred Sander.

The Lincoln park commissioners, group of greenhouse plants.

Henry A. Dreer, Inc., Nephrolepis Scholzeli.

The South park commissioners, group of greenhouse plants.

W. N. Rudd, Carnation Mrs. J. C. Vaughan.

F. Dorner & Sons Co., Carnation Pink Delight.

Honorable Mention.

Adam Wolniewicz, group of greenhouse plants.

Plant Registration.

New plant names have been registered since last report as follows:

No. 398—August 15, 1908. Rose, American Pillar, by the Conard & Jones Co., West Grove, Pa.

No. 399—August 15, 1908. Canna, Gladioflora, by the Conard & Jones Co.

No. 400—August 15, 1908. Canna, Minnehaha, by the Conard & Jones Co.

No. 401—August 15, 1908. Canna, Rosea Gigantea, by the Conard & Jones Co.

No. 402—December 1, 1908. Chrysanthemum, President Taft, by Elmer D. Smith & Co., Adrian, Mich.

No. 403—December 23, 1908. Canna, Wawa, by the Conard & Jones Co.

No. 404—December 23, 1908. Canna, Mont Blanc Improved, by the Conard & Jones Co.

No. 405—December 23, 1908. Rose, Climbing Mosella, by the Conard & Jones Co.

No. 406—January 25, 1909. Cypripedium, Ursula, by Alfred J. Loveless, Lenox, Mass.

No. 407—February 5, 1909. Cattleya, Oakland, by Charles G. Roebling, Trenton, N. J.

No.408—February 5, 1909. Lælio-Cattleya, Magenta, by Charles G. Roebling, Trenton, N. J.

No. 409—February 27, 1909. Carnation, Edward, by W. H. Shumway, Berlin, Conn.

No. 410—March 19, 1909. Clematis paniculata rubra, by the Jackson & Perkins Co., Newark, N. Y.

No. 411—April 2, 1909. Begonia, President Taft, by J. A. Peterson, Westwood, Cincinnati, O.

No. 412—April 23, 1909. Hydrangea cinerea sterilis, by E. Y. Teas, Centerville, Ind.

No. 413—July 16, 1909. Rose, Climbing American Beauty, by Hoopes Bro. & Thomas Co., West Chester, Pa.

Members Lost By Death.

Since the last report the following members have died:

1909.

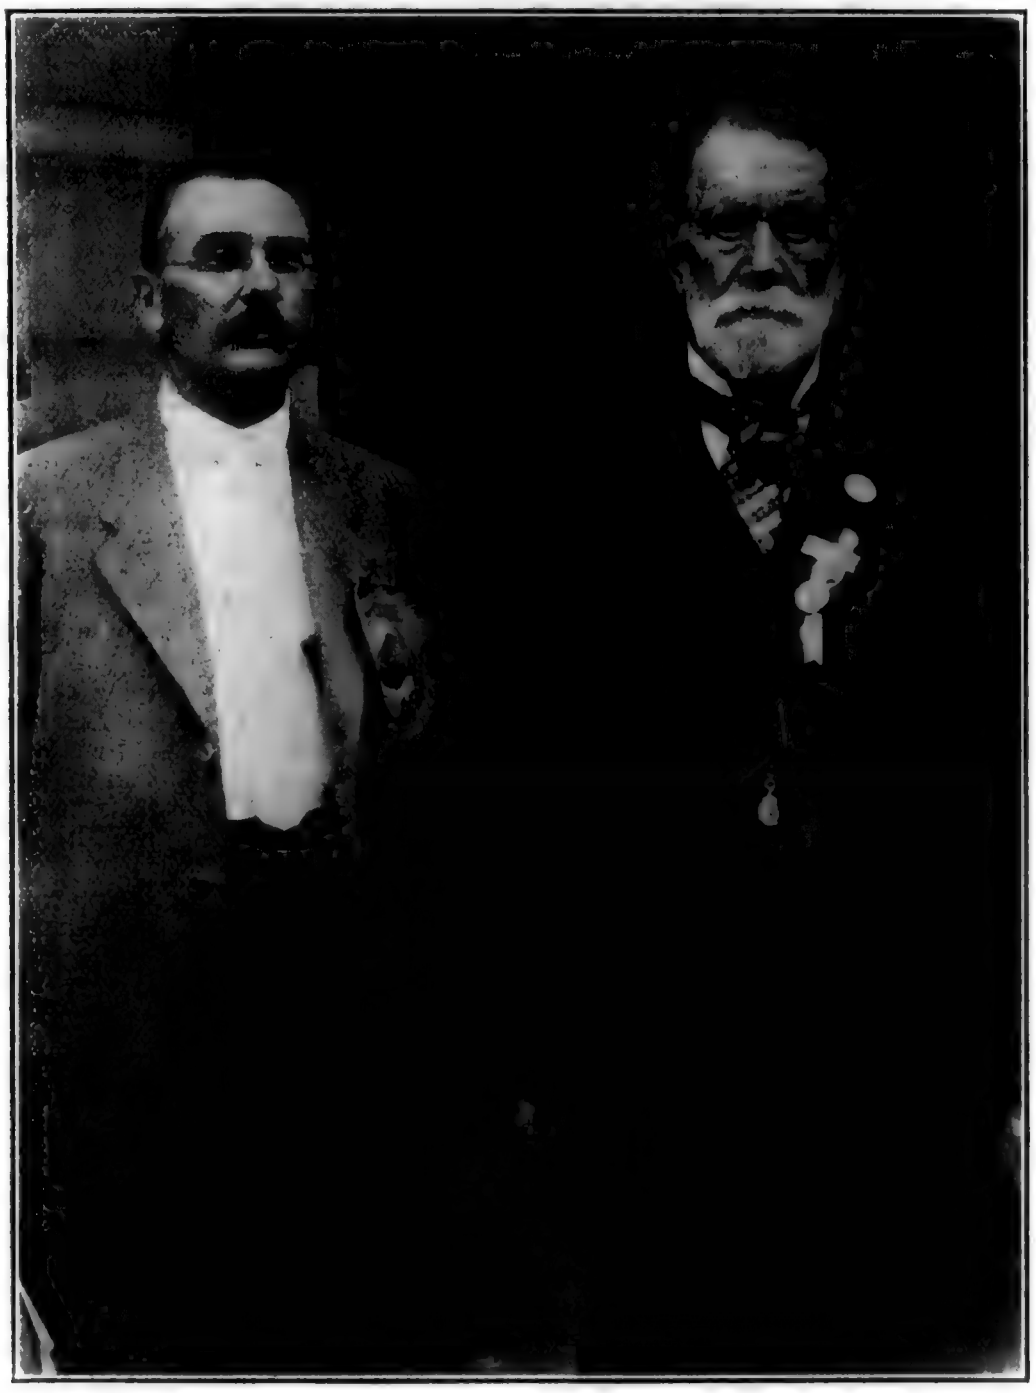
February 6, W. C. Krick, Brooklyn; March 2, E. V. Hallock, life member, Queens, N. Y.; April 3, William Hagemann, New York; April 19, John Scott, Brooklyn; May 28, John E. Andre, Doylestown, Pa.; July 9, Herbert Heller, New Castle, Ind.

Death of John Thorpe.

On July 1, 1909, occurred the death of John Thorpe, the first president of this society.

Membership Statement July 31, 1909.

Total annual members as per last report, November 20, 1908	720	
Reinstated	19	
New members	71	
	810	
Deceased	5	
Total annual members enrolled		805
Total life members as per last report, November 20, 1908	179	
New life members	17	
	196	
Deceased	1	
Total life members enrolled		195
		1,000
Gain in life membership since July 31, 1908	25	
Gain in annual membership since July 31, 1908	56	
Total gain		81



Note—Since August 1 and up to August 12 we have received eight new life members and twenty-four annual members. Last year we had nine annual and one life, making the net increase, August 11, 103 members.

Transportation.

Every effort was made to secure reduced railroad rates, but without success. The various traffic associations seem to have generally adopted the policy of refusing reduced rates, except where there is a guaranteed attendance of 1,000 or more. The writer thinks this policy is a part of the general campaign against the two-cents-per-mile legislation. Anyway, we did not get the rates.

State Vice-presidents.

The state vice-presidents have, during the last year, been very active in the interests of the society, and have done much good work. The complaint which your secretary was compelled to make last year regarding the laxness among them and failure even to pay their own dues on the part of a few, does not hold this year, and a large part of the advance shown is due to their good work.

President J. A. Valentine. Ex-president Wm. R. Smith.

Presidents Present and Past, Photographed at Cincinnati, August 17.

Trade Press.

The trade press have continued their cordial support of the society as in the past.

In closing this, the last report of this kind which the writer will ever make to you, I wish to tender my most heartfelt thanks to all the friends who have, by advice and assistance freely given and by kind words so often spoken, lightened the task and made the work a constant pleasure.

I cannot make you know how much enjoyment there has been to me in getting back into the harness and being actively identified again with all of you good, kind hearts and this great organization of ours. It is with regret that I step out. I assure you that I will set your house in order and will turn over to my successor in good and perfect condition all of your books and records and other property now in my hands. I shall aid him in the exacting task before him to the best of my ability, and beg to assure the society that I shall always stand ready to accept any tasks they may give me to do and shall always remain a true and loyal member, ready to support the best interests of the society and equally ready to fight against any unwise moves.

Secretary's Financial Statement.

For Year Ending December 31, 1908.

Receipts.	
Dues	$1,923.00
New members	760.00
Life membership fees	640.00
P. J. Hauswirth estate (includes $515.45 contra account)	2,270.00
Exchange	.20
1907 Trade exhibition	107.40
1908 Trade exhibition	476.34
Refund Interstate Commerce Hearing	50.00
Total	$6,226.94
Less P. J. Hauswirth account (1907) settled by contra account on order of Board of Directors	$ 515.94
Balance	$5,711.49
Payments.	
To H. B. Beatty, treasurer	$5,711.49

The secretary also presented a carefully tabulated comparative statement of income and expenditures for the years 1907 and 1908. It showed the cash on hand in the general fund January 1, 1909, to be $3,813.07, against $3,001.69 January 1, 1908, and $3,279.99 January 1, 1907; and in the permanent fund $6,186.93 January 1, 1909, $4,718.52 January 1, 1908, and $4,287.70 January 1, 1907.

January 1, 1909, to August 1, 1909.

Receipts General Fund.

Dues	$1,407.00
New members	355.00
Bal. Trade Exhibition, 1908	63.36
Miscellaneous	1.25
	$1,826.61

Receipts Permanent Fund.

Life memberships	425.00
Total	$2,251.61
Paid to treasurer	$2,251.61

Considering current receipts only, the above is a gain of fourteen per cent over the corresponding period last year.

Note—Since the above report was written—that is, up to and including August 11—there has been about $1,000 more collected, including $483.17, this society's share of the proceeds of the national flower show.

The secretary also gave a statement of the warrants drawn on the treasurer, January 1 to July 31, 1909, totaling $2,401.09, including $530 hall rent, and said:

It should be noted that the item of hall rent is one that has never appeared in the treasurer's account before. Under the new system lately adopted, exhibition bills are paid by the treasurer and receipts are turned over to the society, so that this item will take care of itself later on.

Deducting the hall rent makes the expenditures for the period in question $1,871.08, about $50 more than the collections for that period. However, the heavy collections for the first few days in August will bring the balance of the general fund receipts much in excess of the payments made, and we have to add to this balance the collections being made here at the convention, which will undoubtedly be very heavy, and also the proceeds from the trade exhibition, which will apparently greatly exceed those of any previous exhibition by reason of the large amount of space sold and the economical management. It seems certain that we will close the present fiscal year with a substantial increase in the amount of our general fund and also a heavy increase in the permanent fund.

TREASURER'S REPORT.

Treasurer H. B. Beatty made the following report of the financial transactions of the S. A. F. in 1908, at the Cincinnati convention:

General Fund.

Jan. 1, 1908, balance		$3,001.69
Receipts.		
Receipts from dues for the year 1908, 879@$3.00	$2,637.00	
Receipts from dues and initiations for the year 1908, 345@$5.00	1,725.00	
Proceeds trade exhibit, Philadelphia	107.40

NEXT NATIONAL FLOWER SHOW.

[The full report of the committee on second national flower show, F. R. Pierson, chairman; F. H. Traendly, J. K. M. L. Farquhar, W. J. Stewart, Edwin Lonsdale, Robert Craig.]

The committee appointed by President Valentine to consider the time and place for holding the next national flower show has canvassed the matter thoroughly. The understanding of the committee was that it was generally understood that the next national flower show should be held in the east. This being so, the committee assume that it was left to them to determine in what eastern city the show should be held, although it might be questioned whether the financial outcome from such an enterprise in an eastern city would be as great as in Chicago.

In the selection of possible cities, the choice was finally limited to New York, Boston and Philadelphia. Many thought that the show should be held in New York, and it would have given the members of the committee from New York great pleasure to have selected New York; but, unfortunately, the only building in New York large enough and suitable for the purpose, Madison Square Garden, is engaged at the only time in the spring when it is feasible to hold a spring flower show—the end of March or beginning of April—this building having been engaged for years at this time of the year. The committee could have obtained a splendid building in New York city—the Museum of Natural History—in which the American Rose Society will hold its next exhibition. This is one of the finest buildings in the city of New York, in fact, in the country, but as this building belongs to the city, it would be impossible to charge an admission fee, and without such revenue it would be impossible to provide for a premium list or to defray other expenses incident to a flower show. Therefore, this building could not be considered, although it was available. The committee then went into the question of erecting a temporary building for the purpose. This was discussed at length, but the erection of a building was not thought practicable, because it would have to be heated, at the time of the year when the flower show is

appointing to everyone that I hope it will arouse us all to the necessity of promoting an organization in each state to secure better things, and also to appoint a central committee of the society to advise with and to aid the different state organizations.

Medals.

Medals have been delivered during the last year as follows:

Silver medal Henry A. Dreer, Inc., for Nephrolepis Scholzeli, offered through the St. Louis Horticultural Society and awarded at its annual exhibition, November, 1908.

National Flower Show Medals.

The medals listed below were awarded at the National Flower Show, Chicago, November, 1908:

Silver gilt medals—Elmer D. Smith & Co., for display of cut chrysanthemums; Julius Roehrs Co., three heliconias; Halfdan Skjoldager, private gardener winning most premiums.

Silver medals Thomas Proctor, private gardener winning second number premiums; W. A. Manda, ten; medals, for collection of orchid cut blooms, Kentia Mandaiana, Dracaena Black Beauty, improved and Polypodium Mandaianum; E. Oechslin, collection of greenhouse plants; Vaughan's Seed Store, educational exhibit of outdoor planting; Martin A. Ryerson, one chrysanthemum plant; W. J. Smyth, vase of roses; M. Calvat, seedling chrysanthemums; Harry Turner, Celosia Pride of Castle Gould; C. H. Totty, sweepstakes, best of six blooms chrysanthemums.

Bronze medals W. A. Manda, for Manda's Golden Privet; Henry Eichholz, Carnation Alsona; J. A. Peterson, Begonia Agatha; E. G. Hihlein, two medals, for one cattleya and for one orchid plant; John Reardon, private gardener winning third number premiums; Thomas Roland, cyclamen plants; J. J. Mitchell, best flowering plant.

Carnation Medals.

The following were offered through the American Carnation Society and awarded at their annual meeting in Indianapolis, January, 1909:

Silver medal F. Dorner & Sons Co., for Carnation Hoosier Lad.

Bronze medal A. C. Brown, for Carnation Superba.

Various Awards.

The following awards were made at the National Flower Show, Chicago, November, 1908:

Certificates of Merit.

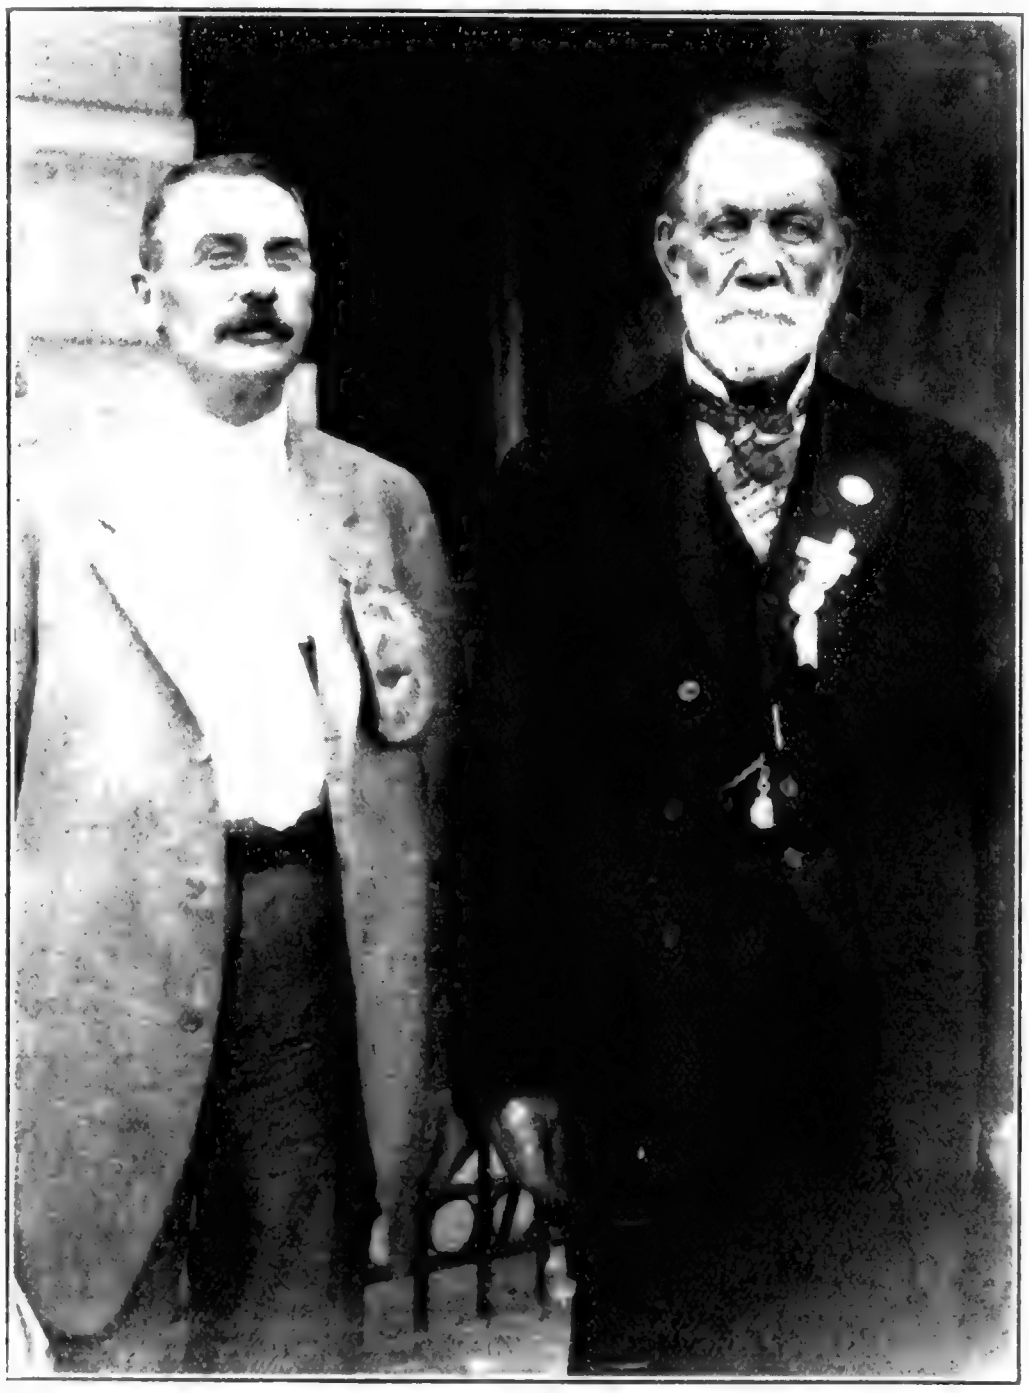
W. A. Manda, three certificates, for Dracaena Mandaiana, Anthurium Cuttingianum and Yucca Menandii.

F. R. Pierson Co., two certificates, for Nephrolepis elegantissima compacta and Nephrolepis superbissima.

Julius Roehrs Co., Croton Fred Sander.

The Lincoln park commissioners, group of greenhouse plants.

Henry A. Dreer, Inc., Nephrolepis Scholzeli.



The South park commissioners, group of greenhouse plants.

W. N. Rudd, Carnation Mrs. J. C. Vaughan.

F. Dorner & Sons Co., Carnation Pink Delight.

Honorable Mention.

Adam Wolniewicz, group of greenhouse plants.

President J. A. Valentine. Ex president Wm R. Smith.

Presidents Present and Past, Photographed at Cincinnati, August 17.

Plant Registration.

New plant names have been registered since last report as follows:

No. 398—August 15, 1908. Rose, American Pillar, by the Conard & Jones Co., West Grove, Pa.

No. 399—August 15, 1908. Canna, Gladioflora, by the Conard & Jones Co.

No. 400—August 15, 1908. Canna, Minnehaha, by the Conard & Jones Co.

No. 401—August 15, 1908. Canna, Rosea Gigantea, by the Conard & Jones Co.

No. 402—December 1, 1908. Chrysanthemum President Taft, by Elmer D. Smith & Co., Adrian, Mich.

No. 403—December 23, 1908. Canna, Wawa, by the Conard & Jones Co.

No. 404—December 23, 1908. Canna, Mont Blanc Improved, by the Conard & Jones Co.

No. 405—December 23, 1908. Rose, Climbing Mosella, by the Conard & Jones Co.

No. 406—January 25, 1909. Cypripedium, Ursula, by Alfred J. Loveless, Lenox, Mass.

No. 407—February 5, 1909. Cattleya, Oakland, by Charles G. Roebling, Trenton N. J.

No. 408—February 5, 1909. Lælio-Cattleya, Magenta, by Charles G. Roebling, Trenton, N. J.

No. 409—February 27, 1909. Carnation, Edward, by W. H. Shumway, Berlin, Conn.

No. 410—March 19, 1909. Clematis paniculata rubra, by the Jackson & Perkins Co., Newark, N. Y.

No. 411—April 2, 1909. Begonia, President Taft, by J. A. Peterson, Westwood, Cincinnati, O.

No. 412—April 23, 1909. Hydrangea cinerea sterilis, by E. Y. Teas, Centerville, Ind.

No. 413—July 16, 1909. Rose, Climbing American Beauty, by Hoopes Bro. & Thomas Co., West Chester, Pa.

Members Lost By Death.

Since the last report the following members have died:

1909.

February 6, W. C. Krick, Brooklyn; March 2, E. V. Hallock, life member, Queens, N. Y.; April 3, William Hagemann, New York; April 19, John Scott, Brooklyn; May 28, John E. Andre, Doylestown, Pa.; July 9, Herbert Heller, New Castle, Ind.

Death of John Thorpe.

On July 1, 1909, occurred the death of John Thorpe, the first president of this society.

Membership Statement July 31, 1909.

New life members	17	
	196	
Deceased	1	
Total life members enrolled		195
		1,000
Gain in life membership since July 31, 1908	25	
Gain in annual membership since July 31, 1908	56	
Total gain		81

Note—Since August 1 and up to August 12 we have received eight new life members and twenty-four annual members. Last year we had nine annual and one life, making the net increase, August 11, 103 members.

Transportation.

Every effort was made to secure reduced railroad rates, but without success. The various traffic associations seem to have generally adopted the policy of refusing reduced rates, except where there is a guaranteed attendance of 1,000 or more. The writer thinks this policy is a part of the general campaign against the two-cents-per-mile legislation. Anyway, we did not get the rates.

State Vice-presidents.

The state vice-presidents have, during the last year, been very active in the interests of the society, and have done much good work. The complaint which your secretary was compelled to make last year regarding the laxness among them and failure even to pay their own dues on the part of a few, does not hold this year, and a large part of the advance shown is due to their good work.

Trade Press.

The trade press have continued their rdial support of the society as in the ast.

In closing this, the last report of this nd which the writer will ever make to n, I wish to tender my most heartfelt anks to all the friends who have, by vice and assistance freely given and kind words so often spoken, lightened e task and made the work a constant easure.

I cannot make you know how much joyment there has been to me in get- ng back into the harness and being tively identified again with all of you od, kind hearts and this great organ- ation of ours. It is with regret that step out. I assure you that I will set ur house in order and will turn over to y successor in good and perfect condi- on all of your books and records and her property now in my hands. I shall d him in the exacting task before him the best of my ability, and beg to as- ure the society that I shall always stand ady to accept any tasks they may give e to do and shall always remain a true nd loyal member, ready to support the est interests of the society and equally ady to fight against any unwise moves.

Secretary's Financial Statement.

For Year Ending December 31, 1908.

Receipts.

ues	$1,923.00
New members	760.00
ife membership fees	640.00
P. J. Hauswirth estate (includes $515.45 contra account)	2,270.00
Exchange	.20
907 Trade exhibition	107.40
908 Trade exhibition	476.34
Refund Interstate Commerce Hearing	50.00
Total	$6,226.94
oss P. J. Hauswirth account (1907) settled by contra account on order of Board of Directors	$ 515.94
Balance	$5,711.49

Payments.

To H. B. Beatty, treasurer	$5,711.49

The secretary also presented a carefully tabulated comparative statement of income and expenditures for the years 1907 and 1908. It showed the cash on hand in the general fund January 1, 1909, to be $3,813.07, against $3,001.69 January 1, 1908, and $3,279.99 January 1, 1907; and in the permanent fund $6,186.93 January 1, 1909, $4,718.52 January 1, 1908, and $4,287.70 January 1, 1907.

January 1, 1909, to August 1, 1909.

Receipts General Fund.

ues	$1,407.00
w members	355.00
t. Trade Exhibition, 1908	63.36
iscellaneous	1.25
	$1,826.61

Receipts Permanent Fund.

fe memberships	425.00
Total	$2,251.61
nd to treasurer	$2,251.61

Considering current receipts only, the above a gain of fourteen per cent over the responding period last year.

Note—Since the above report was written—at is, up to and including August 11—there s been about $1,000 more collected, including 83.17, this society's share of the proceeds of national flower show.

The secretary also gave a statement of e warrants drawn on the treasurer, Jan- y 1 to July 31, 1909, totaling $2,401.09, cluding $530 hall rent, and said:

It should be noted that the item of hall nt is one that has never appeared in the easurer's account before. Under the new sys- m lately adopted, exhibition bills are paid the treasurer and receipts are turned over the society, so that this item will take care itself later on.

Deducting the hall rent makes the expenditures r the period in question $1,871.08, about $50 ore than the collections for that period. How- ver, the heavy collections for the first few ays in August will bring the balance of the eneral fund receipts much in excess of the ayments made, and we have to add to this alance the collections being made here at the onvention, which will undoubtedly be very eavy, and also the proceeds from the trade exhibition, which will apparently greatly exceed those of any previous exhibition by reason of the large amount of space sold and the economical management. It seems certain that we will close the present fiscal year with a substantial increase in the amount of our general fund and also a heavy increase in the permanent fund.

TREASURER'S REPORT.

Treasurer H. B. Beatty made the following report of the financial transactions of the S. A. F. in 1908, at the Cincinnati convention:

General Fund.

Jan. 1, 1908, balance		$3,001.69
Receipts.		
Receipts from dues for the year 1908, 879@$3.00	$2,637.00	
Receipts from dues and initiations for the year 1908, 345@$5.00	1,725.00	
Proceeds trade exhibit, Philadelphia	107.40	
Part of proceeds trade exhibit, Chicago	423.09	
Interest on bank balances	118.38	
Rebate on attorney fees	50.00	
Exchange on checks	.20	
Total receipts		5,061.07
		$8,062.76
Disbursements.		
Secretary's salary	$1,291.65

NEXT NATIONAL FLOWER SHOW.

[The full report of the committee on second national flower show, F. R. Pierson, chairman; F. H. Traendly, J. K. M. L. Farquhar, W. J. Stewart, Edwin Lonsdale, Robert Craig.]

The committee appointed by President Valentine to consider the time and place for holding the next national flower show has canvassed the matter thoroughly. The understanding of the committee was that it was generally understood that the next national flower show should be held in the east. This being so, the committee assume that it was left to them to determine in what eastern city the show should be held, although it might be questioned whether the financial outcome from such an enterprise in an eastern city would be as great as in Chicago.

In the selection of possible cities, the choice was finally limited to New York, Boston and Philadelphia. Many thought that the show should be held in New York, and it would have given the members of the committee from New York great pleasure to have selected New York; but, unfortunately, the only building in New York large enough and suitable for the purpose, Madison Square Garden, is engaged at the only time in the spring when it is feasible to hold a spring flower show—the end of March or beginning of April—this building having been engaged for years at this time of the year. The committee could have obtained a splendid building in New York city the Museum of Natural History in which the American Rose Society will hold its next exhibition. This is one of the finest buildings in the city of New York, in fact, in the country, but as this building belongs to the city, it would be impossible to charge an admission fee, and without such revenue it would be impossible to provide for a premium list or to defray other expenses incident to a flower show. Therefore, this building could not be considered, although it was available. The committee then went into the question of erecting a temporary building for the purpose. This was discussed at length, but the erection of a building was not thought practicable, because it would have to be heated, at the time of the year when the flower show is

to be held, which would add so much to the expense as to make it prohibitive.

The committee understood that the general sentiment has been in favor of holding the show in the spring, at a time that will permit the exploiting and exhibiting many plants with which the public is not familiar and which will lend an added interest and charm to a show of such a national character. For this reason, the committee considered the question from the standpoint of holding the show in the spring, at which time, on account of not being able to obtain a suitable building, it will be impossible to have the show in New York city. It is possible a suitable building could be secured in the fall, but the committee believed it to be desirable to hold a spring flower show.

A Portion of the Pittsburg Delegation at the Cincinnati Convention.

Boston the Place.

After considering the desirability of Boston, Philadelphia, and New York, Boston was finally selected as the most desirable city in which to have the show. Philadelphia is out of the question, for the same reason that applies to New York, as there is no suitable building available in Philadelphia. Massachusetts Horticultural hall in Boston is not large enough for holding a national flower show; but, fortunately, Boston possesses a very fine building—the Mechanics' building—which is admirably adapted for the purpose, being large enough, and, also, located in the best residential section of the city and very near Horticultural hall.

Regarding the time for holding the next national flower show, the committee recommend that it be held in the spring of 1911, which is as early as it will be possible to prepare for an exhibition of so much importance as a national flower show, as a great many exhibits will have to be prepared especially, and it will take at least a year to get them in shape. If the show is held in the spring of 1911, there will be ample time for preparation, but not too much.

Date to be Spring, 1911.

In regard to the date, the committee suggest the end of March. Easter occurs April 16, in 1911, so if the exhibition is held the end of March, it will not interfere with Easter work. This will be mid-Lent, which the committee consider the most favorable time of the year—if the exhibition is to be held in the spring—because more stock is available at that time, and it interferes less with the work of the men engaged along commercial lines.

The committee think that every endeavor should be made to interest the private gardeners on large estates so as to bring out as large exhibits as possible from our large private collections. There should, also, be some strong original floricultural feature or features, and the flower show proper should not be encumbered with tradesmen's exhibits or florists' supplies in horticultural wares. For such commercial exhibits a separate part of the building should be used.

The work should be put in hand at once, and a schedule issued not later than the end of this year or the beginning of 1910. This applies particularly to a preliminary schedule in regard to plants, which should be gotten out with the least possible delay—not later than January 1, 1910—and it should be put in charge of either the present committee or another committee appointed for this purpose. The entire work, however, should be predicated upon a sufficient guarantee fund being subscribed to carry on such an undertaking to a successful completion; and the committee recommend that guarantees be requested, for, say not less than $10,000, to provide for premiums and other necessary expenses incident to such an undertaking; that twenty-five per cent be called for when needed, and such other installments levied from time to time as may be found necessary to provide sufficient funds to carry forward the work.

The committee also recommend that liberal cash premiums be offered; also a series of gold, silver and bronze medals, as well as certificates of different grades, which would be prized on account of their advertising value rather than for their intrinsic merits.

It gives the committee great pleasure to recommend Boston as a suitable city in which to hold the show, because horticulture is there highly developed and there are extensive private collections available in the immediate vicinity, which always add largely to the success of such an exhibition.

THOSE PRESENT.

The attendance was the largest in the history of the Society of American Florists. To enumerate the Cincinnati people present would be to give a list of every man and woman in any way connected with the trade in the city, for they all were indefatigable in their hospitality. Among those present from outside of Cincinnati were the following:

to be held, which would add so much to the expense as to make it prohibitive.

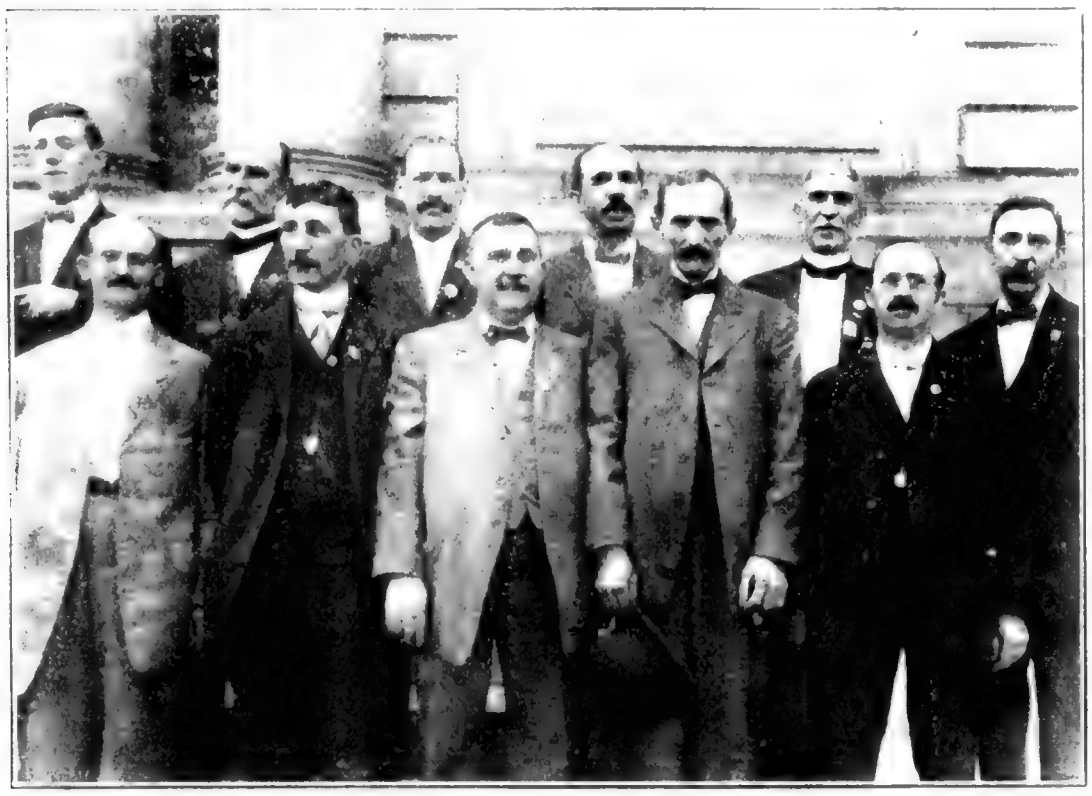
The committee understood that the general sentiment has been in favor of holding the show in the spring, at a time that will permit the exploiting and exhibiting many plants with which the public is not familiar and which will lend an added interest and charm to a show of such a national character. For this reason, the committee considered the question from the standpoint of holding the show in the spring, at which time, on account of not being able to obtain a suitable building, it will be impossible to have the show in New York city. It is possible a suitable building could be secured in the fall, but the committee believed it to be desirable to hold a spring flower show.

Boston the Place.

After considering the desirability of Boston, Philadelphia, and New York, Boston was finally selected as the most desirable city in which to have the show. Philadelphia is out of the question, for the same reason that applies to New York, as there is no suitable building available in Philadelphia. Massachusetts Horticultural hall in Boston is not large enough for holding a national flower show; but, fortunately, Boston possesses a very fine building the Mechanics' building which is admirably adapted for the purpose, being large enough, and, also located in the best residential section of the city and very near Horticultural hall.

Regarding the time for holding the next national flower show, the committee recommend that it be held in the spring of 1911, which is as early as it will be possible to prepare for an exhibition of such importance as a national flower show is as a great many exhibits will have to be prepared especially, and it will take at least a year to get them in shape. If the show is held in the spring of 1911, there will be ample time for preparation, but not too much.

Date to be Spring, 1911.



In regard to the date, the committee suggest the end of March. Easter occurs April 16, in 1911, so if the exhibition is held the end of March, it will not interfere with Easter work. This will be mid Lent, which the committee consider the most favorable time of the year if the exhibition is to be held in the spring because more stock is available at that time, and it interferes less with the work of the men engaged along commercial lines.

The committee think that every endeavor should be made to interest the private gardeners on large estates so as to bring out as large exhibits as possible from our large private collections. There should, also, be some strong original floricultural feature or features, and the flower show proper should not be encumbered with tradesmen's exhibits or florists' supplies in horticultural wares. For such commercial exhibits a separate part of the building should be used.

The work should be put in hand at once, and a schedule issued not later than the end of this year or the beginning of 1910. This applies particularly to a preliminary schedule in regard to plants, which should be gotten out with the least possible delay, not later than January 1, 1910, and it should be put in charge of either the present committee or another committee appointed for this purpose. The entire work, however, should be predicated upon a sufficient guarantee fund being subscribed to carry on such an undertaking to a successful completion; and the committee recommend that guarantees be requested, for, say not less than $10,000, to provide for premiums and other necessary expenses incident to such an undertaking; that twenty five per cent be called for when needed, and such other installments levied from time to time as may be found necessary to provide sufficient funds to carry forward the work.

The committee also recommend that liberal cash premiums be offered, also a series of gold, silver and bronze medals, as well as certificates of different grades, which would be prized on account of their advertising value rather than for their intrinsic merits.

It gives the committee great pleasure to recommend Boston as a suitable city in which to hold the show, because horticulture is there highly developed and there are extensive private collections available in the immediate vicinity which always add largely to the success of such an exhibition.

A Portion of the Pittsburg Delegation at the Cincinnati Convention.

THAT FIRST MEETING.

[A paper by E. G. Hill, Richmond, Ind., read before the Society of American Florists, in convention at Cincinnati, August 17 to 20, 1909.]

It is hard to realize that twenty-five years have passed since the organization of this society. To several of us here it seems only as yesterday since our initial meeting, though the journey from 1884 to the present time has been diversified by enough momentous incidents to convince us that it has been a full quarter-century run.

The central figure of that first meeting was our president, Mr. Thorpe. Those of us who were present will never forget how Uncle John, in his unconventional manner and in his own unique way, presided over our deliberations. Neither can we forget his enthusiasm, and his confidence in this society; he was sure that it was a necessity, and positive of its success. It is a pleasure to remember his kindly manner, his tact in disarming criticism of any violation of parliamentary law, his recognition of any person, big or little, who had a suggestion to offer or an amendment to propose. We all realized that we had a thoroughly informed, sincere and kind-hearted man in the chair, and every member present came readily and gracefully under the spell of his personality. John Thorpe had most unusual gifts of both heart and mind, and at that time he was at the zenith of his power and popularity.

Not Ready to be Oslerized.

I have surmised that the grouping together of the ex-presidents and of the original members of this society on this occasion is to show the beneficent workings of Oslerization, could it be put into general practice. But, though we survivors may wear crowns of silver hair, and show the markings of time upon our outer man, I trust that we can claim minds serene and unimpaired and still able to face the battles of life—and of trade—with fearless vigor.

It was Arnold, of Rugby, who told the regents that when he failed to take the stairs three steps at a time they must look about for a new head master for the school, and though many of us who met here twenty-five years ago may not now feel like taking the stairs just in that way, we can rejoice in the possession of an open mind, a determination to avoid the ruts, and a living interest in the best things in floriculture.

Nevertheless, one of the lessons that we seniors must learn, and put into practice as well, is the recognition of the fact that our sons and the younger men in the society have rightfully assumed the positions of responsibility in this organization. This is exactly as it should be. Every society, every business firm, needs young blood added to keep it to its highest point of efficiency, and we elders must see to it that we do not supply more than the necessary friction as the wheels go onward.

A Meed of Praise.

To the carrying forward of the work of this society has been given anxious thought, determined effort, unremitting toil, service unstinted and freely rendered by J. C. Vaughan, Myron A. Hunt, John N. May, Robert Craig, B. P. Critchell and others down the line.

I think it right and proper that on this twenty-fifth anniversary we render to the memory of Myron A. Hunt a meed of praise for the splendid service rendered the society in its organization and during its earlier years. I sometimes think that we owe to Mr. Hunt quite as much as is our debt to Mr. Thorpe. No service was too heavy, no journey too long for Mr. Hunt to undertake if thereby he could get assistance or recruits, or turn any seeming

THAT FIRST MEETING.

[A paper by E. G. Hill, Richmond, Ind., read before the Society of American Florists, in convention at Cincinnati, August 17 to 20, 1909.]

It is hard to realize that twenty-five years have passed since the organization of this society. To several of us here it seems only as yesterday since our initial meeting, though the journey from 1884 to the present time has been diversified by enough momentous incidents to convince us that it has been a full quarter-century run.

The central figure of that first meeting was our president, Mr. Thorpe. Those of us who were present will never forget how Uncle John, in his unconventional manner and in his own unique way, presided over our deliberations. Neither can we forget his enthusiasm, and his confidence in this society; he was sure that it was a necessity, and positive of its success. It is a pleasure to remember his kindly manner, his tact in disarming criticism of any violation of parliamentary law, his recognition of any person, big or little, who had a suggestion to offer or an amendment to propose. We all realized that we had a thoroughly informed, sincere and kind hearted man in the chair, and every member present came readily and gracefully under the spell of his personality. John Thorpe had most unusual gifts of both heart and mind, and at that time he was at the zenith of his power and popularity.

Not Ready to be Oslerized.

I have surmised that the grouping together of the ex-presidents and of the original members of this society on this occasion is to show the beneficent workings of Oslerization, could it be put into general practice. But, though we survivors may wear crowns of silver hair, and show the markings of time upon our outer man, I trust that we can claim minds serene and unimpaired and still able to face the battles of life—and of trade—with fearless vigor.

It was Arnold, of Rugby, who told the regents that when he failed to take the stairs three steps at a time they must look about for a new head master for the school, and though many of us who met here twenty-five years ago may not now feel like taking the stairs just in that way, we can rejoice in the possession of an open mind, a determination to avoid the ruts, and a living interest in the best things in floriculture.

Nevertheless, one of the lessons that we seniors must learn, and put into practice as well, is the recognition of the fact that our sons and the younger men in the society have rightfully assumed the positions of responsibility in this organization. This is exactly as it should be. Every society, every business firm, needs young blood added to keep it to its highest point of efficiency, and we elders must see to it that we do not supply more than the necessary friction as the wheels go onward.

A Meed of Praise.

To the carrying forward of the work of this society has been given anxious thought, determined effort, unremitting toil, service unstinted and freely rendered by J. C. Vaughan, Myron A. Hunt, John N. May, Robert Craig, B. P. Critchell and others down the line.

I think it right and proper that on this twenty-fifth anniversary we render to the memory of Myron A. Hunt a meed of praise for the splendid service rendered the society in its organization and during its earlier years. I sometimes think that we owe to Mr. Hunt quite as much as is our debt to Mr. Thorpe. No service was too heavy, no journey too long for Mr. Hunt to undertake if thereby he could get assistance or recruits, or turn any seeming

Experimental Greenhouses, U. S. Department of Agriculture.
(Ordinary wooden bench to left, solid concrete bed in center.)

disaffection into loyalty. He was the wise counselor, the devoted friend of our society, the skillful organizer, and to him was due in large measure the pronounced success of that first meeting.

Cincinnati was selected as the best place for our first meeting for two reasons: First, on account of its geographical position, being intermediate between the east and west; second, on account of the hearty invitation given by the members of the profession in this city. How well these members acquitted themselves is greatly to their credit, for their willingness to help and their cordial welcome awakened a strong fraternal feeling which was of untold value.

Early Fears and Encouragements.

I shall always remember with pleasure the arrival of the different delegations from the various sections of our country on the night preceding the opening of our meeting. When I looked upon the faces of the men who had come up to that first session I confess I felt relieved and happy, for a great load of responsibility had been rolled away.

The spirit of those present from every section of the country seemed to set the mark of approval upon the efforts put forth by those who had taken up the initial work of organization.

If you will look over the report of the proceedings of that first meeting you will find many prophetic utterances regarding the future, not only of the organization, but of floriculture—and most of these prophecies have come to pass. The topics of the papers read on that occasion were eminently practical, and of far-reaching importance to the trade at that time. I sometimes think we fail to appreciate the tremendous power for good that this society has wielded, but Mr. Vaughan will take up that phase of the society's work, for no one is better qualified or entitled to speak on this subject than he. He has been an indefatigable worker and a tower of strength to the organization down to the present moment.

The one question foremost in the early days of the society was hail insurance. This was a vital question, which caused prolonged argument and discussion. The formation of the Hail Association was coincident with the organization of the Society of American Florists, and the wisdom of its founders is best justified by a study of its finances, which you will hear presented by the treasurer.

We have looked in vain for many familiar faces that were present on that first occasion; they have gone on before, having served their day and generation. Myron Hunt, Peter Henderson, J. M. Jordan, Hendricks, John Henderson, Asmus, Scott, Thorpe—the list is a growing one, and though each death seemed a loss beyond repair, the building has been so well founded that the individual stones have been replaced without impairing its strength, a fact which is the highest tribute possible to the wisdom of the founders of the S. A. F.

U. S. WORK FOR FLORICULTURE.

[A paper by B. T. Galloway, Chief of the Bureau of Plant Industry, U. S. Department of Agriculture, read at the Cincinnati convention.]

The United States Department of Agriculture is doing considerable work bearing both directly and indirectly upon floriculture. I shall not attempt to discuss all of this work, but will endeavor to point out and emphasize certain lines of investigation and experiment that are now being carried on by the Bureau of Plant Industry.

Introducing New Plants.

As is pretty well known, the department has for a number of years been making a special endeavor in the matter of introducing new plants and seeds from foreign countries. While the greater portion of the introductions have been more strictly of an agricultural nature, there are some things which have been brought in of interest to the horticulturist.

During the past three years the department has had Frank N. Meyer, an agricultural explorer, visiting little known regions of Asia, with the result that quite a number of promising crops have been sent in by him. It is too early yet to predict what these things will do. They are being tested at a number of our stations and also in cooperation with reliable horticulturists in different parts of the country, with a view to determining their possibilities and adaptation to varying conditions of soil and climate.

Among some of the things which Mr. Meyer has secured is a new and striking white bark pine, which grows to great size and seems specially fitted for cemeteries and certain types of public parks and grounds. Mr. Meyer has secured also a number of interesting quick-growing and more or less ornamental, drought and alkali resistant willows. One of the problems met with by horticulturists in certain parts of the west has to do with plants that may be suitable for ornamental purposes under arid or semiarid conditions. It is believed that some of the willows found by Mr. Meyer will be useful in this connection. Several new forms of poplars have been secured, one of which, it is believed, will prove a valuable tree for avenues and streets. Mr. Meyer also secured a collection of Chinese pistachio, a beautiful ornamental tree and a very promising stock for the pistachio nut—a plant which the department is endeavoring to introduce in various parts of the country. Various forms of elms have also been found and introduced. Some of these have promise of value in their ability to resist drought and alkali, hence may become quite useful in connection with the development of gardens and parks in the semiarid regions of the United States. Some promising cold and drought resistant roses were secured, which may be of value in connection with the drier sections of the country, or may be useful adjuncts to the horticultural possibilities of other sections.

Plant Breeding and Improvement.

Closely associated with the plant introduction work is that which has to do with the improvement of plants by breeding and selection. Considerable work of this kind has been under way for a number of years, the results of which have already been published. Mr. Oliver's efforts in the direction of improving the lily have been set forth in bulletins from the department, and his work in securing new types of dahlias has also been described from time to time in other publications.

As a finishing touch to our lily work, we secured a large number of apparently healthy bulbs of such varieties as the multiflorum, Harrisii and giganteum. They were flowered and what were thought to be desirable crosses made between the varieties. Nearly sixty quarts of seed resulted, which was distributed in southern California and elsewhere. One firm has eight acres of these seedlings in fine condition, which will bloom next spring. Other lots are equally promising. The future of lily growing will depend upon the growers growing the bulbs upon new ground; that is, to put other crops in the ground for at least three years succeeding the lily crop. In connection with the work with dahlias, I may say that we now have about six seedlings which are promising. One of them is a semidouble red with long stems and early in blooming.

Study of Principles of Plant Breeding.

Considerable work is in progress in the matter of getting at the basic principles involved in improvement by breeding and selection of commercial florists' crops, such as the rose and carnation. The principles involved in carnation

breeding are being studied by J. B. Norton, who has already presented one or two papers before this society bearing on his work and the results he has secured. Mr. Oliver is doing considerable breeding work with roses, chrysanthemums, pansies, gladioli and sunflowers.

I may say that one of the roses discovered by Mr. Meyer has flowered. It has double yellow flowers and has the peculiar distinction of being the first of all the roses to bloom in the spring. This and several other species introduced from China and elsewhere are being used by Mr. Oliver in his breeding work and already some promising seedlings for outdoor planting have been secured, notably a cross between the new double yellow rose and the white rugosa.

Mr. Meyer, while in China, was instructed to secure the wild forms of chrysanthemums from which our cultivated varieties have sprung. He succeeded in securing a variety with white or rosy-white flowers, and also a yellow variety, both from the very cold regions of north China. These wild forms Mr. Oliver is crossing with some of our best hardy cultivated varieties in order to secure a thoroughly hardy race for outdoor culture in the north. Some promising seedlings have already been secured. Mr. Oliver has also begun some interesting work with pansies, crossing a summer blooming species secured from Australia with other varieties. This Australian variety blooms abundantly during our hottest summers, provided it gets sufficient moisture. We look to obtaining some interesting results along this line. We need a productive annual sunflower for summer cutting with larger and better shaped flowers than we have in the common varieties. This Mr. Oliver has secured by crossing, the resulting progeny having large and well developed flowers with long stems, well adapted for cutting.

In connection with the plant breeding and improvement work an interesting line of study has been conducted for some time by Prof. L. C. Corbett, having to do with the comparative merits of blind and flowering wood for propagation purposes in rose growing.

Studies of Diseases.

The Bureau of Plant Industry is continuing its investigations of the diseases affecting crops under glass. The results of this work, as is well known to the florists' trade, have been published from time to time in the bulletins of the department and elsewhere. The results of studies of wet stem-rot of carnations, dry stem-rot, microsporium spot, bacterial spot and other diseases of this crop have been set forth from time to time, so that there is little new to be added regarding the manner in which the various diseases work, or the methods of preventing the same. Wet stem-rot has proved quite destructive in a number of sections of the country recently and, as already pointed out, the fungus which causes this disease lives in the soil on decaying organic matter, especially if the soil happens to be poor in lime.

The crown gall disease of roses and chrysanthemums has received some attention from our pathologists. The cause of the disease has been discovered to be a bacterial trouble. We have also found out that it is spread by cuttings, which frequently become infected in the cutting bench. Some evidence has also been secured showing that certain varieties are not so susceptible to this trouble as others.

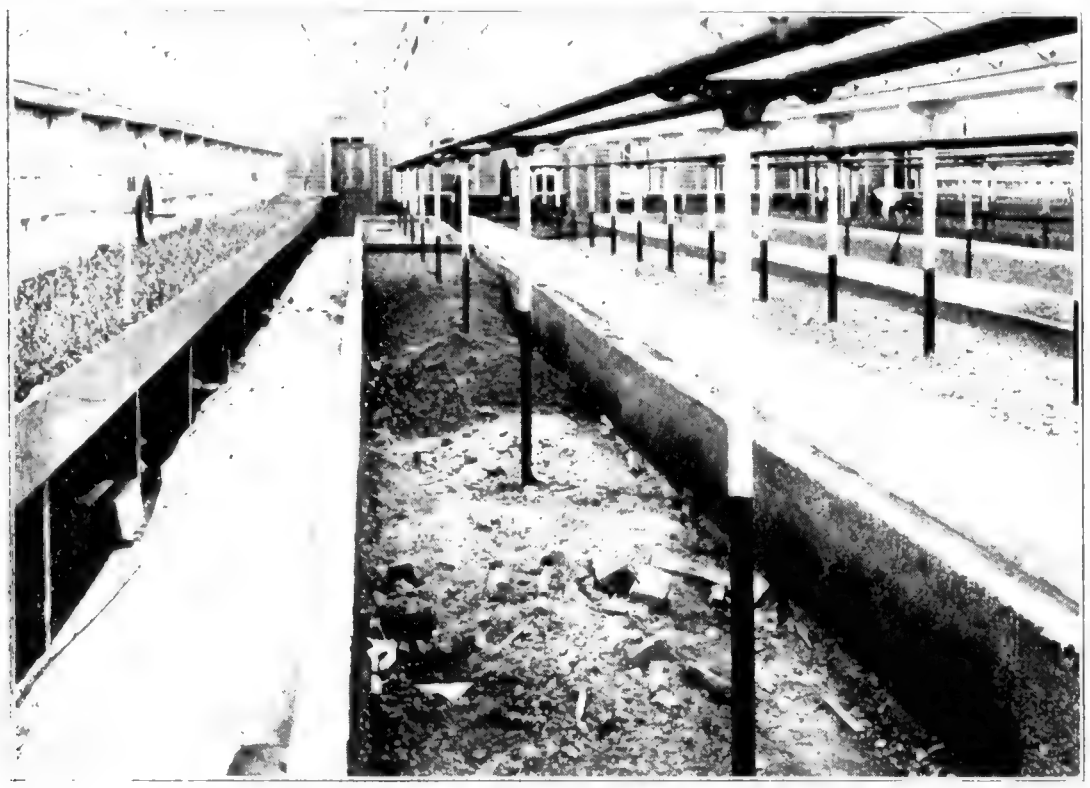
Special Work With Carnations.

I have briefly reviewed the foregoing questions more as an introduction than as an attempt to give you detailed information as to work actually accomplished, or in progress. My particular object at this time is to set before you certain results which have been secured in connection with our work on carnations and the growing of bulbs in the United States.

At one of the former meetings of this society we presented some of the results secured in the matter of feeding the carnation. Soon after this work was completed the houses in which we grow carnations were modified for the purpose of obtaining light on the relative effect of growing the crop on raised benches, as compared with solid beds. The rapid increase in the price of lumber has made it essential and necessary that florists should take advantage of all methods or practices which will reduce the cost of production without interfering with the size and vigor of the plants or crop grown therefrom.

The experimental carnation houses of the department are built on the ridge and furrow plan and run north and south. There are no separating partitions, the house as a whole being forty-eight feet wide and 133 feet long. For experimental purposes the house is divided into seven beds, which, when filled, will hold about 6,000 plants. It was planned in the experiment about to be described to test the effect of growing the crop on raised wooden benches, constructed in the usual way, with wooden supports; on tile bottom benches with iron supports, and in solid beds with concrete walls.

Styles of Construction.



The wooden supports of the raised wooden benches are made of 3x4 Georgia pine and placed four feet apart. The benches themselves are made of 1x12 white pine boards sixteen feet long. The benches are about three feet high.

The tile bench has a frame constructed of 1¼-inch iron pipe, the supports being set five feet apart. The legs of the sup-

In connection with the work with dahlias, I may say that we now have about six seedlings which are promising. One of them is a semidouble red with long stems and early in blooming.

Study of Principles of Plant Breeding.

Considerable work is in progress in the matter of getting at the basic principles involved in improvement by breeding and selection of commercial florists' crops, such as the rose and carnation. The principles involved in carnation

eeding are being studied by J. B. Nor-
n, who has already presented one or two
pers before this society bearing on his
ork and the results he has secured.
r. Oliver is doing considerable breed-
g work with roses, chrysanthemums,
nsies, gladioli and sunflowers.

I may say that one of the roses dis-
ered by Mr. Meyer has flowered. It
s double yellow flowers and has the
culiar distinction of being the first
all the roses to bloom in the spring.
his and several other species introduced
om China and elsewhere are being used
Mr. Oliver in his breeding work and
ready some promising seedlings for
tdoor planting have been secured,
otably a cross between the new double
llow rose and the white rugosa.

Mr. Meyer, while in China, was in-
ructed to secure the wild forms of
hrysanthemums from which our culti-
ted varieties have sprung. He suc-
eeded in securing a variety with white
rosy-white flowers, and also a yellow
ariety, both from the very cold regions
f north China. These wild forms Mr.
liver is crossing with some of our best
ardy cultivated varieties in order to
ecure a thoroughly hardy race for out-
oor culture in the north. Some prom-
sing seedlings have already been secured.
Mr. Oliver has also begun some interest-
ng work with pansies, crossing a summer
blooming species secured from Australia
with other varieties. This Australian va-
riety blooms abundantly during our hot-
est summers, provided it gets sufficient
moisture. We look to obtaining some
interesting results along this line. We
need a productive annual sunflower for
summer cutting with larger and better
shaped flowers than we have in the com-
mon varieties. This Mr. Oliver has se-
ured by crossing, the resulting progeny
having large and well developed flowers
with long stems, well adapted for cut-
ting.

In connection with the plant breeding and improvement work an interesting line of study has been conducted for some time by Prof. L. C. Corbett, having to do with the comparative merits of blind and flowering wood for propagation purposes in rose growing.

Studies of Diseases.

The Bureau of Plant Industry is continuing its investigations of the diseases affecting crops under glass. The results of this work, as is well known to the florists' trade, have been published from time to time in the bulletins of the department and elsewhere. The results of studies of wet stem-rot of carnations, dry stem-rot, microsporium spot, bacterial spot and other diseases of this crop have been set forth from time to time, so that there is little new to be added regarding the manner in which the various diseases work, or the methods of preventing the same. Wet stem-rot has proved quite destructive in a number of sections of the country recently and, as already pointed out, the fungus which causes this disease lives in the soil on decaying organic matter, especially if the soil happens to be poor in lime.

The crown gall disease of roses and chrysanthemums has received some attention from our pathologists. The cause of the disease has been discovered to be a bacterial trouble. We have also found out that it is spread by cuttings, which frequently become infected in the cutting bench. Some evidence has also been secured showing that certain varieties are not so susceptible to this trouble as others.

Special Work With Carnations.

I have briefly reviewed the foregoing questions more as an introduction than as an attempt to give you detailed information as to work actually accomplished, or in progress. My particular object at this time is to set before you certain results which have been secured in connection with our work on carnations and the growing of bulbs in the United States.

At one of the former meetings of this society we presented some of the results secured in the matter of feeding the carnation. Soon after this work was completed the houses in which we grow carnations were modified for the purpose of obtaining light on the relative effect of growing the crop on raised benches, as compared with solid beds. The rapid increase in the price of lumber has made it essential and necessary that florists should take advantage of all methods or practices which will reduce the cost of production without interfering with the size and vigor of the plants or crop grown therefrom.

The experimental carnation houses of the department are built on the ridge and furrow plan and run north and south. There are no separating partitions, the house as a whole being forty-eight feet wide and 133 feet long. For experimental purposes the house is divided into seven beds, which, when filled, will hold about 6,000 plants. It was planned in the experiment about to be described to test the effect of growing the crop on raised wooden benches, constructed in the usual way, with wooden supports; on tile bottom benches with iron supports, and in solid beds with concrete walls.

Styles of Construction.

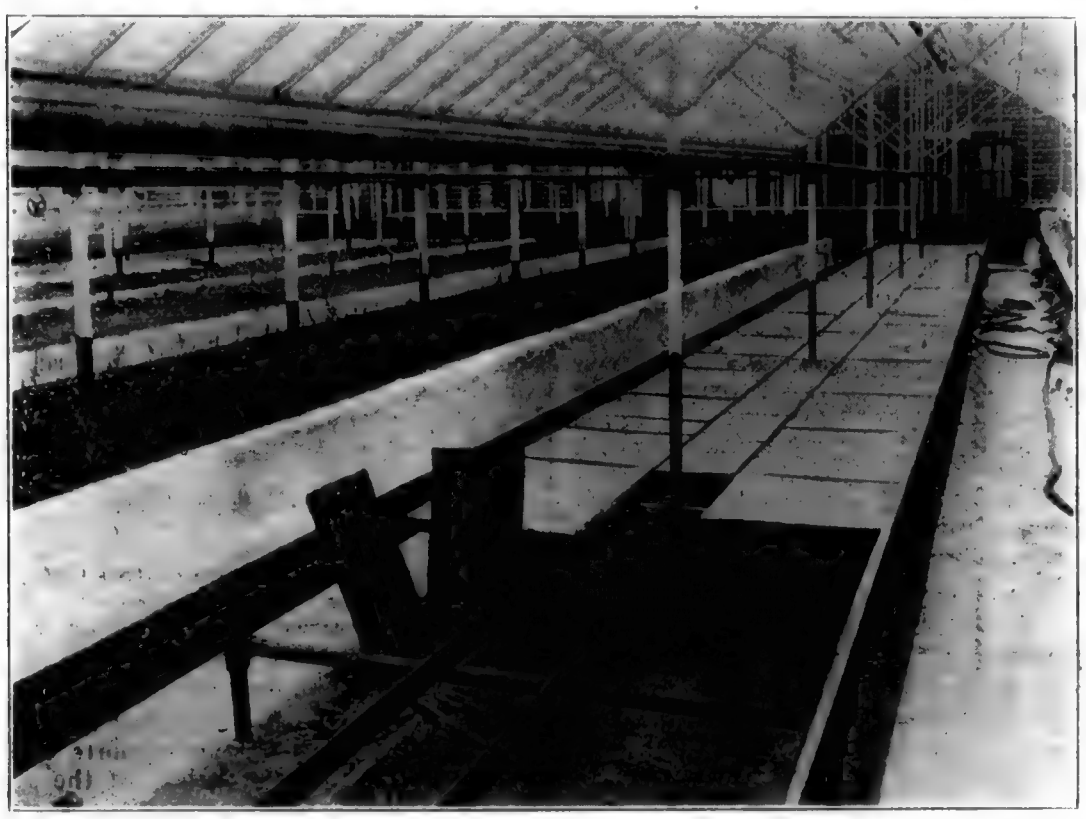
The wooden supports of the raised wooden benches are made of 3x4 Georgia pine and placed four feet apart. The benches themselves are made of 1x12 white pine boards sixteen feet long. The benches are about three feet high.

The tile bench has a frame constructed of 1¼-inch iron pipe, the supports being set five feet apart. The legs of the sup-

Solid Beds Used in Tests by the Department of Agriculture.

(Filled with, first, cinders, 12 in.; second, straw, 2 in.; and last, compost, 4-in. Walls 18 in. high, 4-in. thick.)

ports are set twelve inches in the ground in concrete, with two lines of 2-inch angle iron and two lines of 2-inch T-irons resting on the pipe supports to carry the tile bottom. The tile slabs are twenty-three and three-fourths inches long, twelve inches wide and one inch thick. There is a 6-inch iron spear point attached to the legs to support the side or facial boards. The height of the tile bench above the walk is eighteen inches, corresponding practically with the solid beds next described.



The walls for the solid beds are made of concrete, four inches thick and twenty-four inches high. Six inches of the wall is below and eighteen inches above the ground. The concrete was made of one part Portland cement, three parts sand and six parts broken stone or gravel, without reinforcement. Such construction work can be done by greenhouse men themselves. Where soft coal is burned the ashes after screening would take the place of sand and gravel in about the same proportions. The usual way to construct with ashes or cinders is to use one part Portland cement, three parts fine ashes, and six parts coarse cinders. We constructed our beds eighteen inches high for convenience in working them and gathering the flowers. If the beds are lower than this it is necessary to bend the back a good deal, which cuts into the time of the men when they are working with the plants.

The accompanying illustrations show the methods of construction more satisfactorily than mere description.

Cost of Several Styles.

It is interesting to note the relative cost of these different types of construction. The cost of the wooden benches, constructed in the ordinary way, with the wooden supports, was 12½ cents per square foot of bed space. The cost of the raised beds with iron supports and tile bottoms was 17 cents per square foot, while the cost of the solid beds with concrete walls was 11 cents per square foot. The cost per plant was 9 cents for the wood benches, 8 cents for the solid beds with concrete walls, and 12 cents for the tile bottom benches with iron frames and supports. It thus appears that the solid beds with concrete walls cost less than the other two forms of construction and are, for all practical purposes, permanent.

The soil for the entire house was the same, being made from good, fine sod, composted at the rate of three parts soil and one part of well-rotted manure. The soil and manure were mixed thoroughly and worked over several times before being brought into the house. The raised wooden bench and tile bench were filled in the usual way. The solid bed was filled to a height of twelve inches with cinders, then two inches of straw was put on to prevent the soil from washing into the cinders. On top of the straw four inches of compost was added, this bringing it up flush with the top of the concrete walls.

Method of Constructing Tile Bench With Iron Supports, U. S. Department of Agriculture.

Planting and Record-keeping.

With a view to getting definite information regarding the effect of the character of the bed, if any, on vigor and productiveness, the house was divided into five sections, a different variety of carnation being planted in each. Section one, for example, was planted to Winsor; that is, a portion of the wooden bench, constituting about one-fourth of the entire length, was planted to Winsor, the same variety being used for one-fourth of the tile bench and one-fourth of the solid beds. There were 1,126 Winsor plants involved in this experiment, a sufficient number to give us a fair commercial test.

The same methods were followed in the next section, which was planted with White Enchantress, the next section with White Perfection, the next with Beacon and the next with Rose-pink Enchantress.

A careful record was kept of the number of flowers cut from each section and the value of the cut estimated from the prevailing prices of carnations during the season.

Average Cut of Blooms.

Without going into the details of this work, it suffices to say that the records kept as described were for five months, including November, December, January, February and March, and show practically no difference in the yields from the beds of different construction, if anything the solid beds giving slightly better results.

Our records show, for example, that the average yield per plant from the Winsor plants on the raised wooden benches was fourteen flowers for the period indicated. The average yield on the solid beds was twelve flowers; on the tile bench eleven flowers per plant.

The average yield of the Beacon on the raised wooden bench was thirteen flowers, on the solid beds 13.9 flowers, and on the tile bench 9.9 flowers.

The average yield of Enchantress on the raised wooden bench was ten flowers, on the tile bench ten and on the solid beds thirteen flowers.

It should be borne in mind that records were kept for five months only. If they had been kept the whole season through, the average yields would have been about doubled.

Difference in Vigor.

The plants in the solid beds, however, were decidedly more vigorous; the stems being stronger and the flowers larger than in either the wooden or tile benches, consequently were worth more money. This is due to the fact that there is much better drainage in the solid beds. The soil never becomes soggy when an oversupply of water is put on, as has been found to be the case with the wooden and tile benches. The plants in the tile bench were the least vigorous. It has been our experience that it takes about the same time to work the solid beds as the raised wooden benches. We have found, further, that the solid beds do not require watering as frequently as the other benches. It has been our practice to water the solid beds once a week, while it has been necessary to water the tile and wooden benches at least three times in two weeks.

The cuttings for this experiment were made about January 1 and potted in 2-inch pots when well rooted. Early in March they were shifted to 3-inch pots, where they were kept until the last week in April, when they were transferred to the benches. No field-grown stock was used in the experiment.

Experiments in Bulb Growing.

For a number of years the Bureau of Plant Industry has been giving attention to the possibilities of bulb culture in the United States. Various efforts have been made to encourage bulb growing in different sections and four or five years ago coöperative experiments were inaugurated in the state of Washington with several individuals, the work having for its object experiments and demonstrations in the matter of growing bulbs, especially Dutch bulbs, in that section of the country. Reports of this work have been made from time to time, but as it progressed it was seen that to secure the best results the government should have control of a certain amount of land upon which it could inaugurate with its own men a line of experimentation and demonstration that would necessarily have to last for several years.

The citizens of Bellingham, Wash., were very much interested in this work, and for the purpose of encouraging the department to undertake it near this town, placed at our disposal ten acres of land four miles from the city. The ground is well adapted to bulb culture and, in addition to putting it into thorough shape for the work in view, the

Chamber of Commerce, through whom the site was secured, also constructed the necessary buildings, provided water for irrigation, and also furnished other necessary equipment.

The department now has three experienced men in charge of this garden, carrying on tests in the growing of various bulbs. Good stocks of the bulbs have been secured from Holland and planting was started last fall. Tests will be conducted so as to show the best methods of cultivating and manuring, the best soil conditions for each class of bulbs, etc. Careful records will be kept of the operations, so that when definite results have been secured, publications may be prepared and issued for the information of persons desiring to take up the work of propagating bulbs to supply the trade.

It will be well understood, of course, by the members of this society that time is an important element in work of this nature, and premature reports are to be avoided. It is probably sufficient to say that the department recognizes the importance of developing the bulb industry in the United States and is putting forth its best efforts to this end. With the improvement of transportation facilities which are likely to come within the next few years, and with the gradual adjustment and settlement of agricultural and horticultural practices through the northwestern section of the country, it is believed that more interest will be taken in intensive crops, such as bulb and seed growing. The latent possibilities for the development of industries of this nature are present and as soon as it is demonstrated that the work is practicable and profitable, men with sufficient capital to inaugurate it will not be wanting.

LADIES' BOWLING.

There was an unusually large attendance of ladies at the bowling at Heidelberg, in Kentucky, Wednesday afternoon, August 18. The high score prize, the Reinberg cup, was won by Mrs. Geo. Shaffer, Washington, who defeated Chicago's champion, Mrs. McKellar, by virtue of rolling a game of 157. Mrs. Shaffer also was first for most strikes. Mrs. McKellar won the Darling cup for second high and the prize for the most spares. There were handsome trophies for each of the ten highest in the following list:

Player.	1st.	2d.	Total.
Rasmussen, Mrs. A.	68	57	125
Herr, Mrs. A. M.	86	58	144
Sibson, Mrs. John	35	38	73
Fulmer, Miss Perle	30	18	48
Powell, Mrs. I. L.	33	81	114
Fehr, Mrs. A. G.	33	37	70
Guy, Mrs. E. W.	81	65	146
Shaffer, Mrs. Geo.	95	157	252
Wittman, Mrs. Rudolph	75	57	132
Bauer, Mrs. F. C.	70	62	132
Blackistone, Mrs. Z. D.	56	66	122
Gude, Mrs. W. F.	57	27	84
Bunyard, Mrs. H. A.	25	38	63
Adrian, Mrs. G.	59	61	120
Pfeiffer, Mrs.	69	81	150

Smith, Mrs.	50	39	89

TROY, N. Y.—John Pickering has leased his plant to his two sons, who will carry on the business under the firm name of John Pickering's Sons.

NEW YORK.

The Market.

Convention week has been dull and unprofitable for a quarter of a century. This year is but a recurrence of the inevitable. With the market overwhelmed with asters, gladioli and Hydrangea paniculata grandiflora, and no life whatever in the trade and almost every wholesaler and grower of the cities at Cincinnati—where they should be—what can you expect but stagnation at home?

The asters and glads will soon be relegated to the "has beens." Roses are fast reaching perfection. Carnations begin to look natural again, and there is certainly no serious scarcity of anything. Dahlias are arriving and golden rod is in all the retail windows. It is a time for patience and mutual forbearance, anticipatory of the good times coming.

The Convention Special.

The special New York Second Empire convention train for Cincinnati left the Grand Central at 12:40 on Monday. It was a Scotch send-off, as John Donaldson and John Birnie were at the station to speed the New Yorkers on their way. It was a wet, cool morning and ideal weather for travel, almost too perfect to last. The rain storm continued all day, and its need and value were evident all through the lovely country between New York and Buffalo.

The New York Florists' Club, as usual, provided substantial comfort in fruit and liquid refreshments and the ladies especially were well cared for. Two Pullmans were crowded with the happy throng, and the greatest harmony prevailed. Innocent games, learned discussions, Rochester and Montreal electioneering, planning for the great flower show at Boston in 1911 and prophesying as to the winners in the contests for president and secretary kept everybody wide awake until the "wee sma' hours."

Captain Berry has a good team ready for the bowling tournament, including Messrs. O'Mara, Roehrs, Wilson, Manda and himself, with Traendly and Young in reserve.

At Utica Mr. Robinson, the Canuck from Montreal, boarded the train and talked the crowd blind in behalf of the city on the mountain, getting in his fine work ahead of Charlie Vick and his octette of boomers at Rochester.

Patrick O'Mara joined the train at Syracuse, near which he and Miss O'Mara have been holidaying. Arriving at Rochester at 9 p. m., the big delegation boarded the special and a large crowd of florists and nurserymen were on hand to emphasize the desire of the Flower City for the next convention.

We are rather proud of our loyalty in the east and hope Cincinnati was satisfied with our quality and numbers. We had just half as many as we hoped for and fewer ladies than expected, but it's a long way between cities, and next year at Rochester we will try to make it 200.

Various Notes.

Miss Mona Smedley, bookkeeper for J. K. Allen, is back from her holiday at Ocean Grove.

Miss Levitt, of A. J. Guttman's, is in the Catskills.

Russin & Hanfling are receiving their European importations.

W. E. Marshall has been recuperating in the company's yacht on Great South Bay, and has a fund of fish stories on tap. Mr. Wheeler, of the firm, is enjoying a sea voyage and will visit his old home in England.

Mrs. Sigmund Geller and family are in the mountains. Mr. Geller's purchases in Europe this year are arriving and are far in excess of any year in his business career.

A. L. Young has completed his jury duties and is enjoying his week-ends with his folks in the country.

Kessler Bros. have a fine stock of ferns and palms at their greenhouses in Jersey.

Harry Crawbuck, of Brooklyn, is sending fine asters to the market from his nursery at Summit, N. J.

W. H. Kuebler now has a supply branch with the cut flower business.

Monday evening, September 13, the first fall meeting of the New York Florists' Club will be held in the rooms of the society, Grand Opera House building, West Twenty-third street.

Anton Schultheis and family have been summering at Far Rockaway. Miss Schultheis is in New Hampshire and three of his sons are cruising in their own yacht up the Sound.

A. J. Guttman, the wholesale florist, is too busy again this year to attend the convention. Mr. Kemper, his partner, and Miss Guttman joined the New York special train at Buffalo.

Mrs. Charles Millang and daughter are summering at White Lake until October. Charles is busy preparing for a big violet season, and has sold the lease of his branch store on Sixth avenue for a $1,000 profit. His new store, in the Coogan building, on the ground floor, is now complete.

Because of illness in his family, the veteran J. K. Allen was unable to enjoy the convention as he had planned. George, his son, has returned from his three weeks' outing with his family in the Catskills. Nick Schreiner has been added to the force of salesmen.

A. L. Young has had a progressive year, and his enterprises seem to all have the microbe of success.

August Millang has added a thirteen-acre tract to his possessions over on Long Island, with growing ambitions added to his wholesale and retail stores.

B. Rosens, the supply man, is making his annual western trip and expected to meet his customers at Cincinnati.

Mr. Blake has returned from Rochester, where he had a month of rest with his family, and Mr. Bonnet, of the same house, is now away in his yawl for a month of fishing.

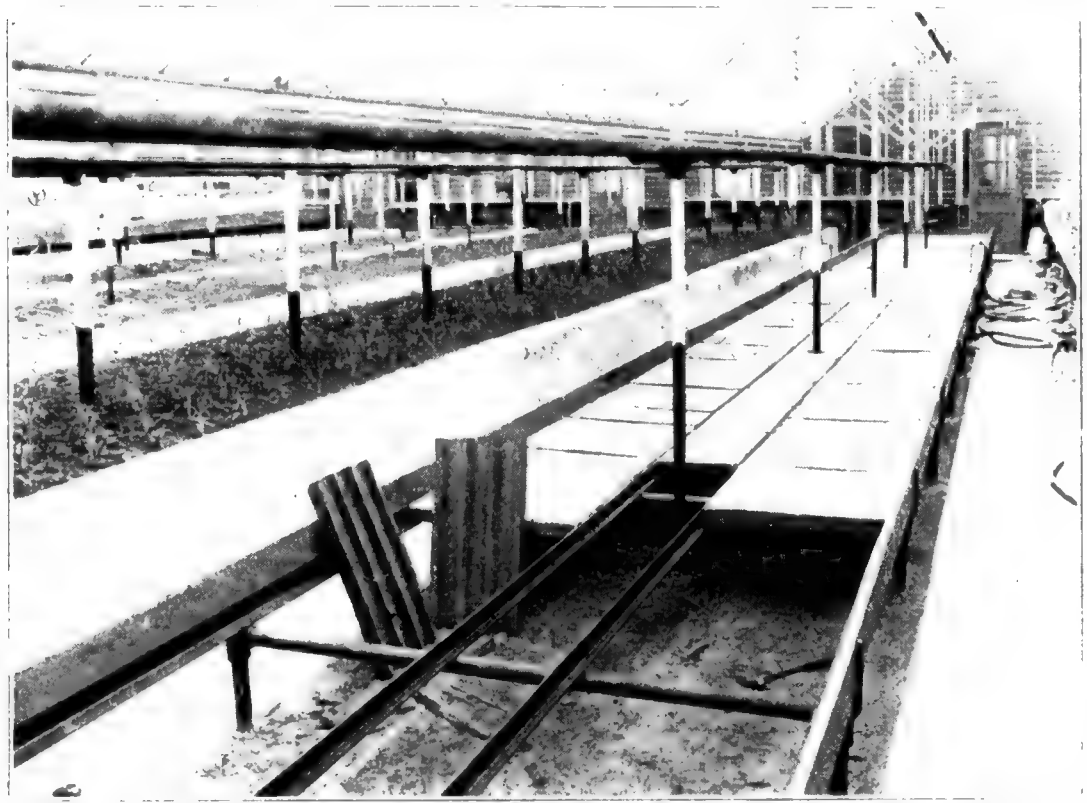
Jonathan Nash is with his wife for a month's stay in the Adirondacks.

Joseph Levy is home from the mountains, and John Seligman has been on the sick list here.

James McManus predicts the greatest orchid season ever known in quantity, variety and popularity. Headquarters always for the best things, he is adding roses this year to his repertoire.

Kessler Bros., the plantsmen, have a grand stock of ferns and palms at their greenhouses in Jersey ready for the September retail trade.

John Kral, of Moore, Hentz & Nash, has been yachting in his own boat for three weeks on the Hudson.



Manager Crawbuck, of Brooklyn, says business now shows progress every week and the outlook is for a quarter million year in 1910.

Mr. Reed, of Reed & Keller, was in Cincinnati with his greatest exhibit,

ports are set twelve inches in the ground in concrete, with two lines of 2-inch angle iron and two lines of 2-inch T-irons resting on the pipe supports to carry the tile bottom. The tile slabs are twenty-three and three-fourths inches long, twelve inches wide and one inch thick. There is a 6-inch iron spear point attached to the legs to support the side or facial boards. The height of the tile bench above the walk is eighteen inches, corresponding practically with the solid beds next described.

The walls for the solid beds are made of concrete, four inches thick and twenty-four inches high. Six inches of the wall is below and eighteen inches above the ground. The concrete was made of one part Portland cement, three parts sand and six parts broken stone or gravel, without reinforcement. Such construction work can be done by greenhouse men themselves. Where soft coal is burned the ashes after screening would take the place of sand and gravel in about the same proportions. The usual way to construct with ashes or cinders is to use one part Portland cement, three parts fine ashes, and six parts coarse cinders. We constructed our beds eighteen inches high for convenience in working them and gathering the flowers. If the beds are lower than this it is necessary to bend the back a good deal, which cuts into the time of the men when they are working with the plants.

The accompanying illustrations show the methods of construction more satisfactorily than mere description.

Method of Constructing Tile Bench With Iron Supports, U. S. Department of Agriculture.

Cost of Several Styles.

It is interesting to note the relative cost of these different types of construction. The cost of the wooden benches, constructed in the ordinary way, with the wooden supports, was 12½ cents per square foot of bed space. The cost of the raised beds with iron supports and tile bottoms was 17 cents per square foot, while the cost of the solid beds with concrete walls was 11 cents per square foot. The cost per plant was 9 cents for the wood benches, 8 cents for the solid beds with concrete walls, and 12 cents for the tile bottom benches with iron frames and supports. It thus appears that the solid beds with concrete walls cost less than the other two forms of construction and are, for all practical purposes, permanent.

The soil for the entire house was the same, being made from good, fine sod, composted at the rate of three parts soil and one part of well-rotted manure. The soil and manure were mixed thoroughly and worked over several times before being brought into the house. The raised wooden bench and tile bench were filled in the usual way. The solid bed was filled to a height of twelve inches with cinders, then two inches of straw was put on to prevent the soil from washing into the cinders. On top of the straw four inches of compost was added, this bringing it up flush with the top of the concrete walls.

Planting and Record-keeping.

With a view to getting definite information regarding the effect of the character of the bed, if any, on vigor and productiveness, the house was divided into five sections, a different variety of carnation being planted in each. Section one, for example, was planted to Winsor; that is, a portion of the wooden bench, constituting about one-fourth of the entire length, was planted to Winsor, the same variety being used for one-fourth of the tile bench and one-fourth of the solid beds. There were 1,126 Winsor plants involved in this experiment, a sufficient number to give us a fair commercial test.

The same methods were followed in the next section, which was planted with White Enchantress, the next section with White Perfection, the next with Beacon and the next with Rose-pink Enchantress.

A careful record was kept of the number of flowers cut from each section and the value of the cut estimated from the prevailing prices of carnations during the season.

Average Cut of Blooms.

Without going into the details of this work, it suffices to say that the records kept as described were for five months, including November, December, January, February and March, and show practically no difference in the yields from the beds of different construction, if anything the solid beds giving slightly better results.

Our records show, for example, that the average yield per plant from the Winsor plants on the raised wooden benches was fourteen flowers for the period indicated. The average yield on the solid beds was twelve flowers; on the tile bench eleven flowers per plant.

The average yield of the Beacon on the raised wooden bench was thirteen flowers, on the solid beds 13.9 flowers and on the tile bench 9.9 flowers.

The average yield of Enchantress on the raised wooden bench was ten flowers, on the tile bench ten and on the solid beds thirteen flowers.

It should be borne in mind that records were kept for five months only. If they had been kept the whole season through, the average yields would have been about doubled.

Difference in Vigor.

The plants in the solid beds, however, were decidedly more vigorous; the stems being stronger and the flowers larger than in either the wooden or tile benches, consequently were worth more money. This is due to the fact that there is much better drainage in the solid beds. The soil never becomes soggy when an oversupply of water is put on, as has been found to be the case with the wooden and tile benches. The plants in the tile bench were the least vigorous. It has been our experience that it takes about the same time to work the solid beds as the raised wooden benches. We have found, further, that the solid beds do not require watering as frequently as the other benches. It has been our practice to water the solid beds once a week, while it has been necessary to water the tile and wooden benches at least three times in two weeks.

The cuttings for this experiment were made about January 1 and potted in 2-inch pots when well rooted. Early in March they were shifted to 3-inch pots, where they were kept until the last week in April, when they were transferred to the benches. No field-grown stock was used in the experiment.

Experiments in Bulb Growing.

For a number of years the Bureau of Plant Industry has been giving attention to the possibilities of bulb culture in the United States. Various efforts have been made to encourage bulb growing in different sections and four or five years ago coöperative experiments were inaugurated in the state of Washington with several individuals, the work having for its object experiments and demonstrations in the matter of growing bulbs, especially Dutch bulbs, in that section of the country. Reports of this work have been made from time to time, but as it progressed it was seen that to secure the best results the government should have control of a certain amount of land upon which it could inaugurate with its own men a line of experimentation and demonstration that would necessarily have to last for several years.

The citizens of Bellingham, Wash. were very much interested in this work, and for the purpose of encouraging the department to undertake it near this town, placed at our disposal ten acres of land four miles from the city. The ground is well adapted to bulb culture and, in addition to putting it into thorough shape for the work in view, the

hamber of Commerce, through whom the ite was secured, also constructed the ecessary buildings, provided water for rrigation, and also furnished other nec-ssary equipment.

The department now has three experi-nced men in charge of this garden, car-ying on tests in the growing of various ulbs. Good stocks of the bulbs have een secured from Holland and planting as started last fall. Tests will be con-ucted so as to show the best methods f cultivating and manuring, the best oil conditions for each class of bulbs, tc. Careful records will be kept of the perations, so that when definite results ave been secured, publications may be repared and issued for the information f persons desiring to take up the work f propagating bulbs to supply the trade.

It will be well understood, of course, y the members of this society that time s an important element in work of this ature, and premature reports are to be voided. It is probably sufficient to say hat the department recognizes the im-portance of developing the bulb indus-ry in the United States and is putting forth its best efforts to this end. With the improvement of transportation facili-ies which are likely to come within the next few years, and with the gradual ad-justment and settlement of agricultural nd horticultural practices through the orthwestern section of the country, it is believed that more interest will be taken n intensive crops, such as bulb and seed growing. The latent possibilities for the levelopment of industries of this nature re present and as soon as it is demon-strated that the work is practicable and profitable, men with sufficient capital to naugurate it will not be wanting.

LADIES' BOWLING.

There was an unusually large attend nce of ladies at the bowling at Heidel-berg, in Kentucky, Wednesday afternoon, August 18. The high score prize, the Reinberg cup, was won by Mrs. Geo. Shaffer, Washington, who defeated Chi-ago's champion, Mrs. McKellar, by vir-tue of rolling a game of 157. Mrs. Shaf-fer also was first for most strikes. Mrs. McKellar won the Darling cup for second high and the prize for the most spares. There were handsome trophies for each of the ten highest in the following list:

TROY, N. Y. John Pickering has leased his plant to his two sons, who will carry on the business under the firm name of John Pickering's Sons.

NEW YORK.

The Market.

Convention week has been dull and unprofitable for a quarter of a century. This year is but a recurrence of the in-evitable. With the market overwhelmed with asters, gladioli and Hydrangea pan-iculata grandiflora, and no life whatever in the trade and almost every wholesaler and grower of the cities at Cincinnati—where they should be—what can you ex-pect but stagnation at home?

The asters and glads will soon be rel-egated to the "has beens." Roses are fast reaching perfection. Carnations begin to look natural again, and there is certainly no serious scarcity of anything. Dahlias are arriving and golden rod is in all the retail windows. It is a time for patience and mutual forbearance, an-ticipatory of the good times coming.

The Convention Special.

The special New York Second Empire convention train for Cincinnati left the Grand Central at 12:40 on Monday. It was a Scotch send-off, as John Donaldson and John Birnie were at the station to speed the New Yorkers on their way. It was a wet, cool morning and ideal weather for travel, almost too perfect to last. The rain storm continued all day, and its need and value were evident all through the lovely country between New York and Buffalo.

The New York Florists' Club, as usual, provided substantial comfort in fruit and liquid refreshments and the ladies especially were well cared for. Two Pull-mans were crowded with the happy throng, and the greatest harmony pre-vailed. Innocent games, learned discus-sions, Rochester and Montreal electioneer-ing, planning for the great flower show at Boston in 1911 and prophesying as to the winners in the contests for president and secretary kept everybody wide awake until the "wee sma' hours."

Captain Berry has a good team ready for the bowling tournament, including Messrs. O'Mara, Roehrs, Wilson, Manda and himself, with Traendly and Young in reserve.

At Utica Mr. Robinson, the Canuck from Montreal, boarded the train and talked the crowd blind in behalf of the city on the mountain, getting in his fine work ahead of Charlie Vick and his oc-tette of boomers at Rochester.

Patrick O'Mara joined the train at Syracuse, near which he and Miss O'Mara have been holidaying. Arriving at Rochester at 9 p. m., the big delega-tion boarded the special and a large crowd of florists and nurserymen were on hand to emphasize the desire of the Flower City for the next convention.

We are rather proud of our loyalty in the east and hope Cincinnati was satis-fied with our quality and numbers. We had just half as many as we hoped for and fewer ladies than expected, but it's a long way between cities, and next year at Rochester we will try to make it 200.

Various Notes.

Miss Mona Smedley, bookkeeper for J. K. Allen, is back from her holiday at Ocean Grove.

Miss Levitt, of A. J. Guttman's, is in the Catskills.

Russin & Hanfling are receiving their European importations.

W. E. Marshall has been recuperating in the company's yacht on Great South Bay, and has a fund of fish stories on tap. Mr. Wheeler, of the firm, is en-joying a sea voyage and will visit his old home in England.

Mrs. Sigmund Geller and family are in the mountains. Mr. Geller's purchases in Europe this year are arriving and are far in excess of any year in his busi-ness career.

A. L. Young has completed his jury duties and is enjoying his week-ends with his folks in the country.

Kessler Bros. have a fine stock of ferns and palms at their greenhouses in Jersey.

Harry Crawbuck, of Brooklyn, is send-ing fine asters to the market from his nursery at Summit, N. J.

W. H. Kuebler now has a supply branch with the cut flower business.

Monday evening, September 13, the first fall meeting of the New York Flo-rists' Club will be held in the rooms of the society, Grand Opera House build-ing, West Twenty-third street.

Anton Schultheis and family have been summering at Far Rockaway. Miss Schultheis is in New Hampshire and three of his sons are cruising in their own yacht up the Sound.

A. J. Guttman, the wholesale florist, is too busy again this year to attend the convention. Mr. Kemper, his part-ner, and Miss Guttman joined the New York special train at Buffalo.

Mrs. Charles Millang and daughter are summering at White Lake until October. Charles is busy preparing for a big violet season, and has sold the lease of his branch store on Sixth avenue for a $1,000 profit. His new store, in the Coogan building, on the ground floor, is now complete.

Because of illness in his family, the veteran J. K. Allen was unable to enjoy the convention as he had planned. George, his son, has returned from his three weeks' outing with his family in the Catskills. Nick Schreiner has been added to the force of salesmen.

A. L. Young has had a progressive year, and his enterprises seem to all have the microbe of success.

August Millang has added a thirteen acre tract to his possessions over on Long Island, with growing ambitions added to his wholesale and retail stores.

B. Rosens, the supply man, is making his annual western trip and expected to meet his customers at Cincinnati.

Mr. Blake has returned from Roches-ter, where he had a month of rest with his family, and Mr. Bonnet, of the same house, is now away in his yawl for a month of fishing.

Jonathan Nash is with his wife for a month's stay in the Adirondacks.

Joseph Levy is home from the moun-tains, and John Seligman has been on the sick list here.

James McManus predicts the greatest orchid season ever known in quantity, variety and popularity. Headquarters always for the best things, he is adding roses this year to his repertoire.

Kessler Bros., the plantsmen, have a grand stock of ferns and palms at their greenhouses in Jersey ready for the Sep-tember retail trade.

John Kral, of Moore, Hentz & Nash, has been yachting in his own boat for three weeks on the Hudson.

Manager Crawbuck, of Brooklyn, says business now shows progress every week and the outlook is for a quarter million year in 1910.

Mr. Reed, of Reed & Keller, was in Cincinnati with his greatest exhibit,

twenty-six big cases, and all his latest inventions, including his best novelty, the metal relief work in twenty-eight varieties.

Brooklyn sent Messrs. Phillips, Wilson and Miller, three of its brightest lights, to the convention.

Hugo Jahn is summering with his family at Patchogue, and Mrs. Sperwin, the retail florist, is at Blue Point.

David Mellis left on August 14 for Glasgow, because of the serious illness of his mother, now 87 years of age.

H. C. Reidel, of Guttman's, is spending three weeks with his family at the seashore. Mr. Hortenstein, of the same house, leaves next week for the mountains.

E. J. Deal, of the W. W. Johnston Seed Co., of Boston, England, is in the city; also Lawrence S. Payne, representing E. Andre Leroy & Co., Angers, France.

Romeo Guido, for several years with Thos. Young, Jr., is now with Charles Millang.

Mr. Hanfling has returned from a two months' trip to Europe, with many basket and other novelties. Russin & Hanfling now occupy the whole building and their trade is widening.

T. J. Wolfe, the florist of Waco, Tex., was a visitor last week at Boddington's.

Mr. Russin and Leo Rosen, of Russen & Hanfling, left this week for a holiday in the Catskills.

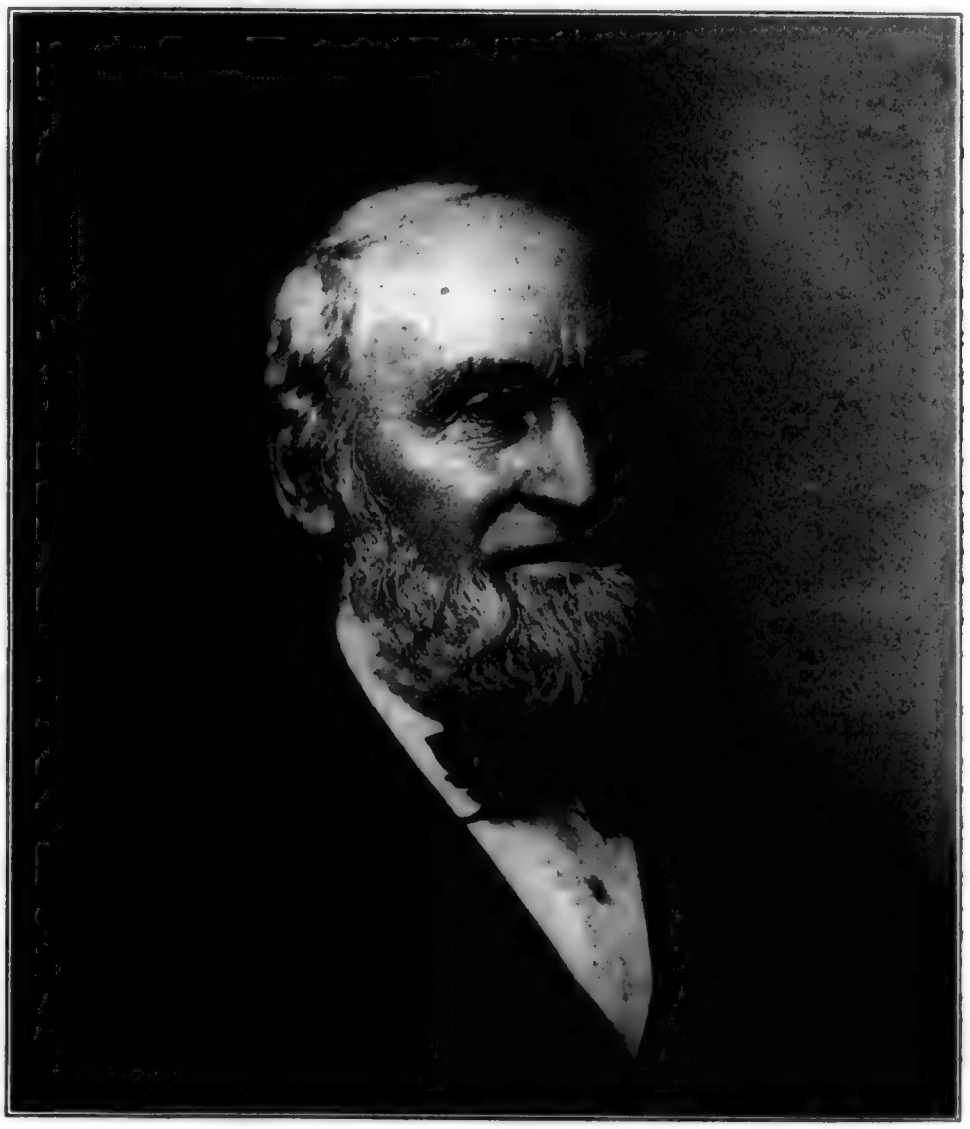
The demand for Aphine, the insect destroying discovery of George E. Talmadge, of Madison, N. J., is widespread. Its endorsement has been remarkable. An unsolicited editorial in Collier's Weekly is especially strong in its behalf, and Arthur Herrington, Albert M. Herr, Louis A. Noe, Brant-Hentz Flower Co., Aug. Belmont and the entomologists, J. B. Smith and E. B. Southwick, have much to say as to its efficiency.

The Smart Set Floral Co. has been incorporated by Henry Pearlman, 8691 Nineteenth avenue, Brooklyn, and others, with a capital of $5,000.

J. Austin Shaw.

OBITUARY.

William H. Gullett.



William Henry Gullett, head of the firm of W. H. Gullett & Sons, Lincoln, Ill., died of heart failure August 10. He had celebrated his seventy-seventh birthday on the preceding day. He had been operated on by Dr. J. B. Murphy, at Mercy hospital, Chicago, June 2, and was taken back to his home July 15. Until a few hours before his death, he appeared to be recovering.

He was born August 9, 1832, on a farm near Circleville, Pickaway county, O. While he was still in his early boyhood his family moved to Indiana. Soon afterward his father died, and then the young man began to work at the carpenter trade, which he followed when he removed to Lincoln from Carroll county, Ind., in 1856. He was a carpenter and builder until the opening of the Civil war, when he purchased a forty-acre tract of land and started the Lincoln Nursery. From 1876 to 1884 Walter Birmingham was associated with him in the business. This relationship was dissolved in 1884, and the reorganized firm was styled W. H. Gullett & Son, with Fred Gullett as the junior member. Fred Gullett retired in 1889, and C. E. and W. J. Gullett became members of the firm, which henceforth conducted business under the name of W. H. Gullett & Sons.

Mr. Gullett was married January 29, 1861, to Nancy Randolph, who survives him. Ten children were born to them. Three of these died in infancy, but the rest of the family still survive and three of them reside in Lincoln, namely: Charles Edward and Wilbur J., of the firm of Gullett & Sons, and Frank E. Gullett. The others are W. F. Gullett, of Deer Lodge, Mont.; Eugene R. Gullett, Lansing, Mich.; and Misses Anna Gullett, of Pontiac, and Ida B. Gullett, of Columbus, O.

W. H. Wright.

W. H. Wright, for many years a florist in Vicksburg, Miss., died at his residence, at First East and Monroe streets, in that city, August 10, at the age of 60 years. He was well known and highly esteemed in the city. He is survived by four children, Elmira, Mary, Tom and Douglass; also by two sisters, Mrs. Bidsong and Miss Eloise Wright, and by three brothers, Charles G., Douglass S. and H. C. Wright.

Wm. H. Gullett.

A. J. Pennock.

A dispatch from Denver, Colo., announces the death of A. J. Pennock. Mr. Pennock had been enjoying his vacation in the far western states, when he was stricken with spinal meningitis. Mrs. Pennock and a near relative were with him when he died. The announcement came as a terrible shock to Mr. Pennock's family and many friends in and near Philadelphia.

A. J. Pennock was born August 20, 1868, at Hoodland, Upper Darby, Delaware county, Pa. He was the son of Abram L. and Anna C. Pennock. Mr. Pennock began work as a florist about 1887, with his father's firm, A. L. Pennock & Son, at Lansdowne. Later he went into business for himself, building greenhouses near Lansdowne. Mr. Pennock was best known as a forcer of lily of the valley. He was so successful in producing high grade flowers as to earn the title of the "Valley King," his best stock attaining a wonderful degree of perfection in finish, in number and size of bells and in length of stem. Mr. Pennock was also a rose grower of note, specializing Killarney. During the last year or more he had devoted some attention to peonies and had gathered a fine collection.

Mr. Pennock married Elizabeth Naomi Woolman, November 1, 1906.

Mrs. Robert George.

Mrs. Robert George, wife of Robert George, of the Storrs & Harrison Co., Painesville, O., died Friday, August 13, and was buried August 16. The funeral was one of the largest in the town for years, as Mr. and Mrs. George and their son and his family all numbered every member of the community as acquaintance and friend. Mr. George was one of the organizers of the S. A. F. and an old schoolmate of E. G. Hill, of Richmond, who attended the funeral, with Adam Graham and Charles Hart, of Cleveland. The flowers were many and beautiful.

Valentine Fox.

Valentine Fox, aged 69, a well known gardener and long a resident of Wayne township, near Fort Wayne, Ind., died suddenly August 9. He was born in Baden, Germany, January 12, 1840, and came to this country as a boy of 15. He was for many years a prominent gar-

dener in his neighborhood, but had retired from active business in recent years. The surviving members of his family are the widow and seven children.

John Carson.

John Carson, a landscape gardener of Chicago, Ill., died at his home, 2212 Jackson boulevard, August 12. He was born in Ireland seventy-nine years ago. His widow, Anne, and four sons, Thomas, Frank W., John and Robert S., survive him.

Augustus Dittrich.

Augustus Dittrich, a florist at 3424 Kensington avenue, Philadelphia, met with a tragic death on the morning of August 14 by stepping in front of a trolley car at Broad street and Indiana avenue. Mr. Dittrich was 57 years of age.

SECRETARIES OF THE S. A. F.

In twenty-five years the S. A. F. has had only five secretaries, as follows:

E. G. Hill	1885 to 1886
Edwin Lonsdale	1887
W. J. Stewart	1888 to 1906
P. J. Hauswirth	1907
W. N. Rudd	1908 to 1909

BOWLING.

Thursday afternoon those not interested in other events were taken for a trolley ride by the Cincinnati florists, but most of the visitors looked in at the alleys where the bowling was in progress, and found ten teams battling for the championship with almost old-time enthusiasm. The alleys and arrangements were excellent. Following are the scores:

AMERICAN CARNATION SOCIETY

The American Carnation Society met at Cincinnati August 19, with President Herr in the chair and some twenty members present, including Messrs. Baur, Burki, Fisher, Patten, Dailledouze, Pierson, Hill, Heacock, Washburn, Poehlmann, Lemon, Witterstaetter and Gammage. A tentative program for the Pittsburg convention was framed up, and the premium list was revised. There was considerable discussion, mostly in favor of a combined meeting of the Carnation and Rose Societies.

AMERICAN ROSE SOCIETY.

The American Rose Society held a meeting August 19, with President A. F. Poehlmann in the chair, Secretary Hammond and a dozen members present. Routine matters concerning the investment of the permanent fund, medals, rules for the next exhibition, etc., were acted on. The subject of a joint meeting with the Carnation Society had favorable but not final consideration.

BAR HARBOR, ME.

Flower Show.

The second annual exhibition of the Bar Harbor Horticultural Society was held in the Building of Arts, August 14 and 15, and was a magnificent success. The exhibits were fully twice as numerous as a year ago, and in addition to the beautiful hall itself, the spacious lawns in front were utilized for many specimen hydrangeas in large tubs, as well as other plants, while in the rear a large awning over the lawn gave shelter to groups of plants, fruits and vegetables. It would be hardly possible to select a more beautiful site for a flower show, located well up on a mountain side, with mountains and mountain gorges, beautifully wooded, forming an amphitheater.

For the best group of stove or greenhouse plants arranged for decorative effect, John I. Kane, Kenneth McLean gardener, won with a charming arrangement in which gloxinias, crotons, Pandanus Veitchii, adiantums and fittonias were chiefly used. Second place went to John S. Kennedy, W. T. Burton gardener, who used fancy caladiums, Francoa ramosa, streptocarpus and tuberous begonias principally. Among specimen plants, Joseph Pulitzer, W. E. Ekstrom gardener, had a magnificent standard Allamanda Hendersoni, nine feet across, also Allamanda Williamsii, ten feet high. These secured for Mr. Ekstrom the first of the special prizes offered for the most meritorious exhibit in the show, second place going to John S. Kennedy for his splendid Muscat of Alexandria and Black Hambro grapes, and the third special to E. C. Cushman, John Remick gardener, for large specimen fuchsias and fibrous begonias, the latter being specimens in tubs, eight feet high and nearly as much across.

Gloxinias, tuberous begonias and achimines were largely and finely shown by J. S. Kennedy; A. C. Gurney, C. L. Shand gardener; Joseph Pulitzer, and others. Collections of greenhouse ferns were excellent, adiantums being remarkably good, including specimens averaging four to five feet across; A. C. Gurney, E. C. Cushman and Joseph Pulitzer were among the successful exhibitors of these. Such specimen fuchsias as those shown by E. C. Cushman and William Miller, from the Mount Desert Nurseries, are not to be met with at any other show in America.

There were over a score of big specimen hydrangeas arranged on the lawns, each carrying hundreds of heads of blooms, the best coming from Joseph Pulitzer.

Cut flowers, as usual, were abundantly shown, and of a high quality, such as cannot be produced at inland points. Sweet peas were superb, also phloxes, pentstemons, antirrhinums, aconitums, gladioli and annuals in great variety. Baskets arranged for effect were numerous. In the amateur class, Mrs. Louis B. McCagg won, with a beautiful arrangement of annual lupines and gypsophila. In the open class, Mrs. T. Campbell was in the lead, with a charming basket of pink Shirley poppies and pentstemons. Second place was taken by Mrs. J. T. Bowen, who used white physostegia, gypsophila and pale yellow snapdragons very effectively. Two tables were filled with the baskets.

Fruits were splendidly shown by George W. Vanderbilt, Edward Kirk gardener, J. S. Kennedy, A. C. Gurney and others, and there was also a large display of vegetables. Among the successful exhibitors in these and the plant and flower classes, in addition to those already named, were: George S. Robbins, J. F. Bunker gardener; William J. Schieffelin, T. F. Anthony gardener; Edgar Scott, A. Mitchell gardener; George S. Bowdoin, Bernard Morris gardener; Louis B. McCagg, Harrison Stiles gardener; Joseph T. Bowen, A. E. Chilman gardener; D. C. Blair, Eugene Mitchell gardener; Misses Morrill, C. W. Heath gardener; J. W. Auchincloss, W. Seaver gardener; Miss N. H. Dehone, N. V. Wilson gardener; Mrs. John Harrison, Washington Grant gardener; Henry L. Eno, W. T. Chandler gardener; Alfred M. Coats, John Brown gardener; and Mrs. Edward Coles, Edward McGranaghall gardener.

Among miscellaneous, not competitive, exhibits were orchids and foliage plants from Julius Roehrs Co., awarded a certificate of merit; a fine collection of gladioli from B. Hammond Tracy, Wenham, Mass.; gladioli and dahlias from W. W. Rawson & Co., of Boston; a beautiful group of gloxinias, specimen fuchsias, tuberous begonias, Nephrolepis Whitmani and new N. Milleri from Mount Desert Nurseries (William Miller manager); and a large vase of a new double scarlet dahlia from C. L. Shand. All these received certificates of merit. The State of Maine Entomological Department had a large exhibit of injurious insects, which proved of much interest.

Robert Cameron had charge of the arrangements for exhibitions. The judges were: Duncan Finlayson, T. D. Hatfield, W. N. Craig, E. O. Orpet, J. T. Clarke and A. P. Meredith. Among other visitors from a distance were: W. F. Dreer, Philadelphia; M. Fuld, Boston, Mass.; B. H. Tracy, Wenham, Mass.; William Miller, West Lynn, Mass., and A. C. Ritchie, Southboro, Mass. The weather was perfect on both days and the attendance large, everyone, seemingly, in Bar Harbor visiting it.

The Mount Desert Nurseries, George B. Dorr proprietor, tendered a banquet to visiting horticulturists and gardeners and florists at Bar Harbor on the evening of August 14, at the Keho Valley clubhouse, nearly 100 attending. William Miller acted as toastmaster, and speeches were made by all the visitors, as well as a number of local orators. The local horticultural society, formed in the fall of 1908, now numbers 200 members and is in a flourishing condition.

W. N. CRAIG.

EXETER, N. H.—John R. Perkins has resigned his position with W. S. Perkins, to take charge of E. E. Arnold's greenhouse, at Greene, R. I. William Toland has accepted a position as grower with W. S. Perkins; he worked at the same place twenty years ago. W. S. Perkins has been spending a few days with his son at Greene, R. I.

twenty-six big cases, and all his latest inventions, including his best novelty, the metal relief work in twenty-eight varieties.

Brooklyn sent Messrs. Phillips, Wilson and Miller, three of its brightest lights, to the convention.

Hugo Jahn is summering with his family at Patchogue, and Mrs. Sperwin, the retail florist, is at Blue Point.

David Mellis left on August 14 for Glasgow, because of the serious illness of his mother, now 87 years of age.

H. C. Reidel, of Guttman's, is spending three weeks with his family at the seashore. Mr. Hortenstein, of the same house, leaves next week for the mountains.

E. J. Deal, of the W. W. Johnston Seed Co., of Boston, England, is in the city; also Lawrence S. Payne, representing E. Andre Leroy & Co., Angers, France.

Romeo Guido, for several years with Thos. Young, Jr., is now with Charles Millang.

Mr. Hanfling has returned from a two months' trip to Europe, with many basket and other novelties. Russin & Hanfling now occupy the whole building and their trade is widening.

T. J. Wolfe, the florist of Waco, Tex., was a visitor last week at Boddington's.

Mr. Russin and Leo Rosen, of Russen & Hanfling, left this week for a holiday in the Catskills.

The demand for Aphine, the insect destroying discovery of George E. Talmadge, of Madison, N. J., is widespread. Its endorsement has been remarkable. An unsolicited editorial in Collier's Weekly is especially strong in its behalf, and Arthur Herrington, Albert M. Herr, Louis A. Noe, Brant-Hentz Flower Co., Aug. Belmont and the entomologists, J. B. Smith and E. B. Southwick, have much to say as to its efficiency.

The Smart Set Floral Co. has been incorporated by Henry Pearlman, 8691 Nineteenth avenue, Brooklyn, and others, with a capital of $5,000.

J. Austin Shaw.

OBITUARY.

William H. Gullett.

William Henry Gullett, head of the firm of W. H. Gullett & Sons, Lincoln, Ill., died of heart failure August 10. He had celebrated his seventy-seventh birthday on the preceding day. He had been operated on by Dr. J. B. Murphy, at Mercy hospital, Chicago, June 2, and was taken back to his home July 15. Until a few hours before his death, he appeared to be recovering.

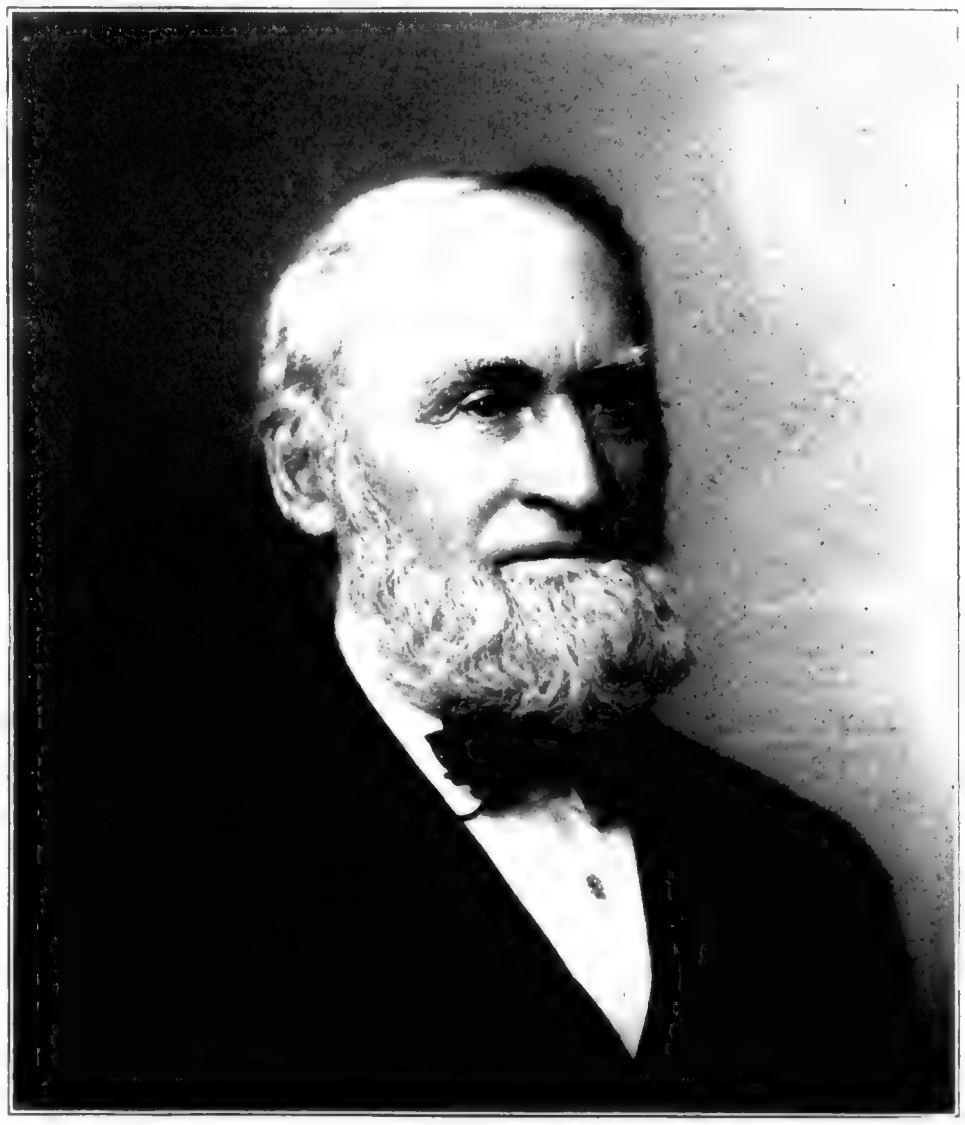
He was born August 9, 1832, on a farm near Circleville, Pickaway county, O. While he was still in his early boyhood his family moved to Indiana. Soon afterward his father died, and then the young man began to work at the carpenter trade, which he followed when he removed to Lincoln from Carroll county, Ind., in 1856. He was a carpenter and builder until the opening of the Civil war, when he purchased a forty-acre tract of land and started the Lincoln Nursery. From 1876 to 1884 Walter Birmingham was associated with him in the business. This relationship was dissolved in 1884, and the reorganized firm was styled W. H. Gullett & Son, with Fred Gullett as the junior member. Fred Gullett retired in 1889, and C. E. and W. J. Gullett became members of the firm, which henceforth conducted business under the name of W. H. Gullett & Sons.

Mr. Gullett was married January 29, 1861, to Nancy Randolph, who survives him. Ten children were born to them. Three of these died in infancy, but the rest of the family still survive and three of them reside in Lincoln, namely: Charles Edward and Wilbur J., of the firm of Gullett & Sons, and Frank E. Gullett. The others are W. F. Gullett, of Deer Lodge, Mont.; Eugene R. Gullett, Lansing, Mich.; and Misses Anna Gullett, of Pontiac, and Ida B. Gullett, of Columbus, O.

W. H. Wright.

W. H. Wright, for many years a florist in Vicksburg, Miss., died at his residence, at First East and Monroe streets, in that city, August 10, at the age of 60 years. He was well known and highly esteemed in the city. He is survived by four children, Elmira, Mary, Tom and Douglass; also by two sisters, Mrs. Bidsong and Miss Eloise Wright, and by three brothers, Charles G., Douglass S. and H. C. Wright.

A. J. Pennock.



A dispatch from Denver, Colo., announces the death of A. J. Pennock. Mr. Pennock had been enjoying his vacation in the far western states, when he was stricken with spinal meningitis. Mrs. Pennock and a near relative were with him when he died. The announcement came as a terrible shock to Mr. Pennock's family and many friends in and near Philadelphia.

A. J. Pennock was born August 20, 1868, at Hoodland, Upper Darby, Delaware county, Pa. He was the son of Abram L. and Anna C. Pennock. Mr. Pennock began work as a florist abo 1887, with his father's firm, A. L. Pe nock & Son, at Lansdowne. Later went into business for himself, buildi greenhouses near Lansdowne. Mr. Pe nock was best known as a forcer of li of the valley. He was so successful i producing high grade flowers as to ea the title of the "Valley King," his be stock attaining a wonderful degree perfection in finish, in number and si of bells and in length of stem. M Pennock was also a rose grower of not specializing Killarney. During the la year or more he had devoted some atte tion to peonies and had gathered a fi collection.

Mr. Pennock married Elizabeth Naom Woolman, November 1, 1906.

Mrs. Robert George.

Mrs. Robert George, wife of Robert George, of the Storrs & Harrison Co., Painesville, O., died Friday, August 13 and was buried August 16. The funeral was one of the largest in the town for years, as Mr. and Mrs. George and their son and his family all numbered every member of the community as acquaintance and friend. Mr. George was one of the organizers of the S. A. F. and an old schoolmate of E. G. Hill, of Richmond, who attended the funeral, with Adam Graham and Charles Hart, of Cleveland. The flowers were many and beautiful.

Wm. H. Gullett.

Valentine Fox.

Valentine Fox, aged 69, a well known gardener and long a resident of Wayne township, near Fort Wayne, Ind., died suddenly August 9. He was born in Baden, Germany, January 12, 1840, and came to this country as a boy of 15. He was for many years a prominent gar-

dener in his neighborhood, but had retired from active business in recent years. The surviving members of his family are the widow and seven children.

John Carson.

John Carson, a landscape gardener of Chicago, Ill., died at his home, 2212 Jackson boulevard, August 12. He was born in Ireland seventy-nine years ago. His widow, Anne, and four sons, Thomas, Frank W., John and Robert S., survive him.

Augustus Dittrich.

Augustus Dittrich, a florist at 3424 Kensington avenue, Philadelphia, met with a tragic death on the morning of August 14 by stepping in front of a trolley car at Broad street and Indiana avenue. Mr. Dittrich was 57 years of age.

SECRETARIES OF THE S. A. F.

In twenty-five years the S. A. F. has had only five secretaries, as follows:

E. G. Hill	1885 to 1886
Edwin Lonsdale	1887
W. J. Stewart	1888 to 1906
P. J. Hauswirth	1907
W. N. Rudd	1908 to 1909

BOWLING.

Thursday afternoon those not interested in other events were taken for a trolley ride by the Cincinnati florists, but most of the visitors looked in at the alleys where the bowling was in progress, and found ten teams battling for the championship with almost old-time enthusiasm. AMERICAN CARNATION SOCIETY

The American Carnation Society met at Cincinnati August 19, with President Herr in the chair and some twenty members present, including Messrs. Baur, Burki, Fisher, Patten, Dailledouze, Pierson, Hill, Heacock, Washburn, Pochlmann, Lemon, Witterstaetter and Gammage. A tentative program for the Pittsburg convention was framed up, and the premium list was revised. There was considerable discussion, mostly in favor of a combined meeting of the Carnation and Rose Societies.

AMERICAN ROSE SOCIETY.

The American Rose Society held a meeting August 19, with President A. F. Poehlmann in the chair, Secretary Hammond and a dozen members present. Routine matters concerning the investment of the permanent fund, medals, rules for the next exhibition, etc., were acted on. The subject of a joint meeting with the Carnation Society had favorable but not final consideration.

BAR HARBOR, ME.

Flower Show.

The second annual exhibition of the Bar Harbor Horticultural Society was held in the Building of Arts, August 14 and 15, and was a magnificent success. The exhibits were fully twice as numerous as a year ago, and in addition to the beautiful hall itself, the spacious lawns in front were utilized for many specimen hydrangeas in large tubs, as well as other plants, while in the rear a large awning over the lawn gave shelter to groups of plants, fruits and vegetables. It would be hardly possible to select a more beautiful site for a flower show, located well up on a mountain side, with mountains and mountain gorges, beautifully wooded, forming an amphitheater.

For the best group of stove or greenhouse plants arranged for decorative effect, John I. Kane, Kenneth McLean gardener, won with a charming arrangement in which gloxinias, crotons, Pandanus Veitchii, adiantums and fittonias were chiefly used. Second place went to John S. Kennedy, W. T. Burton gardener, who used fancy caladiums, Francoa ramosa, streptocarpus and tuberous begonias principally. Among specimen plants, Joseph Pulitzer, W. E. Ekstrom gardener, had a magnificent standard Allamanda Hendersoni, nine feet across, also Allamanda Williamsii, ten feet high. These secured for Mr. Ekstrom the first of the special prizes offered for the most meritorious exhibit in the show, second place going to John S. Kennedy for his splendid Muscat of Alexandria and Black Hambro grapes, and the third special to E. C. Cushman, John Remick gardener, for large specimen fuchsias and fibrous begonias, the latter being specimens in tubs, eight feet high and nearly as much across.

Gloxinias, tuberous begonias and achimines were largely and finely shown by J. S. Kennedy; A. C. Gurney, C. L. Shand gardener; Joseph Pulitzer, and others. Collections of greenhouse ferns were excellent, adiantums being remarkably good, including specimens averaging four to five feet across; A. C. Gurney, E. C. Cushman and Joseph Pulitzer were among the successful exhibitors of these. Such specimen fuchsias as those shown by E. C. Cushman and William Miller, from the Mount Desert Nurseries, are not to be met with at any other show in America.

There were over a score of big specimen hydrangeas arranged on the lawns, each carrying hundreds of heads of blooms, the best coming from Joseph Pulitzer.

Cut flowers, as usual, were abundantly shown, and of a high quality, such as cannot be produced at inland points. Sweet peas were superb, also phloxes, pentstemons, antirrhinums, aconitums, gladioli and annuals in great variety. Baskets arranged for effect were numerous. In the amateur class, Mrs. Louis B. McCagg won, with a beautiful arrangement of annual lupines and gypsophila. In the open class, Mrs. T. Campbell was in the lead, with a charming basket of pink Shirley poppies and pentstemons. Second place was taken by Mrs. J. T. Bowen, who used white physostegia, gypsophila and pale yellow snapdragons very effectively. Two tables were filled with the baskets.

Fruits were splendidly shown by George W. Vanderbilt, Edward Kirk gardener, J. S. Kennedy, A. C. Gurney and others, and there was also a large display of vegetables. Among the successful exhibitors in these and the plant and flower classes, in addition to those already named, were: George S. Robbins, J. F. Bunker gardener; William J. Schieffelin, T. F. Anthony gardener; Edgar Scott, A. Mitchell gardener; George S. Bowdoin, Bernard Morris gardener; Louis B. McCagg, Harrison Stiles gardener; Joseph T. Bowen, A. E. Chilman gardener; D. C. Blair, Eugene Mitchell gardener; Misses Morrill, C. W. Heath gardener; J. W. Auchincloss, W. Seaver gardener; Miss N. H. Dehone, N. V. Wilson gardener; Mrs. John Harrison, Washington Grant gardener; Henry L. Eno, W. T. Chandler gardener; Alfred M. Coats, John Brown gardener; and Mrs. Edward Coles, Edward McGranaghall gardener.

Among miscellaneous, not competitive, exhibits were orchids and foliage plants from Julius Roehrs Co., awarded a certificate of merit; a fine collection of gladioli from B. Hammond Tracy, Wenham, Mass.; gladioli and dahlias from W. W. Rawson & Co., of Boston; a beautiful group of gloxinias, specimen fuchsias, tuberous begonias, Nephrolepis Whitmani and new N. Milleri from Mount Desert Nurseries (William Miller manager); and a large vase of a new double scarlet dahlia from C. L. Shand. All these received certificates of merit. The State of Maine Entomological Department had a large exhibit of injurious insects, which proved of much interest.

Robert Cameron had charge of the arrangements for exhibitions. The judges were: Duncan Finlayson, T. D. Hatfield, W. N. Craig, E. O. Orpet, J. T. Clarke and A. P. Meredith. Among other visitors from a distance were: W. F. Dreer, Philadelphia; M. Fuld, Boston, Mass.; B. H. Tracy, Wenham, Mass.; William Miller, West Lynn, Mass., and A. C. Ritchie, Southboro, Mass. The weather was perfect on both days and the attendance large, everyone, seemingly, in Bar Harbor visiting it

The Mount Desert Nurseries, George B. Dorr proprietor, tendered a banquet to visiting horticulturists and gardeners and florists at Bar Harbor on the evening of August 14, at the Keho Valley clubhouse, nearly 100 attending. William Miller acted as toastmaster, and speeches were made by all the visitors, as well as a number of local orators. The local horticultural society, formed in the fall of 1908, now numbers 200 members and is in a flourishing condition.

W. N. CRAIG.

EXETER, N. H.—John R. Perkins has resigned his position with W. S. Perkins, to take charge of E. E. Arnold's greenhouse, at Greene, R. I. William Toland has accepted a position as grower with W. S. Perkins; he worked at the same place twenty years ago. W. S. Perkins has been spending a few days with his son at Greene, R. I.

THE REVIEW is quite the goods and hits the spot with every issue.—W. G. TENCH, Columbus, O.

PADUCAH, KY.—C. L. Brunson has been appointed assistant superintendent of the department of plants and flowers at the fair to be held September 13 to 18.

ASHLAND, KY.—W. H. Carp says this has been an unusually good season. He attributes many of his sales to the spirit of improvement aroused by the Ashland League for Civic Improvement. As a result many want to beautify their lawns and most of them are succeeding in doing so.

Advertisements must reach us by Wednesday morning to insure insertion in the issue of the following day, and earlier will be better.

Entered as second class matter December 3, 1897, at the post-office at Chicago, Ill., under the act of March 3, 1879.
This paper is a member of the Chicago Trade Press Association.

RESULTS.

We give them. You get them.
We both have them.

THE gentleman whose portrait adorns the title page of this issue of the REVIEW is a member of the S. A. F., all right.

FIELD-GROWN carnation plants are scarce in the middle west, but may be fairly plentiful a little later, after the growers who do not now care to sell finish planting.

FEW trade organizations ever have had so complete and detailed accounting of funds as was presented at Cincinnati by Secretary Rudd and Treasurer Beatty, of the S. A. F.

THE orders for peony roots for fall delivery are not coming in as rapidly as the big growers would like, and there is alarm in certain quarters at the prospect that the sales may show a big falling off this year. Among those who sell at retail by means of advertising in the gardening papers the number of inquiries for catalogues is as great as usual, but the orders are not coming back as promptly as they should.

IT is well determined in law that where merchandise received is of a character that shows its unsatisfactory nature was due to the shipper, and not to negligence of the transportation company, it need not necessarily be returned in order to establish a claim for credit or refund—if proof of worthlessness at time of shipment can be given, one may refuse to pay for plants he has put on the dump, or he may get his money back by process of law, in case he has paid in advance. But the best thing to do if one orders what is described as "nice stock" that turns out to be rubbish, as once in a while will happen, is not to throw the plants away and then write an angry letter demanding the money back; instead, send a telegram: "Stock is unsatisfactory; held subject to your order; refund required." Dissatisfaction really is rare when one considers the unstandardized character of the merchandise and the differences of opinion of men, especially between buyers and sellers.

SOCIETY OF AMERICAN FLORISTS.

Registration of Odontoglossum Crispum.

Public notice is hereby given that the Julius Roehrs Co., of Rutherford, N. J., offers for registration the plant described below. Any person objecting to the registration of this plant or to the use of the proposed name, is requested to communicate with the undersigned at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

Description — Odontoglossum crispum, blotched variety. Flowers pure white, well formed, large lip. Petals, sepals and lips beautifully blotched, claret purple extending to the extremities. An exceedingly distinct form of Odontoglossum crispum. Name—Odontoglossum crispum, variety, E. B. Dane.

W. N. RUDD, Sec'y.

August 13, 1909.

Registration of Canna.

Public notice is hereby given that Vaughan's Seed Store, of Chicago, Ill., offers for registration the plant described below. Any person objecting to the registration of this plant or to the use of the proposed name is requested to communicate with the undersigned at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

Description—Vigorous plant, foliage green, stalk and bracts brown; large flower, brilliant scarlet. Spikes numerous, free flowering, carrying the flowers well. Name—This variety came from Vilmorin, Andrieux & Co., Paris, France, under the name Philadelphia, but as one Philadelphia already exists in this country, we have taken the liberty of naming this New Chicago.

W. N. RUDD, Sec'y.

August 13, 1909.

FOUR-FIFTHS OF IT.

There are many factors which may influence an advertiser part of the time, but it is actual results which influence him most of the time.

In regard to your paper, I will say that while I advertise in several other trade papers, I find that eighty per cent of my business comes through the columns of the Review.—W. Z. Purnell, Snow Hill, Md., August 12, 1909.

CHICAGO.

The Great Central Market

Last week was the quietest of the summer; business has been running downhill steadily since August began. This week marks the hiatus, for the convention is on. A larger number than at any other date in the year are out of town and things are being permitted to take their own course. The rule is that everyone puts his shoulder to the wheel after the S. A. F. meeting.

There has been extremely little good stock in the market. The greatest factors in point of quantity are gladioli and asters. The glads, while a few really good have been offered, have averaged below grade because of the dry weather. They have been received in enormous quantity, with only a few expanded flowers at the base of the spike and a tall, twisted point of tight buds; not even the Greeks want such stock. As for asters, after the early varieties were out there came a few days when there were exceedingly few that would meet the requirements of first-class stores. There were many thousands of short and open-centered flowers, but hardly anything of really first-class quality. Just as the asters began to improve the heavy rains on August 12 and 14 did injury to all outdoor flowers; temporary injury,

There is an Important

Convention

In Progress at Our Place Every Day in the Year

The Trade Exhibit includes every seasonable Cut Flower of Special and other grades, in large quantity—and all Greens. The attendance embraces all the buyers—the locals attend in person; our order clerks represent the buyers from out of town, for whom they select and ship large quantities of stock.

We cordially invite a visit or trial by any who do not now avail themselves of our facilities

Beauties

We can supply any quantity of any length and the quality is excellent for mid-summer. This house is absolutely **Headquarters** on Summer Beauties and we want everybody to know it.

Kaiserin—Killarney

If you want the best of white roses, order Kaiserin of us. It is **THE** hot weather rose. Our supply is large. Our Killarney are good. This is the best pink rose for summer, and we can take good care of every order.

MAID, BRIDE and RICHMOND, good as summer affords.

Gladioli

We have an enormous supply of the three varieties that are sellers—America, Augusta and Mrs. Francis King—each the best of its color. The stock is fine.

ASTERS

It has been a poor season for Asters, but the late sorts are now coming in and are better than the earlies.

OUR Asters are the best the market affords.

We have a large supply that are good for the season. Let us have your orders.

Lilies

Order Easter or Auratum lilies. They are among the best flowers now in market. Our supply is adequate.

Green Goods

The best Ferns in the market, $1.00 per 1000. Long heavy strings of Smilax, Farleyense and Adiantum.

Fancy Valley Always on Hand

that is, for the outdoor stock was sadly in need of rain and should now improve rapidly. There are already some much better asters coming in, the midseason sorts. Saturday, August 14, there was a little flurry because of the shortage of white, but it was soon over.

The carnations now are practically limited to the outdoor stock and are short-stemmed and small. Since the rain there has been an improvement in these, but they are slow sale; asters are cheaper for funeral work, and that is about all the carnations are good for.

The supply of Beauties is not so great as the demand, even though quality generally is nothing to brag about. Kaiserin, Killarney, White Killarney and My Maryland are of excellent quality and selling well in a limited way. Bride and Maid are not much wanted. There is a great deal of mildew, as usual at this season of the year. Strange to say, some of the best growers appear to always be afflicted at this date, or a little later.

There continue to be large supplies of Easter lilies and all the auratums that are needed. Lancifolium lilies are quite abundant; album sells moderately well, but rubrum seems little wanted.

Peonies are out of it; a few still are on hand, but nobody wants them. Golden Glow chrysanthemums are seen in considerable quantity. They are in only limited demand.

There is a steady but not heavy sale for valley. Adiantum seems more largely used. Other green goods are as usual.

Chicago to Cincinnati.

When the special train for Cincinnati pulled out at 2:30 Monday afternoon it carried the liveliest party the Chicago Florists' Club ever has taken to a convention. The abundance of gladioli and other outdoor stock in the market gave the opportunity for lavish decoration. President Valentine and his bodyguard from Denver were on the train, and there were many others from the west and north. P. J. Foley had made arrangements so that there was something doing every minute. Some of the Chicago Indians, of historic fame, have gone to the happy hunting ground and age is telling on other members of the tribe, but for this occasion they renewed their youth and playfulness. There was constant entertainment, varied in character. The Florists' Club and others had provided refreshments in plenty.

As the train proceeded Indiana florists were taken on at nearly every town. The club has never had a more successful excursion.

The steam calliope attached to the train awakened the countryside and attracted big crowds at every stop.

In Kenwood.

The Kenwood district, in which Johnson & Chronis, at Lake avenue and Forty-seventh street, and the Kenwood Floral Co., at 192 Forty-seventh street, are located, is one of the best in town. There is not much doing now, but both stores find it advantageous to keep up a good show, with large stocks of palms and ferns and a variety of cut flowers.

Various Notes.

The John C. Moninger Co. is having an extremely busy season, but found time to lay in a stock of souvenirs for Mr. Rupp to hand out at the convention. One was a pocket mirror and the other a good-luck coin for a pocket-piece. It looked like a 20-dollar gold piece and had on it a swastika, a horseshoe, a four-leaf clover, a wishbone and some other emblems of luck.

John Zech was able to spend only one day at the convention. He went down Wednesday night, bowled Thursday and returned the same evening.

The Greek who operates at the corner of State and Monroe streets calls his place the Busy Bee Flower Store. He buys his flowers, all that the wholesaler has, when he can name the price, and his fruit he buys by the carload at the fruit auction.

The trade in Chicago includes practically every nationality. There even are two colored men in the business. T. J. Johnson has had a regularly equipped store at 399 Thirty-first street for six years and has done a steadily increasing business. Clarence Powers, another colored man, also does business on the south side.

E. H. Hunt is handling a line of glass vases made by Macbeth, the man whose lamp chimneys won't break.

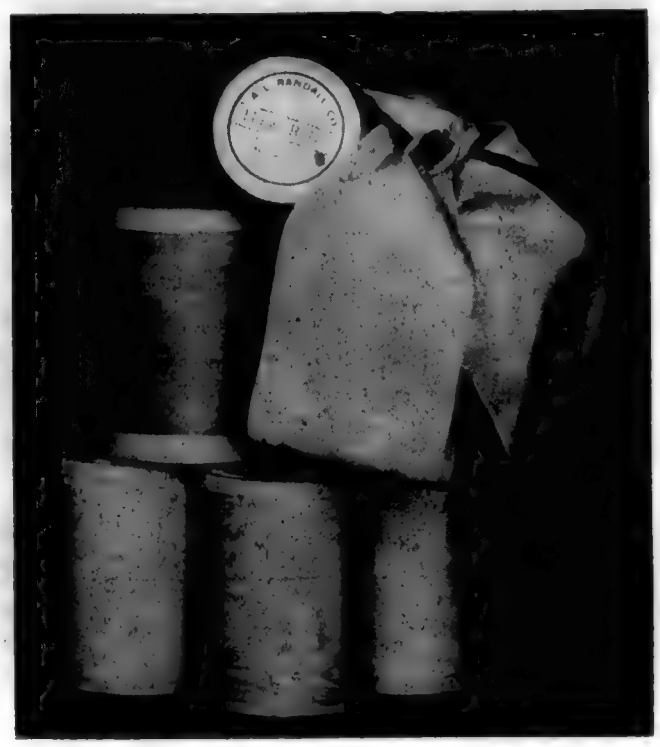
Mention The Review when you write

The George M. Garland Co. has had the largest season in its history. The truss construction has been a large factor.

Fred G. Heinl, of John G. Heinl & Son, Terre Haute, Ind., was in the city for a short time Tuesday. He was on his way home from the Seattle exposition and other points of interest on the Pacific coast, where he has been for the past two months.

D. B. Hazen, of Batavia, Ill., called on the trade Wednesday. Mr. Hazen only recently returned from Orlando, Fla., where he has been the past two years.



George F. Hughson, who was manager of the John Davis Co., is still selling steam specialties to the florists. He now does business as the Hughson Steam Specialty Co.

Nic Kruchten is figuring on discarding his steam pump and putting in an electric motor and pump to supply water in

THIS IS THE PLACE TO BUY YOUR

Florists' Supplies

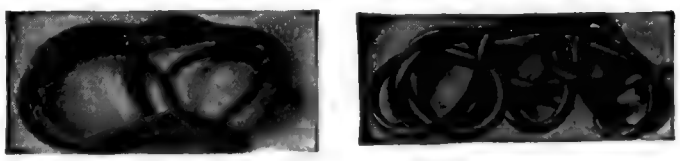
We have a complete stock of all Staple Supplies, and one of the largest lines of novelties in the United States. We manufacture, import, or buy in largest quantities for spot cash, so that **we are in a position to meet all competition** on prices on the same quality of goods. Call on us for anything you need in Supplies as well as Cut Flowers, and you will find we mean just what we say when we tell you we are able and anxious to serve you **promptly** and well. Write us about something you need.

Ribbons and Chiffons

We carry an immense line of Ribbons and Chiffons—we can supply anything you need and can do it at the right price. In fact, buying in what are known as "loom orders," we can sell at the prices smaller jobbers have to pay—we can **compete** with any Ribbon House in the United States.

Cut Flower and Design Boxes

We want you to give us at least a part of your order for boxes this season—do it now, and we have enough confidence in our box to feel sure you will re-order. Our box is the heaviest on the market, but it doesn't cost any more than many inferior lines. We have a nice stock of half tone cuts for printing boxes—no charge for printing on orders for 1000 or more boxes.



Violet Boxes

You will soon be needing these again, and we want your order. Our line of Violet Boxes includes all prices.

Write for circular quoting prices on the full line.

"Revero" Hose

The Hose you have been looking for.
Light. Strong. Durable.

OLD STYLE HOSE — **Note the Kinks**

"REVERO" HOSE — **Non-kinking**

Revero Hose furnished in any lengths desired. This is a 2-ply hose.

his range of houses. An electrical engineer in whom he has confidence tells him that by investing $300 to $400 in making the change he can save fifteen to twenty per cent of the cost of pumping his water. It will not be necessary to fire up in the summer when he wants water.

H. N. Bruns now has two boys and two girls. One of the boys is just 21—days old.

Frank Oechslin has returned from a trip east to see what the plantsmen are doing.

Henry Wietor and Gus Alles are spending a few days this week in the vicinity of Port Washington, Wis.

E. H. Hunt is well represented at the convention, C. M. Dickinson being present with two salesmen.

Wietor Bros. are nearly through planting carnations. They have benched only eight varieties, three of them Enchantress sorts, three whites, two pink and one red. The varieties are Enchantress, White Enchantress, Rose-pink Enchantress, White Perfection, Lawson, White Lawson, Winsor and Victory.

W. E. Lynch spent a few days in Michigan the first of this week.

J. A. Mendel opened his new store at 578 West Eighteenth street, July 25, only three blocks from his other store, at 422 West Eighteenth street. He had six people at work in the old store and could get no more space there. The new store is now headquarters.

Frank Ayers, of McKellar's, was as brown as an Indian after his outing in Canada.

Frank Williams is ill with pleurisy, under the care of a trained nurse.

Mrs. P. L. McKee is convalescing nicely from her recent operation.

Percy Jones says the last of Klehm's peonies are in as good shape as a month ago, but nobody wants peonies now.

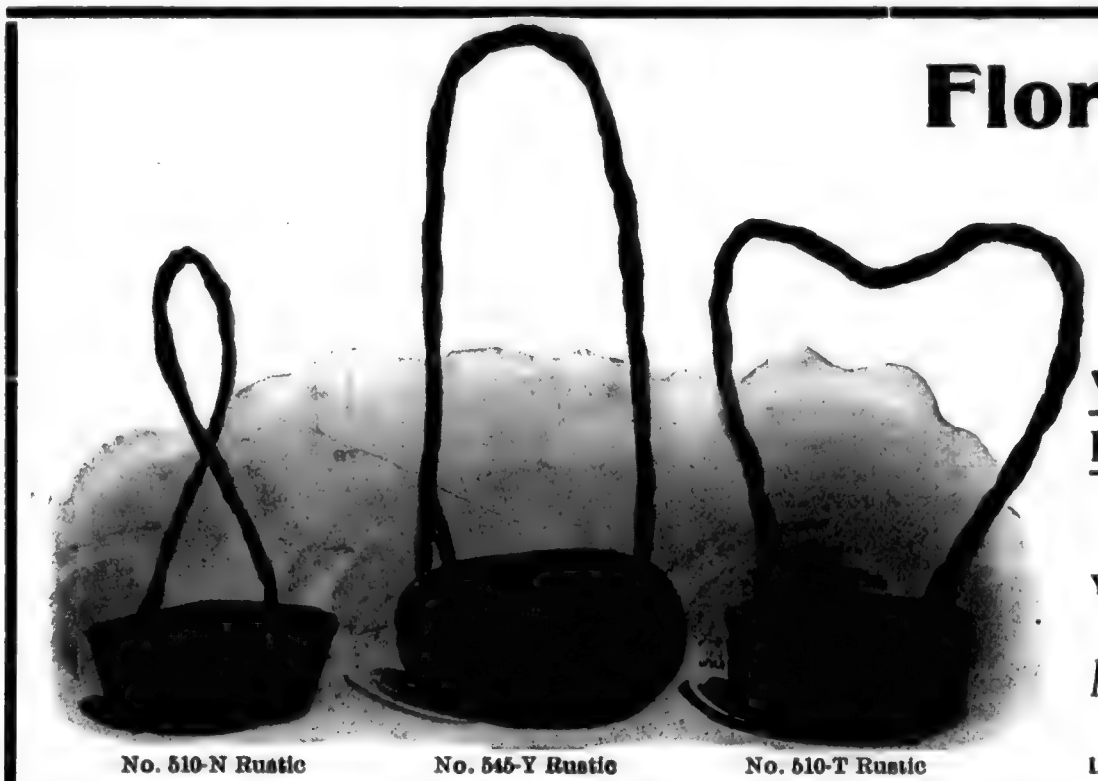
Bassett & Washburn say summer business is good, especially on roses.

The A. L. Randall Co. says supply orders are already coming in well and the prospect is for a big fall trade, especially west.

Walter H. Demmler, of Eau Claire, Wis., is working at Bassett & Washburn's, Hinsdale, getting the latest ideas on rose culture. He attended the convention at Cincinnati this week.

The A. Dietsch Co. says the present season's building beats all records for the twenty-seven years they have been manufacturing greenhouse material.

August Poehlmann feels that the summer results with My Maryland justify his confidence in it.



A. C. Spencer is back at Peter Reinberg's after his fortnight's trip east.

Winterson's Seed Store filled its windows with French bulbs last week.

A. C. Kohlbrand, of E. C. Amling's, formerly lived in Cincinnati. He is there this week and will remain several days after the convention. John Michelsen has returned from his outing.

Phil Schupp is tied down; Miss Wolf, who looks after the office detail at J. A. Budlong's, is on vacation.

Charles Handel, who has a five years' lease on Mrs. A. M. Schafer's greenhouses at 229 Balmoral avenue, has his stock of Richmond and Killarney in fine shape, in spite of difficulty in securing needed help. He expects to begin cutting next month. Mrs. Schafer has been

laid up for several weeks with a badly-sprained knee.

Richard Schmidt, employed with Frank Oechslin, left for the convention at Cincinnati Saturday, August 14. He was expecting to spend Sunday with his people in Covington.

Among the visitors last week were Frank Otto, of Winnetka, Ill.; J. J. Le Borious, Duluth, Minn.; Mr. Tjenswald, of the Superior Floral Co., Superior, Wis.; C. M. Weaver, Paw Paw, Mich.; E. W. Plater, Carbondale, Ill.; George Kranz, Muscatine, Ia., who is building two more houses.

Early this week the town was full of florists bound for the convention.

BALTIMORE.

The Market.

The changes in the market are often kaleidoscopic. Last week there was a paucity of flowers; this week there is an abundance which overcrowds all accommodations and meets the demand, which had sunk to a comparatively low point, many times over. Early asters are coming into the market in great quantities and much hardy stock is now in evidence, but it shows the effects of the exceedingly dry spell. Carnations are nearly all benched and are in good shape, considering the very dry season.

The annual exodus of the city population to the country, the seashore and the mountains is at its zenith now, and though it is not so large and general as usual, it has a vast influence on current business

Various Notes.

Wm. S. Manning, superintendent of the parks in Baltimore, has been selected to head the national organization of Public Park Managers. He was elected at its session August 12, at Seattle, Wash., where the convention was held.

The local delegation to the convention left Union station 2:45 p. m., Monday, August 16, and had a special car with the Washington boys. Among those from Baltimore were Isaac H. Moss, Geo. S. Kalb, J. H. Kaplinger, Mr. Klutch, Chas. L. Seybold, Henry M. Lehr, Harry Quick, R. Vincent, Jr., and sons, John J. Perry and J. W. Boom. Q.

Michell's Giant Pansy Seed

Our Giant Strain of Pansies should not be compared with the ordinary Giant Trimardeau, as the seed we offer will produce flowers of much heavier texture.

SPRINGFIELD, MASS.

Current Comment.

Mark Aitken has recently purchased twenty-seven acres of land in Agawam, just across the river from this city. Plans are being drawn for him by the Lord & Burnham Co. for 50,000 feet of glass to be started early next spring. His present greenhouses in the city are too small to supply his need, and will be removed, if not sold by next summer.

N. F. Higgins has just completed a new greenhouse, 28x100, which is being planted to carnations. Plants in the field have never done better and are of extra size. A large steel boiler is being installed, capable of taking care of the future growth of the plant, as Mr. Higgins intends adding another house in the spring. A house of mums, 25x150, is looking well and would be hard to equal hereabouts. Some newer varieties are being tried. Golden Glow, Virginia Poehlmann and Golden Chadwick are looking promising, but Pacific Supreme leads them all; a bench three and a half feet high, just in bud, is a sight worth seeing. No doubt this variety will take the place of Glory of Pacific here.

William Schlatter & Son are completing a house 48x120, with a lean-to 18x48, which will be planted to carnations and miscellaneous stock.

J. W. Adams & Co. have just completed a storage house of concrete and are now working on a greenhouse, 25x100, which will be planted to carnations when completed.

Osterman & Steele have made extensive alterations in their store on State street, which improve it greatly. M. R. E.

CHAMPAIGN, ILL. — George Franks is again on duty, after a three weeks' holiday.

You know what **hot weather** does to stock. Well, Milwaukee is well favored, as we have no very hot weather here, and in consequence stock of all kinds is still in good shape. Big cut of fancy Carnations, Roses and Giganteums. Try a few shipments and be convinced.

MILWAUKEE.

The Market.

With the last week business assumed its usual summer gait, which was quite an improvement over the week previous. The falling off in carnations makes receipts light, and consequently the other available stock, such as roses, gladioli, lilies, etc., comes to the front. Even the outdoor grown asters, which are not of a good quality, are cleaned up. So all good stock of any kind is a profitable proposition at this time. The green goods market is well supplied.

With plenty of rain Saturday and Sunday, August 14 and 15, outdoor crops again put forth a bold front and there is now hope for the asters of the later varieties. The extreme heat on Sunday—for it was 95 degrees—was brought to a sudden end by a heavy rain and wind storm, which played havoc all around, especially with the flowering beds in our public parks.

Most of the wholesale carnation growers say that they finished planting by August 15. The stock, while not quite as large as might be desired, is in a cleaner condition than last year, with no red spider to speak of.

Club Meeting.

The club meeting August 12 was attended by an unusually large number, which was a real surprise to the regulars.

Messrs. Eschrig and Kaufmann were elected as members.

The entertainment committee once more called attention to the club's picnic on Sunday, August 22, at Crystal Spring park, and promised all a good time. Many tickets were disposed of. Various events will take place, for which many valuable prizes will be offered. So do not fail to attend.

The flower show committee reported that it had visited the Auditorium, now under construction, and found that, owing to the big floor space, all exhibits could be displayed to good advantage.

Various Notes.

The M. A. McKenney Co. reports business good—about the same as in former seasons.

Mrs. Ennis, in speaking for the Wisconsin Floral Co., says that transient business is fine, the call being mainly for Beauties and carnations. She also says that it seems the people always want what is not in stock. Funeral work here has also kept up pretty well.

Wm. Zimmerman is one who believes in having an attractive window display. Last week it was made up of asters, gladioli, lilies and ferns. He says there is something doing all the time.

Miss Rose Semler, of the Edlefsen-Leidiger Co., returned August 16 from a two weeks' vacation, spent at Elkhart lake.

Gust Rusch is again back of the counter at Holton & Hunkel's salesroom.

The following left Milwaukee August 16 at 9 a. m., for Chicago, to join the florists from the latter city on their way to the convention at Cincinnati: F. Holton, N. Zweifel, Gust Mueller and C. C. Pollworth. Mr. Pollworth intends to spend a week in the east, starting from Cincinnati the night after the close of the convention.

Eschrig & Kaufmann is the name of the new firm that is erecting 12,000 feet of glass on the south side, for pot and bedding plants. E. O.

WASHINGTON.

Interest in the automobile floral parade, set for September 30, continues to increase. The parade is to be under the auspices of the Chamber of Commerce, but the local Florists' Club is actively coöperating to make the affair in every way a success. Isaac Gans is chairman of the parade, and predicts the biggest kind of a success.

F. H. Kramer, president of the Florists' Club, is doing all that can be done to have two classes of cars, with two sets of judges, created. The idea is to have one class for cars decorated with natural flowers, to be judged by some outside florists, and another class for cars decorated with artificial flowers and other materials, to be judged by a different group of men.

The Florists' Club offers a fine cup for the best car decorated with natural flowers, and will enter a car to help the cause along. This car will, of course, not compete for the cup.

Niessen's News Column

What Is Worth Having

in cut flowers at this season of the year, you will find here, and as good as they are grown. We have plenty of CHOICE ASTERS, GOOD BEAUTIES in all grades, a good supply of KAISERIN and MARYLAND roses, and the BEST PEAS in town. We will fill your cut flower order in a way that will please you.

Field-grown Carnation Plants

We have to offer, subject to being sold, the following plants:

PINK

500 Winsor
10,000 Enchantress
2,000 Rose-pink Enchantress
2,500 Afterglow
400 Aristocrat
2,000 Joost

WHITE

500 Sarah Hill
3,000 White Perfection
1,000 Queen Louise
5,000 Queen
4,000 Boston Market
1,000 Lady Bountiful
1,100 Lieutenant Peary

MISCELLANEOUS

1,800 Beacon, red
500 Harry Fenn, crimson
1,000 Harlowarden, crimson
500 Irene, yellow
2,000 Red Seedling

These plants we guarantee to be healthy, strong stock, free from disease. Every lot of plants, before we offer them to the trade, are personally inspected in the field. We know that we can recommend these plants, and that they will give you entire satisfaction. Our list is constantly changing, and if interested, let us know the quantity you want, and we will quote you prices.

PHILADELPHIA.

The Rising Eastern Market.

There is no business; still, to be absolutely fair, a few lines must be given to a description of cut flower conditions. There is a limited demand for good flowers. This is proved by the extremely high price that cattleyas command. There are not many of them, not enough to fill all orders at $9 per dozen. Valley is in fair demand, especially high grade stock.

The rose market is in bad shape. All the poor and some of the better stock accumulate. A few really fine carnations have appeared—white, almost in winter form, and Ethel Crocker. Good asters are scarce, but poor flowers are almost unsalable at any price. Gladioli are less plentiful. Dahlias have made their appearance, some fine pink being accepted as a substitute for fancy asters on a day when that color could not be secured. There is no steady demand for dahlias yet. Fine cosmos is in, but does not sell.

A Land Purchase.

The flower world will be deeply interested in the plans of the Joseph Heacock Co., which have now taken definite shape. It has been generally known that the plant at Wyncote had reached its limit; all the available ground is covered with glass and more ground in the neighborhood cannot be acquired; valuation is increasing. A farm farther out of town became necessary. A year was spent in going carefully over the ground. Last week Joseph Heacock, president of the company, purchased a tract of fifty-eight acres of land at Roelofs Station, eighteen miles above his present station, Jenkintown, on the Bound Brook railroad. The ground is slightly rolling, with dark, rich soil that Mr. Heacock considers well adapted for the growing of cut flowers. It is understood that Mr. Heacock's plan is to erect a range of glass for his roses and carnations at Roelofs, while the palms and orchids will remain at Wyncote. The new plant will, it is understood, be in operation by next July.

Norwood.

Robert A. Craig met his guests at the West Philadelphia station. There were just two, Jacob Becker and Phil. It proved a congenial party. The short ride out of town was pleasantly spent in chat. The trio stopped at Norwood, a pretty suburb in Delaware county, with handsome houses and good roads. Hard by the station on the main road is the sixteen-acre lot owned by the Robert Craig Co. On this lot were the improvements the party had come to see.

The lot itself was desirable—square, or, to be exact, rectangular, level, unshaded. The houses, four in number, are each 27¼x300. Mr. Craig said they were flat roofed—a pitch of something like six inches to the foot. The walls are of concrete, a little less than four feet high, straight and true, with even finish, good to see. The roofing material was what D. T. Connor delights in calling semi-iron construction, which, put in plain English, means "imperishable," when compared with you and me. The glass was 16x24 inches and double thick. The benches were raised and made of cypress, with heating pipes beneath.

This heating system was of deep interest, embodying the latest ideas. Mr. Elder, who had that part of the contract in charge for the builders, Lord & Burnham Co., described it in detail. A 150 horse-power horizontal return tubular boiler will heat water that will circulate through 5-inch mains into 2-inch flows and returns, scientifically laid to insure equal temperature throughout both pipes and houses. This circulation will be quickened by a circulator, or in plain words a suction pump applied to the return pipes to bring the water back quickly to the boiler. A fan or blower will be used to give sufficient draught to burn small hard coal. A forty horse-power steam boiler will also be installed and a sufficient amount of 1¼-inch steam pipe will be attached to it and laid in the houses to keep out the dampness dur-

Last week we exploited the **NEW KIND** of store.

Below we offer the **NEW KIND** of bucket or flower jar, made of the best galvanized iron, which is only one of the many novelties we have in store for our customers the coming season.

After a practical and thorough test of two years this bucket has been found far more durable, easier handled; in fact, superior in every way to any flower receptacle on the market today.

It does not break, does not wear out, does not rot, does not chip; in fact, with any kind of care, will last a life time.

ing the fall and spring, when it is not cold enough to run the large boiler.

The benches were filled with strong young plants from 4-inch pots and from the field—18,000 in all, Mr. Craig said. The varieties were Winsor, Beacon, Enchantress, Afterglow, Rose-pink Enchantress, Red Wing, considered the greatest producer, a pink seedling, much admired in aristocratic circles, and a white seedling in which E. A. Stroud takes a deep interest.

Two of the houses are for plants. They will have more heat, and a partition will separate them from the carnations. A slate bench for propagating and a concrete manure pit, two feet deep and 150 feet long, to give bottom heat, are features. A high shed, 27x100 feet, makes a splendid workshop.

The sight of this well appointed place excited the enthusiasm of the party. Mr. Becker gave expression to his feelings in a story about a race horse he once owned that always brought him home a double eagle. "Yes, sir; every time it went out of the stable it raced and brought home a $20 gold piece." If you don't believe me, just ask Mr. Becker.

Mr. Craig then said it was train time, so we had to go.

THE SIXTH ANNUAL SALE OF STALLS

in the **Boston Co-operative Flower Market** will be held on Saturday, August 28th, 1909, at Music Hall Place, Winter Street, Boston, Mass., at 9 a. m. All growers of flowers will find it to their advantage to attend this sale.

JOHN McFARLAND, Secretary **ELIJAH CARTWRIGHT, President**

Mention The Review when you write.

The Man With the Bellows.

There is an awfully good story—perhaps you know it—about the bellows man remarking to the organist as they went out of church, "That was a good tune we played today." "We!" the organist replied, with his head held high; "I played a good tune." The next Sunday the organ stopped suddenly in the middle of a tune. The organist tore downstairs to see what was the matter. "Is it I or we?" the bellows man asked.

Now, this story is recalled to me vividly by the oft repeated statement heard in town, that "everybody is away."

This, unfortunately, is not the case. It is true merely of half of the profession. The other half have to work, and work hard under trying conditions to produce the high grade stock that is required in

THE Florists' Supply House of America

MADE

The greatest exhibit at Cincinnati, eclipsing our own record of a year ago, showing a finer and larger collection of Novelties and Staple Supplies than were seen in any exhibition before.

Why We Did It

Because the Tariff is settled; the tide of prosperity is rising; the Florists of America will require larger quantities of high grade supplies than ever before, and we are prepared.

H. BAYERSDORFER & CO.

1129 Arch Street PHILADELPHIA, PA.

winter. This is the growing season. The man who neglects his stock now will not have the quality when it is wanted. Remember, gifted decorator, that your handsome shop, your vacation, the very butter on your bread depends on the willingness of the other half of the profession to expend brain and muscle when it is hot under glass, and say a kind word to them.

Various Notes.

The drought was broken August 16.

W. E. McKissick & Bros. are receiving some exceptional white Ostrich Plume asters, the flowers being of unusual size.

The railroad gardeners will hold their third annual convention in this city at Horticultural hall, Broad street below Locust street, August 24 to 26.

The Evening Times' flower day for the children of the poor, who rarely have a plant or flower, brought out generous gifts from many of the profession.

Robert A. Stewart is enjoying his vacation at Island Heights, N. J.

Some of our best men are enjoying Cincinnati's hospitality this week.

Edward Reid is doubling his receiving capacity by adding a carnation cooling room, where natural air will strengthen the endurance of the divine flower.

J. Otto Thilow, secretary of the Henry A. Dreer Co., will sail for Europe August 24, for a short vacation in Germany and Switzerland.

The Keller Pottery Co.'s Cincinnati souvenir is a half-inch pan of perfect proportions.

Max Nitzschke, manager of J. J. Habermehl's Sons' flower store in the Bellevue-Stratford, is expected home from his wedding trip this week. PHIL.

Moire Ribbons are the thing right now.

We are making some beautiful numbers. The florist who is keeping ahead can use these ribbons, the plain taffetas and satin taffetas and chiffons. Samples and prices will prove to you that ribbons bearing the **Pine Tree Brand** Label are the best for your work.

ST. LOUIS.

The Market.

A week of the hottest kind of weather did not help the cut flower business any and we may safely report that the business, both wholesale and retail, was extremely dull, with plenty of good stock going to waste for want of demand. At the retail stores they say that if it was not for a little funeral work business would be at a standstill, and the wholesalers are saying the same. About the only stock in demand is in light colors.

We had in stock last week a fine lot of asters, which took the place of carnations, which were poor in quality. There are some good Cochet roses, and American Beauties are coming in somewhat better. Tuberoses and gladioli are coming in heavily from Kirkwood and selling cheaply. A lot of other outdoor stock is also in, with little demand. The market is well supplied with all kinds of greens.

Club Meeting.

The Florists' Club held its first outdoor meeting for this season at the home of A. J. Bentzen, secretary of the club and president of the Bentzen Floral Co., on Marcus avenue. The meeting was well attended, thirty members being present and several visitors. The meeting was called to order by President W. C. Young at 3 o'clock, with all the other officers present. After the regular business had been disposed of and committees had reported, the chairman announced that the election of officers for the ensuing year would take place. The candidates for president were W. C. Young and F. J. Fillmore. President Young, in a well pointed speech, withdrew from the race and George B. Windler was nominated in his place. After all ballots had been counted, George B. Windler was elected by a vote of nineteen to eleven. For the office of vice-president John Connon and

GALAX, FERNS, LEUCOTHOE, Etc.

Henry Kahrs made the race. Mr. Connon was elected by a vote of twenty to ten. J. J. Beneke, having no opposition for the office of secretary, was elected by unanimous vote. William C. Smith also found himself without any opposition for the office of treasurer and was the unanimous choice of the members. As trustee for a three-year term the candidates were A. J. Bentzen and F. H. Weber. After three ballots, A. J. Bentzen was elected. These officers will be installed at the next meeting of the club, in September.

The average attendance during the year was twenty-five. The membership of the club is now eighty and the treasurer's report showed a healthy balance in the club's funds.

Joseph Hauser, of Webster Groves, Mo., made application for membership.

The question box brought out a lengthy discussion on carnations, asters and chrysanthemums, which became quite interesting.

The meeting then adjourned and, after inspecting Mr. Bentzen's well kept place, the party sat down on the lawn to a fine spread, with plenty to eat, drink and smoke. It was a most pleasant meeting and a most hearty vote of thanks was extended to Mr. Bentzen and Mrs. Bentzen and daughter for the pleasant entertainment, which will long be remembered by the members.

The next meeting of the club will be held at Weber's Nursery, by kind invitation of Frank Weber. This meeting will be held Thursday, September 9.

his bride left on the florists' special for Cincinnati, to attend the convention.

Henry Ostertag reports that his brother, George, was somewhat better last week, but still a sick man. His many friends in the trade wish him a speedy recovery.

John Connon, of Webster Groves, says he will not be able to attend the convention this year, owing to a lame knee cap. Besides, Mr. Connon is busy putting his houses in shape for the fall season.

Fred Bruenig's place on Gravois avenue is in nice shape and he is cutting a lot of outdoor stock from his Columbia, Ill., place just across the river.

Andrew Hoffmann, assisted by Dave Banzhof, is in charge at Waldbart's place, in the absence of the boss, who is in Europe. A nice lot of outdoor stock is coming in from the Clayton place.

The following florists left here Monday, August 16, for Cincinnati, to attend the S. A. F. convention: J. F. Ammann, E. W. Guy, O. G. Koenig, F. H. Meinhardt, C. A. Kuehn, H. G. Berning, V. Gorley, W. C. Smith, F. W. Bruenig, Charles Juengel, J. L. Koenig, H. Kahrs, F. H. Weber and J. J. Beneke, and about twelve ladies. J. J.B.

DETROIT.

The Market.

Business remains good, especially for August, which is usually the dullest month. Stock is more plentiful than last reported. The quality of the roses is improving. Some My Maryland and White Killarney are coming out nicely, although still short-stemmed. From all appearances, these two varieties will be much sought after this season.

Asters are now arriving in large quantities, but the quality is not up to the standard of other years. Some fine gladioli are now available and meet with quite a demand, as they can be worked up nicely in funeral work.

Various Notes.

Most of the Detroit delegation left for Cincinnati Tuesday morning, August 17. Among the party from this city are: Mr. and Mrs. William Dilger, Mr. and Mrs. C. H. Maynard, Mr. and Mrs. E. A. Scribner, Robert Watson and son, M. Bloy, Robert Rahaley, Louis Charvat, William Hielscher, Gus H. Taepke, Phil Breitmeyer, Norman Sullivan.

Robert Watson means to do a lot of puttying before snow falls, for did he not win the putty donated by the Hammond Paint & Slug Shot Works for the outing of the club? Michael Bloy was the fortunate one to win the paint, also donated by the above firm, and his whole establishment will be snowy white this winter.

The Simonds' Compound Vacuum System for greenhouse heating is being installed in a large, new range for Dunbar & Hopkins, at Ashtabula, O., who have had the system in use in another large range for three years.

The many fine knives which were so liberally distributed among the prize winners at the club's outing were kindly donated by the Michigan Cut Flower Co.

Miss Julia Dreher, of W. B. Brown's staff, is spending a few weeks at Mr. Brown's country home.

Beard Bros. have given the Chicago Sprayer a good test and found it satisfactory in spraying their thousands of small ferns.

Anton Hupprich's pots are giving good satisfaction to the buyers here and the firm is working overtime.

Albert Stahelin, of Redford, Mich., has more field grown carnation plants than he can use this year. The stock is fine.

J. F. Sullivan has been somewhat under the weather for several days—too much outing, perhaps.

Miss May Wright spent two weeks in

Lake Huron, near the beach at Port Sanilac, Mich.

Mr. and Mrs. Boehringer, of Bay City, came to Detroit to join the florists the day of the picnic. H. S.

LEXINGTON, KY.

The Market.

Outdoor flowers are plentiful and have slow sales at present. Some roses of fairly good quality are being cut. Asters are good, but there is no great quantity of them at present. Longiflorum and auratum lilies are good and they move fairly well. Tuberose stalks are in good supply, but there is not much demand for them. Green goods, such as smilax, fern leaves, asparagus and galax, are in good supply.

Thousands of people were here last week, attending the Blue Grass fair, but they were not flower buyers and did not seem to help the florists much.

Various Notes.

A recent visit to the greenhouses of Anderson & White, the lady florists on Georgetown street, found everything looking well there. They are growing a good many chrysanthemums this season and will no doubt cut some fine flowers, as their stock is looking well. They are also cutting an abundance of outdoor flowers at present and they have sales for all they can grow.

Mr. and Mrs. Albert Reichspfarr, of the Richmond Greenhouses, Richmond, Ky., were here last week, doing the Blue Grass fair and calling on the trade.

Graser & Humphreys, the wholesale and retail cut flower growers of Mount Sterling, Ky., are sending some excellent asters to this market. This firm grows as good outdoor asters as are found in this state and ships them to the Cincinnati and Lexington markets.

Lucien Le Clere and John Ballow, of Frankfort, Ky., contemplate taking a trip north after the convention.

J. Ferdinand Keller, of the J. A. Keller estate, is sending some of the best asters to be seen in this city to their downtown store.

Among those who are attending the convention are the following: Charles Michler, Louis Michler and father, James P. Keller, Ferdinand Keller, Theodore Keller, Henry Ballard, Misses Fannie Anderson and Fannie White, and Lucien Le Clere. BLUE GRASS.

WE have had a nice trade this season on pansies; the REVIEW did it.—J. H. KRONE, JR., Fort Smith, Ark.

NEW CANAAN, CONN.—It is stated that Stephen B. Hoyt has purchased the business of H. M. Woundy. Mr. Woundy has been located here eighteen years.

CHARLEROI, PA.—Joseph Haube has bought a farm of twenty-three acres, near town, in order to expand his business. Mr. Haube will take his brother in as a partner and will begin the building of new greenhouses in the spring. The firm will hereafter be styled Jos. Haube & Bro.

MILWAUKEE, WIS.—A preliminary premium list of the Milwaukee flower show, to be held at the Auditorium, November 11 to 14, 1909, has been issued. Completed and revised premium list and rules will be ready early in October. Further information before that time may be had from H. V. Hunkel, chairman, 462 Milwaukee street, Milwaukee, Wis. The executive committee in charge of the flower show is composed of the following members: H. V. Hunkel, C. Dallwig, C. C. Pollworth, Wm. Zimmermann, N. Zweifel, J. G. Heitman and G. Kellner.

Vegetable Forcing.

INBREEDING OF CUCUMBERS.

Sensational results from inbreeding of cucumbers under glass were recently made public by Prof. W. J. Green, of the Ohio Agricultural Experiment Station.

Nearly 100 growers were present, representing half a dozen states, and all paid close attention to Prof. Green's modest explanation of the manner in which he has secured results of great value to the greenhouse interests by taking a course directly the opposite to the established method of procedure in matters of selection for improving varieties of vegetables.

The advice has been to avoid inbreeding and to seek crosses with plants of similar variety grown some distance away. This did not give the results that Prof. Green sought, in his efforts to improve the variety of White Spine cucumbers grown in hothouses, so he tried the plan of keeping the product of certain promising vines pure by pollenizing from blossoms on the same vine. This he accomplished by keeping the blossoms covered before and after artificial pollenizing, to avoid a cross from near-by vines of less purity of strain.

As a result of his experiments, Prof. Green stated that he believes that scarcely a variety of cucumber on the market today is pure, but that all are crosses more or less detrimental to quality of fruit. The "bad blood" in the ordinary hothouse cukes shows in the vines producing fruits badly bloated in the center, crooked fruits which must be sold as seconds and culls, and cukes almost as round as balls, which are often thrown away.

Straight cucumbers, small at the stem end, of uniform size the whole length, of a delicate dark green color, wholly ideal in every way, will be the rule and not the exception if Prof. Green succeeds in his experiment, which so far has been a perfect success.

He first took one vine and was careful to keep the variety pure. Seeds from this vine were planted in a house by itself, so that bees could not get in with pollen from ordinary vines. The result was twenty-four vines in full fruitage, all producing the perfected variety of cukes. Samples were exhibited at the Cleveland convention of Greenhouse Vegetable Growers, and were looked upon with envious eyes by many of the growers, few of whom have been able to grow fall cukes in paying quantities.

The spring and early summer crop of cucumbers is the life-saver of the average "greenhouser" who depends entirely on vegetables for his income. Lettuce and tomatoes just about pay expenses, and a full crop of cukes is absolutely necessary to make the year a profitable one.

The selling value of this crop is much lessened by the large number of poor fruits produced, especially toward the end of the season. Anything which will improve the quality of the product will prove a little gold mine to growers, and that is why they paid such close attention to Prof. Green's story of his experiments.

Prof. Green stated informally that he believes many other varieties of greenhouse vegetables can be gotten back to purer and better strains by judicious inbreeding. GREENHOUSER.

RAWSON'S HOTHOUSE CUCUMBER

As a forcing Cucumber is one of the largest and most profitable crops of the Market Gardener, it is essential that the very best possible strain should be sown. With this idea in view we have made selections for the past few years from our Rawson's White Spine, which have resulted in a strain about two inches longer and a darker green in color, with a few light spines showing at blossom end. **This new strain** we confidently believe to be **superior** to any other on the market. The results we have had at our own greenhouses with the stock conclusively prove the above to be true. ½ oz., 35c; oz., 60c; 4 oz., $1.75; lb., $6.00.

No Grower of Vegetables under glass can afford to do without the Wittbold system of
Watering
—because with it a boy can do as much as two men can do in a whole day with the hose—and do it better.
The system is equally valuable outdoors, and for many other crops besides vegetables—wherever you need water.
Send for our booklet—with testimonials—read and you'll send in your order.

FONTANA, WIS.—Mr. Bergstrom, foreman for Mr. Uhlein, has begun building in Walworth. He will build a greenhouse and grow flowers for decorative purposes.

ST. PAUL, MINN.—Andrew Lauritzen, of 1236 Churchill avenue, was severely bruised and shaken up recently in a runaway accident at Como avenue and Gaultier street. His team became frightened, threw him from his seat and dragged him a considerable distance before passersby stopped the horses.

Fluegge Bros., 2791 N. Leavitt St., Chicago

Judicial Sale of Part of Assets of the Rosery Flower & Seed Company, Limited

Tenders will be received addressed to T. Harry Webb, Esquire, Liquidator of the Rosery Flower & Seed Company, Limited, New Nanton Building, Winnipeg, Manitoba, Canada, and marked "Tender re Rosery Flower & Seed Company Limited," up to four o'clock p. m. of the 15th day of September, 1909, for the purchase of the following property of the above named Company, namely:

That portion of the North West Quarter of Section thirty-two (32), in Township twelve (12), Range five (5) West of the fourth meridian in the City of Medicine Hat in the Province of Alberta, consisting of five (5) acres situate and abutting the South West corner of the City Park, purchased from one William R. Johnston,

together with all buildings and erections thereon and appurtenances thereto, including the following, namely: Greenhouses, store rooms, cold storage basement, piping, temporary heating apparatus, benches, pots, implements and usual accessories representing an investment of $15 000 or thereabouts.

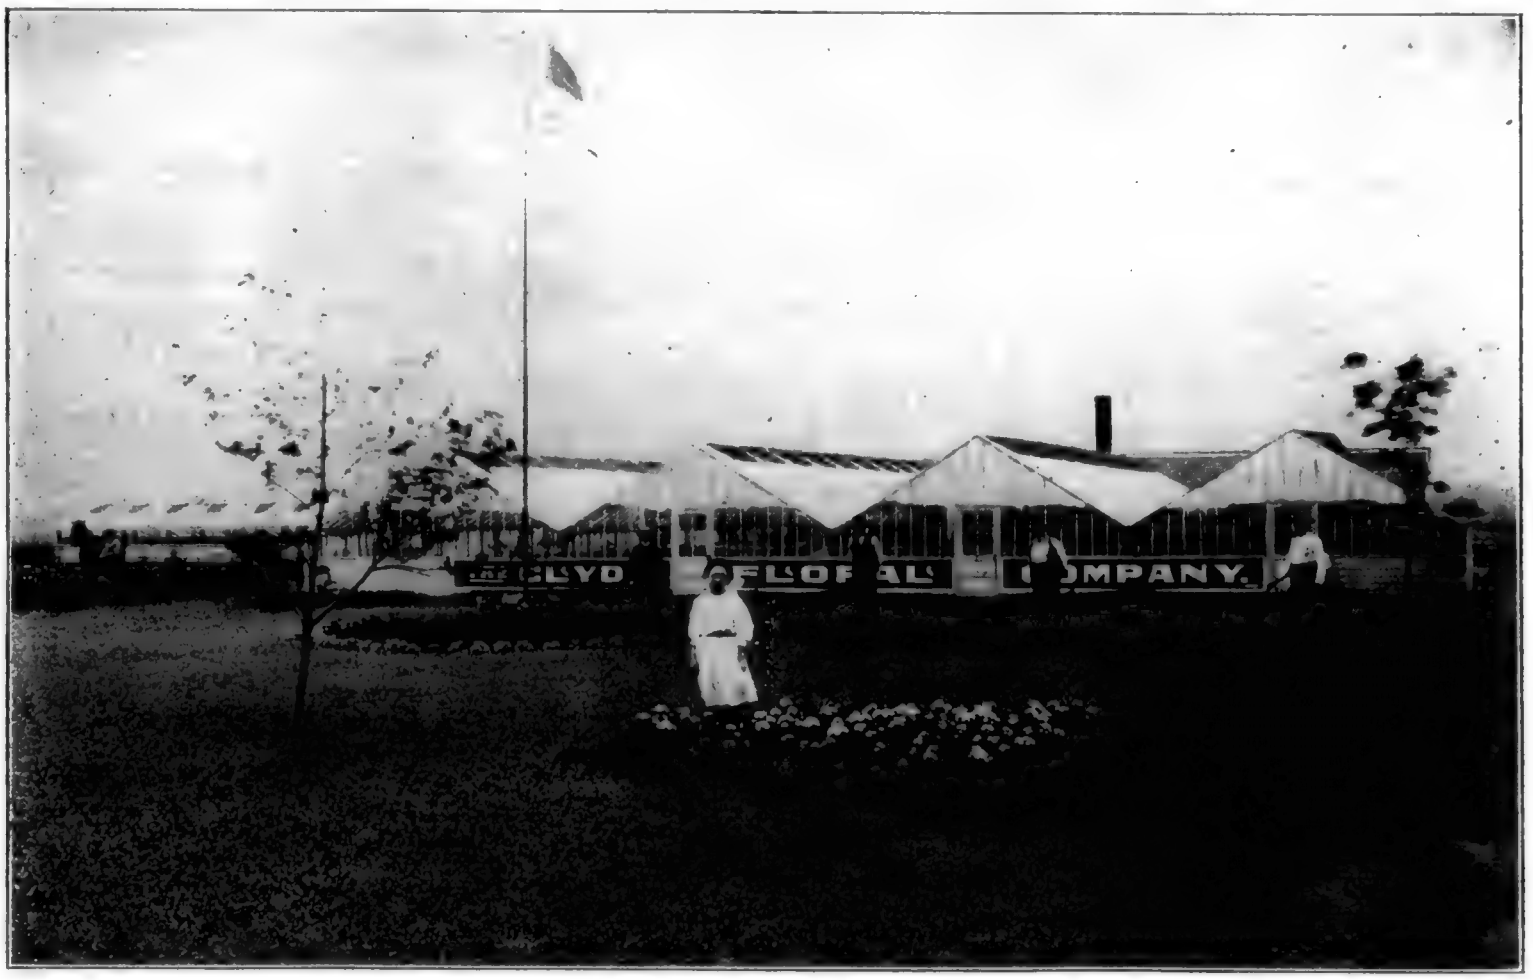
The City of Medicine Hat, in the Province of Alberta, has made favorable arrangements as to taxation and for the supply of water and natural gas.

The above property offers a good opportunity, owing to the existence of natural gas, good sunny climate and good soil, for establishing a wholesale florist business with a market in Winnipeg, Regina and Calgary.

TERMS OF SALE: Twenty-five per cent in cash and the balance on terms to be arranged with, and secured to the satisfaction of, the liquidator.

A marked cheque payable to the liquidator for ten per cent of the amount of the tender must accompany each tender, which will be returned if tender is not accepted. The tenders will be opened by the Liquidator at his office aforesaid on the 16th day of September, 1909, at the hour of eleven o'clock a. m., and all who tender are requested to be then present.

The highest or any tender not necessarily accepted.



The above property will be sold subject to the following conditions:

1. The property will be sold subject to a reserve price.
2. The Purchaser shall be bound by the terms of an agreement with the City of Medicine Hat dated the 17th day of May, 1909, which provides amongst other things that the occupant for the time being shall maintain upon the said lands and premises the business of florists as a going concern for a period of five years from the date of the purchase, in default of which the lands will revert to the City on repayment of the sum of $1,000.00 and the owner shall have the right to remove his buildings and other improvements. The agreement further provides that in order to obtain reduced rates for natural gas the occupant must instal and maintain on the premises a steam heating plant.
3. The purchaser will be required to enter into an agreement with the City embodying the above terms.
4. The purchaser shall have the conveyance prepared at his own expense, and tender same for execution.
5. If the purchaser fails to comply with the conditions aforesaid or any of them, the deposit and all other payments made thereon, shall be forfeited, and the premises may be resold; and the deficiency, if any resulting from such re-sale, together with all charges attending the same, or occasioned by the defaulter, are to be made good by the defaulter.
6. The said property will be sold subject to the approval of the Court of King's Bench for the Province of Manitoba.

For further particulars apply to the Liquidator, or to Messrs. Andrews, Andrews, Burbidge & Bastedo, Barristers and Solicitors, Aikins Building, McDermott Avenue and Albert Street, in the City of Winnipeg, in the Province of Manitoba, his solicitors.

Dated at Winnipeg, this 28th day of July, A. D., 1909.

T. HARRY WEBB, Liquidator, No. 308-11 New Nanton Building, Winnipeg, Manitoba, Can.

WANTED—An industrious, sober young man for partner in one-half interest in greenhouse property of 7½ acres of land, 6 new, up-to-date greenhouses, 15,000 ft. of glass, 50 h. p. boiler; boiler room and potting shed, 10x84 ft.; all cement floor; good shipping point, with electric line from Toledo to Cleveland; cars passing every hour, also stop at door; everything in readiness for a fall and winter's business; to anyone interested will furnish further information on application; terms reasonable. **THE CLYDE FLORAL CO., Clyde, O.**

BOSTON.

The Market.

Business remains extremely quiet and a good many flowers coming in cannot be sold. The glut of asters and gladioli is about the worst ever seen in this market. These two flowers seem to have done remarkably well under the droughty conditions prevailing this summer. Gladioli are not selling well and many are wasted. Sweet peas are getting small in quantity and deficient in quality. Roses of good quality continue to meet with a fair sale, but there is little call for the many small, inferior flowers arriving. Carnations are almost out of the running; few are coming in and these are of inferior quality.

The supply of lilies is overabundant, and speciosums and auratums are not selling at all well. Some good callas are still seen. A few Golden Glow chrysanthemums are appearing. These are too early, there being a superabundance of fine asters to compete with them. Cosmos is plentiful; some days it sells well, and on others nothing will move it. Dahlias are getting common and sell a little better than two or three years ago.

A Trip to Whittier's.

A good delegation of members of the Gardeners' and Florists' Club of Boston journeyed to South Framingham, August 14, per Boston and Worcester electric cars, to see the nurseries of W. B. Whittier & Co.; but for many members being away on vacations, the attendance would have been much larger. The party on arrival was met by Mr. Whittier, and an inspection of the extensive and well kept nurseries, which cover an area of 175 acres, was made. The stock of evergreen and deciduous trees and shrubs, climbers and hardy perennials was in superb condition. Frequent cultivation had kept the ground clean of weeds and the plants showed but little effects of the severe and long continued drought.

After several hours had been spent inspecting the nurseries, the party returned to Boston, well pleased with the day's instructive outing. Refreshments were served during the afternoon and several short but felicitous addresses were made by the visitors and host.

Various Notes.

The Boston Market Gardeners' Association held its first annual outing and field day at Paddock's Island, August 14. There was an attendance of over 300. Dinner was served and various athletic sports were afterward indulged in. The committee in charge of the affair consisted of George Pennington, A. P. Esty and E. S. Sheahan.

Fred Becker, of Cambridge, is at Provincetown, Mass., with his family for a month's rest.

Wax Bros., on Tremont street, are enlarging their cellar capacities and much improving their store at present.

P. L. Carbone's new store, at 342 Boylston street, will open September 1. The increasing call for Carbone's wares made larger show-rooms imperative. At present Mr. Carbone operates two stores, at 258 and 272 Boylston street.

Excellent Golden Glow chrysanthemums, for so early in the season, are coming in from Willow Hill greenhouses and from Edward Bingham, of Dedham, Mass.

William McAlpine, salesman for Budlong & Co., and M. Ruam, salesman for Peirce Bros., are away on their vacations at present. William Chase, from

W. H. Knapp, of Newtonville, is back from his vacation, brown as a berry and looking very fit.

F. H. Houghton is busy with improvements to his Boylston street store at present.

S. J. Goddard was away on a business trip to Buffalo last week.

Peirce Bros. are handling remarkably fine asters, disbudded and grown under glass. The stems are much longer and finer than outdoor ones.

A. S. Parker, who is one of our largest aster specialists, is marketing large quantities of fine flowers at present.

About a dozen local horticulturists attended the Bar Harbor flower show, August 14 and 15, and were delighted with the beautiful exhibition. Several in the party stayed several days, visiting the leading private estates, on which annuals and perennials were found blooming superbly.

The New England Dahlia Society expects to have the largest and finest exhibit of flowers September 10 to 12, in Horticultural hall, ever seen in America.

W. N. CRAIG.

CARNATIONS WITH SWEET PEAS.

Can I grow carnations and sweet peas successfully in the same house?

F. E. W.

Sweet peas in winter prefer a temperature a few degrees lower than carnations. We have, however, seen good peas grown in carnation houses. It will be better to use such carnations as the various forms of Enchantress, and others preferring a temperature of 48 to 50 degrees at night, rather than such as

Seed Trade News.

AMERICAN SEED TRADE ASSOCIATION.

Pres., J. C Robinson, Waterloo, Neb.; First Vice-pres., M. H. Duryea, New York; Sec'y and Treas., C. E. Kendel, Cleveland, O.

S. F. LEONARD is expected to return from his European trip September 5.

THE prospect for a crop of sweet corn for seed is fair; the weather has been dry, but corn is now doing well.

S. B. DICKS, of Cooper, Taber & Co., London, is making his annual tour in the United States, having arrived at New York, August 9.

A TELEGRAPHIC report states that D'Alcorn & Sons, of Portsmouth, Va., have purchased the entire stock of the American Bulb Co., at Richmond.

PURPLE TOP GLOBE turnip is out of supply. There is an increasing demand for this variety and the seed crop seems to keep getting less right along.

W. ATLEE BURPEE and his two sons, David and W. Atlee, Jr., have completed a pleasant and profitable European trip and are en route homeward.

CHARLES N. PAGE and wife have returned to Des Moines after a trip to the Pacific coast occupying several weeks and combining business and pleasure.

THE vine seed crops have been having a hard time, according to reports. In one section too dry, in another too heavy rain and in several districts too many bugs.

THE middle west is reported to be harvesting a good crop of onion seed. One grower, evidently overlooked to date, says he has over 100 acres doing fairly well. This grower is in Illinois, but not at Rockford.

THE outlook for onion is good; the crop promises well in practically all the principal growing districts and the little patches here and there will in the aggregate count quite some little, for they are good to date.

THE seed trade in general seems to be better than usual for August. Turnip seed, beans and winter top onions assist in making the shipments from the wholesale houses respectable. Market gardeners are buying well, hoping that good fall weather will make up for the late, bad spring. Taken altogether, it looks as though the seedsman is being used as well as can be expected.

Unique, blue stripe on ivory white ground	.20
Brilliant Blue, best blue	.20

Early Varieties

Christmas Pink	$0.30
Christmas White	.30
Black-seeded White	.30

New Nasturtiums

The many new and gorgeous Nasturtiums originating on our farm have been a surprise and constant delight to the trade visitors. To see them was to arrange for their introduction in their 1910 Catalogues. The following, listed under different types of foliage, we can recommend as most desirable for your listing. While our record in New Sweet Peas has been second to none in either America or Europe, our record in Nasturtiums has far excelled all others. In fact, all others combined can nowhere near approach the success attained by the Routzahn Seed Co. Many of these varieties offered represent four years of labor and can be accepted with confidence.

Golden Foliage Type

A striking and most desirable type for bedding and potting.

	Per lb.
Golden Rose, flower a true rose color	$1 00
Golden Pearl flower a deep pearl	1.00
Golden Blotched, flower mottled crimson on white and primrose ground	1 00
Golden Midnight, flower darkest maroon	.75
Golden Mixed, containing all colors so far originated	.60

Variegated Foliage Type

An exceedingly fine acquisition to the Nasturtium family.

Variegated Dwarf Orange, flower deep orange	$1.00
Variegated Dwarf Scarlet, flower deep scarlet	1 00
Variegated Dwarf Crystal, flower primrose with maroon stripings	1.00
Variegated Dwarf Lady Bird, yellow with blotched crimson	1 00
Variegated Dwarf Queen, flower scarlet maroon	.75
Variegated Dwarf Mixed, all dwarf variegated colors mixed	.60
Variegated Tall or Trailing Scarlet, flower scarlet	.75
Variegated Tall or Trailing Croesus, primrose, striped with velvet crimson	.75
Variegated Tall or Trailing Salmon, flower salmon	.75
Variegated Tall or Trailing Crystal, flower primrose with maroon stripings	.75
Variegated Tall or Trailing Queen, flower scarlet maroon	.75
Variegated Tall or Trailing Orange, flower deep orange	.75
Variegated Tall or Trailing Mixed, all variegated-leaved mixed	.60

Lilliput Type

The most dwarf of all dwarf Nasturtiums. Of compact growth and throwing the blooms in beautiful mass above the foliage, immensely fine for potting and bedding.

	Per lb.
Lilliput Baby Rose, flower pure white ground, with deep rose markings, in Lilliputs, the most beautiful variety	$1.00
Lilliput Lady Cherry, an unusual, dark foliage, flower a deep, rich cherry	1.00
Lilliput Fairy King, flower ecru rose	1.00
Lilliput Fairy Queen, flower light, with lavender markings	1.00

Ivy-leaved Foliage Type

A new and most desirable strain of the Nasturtium family. The leaves are of a delicate English ivy-leaved form, while the flowers are of a most delicate fringed formation.

Either for bedding or potting, a most desirable type.

	Per lb
Dwarf Ivy-leaved Othello, flower deepest maroon	$0.75
Dwarf Ivy-leaved Fairy, flowers primrose with purple lavender markings	.75
Dwarf Ivy-leaved Rose, flowers a light rose	.75
Dwarf Ivy-leaved Golden Butterfly, flowers a bright golden yellow	.75
Dwarf Ivy-leaved Lady Bird, flowers yellow, blotched crimson	.75
Dwarf Ivy-leaved Mixed, all ivy-leaved mixed	.60
Tall Ivy-leaved Lady Bird, yellow, blotched crimson	.75
Tall Ivy-leaved Flamingo, flower orange scarlet	.75
Tall Ivy-leaved Golden Gem, flowers golden yellow	.75
Tall Ivy-leaved Mixed, all ivy-leaved mixed	.60

Last but not least of those offered is this year's novelty,

Dwarf Variegated Foliage Ivy-leaved Princess

As the name indicates, The Princess is a variegated foliage ivy-leaved variety, flowers primrose with scarlet markings. A novel and most beautiful combination. For potting, a window or bedding plant, it is difficult to excel. $1.00

HEMPHILL-STEHLIN PRINTING CO.
Industrial Bldg., INDIANAPOLIS, IND.

It appears that this will be another season of world-wide seed shortage, for there are few countries or even districts that make an altogether favorable report, but one of the oldest and most conservative men in the trade has said that the seed-producing industry is now so large that there is never again likely to be a time when planters will have to go without seeds—if they find their favorite varieties sold out there will be something else to be had that is just as good in someone's estimation.

This has been a bad season for the market gardeners in many sections of the country. Complaints in general show that crops have been abnormal. Peas are complained of as being wrong; lettuce, endive and beets run to seed; carrots are not true to type; early cauliflower failed to head, etc. It is a good thing for any individual seed house that it did not supply the seed to all of them, for when everybody's seed fails to make a right crop the gardener will admit that it is probably weather conditions that cause the trouble.

Christmas —AND— Thanksg'ving SWEET PEAS

Typical Roots of Crosby's Egyptian Beet.

CROSBY'S BEET.

The Livingston Seed Co., Columbus, O., pats itself on the back, figuratively speaking, over its Crosby's beet, for the president of the company asserts that he believes they have it nearer to the original Crosby idea than anyone in the trade. The accompanying illustration is from a photograph of some typical roots grown on the Livingston farm, where there is this season about six acres of the Crosby beet.

"Four of the Finest"

True Superb New "Spencer" Sweet Peas for 1910

Miriam Beaver

In the development of the new "Spencer" selections it has been generally noted that the color and markings and shadings of the familiar grandiflora types have been preserved and carried up into the grand new wavy form of the dignified and glorious Spencers, and on this account both Burpee & Co. and ourselves have heretofore preserved the older and familiar names. We have constantly watched and waited and hoped for a break into new tints and colors, and after several seasons of fruitless search we were at last rewarded by the discovery of a most brilliant and attractive sport in our selection, bearing the field name of **Dark Apricot and Straw.** The original beauty stood out in bright array and was then and there christened with an appropriate new name, as it is not a shade known before in the grandiflora or Eckford types. In shape, size, graceful arrangement on the stem, free blooming and seedless nature, it is in all respects the same as Countess Spencer. Its novelty is its color—a glowing but soft apricot, tinted, shaded and suffused with lemon. A little variation perhaps with a tint of salmon, deeper by a trifle on the back of the standard, but practically a self color. It is a color difficult to describe and might be said to approach a **terra cotta tint,** especially so as it harmonizes so beautifully with golden brown. The mid-rib of the standard is more pronounced and a trifle deeper than the body of the standard. As the blooming season advances the color fades somewhat to a pinkish salmon buff.—**Description of the originators, Messrs. C. C. Morse & Co.**

W. T. Hutchins

The fully expanded flower has the appearance of light apricot (distinctly lemon at the throat), overlaid with a beautiful blush pink. The attractiveness of the flowers when bunched is beautiful beyond description. As the season advances, the blush pink shading becomes rather more pronounced. In form this superb new Spencer is an exact counterpart of the finest selected strains of the beautiful pink or True (Original) Countess Spencer. The vigorous vines flower most freely, the stems are long and carry well three or four fine flowers. Both standard and wings are wavy, ruffled and crinkled, of the most advanced Spencer type.

Senator Spencer

Although this variety belongs in the darker colored class, the lighter background gives a mass of the blooms a sort of heliotrope tint which is very pleasing. The color is a varying combination of deep claret and chocolate, striped and flaked on a ground of light heliotrope. It presents a beautiful combination of tints and colors and shows up wonderfully well under close inspection, as the dainty detailed markings are most attractive.

Senator Spencer is of the true Spencer form—wavy edges on both standard and wings—large, round, fluffy standard, long, drooping wings. Both standard and wings are marked with the same colors and in the same way, with perhaps a trifle more of the wine shading in the wings. The stems are long and there are usually four good large, finely formed flowers on each stem.

Prince of Wales Spencer

The flowers are brilliant rose carmine or red, of good size and fine form. The wings are a pure, rich rose crimson and the standard is the same with a tint of cherry red. The whole effect is that of a brilliant crimson—clear, distinct and beautiful. The standard is large, round and wavy; the wings are full and are inclined to remain boldly outright instead of drooping. The strong stems are long and usually bear four blossoms each. The plant is very vigorous and free flowering. **Prince of Wales** is a variety that belongs in all first dozen sets and will become one of our standard shades in Spencers.

In Addition to the Above Four Superb New "Spencers"

we are also offering to the Trade for cataloguing in 1910, **Aurora and Othello Spencers,** both of which were offered in 1909 at retail only, owing to scarcity of seed.

Othello Spencer

This beautiful new Sweet Pea, of the true Spencer type, will appeal to those having a preference for the darker colors. The flowers come uniformly true to type, being beautifully waved or crinkled both in standard and wings. The stems are thick and long and carry well either three or four fine blooms of a **rich deep maroon.** It is a strong grower and the intensly dark colored flowers contrast well with the lighter shades already introduced.

Aurora Spencer

The superbly beautiful flowers are of **really enrmous size,** and come uniformly of the **true "Spencer" type.** Both standard and wings are waved or fluted to a most pronounced degree. The magnificent flowers are produced most profusely in threes and fours, well placed on the end of long, stiff, dark green stems. The ground color of the flower is a cream-white, and this is exquisitely flaked and mottled with rich orange salmon.

Prices to the trade on all the six beautiful new "Spencer" Sweet Peas offered in this advertisement.

In sealed packets: **Per pkt., 25c; $2 per doz. pkts.; $3.75 per 100 pkts.** In lots of 500 pkts. or more, **$12.50 per 100 pkts.**

In half-size packets: **Per pkt., 15c; $1 per doz pkts; $7 per 100 pkts.** In lots of 500 pkts. or more, **$8.25 per 100 pkts.**

For number of seeds in packets, please refer to circular, copy of which will be mailed on application.

CHICAGO SEED CROPS.

Toward the end of last week rain came and tried to make up for lost time. It found many of the market gardeners and set growers unprepared for it. It did some good and much harm. One-half of the onion set crop had been harvested and field-stacked. The remaining half will not come out dry and clean, like those that were taken before the rain came. Some lots that were more than ready will need to be taken out at once, to save them from making a second growth. The extra labor made necessary to re-dry the sets that were left unstacked in the fields will add considerably to the cost of producing the crop, and is likely to stiffen up the price. This, in addition to the fact that jobbers from outside are trying to buy in a part of the Chicago crop, muddles the situation, and the growers who planted on the speculative basis are wondering if they will hit it.

There is considerable guessing being done as to the actual quantity of sets that Chicago produces. Some guessers who are known to be conservative, but are probably not well posted, say 250,000 bushels. Others, who have added up the totals that a number of the shippers gave as the quantities they handled last season, put it at 750,000 bushels. Well posted guessers, also conservative, say the high estimate is as far wrong as the low estimate—so there you are.

FRENCH BULBS.

The main shipment of French bulbs reached New York on the steamer Madonna August 10 and comes in under the new rates of duty. The consignees and number of cases were as follows:

Ivey, Thomas A., & Sons	6
To order	701
Total	5,481

PRACTICALLY everyone has made up his mind to a shortage of peas and beans—it now is only a question how great the shortage will be. There probably will be peas enough so all the home gardens will be supplied, and the market gardens, too, but the canners are taking a great deal of interest in the situation.

STUART LOW & Co., the English growers, say that although they have experienced an abnormally wet and cold season, cyclamen seed and schizanthus are average crops. The only novelty to report in the cyclamen way is Salmon Pioneer, of the crested tribe, a soft salmon not so intense in color as Low's Salmon King, but a useful addition to the crested class.

PRINCE BAY, - NEW YORK

PLANTERS' SEED CO. IN TROUBLE.

An involuntary petition in bankruptcy against the Planters' Seed Co., St. Joseph, Mo., was filed in the federal court there August 8 by the Kimberlin Seed Co., Santa Clara, and other California creditors. It was alleged that the company is insolvent, and that the sum of $2,000 is due the creditors instituting the action. Only one of the stockholders in the Planters' Seed Co. lives in Springfield. He is Sidney Lee, the general manager. The other owners live in Fort Smith and Fayetteville, Ark. The company is capitalized for $13,000. The principal creditors are California and English seed growers and wholesalers, and a few concerns in the east. It is hoped and expected at St. Joseph that an adjustment may be reached whereby the company can continue in business.

IMPORTS.

The imports of seed through the port of New York for the week ending August 7 were as follows:

Kind.	Pkgs.	Val.	Kind.	Pkgs.	Val.
Anise	150	$1743	Fennel	37	$ 248
Canary	100	522	Grass	1402	18719
Caraway	600	4413	Millet	500	1600
Castor	2728	9164	Rape	1	33
Celery	48	676	Other		15085
Coriander	10	64			

In the same period the imports of bulbs, trees and plants were valued at $23,414.

WOBURN, MASS.—J. C. Ela has a special exhibit of dahlias at the Alaska-Yukon-Pacific Exposition.

THE Faber Seed Co., St. Joseph, Mo., cleared 290 bags of German clover seed at the local custom house August 9.

RED RIVER VALLEY POTATOES.

Will you please give me the names of some good growers of seed potatoes in Red River Valley district? M. J. Y.

M. J. Y.'s inquiry is not quite plain in one particular; he does not clearly indicate what locality he has in mind. The Red River Valley district, properly speaking, is the district where the Early Ohio potatoes are mostly grown, in North Dakota. Nearly all the seed of this variety that is furnished in the south comes from that district.

But, as M. J. Y. doubtless knows, there is also a Red river which borders on the north boundary of Texas, where the Bliss Triumph potatoes are grown and shipped to northern markets. The Bliss Triumph is the standard variety of the south, and is grown extensively in the vicinity of Fort Smith and through Oklahoma, as well as in northeast Texas. Two crops of it are raised each year, the first being shipped north about June 15 and used for early potatoes in northern

E. S. MILLER
Wading River, Long Island, N. Y.

COSHOCTON, OHIO.

When William Clory began business here, seven years ago, he built one house, 22x50. He did not have money enough, he says, to buy glass, so he covered this house with canvas. His heating apparatus was a brick flue through the center. Now he has seven houses 22x50, one 23x150, and is building another, 24x150, this summer. He heats them all with steam.

"When I started in the trade," Mr. Clory says, "I did not know any more about the business than a pig knows about Sunday. So I had hard sledding, I tell you, until I got hold of the REVIEW, but after that I soon got on Easy street. There is no mortgage on any of my property now."

ALLIANCE, O.—John E. Walters & Sons, of Niles, have purchased the old established Gaskill greenhouses and took possession of the property August 6.

SOW NOW

The new giant stock **Sunrise,** fine for cutting or pots, brilliant rose, large flowers, a grand acquisition. Pkt., 50c; trade pkt., $1.00. **Giant White Perfection,** throws one enormous spike, 2½ feet tall, large white flowers, pkt., 50c; trade pkt., $1.00. **Beauty of Nice, Princess Alice, Queen Alexandra,** trade pkt., 50c. These are the cream of the stock family for either pot culture or cutting.

Schizanthus Wisetonensis, grand for pot culture, trade pkt., 50c.

Mignonette, new giant, saved in our own greenhouses. We could not give our commission men, Henshaw & Fenrich, nearly enough cut spikes to supply their demand at top prices, last winter. Trade pkt., 50c; full trade, $1.00.

Sweet Peas. We offer three colors, white, pink, lavender, per oz., 15c; ¼-lb., 50c. These are the finest for early forcing under glass.

PITTSBURG.

The Market.

Extremely warm weather, with every person, who has the price, out of the city, is not conducive to good business, and the commission men are not rushed with orders. The retailers are spending most of their time trying to make themselves comfortable. Stock is plentiful along all lines, with mountains of poor asters going to the garbage box. Vacations are the principal topic, since some have returned and others are getting ready to go away.

Various Notes.

Gertrude Yaley, cashier for A. W. Smith, has gone to Ligonier, and Arthur Hall, of the same firm, will probably spend his time on his farm at Carrick, Pa.

The salesmen in the several wholesale houses have all had their vacations and are now settled down to business.

This city will be represented at the convention by Fred Burki and sons, John Bader and daughter, P. S. Randolph and sons, James Moore, J. W. Ludwig and wife, G. Ludwig and son, E. C. Ludwig and wife, Gus Frischkorn, William Mueschke and wife, Mr. Puhlman and wife, William Loew, P. J. Demas, John Jones and E. C. Reineman.

Among the visitors this week were: Martin Reukauf, Mr. Bayersdorfer, Jr., A. Ringier and Ella Grant Wilson, of Cleveland.

A. W. Smith has leased the large corner store room in the Keenan building, at the corner of Liberty avenue and Seventh street, which he will open about October 1 with probably one of the finest appointed stores in this country.

Hoo-Hoo.

INDIANAPOLIS.

The Market.

The cut flower market is in a decidedly unsatisfactory condition. With the exception of lilies, Beauties and gladioli, there are no fit flowers to show. No good asters are to be seen. A few dahlias are to be had, but they do not keep this hot weather. Good roses and carnations are a thing of the past. There are some good rubrum lilies coming in. The weather for the last few weeks has been extremely hot. With almost everyone away at the lakes, there is practically no business except for funeral work.

Various Notes.

Fred Hukriede and family have returned from an extended trip in the northern part of the state. Mr. Hukriede says he had the time of his life.

John Bargman, of A. Wiegand & Sons, visited Chicago last week. On the return trip some one touched him for his pocketbook. It is a good thing they did not see him on the way up.

A. Wiegand & Sons had a novel decoration at the speedway for the auto races last week. They put up a tent 60x150 feet and constructed about 250 feet of walks with crushed stone. There was also a pergola, 100 feet long, decorated with artificial roses, laurels, palms, geraniums and arbor-vitæs.

PACIFIC COAST.

SAN FRANCISCO.

The Market.

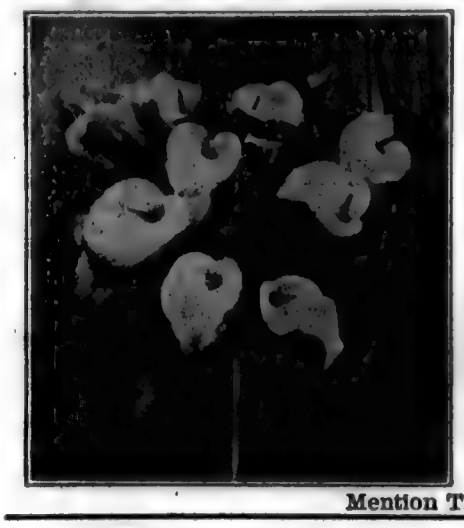
Although the change in the situation in a business way in San Francisco is not marked, it is brightening somewhat and the indications are favorable for something still better in the near future. With the return of the townspeople from the country and the resumption of the city schools, the season opens with some resemblance to the favorable conditions that existed before the fire. Flowers show a slight stiffening in price and somewhat shorter supplies, but the quotations are yet low and we cannot expect them to advance much till after the present stretch of pleasant weather.

Carnations have been cheaper during the present summer than at any previous time in the history of San Francisco. The same can be said of the shorter grades of roses, but the prices of other kinds of stock have not changed to any extent from that of other years. The sweet pea growers have had a highly successful season and have been enabled to market their crops at fair prices. Other classes of hardy outside stock have likewise paid well and the growers have been well satisfied.

Asters are at their height at present and the wholesalers are receiving fair prices for their product, with the possible exception of short stemmed stock. Lilium album and rubrum are in good demand and at good prices; from $1 to $2 per dozen is charged by the growers and the blooms move well at these rates. Amaryllis of the dark pink variety was a glut in the market last week, but they stay in season only for a short time. The later blooming varieties are much the better sellers, from $3 to $4 a hundred being the ruling prices last season.

Funeral work has moved a little more slowly than during the first week of the month, a fact that has been noticeable both in Oakland and Berkeley, as well as on this side of the bay.

Various Notes.



Miss C. Fivish, formerly connected with the Rosarie Co., has opened a store at 2807 California street.

L. O. Beery, proprietor of the Bay Tree Nursery, departed on a European trip August 10. He will be absent from San Francisco about six weeks.

B. F. Strickland, the landscape gardener, is located at 1833 Pacific avenue, Alameda, Cal.

Otto Doirier, formerly of Los Angeles and Chicago, is permanently located in Berkeley, Cal.

The Thorsted Floral Co., of Oakland and Fruitvale, has leased for a long term of years the only remaining store in the new Phelan building, on Market street, and is putting in some handsome fittings preparatory to opening it. Peter Thorsted promises that this will be one of the finest establishments of the kind on the Pacific coast. G.

MOVING CALIFORNIA PALMS.

Please let me know when is the proper time to take up, with a ball of earth, such palms as Washingtonia robusta and Phœnix Canariensis. I am located in southern California. A. N.

Hardy palms act quite differently from many other classes of plants, for they want to be transplanted from the open ground at the time when they are making their heaviest growth, which, if they have been given a fair amount of water, will be at the present time.

In southern California the varieties mentioned really have no resting season, strictly speaking, and they can be handled with safety at any time when they will not be subject to cold, frosty weather. At the present time, however, there is absolutely no danger if a few simple ideas are carried out. First of all, see that the soil is sufficiently moist to ball properly. Then cut off all the old and straggling leaves, and if it is not important to save all the foliage, the palms will feel the check less in proportion as it is removed. Now tie in the branches into a snug bunch, which will make the handling easier and will also assist in keeping the loose branches from swaying too much in the wind. It is well to leave the palms tied up in this way for several weeks after they have been transplanted.

In making a ball of earth, it is better to shape it long and narrow rather than shallow and flat, beveling it off toward the lower end. In proportion as the roots are trimmed, so should the tops be, and

do not attempt to save all the branches if the roots have necessarily been sacrificed to any extent. If the soil is rather sandy or filled with rocks, great care will have to be used in shaping and digging the ball of earth, to save it intact. If the ground should luckily be of a stiff, adobe nature, there will be but little trouble in keeping the soil in a hard lump. Ordinary burlap and rope will complete the operation, care being necessary to tie sufficiently snug so that there will be no danger of cracking in handling.

After the palms are transplanted, give them plenty of water and shade them if possible. If it is the intention to replant them in tubs or boxes, they should be put in a lath house and kept from draughts for several weeks.

There is but little trouble in transplanting hardy palms at this season of the year, if the foregoing suggestions are kept in mind. They are at the height of their growing season and that is the proper time to handle them. Later, when they are partially dormant from the cold weather and are not in condition to embrace any opportunity to continue thriving, there is always a chance that they will succumb before the warmer spring weather will start them on another season's growth. G.

PORTLAND, ORE.

The Market.

Business conditions are at a low ebb. Every effort possible is necessary to effect a sale. The better class of flower buyers are either out of town or are utilizing garden products for all occasions, and home talent is even to be seen in funeral work. Nevertheless the florist gets in a good day occasionally. The tourist traffic through our gateway has a tendency to enliven business at times.

Roses are of normal supply and fair quality. Carnations have become a scarcity and most of them have been displaced for new stock. Golden Glow is a welcome visitor and finds many friends among flower buyers. There is a scarcity of flowering plants. Gloxinias are to be seen in the show windows and are of excellent coloring.

Various Notes.

Sam Roake, the veteran green goods and moss man, and Chas. F. Street, of Clackamas, are out on a trout fishing expedition. We must prepare for the worst crop of fish stories ever.

The Routledge Seed & Floral Co. was awarded an extensive order for bedding stock, for the grounds of the Oregon State Fair, to be held in Salem, Ore., in September.

Geo. A. Lehmann, of San Jose, Cal., recently spent several days in the city. He reports business normal and the past season satisfactory.

J. D. Fletcher, of Hood River, was a recent visitor, looking over the market. He finds the raising of poultry a profitable side line.

Louis Goodfriend, representing Wertheimer Bros., dropped in on us, with his usual smile, showing an extensive line of chiffons and ribbons.

Arthur Zirkman, representing M. Rice & Co., was also a caller. He reports business satisfactory throughout his territory.

The Tonseth Floral Co. has completed its new range, near Milwaukee, Ore. Business had so increased that the management found it expedient to move its plant from Mount Tabor, where it was gradually being hemmed in by residences, to a wider field of operations.

E. R. Chappell is out for a vacation in California, Oakland and San Francisco being the objective points. E. R. C.

NURSERY NEWS.

AMERICAN ASSOCIATION OF NURSERYMEN.
Officers for 1909-10: Pres., F. H. Stannard, Ottawa, Kan.; Vice-Pres., W. P. Stark, Louisiana, Mo.; Sec'y., Geo. C. Seager, Rochester, N. Y.; Treas., C. L. Yates, Rochester, N. Y. Thirty-fifth annual meeting, Denver, June, 1910.

NEW YORK NURSERY LAW.

The strong commendation which the New York nursery law has received, both from members of the Nurserymen's Association and from others, has induced the REVIEW to publish the entire law. The first section of the law, referring especially to the prevention of disease and pests, was printed in the REVIEW of August 12. The second section, which provides for the application of remedies and for the issuance of certificates, is as follows:

§ 305. Action to be taken by the commissioner of agriculture relative to nursery stock affected with or by contagious or infectious disease or diseases or infested with insect pest or pests and providing for issuing certificates relative to nursery stock apparently free from such diseases and pests, regulating the use thereof, defining nursery stock, providing for fumigation, forbidding the bringing into the state such diseases or insect pests.—When the commissioner of agriculture knows or has reason to believe that any such contagious disease exists, or that there is good reason to believe that it exists, or danger is justly apprehended of its introduction into any town or city in the state, or that any dangerously injurious insect pest exists within this state, and has reason to believe that danger may be justly apprehended from its existence, he shall forthwith send some competent person and such agent or agents as he may deem necessary to assist in extirpating said pest or pests, disease or diseases, and the said commissioner of agriculture is hereby authorized and empowered to take such steps and do whatever may be deemed necessary to so control or prevent the spread or extirpate such pest or pests, disease or diseases.

The said commissioner is hereby empowered to issue such orders or notices as he may deem necessary or proper for the purposes herein relative to such diseased nursery stock or relative to any trees, shrubs, plants, vines, boxes, containers or packing material concerning which he has reasonable cause to believe are or may be infected or infested with any such disease or pest. Any person violating the provisions of any order or notice so issued by him shall be guilty of a misdemeanor. He shall cause an examination to be made at least once each year, prior to September 1, of each and every nursery or other place where trees, shrubs, plants or vines, commonly known as nursery stock, are grown for sale, for the purpose of ascertaining whether the trees, shrubs, plants, or vines therein kept or propagated for sale are infected with any such contagious disease or diseases, or infested with such pest or pests. If after such examination it is found that the said trees, shrubs, plants or vines so examined are free in all respects from any such contagious or infectious disease or diseases, dangerously injurious pest or pests, the said commissioner or his duly authorized agent or other person designated to make such examination, shall thereupon issue to the owner or proprietor of the said stock thus examined a certificate setting forth the fact that the stock so examined is apparently free from any and all such disease or diseases, pest or pests.

Should any nurseryman, agent, dealer or broker distribute or deliver within the state, trees, vines, shrubs, plants, buds or cuttings, commonly known as nursery stock, and which are subject to the attacks of insects and diseases above provided for, unless he has in his possession a copy of said certificate, dated within a year thereof, deface or destroy such certificate, or wrongfully be in possession of such certificate, he shall be guilty of a misdemeanor. All nursery stock consigned for shipment or shipped by freight, express or other means of transportation, shall be accompanied by a copy of said certificate attached to each car, box, bale, bundle or package, but no nursery stock shall be sold or shipped under the certificate issued as provided herein that is not raised in the nursery for or to which the said certificate was issued until such stock has been duly examined as provided herein and found to be apparently free from any dangerously injurious insect pest or disease. Any person consigning for shipment or shipping nursery stock as above without such certificate attached or a facsimile thereof or wrongfully using such certificate or a facsimile thereof shall be guilty of a misdemeanor.

All custom house brokers bringing into or causing to be brought into this state any nursery stock, shall file with the commissioner of agriculture on or before October 1 each year, the name of the person, firm, association or corporation engaged in or intending to engage in such business, together with the business address of such person, firm, association or corporation. All transportation companies, custom house brokers or other persons importing or bringing nursery stock into this state, shall immediately, upon receiving such consignment, notify the commissioner of agriculture of the fact that such consignment is in their possession or is en route to some point within the state and give the name of the consignor and consignee, and the points of shipment and of destination of such consignment, and the name of the transportation company bringing such stock and the route or routes over which it is brought, and shall make such further report relative to such shipments as the commissioner of agriculture may from time to time require.

Any person bringing nursery stock into this state or receiving nursery stock from outside the state shall before unpacking the same within the state apply to and receive from the commissioner of agriculture a permit so to do; the commissioner of agriculture shall upon being satisfied that said stock so desired to be inspected is free from any dangerously injurious insect pest or disease issue a certificate permitting such person to unpack such nursery stock.

No person shall knowingly or willfully bring into this state or unpack within the state gypsy or brown-tail moth or other insect pests or caterpillar, larvæ, pupæ or eggs of the same except for scientific purposes and then only upon the written consent and approval of the commissioner of agriculture.

All trees, plants, shrubs, buds or cuttings, commonly called nursery stock, grown in any nursery in this state, in which San Jose scale has been found within two years of the date of the dissemination of said nursery stock or grown in said nursery within one-half mile of where said scale was found, must be fumigated with hydrocyanic acid gas, in such manner as may be directed by the commissioner of agriculture of this state. Such fumigation must be done by the grower of such stock before planting, dissemination or reshipment, except such trees, shrubs, plants, buds or cuttings grown in this state as are planted by the grower

NEW YORK NURSERY LAW.

[Concluded from page 90.]

or propagator for himself, or such as from its nature or state of growth would be exempt; in such cases the said commissioner shall declare such trees, shrubs, plants, buds or cuttings free from such treatment. Should any nursery stock purchased within one year be found infested with San Jose scale on the premises of any nurseryman, it shall not be considered such an infestation as to require the fumigation of other stock not so purchased.

The words "nursery stock," wherever used in this article, shall apply to and include all trees, shrubs, plants, buds, scions, cuttings and vines grown in a nursery and willows grown for baskets or cuttings or for nursery or other commercial purposes. The provisions of this and the preceding section shall not apply to florists' greenhouse plants, flowers or cuttings commonly known as greenhouse stock, and no certificate shall be required for stock so shipped into the state that its sale and shipment become either interstate commerce traffic or commerce with foreign nations.

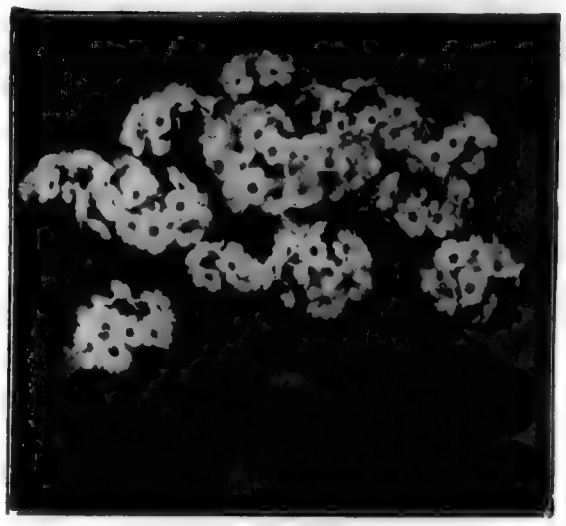
§ 2. The sum of twenty-five thousand dollars ($25,000), or so much thereof as may be necessary, is hereby appropriated out of any moneys in the treasury not otherwise appropriated, for the purposes of this act.

§ 3. This act shall take effect immediately.

LOUISVILLE, KY.

The Market.

The demand for funeral work last week was good, and was shared by all. Some good asters are to be seen, but the supply is not sufficient to meet the demand. Roses are improving right along. Some of the growers expect to cut carnations in a few weeks. Other flowers are plentiful. Green goods are plentiful and good.



Various Notes.

Mr. and Mrs. Jacob Schulz have returned from a trip of six weeks in the west, which was enjoyed immensely. Mr. Schulz is attending the convention at Cincinnati, being a charter member of the S. A. F.

Mrs. C. B. Thompson had a pretty window display last week, in yellow and green.

A party of twenty left for Cincinnati Monday night, on the packet, to attend the convention. It was a jolly crowd. About twenty-five more left later in the week, to remain from two to four days at the convention. K. R.

THE REVIEW sends Scott's Florists' Manual postpaid for $5.

Primula Specialist

Primula Kewensis, new sweet scented and yellow flowering. Strong plants from 2¼-in. pots, $5.00 per 100.

ST. VINCENT, KY.—After spending the months of March, April and May in Texas, John Roach returned to Kentucky and accepted a position here, as manager at St. Vincent's Academy. While in Texas he worked for the Green Floral & Nursery Co., of Dallas; also for A. J. Seiders, of Austin, and for the Hyde Park Floral Co., of Austin. He says that the Hyde Park Floral Co.'s flower and seed store, on Congress avenue, near the state capitol, is an unusually handsome establishment.

ALBANY, N. Y.

Interest in the August meeting of the Florists' Club was intensified by the reading of the advertisement of Thomas F. Galvin, Boston, directed against crepe chasers, from the Review of July 29. The article was read by President Frederick Goldring at the request of one of the members, and precipitated a lively discussion. The consensus of opinion was that the crepe chasing practice is a bad one, and so far as Albany is concerned, should be broken up. The club decided to leave the matter in the hands of a committee composed of Fred A. Danker, chairman; Alfred Whittle and W. C. King.

The subject of loaning decorative plants was discussed, and the members came to the conclusion that the practice is not now profitable. Efforts will be made through a committee to have the florists agree upon a uniform scale of prices for such service. Charles Sanders, a well known gardener, submitted samples of Boston fern, among them a new variety that he raised himself. The club commended the new fern.

At the coming meetings a question box will be a feature. President Goldring will read a paper at the September meeting on "The Splitting of Carnations," which will be followed by a discussion.

The club held its annual clambake at Henkes' grove, Newtonville, August 15, and also accepted the invitation to attend the twelfth wedding anniversary of W. W. Hannell, Watervliet, August 21.

ERIE, PA.

The Market.

Rain is needed badly in this section. A repetition of last year's drought is threatened. Snapdragons, asters and gladioli are getting plentiful, while cosmos and rudbeckia are just coming in. Choice stock is moving well.

Various Notes.

W. O. Baur left for the florists' convention Saturday. He will stop at Cleveland and Toledo on his way to Cincinnati, and return to Erie in ten days.

Mr. and Mrs. Wm. F. Kasting, of Buffalo, N. Y., are spending the summer here.

Lewis Perkins, of Welland, Ont., was the guest of Erie relatives over Sunday.

J. F. Dayton, representing the Madison Basketcraft Co., was calling on the local florists last week. B. P.

Lewistown, Ill.—Miss L. M. Davidson is having a greenhouse built, with concrete foundations.

LATE HOUSING OF PLANTS.

Will September 15 be too late, here in southern Texas, to take carnations or mums from the field or pots and plant them in benches for Christmas blooms? I had a good supply in the benches, but the houses and stock were destroyed by a storm. J. E. W.

September 15 is not too late in your section to set out plants in the bench from the field, or from pots, either, so long as they are not stunted in growth. Considerable mum stock used to be planted out and lifted early in September, just as the plants were budding, and potted or boxed up, and very fair commercial flowers can be produced in that way.

Carnations, of course, can be lifted any time at all, and housed, but the later planting retards the crop of flowers.

C. H. Totty.

TULIPS FOR FORCING.

Will forced blooms of Cottage Maid, La Reine (Queen Victoria) and Yellow Prince tulips sell well, or are other varieties preferred in large cities? If so, give names. What proportion of each color would the market demand? C. B.

La Reine is the most popular single tulip for forcing and probably as many of it are sold as all other earlies combined. Yellow Prince is a good yellow. Cottage Maid and Keizerskroon are also sold to some extent. In doubles Murillo and Couronne d'Or are the most popular. I would suggest that you plant one-half to La Reine of all you intend growing and divide the others in equal parts, if anything giving a preference to Yellow Prince and Cottage Maid. The scarlets are not in mueh demand. W. C.

LILIUM AURATUM.

Is it true that Lilium auratum degenerates each year, instead of increasing as the other varieties do? H. C.

Yes; it is true that this handsome lily in nearly all cases degenerates from year to year under cultivation. I have known cases where it has grown and flowered well for as long as six or eight years, and in one case even longer, but as a general rule the first year the bulbs flower well, the second moderately so, while the third or fourth years they entirely disappear. They will live the longest if they can be planted among rhododendrons or other flowering evergreens, over which there is a constant thick mulch of leaves and where the roots never get dry. W. N. C.

ECHEVERIAS FOR SPRING.

When should I plant echeveria seeds for plants to use next spring? C. P. N.

Echeverias, such as secunda glauca and metallica, are better propagated from leaf cuttings than by seeds. The latter method is slow and uncertain, but leaves rubbed off with a dormant eye attached will root in a propagating bed within a month. Water sparingly and not at all until roots appear, or the leaves will rot. When well rooted, place in flats of sandy loam and they will make nice plants for spring sales. C. W.

When Writing Advertisers

Tariff Now Settled

PROSPERITY IS EVERYWHERE
And is Now Knocking at Your Door
WHY NOT GET YOUR SHARE OF IT?

Look! This speaks for itself—one order of 500 Araucarias, 50 at $2.00, 50 at $1.00, 200 at 75c, 200 at 50c, has just been shipped to a large New England concern.

This is our 25th anniversary. For 25 years we have been importing, growing and shipping that so well-known decorative plant, the **Araucaria Excelsa, Excelsa Glauca** and **Robusta Compacta**, of which we are specialists. Convince yourself of the immensity and quality of our stock by coming to the spot—to our greenhouses—and see it growing. It will do you good.

Four Houses Filled with the Best. With What? Sure, with ARAUCARIAS, His Specialty

Empty houses! That won't do. What shall I plant? What is the most profitable? Listen to what your neighbor florist has to say. Mr. McGinty to George Know Nothing: "I filled a reasonable portion of my greenhouses last year with Godfrey Aschmann's Araucarias, and I tell you straight out I was only sorry I did not buy more. In two weeks, just when the demand was the biggest, my stock was nearly exhausted. This year I shall be smarter. Last week my order to Aschmann called for just double the amount. I never can lose anything on such an investment as that. Every dollar put in Araucarias yields three to four times the value while we're asleep."

We are one of the largest importers of these well-known and beautiful evergreen decorative plants, the **Araucaria Robusta Compacta, Excelsa Glauca and Excelsa.**

Araucaria Robusta Compacta, Glauca and Excelsa. Our reputation of being one of the largest importers and shippers of this beautiful evergreen decorative plant is so well known, dating far back into the 19th century, that our name, as well as the Araucaria itself, shall never die out, and is still fresh in people's minds, same as when we first started. Why the Araucaria is so popular is because it is an ancient plant, kept by Greeks and Romans as a special favorite in their household, as a good omen.

Araucaria Robusta Compacta and Excelsa Glauca, new importation, 3 tiers, 3-year-old, $1.00, $1.25 and $1.50.

Araucaria Excelsa Glauca. This is a beautiful blue variety, very graceful and beautiful. Specimen plants, 6-in., 7-in., 8-in. pots, 4 and 5 years old, 4, 5 and 6 tiers, 20, 25, 30 and 32 in. high, same in width, $1.50, $1.75, $2.00, $2.50 to $3.00 each.

Araucaria Excelsa, 1909 importation, in sizes as herewith stated: 5, 5½ to 6 in. pots, 3, 4, 5, 6 tiers, 12, 14, 16, 18, 20 to 25 in. high, 35c, 40c, 50c, 60c, 75c, $1.00 to $1.25.

Sago Palm, or Cycas Revoluta, 5½, 6, 7 and 8-in. pots, from 5 to 20 leaves to a plant, 10c per leaf.

Kentia Belmoreana, 4-in., 25c to 35c; 6 to 7-in., 6 good leaves, 75c, $1.00, $1.25 to $1.50.

Kentia Forsteriana, 8 in. pots, made up, 1 large, 4 ft. high in center, with 3 small around, price $3.00 to $4.00; single plants, 6 to 7-in. pots, 30, 35, 40 to 48 in. high, $2.00, $2.50 to $3.00.

Areca Lutescens, 4-in., made up of 3 plants, 25c.

Cocos Weddelliana, 3½-in., 18 to 20 in. high, 20c to 25c; 3-in., 15 in. high, 18c.

Ferns. Nephrolepis Whitmani, Todeaoides and Boston, 5, 5½ and 6-in. pots, 35c, 40c, 50c. Whitmani, large, 4-in. pots, fit for 6-in., 25c.

Adiantum Hybridum, very valuable for cutting, 6-in. pots, 25c, 35c, 50c.

Asparagus Plumosus Nanus, 2½-in. pots, $3.00 per 100; 4-in. pots, $10.00 per 100.

Asparagus Sprengeri, 2½-in. pots, $3.00 per 100.

Dish Ferns. Best assortment, 2½-in. pots, $3.00 per 100.

We have a full house each of the finest **Amerpohlii** and **Whitmani** in the market, 5½ to 6-in. pots, 25c, 40c to 50c.

Jerusalem Cherries. We offer the best, new improved variety, already laden with large, orange-colored berries, 2½-in. pots, $5.00 per 100.

Begonia Gloire de Lorraine a specialty; also own new improved strain introduced last Xmas is still well in the minds of florists. We have both the deep pink and the light pink variety (Lonsdale), 4-in. pots, 30c.

Cineraria Hybrida. Aschmann's well-known strain, at one-half price, tall, 2-in. pots, $3.00 per 100, ready September 1.

Cyclamen Giganteum, 2½ to 3-in. pots, $4.00 to $5.00 per 100.

All goods must travel at purchaser's risk. Cash with order, please.

Please state if you want stock shipped in or out of pots.

J. H. MENARD,
5212 S. Rampart St., New Orleans, La.

SEEDS.

COBURN'S SELECTED PANSY SEED.
BEST MARKET STRAIN GROWN.
Our seed is saved from about 12,000 plants, carefully selected, when in bloom, from the 500,000 we grow for our spring sales.
Each plant is carefully selected, color, size, form and substance being taken into consideration, and the proportion of each color is properly balanced.
As a result of over 25 years' work along these lines, we feel justified in claiming to have the best strain of pansies on the market, and we invite trial and comparison.
Growing our stock in this manner, we have only a limited amount of seed to spare, and in order to distribute as widely as possible, we offer it in packets of 1,000 seeds. Price $1.00 per packet (only one to each customer).
I. E. COBURN, 291 Ferry St., Everett, Mass.

It is an absolute certainty and conceded by leading European growers, who have seen our pansies and theirs growing side by side in our gardens, that pansies grown from American seed will produce larger, earlier, finer blooms than foreign-grown seed of the same strain. We supply over 100 cities and towns in the west with blooming plants at a higher average price than any grower on the western continent. We sow and sell from the same bag. 1800 seeds, $1.00. Write for "Points on Pansies."
Steele's Giant Pansy Gardens, Portland, Ore.

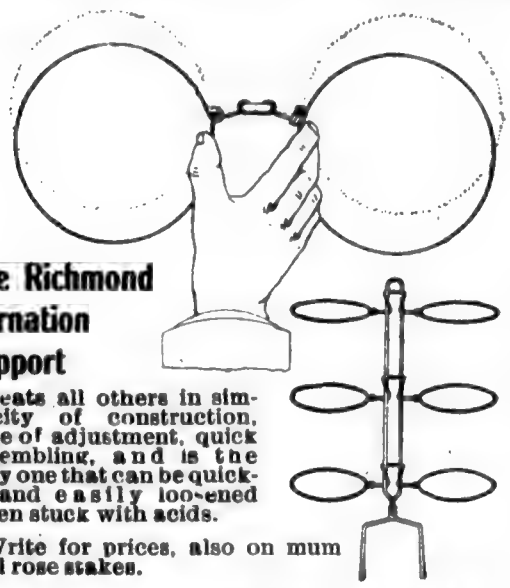
Full line of wire work. Write for list.
Holton & Hunkel Co., Milwaukee, Wis.

E. H. Hunt, 76-78 Wabash Ave., Chicago.



PANSIES FOR SPRING SALES.

Will pansy seed planted in coldframes in May, if the plants are transplanted in the field and partly shaded in July and August, make good plants for next season? Would you advise the removal of the blooms this summer?

F. E. W.

A better plan would be to sow seeds either in the open ground in partial shade, or in frames, the last week in July or first week in August. Plants started as early as May could, of course, be sold the following spring, but are too large and less desirable than such as were started three months later. The labor of picking off flowers and seeds is quite considerable, and although it is a trifle late now, you might still sow a batch of seeds and get nice little plants before winter. Another season start your seeds later and you will have better satisfaction. C. W.

PORTSMOUTH, VA.—D'Alcorn & Sons have purchased the entire stock of the American Bulb Co., at Richmond, Va.

The Richmond Carnation Support

Beats all others in simplicity of construction, ease of adjustment, quick assembling, and is the only one that can be quickly and easily loosened when stuck with acids.

Write for prices, also on mum and rose stakes.

EAGLE MACHINE WORKS

RICHMOND, IND.

Mention The Review when you write.

PROVIDENCE, R. I.

Trade Conditions.

Except for funeral work, there is nothing doing and the retail dealers and their clerks are taking frequent days off. Among the growers all are busy overhauling houses and benches and getting ready for planting the indoor crops. Asters are all the go and they are plentiful and generally good. A few sweet peas find favor, but otherwise the stock is indifferent.

Various Notes.

Charles Hunt is benching 20,000 carnation plants.

Many large floral pieces were seen at a recent Italian funeral, the supplying of which was well distributed among the various dealers.

A. Holscher is cutting some of the finest asters seen in this market in several years.

O'Connor's houses of mums are coming along in fine shape and he expects to cut some fancy blooms this fall.

Carl Jurgens is building an extensive addition to his range at Newport, which when complete will give him nearly six acres of glass. He is confining his energies almost entirely to roses and lily of the valley.

Miss Clara McCarron, daughter of Eugene McCarron, and Miss Nellie O'Connor are spending their vacations at Matunuck.

The town council of Westerly has appointed S. J. Reuter as tree warden for that town.

The will of Otto C. Lenz was probated in this city August 10.

C. T. Nelson, of Aquidneck avenue, Middletown, announces a large crop of hothouse grapes.

Gibson furnished the decorations for the wedding of the daughter of the former mayor, Robert C. Cottrell, at Newport, August 9. It was a hydrangea wedding, this flower being used in both the church and the house and for the bouquets and hats of the bridal party. Pink, blue and white were generously used.

Eugene McCarron reports a good business on funeral orders.

Robert Clarke has accepted a position on the estate of William L. Hodgman, at East Greenwich. W. H. M.

The Review sends Scott's Florists' Manual postpaid for $5.

FOR GROWING ON JARDINIERE FERNS in all leading varieties, transplanted in flats.

$1.00 per 100; $7.50 per 1000. 2¼-in. pots, $3.50 per 100; $30.00 per 1000.

Larger sizes, all varieties, at special prices on application.

Madison, N. J.—Arthur Herrington, who has hitherto held the position of park superintendent, at Florham Farms, the estate of H. McK. Twombly, has been promoted to the position of landscape architect. His new duties will be to design and carry into effect improvements for the park. It is said that Mr. Twombly will spend a great sum of money, during the next year or two, for the purpose of beautifying the park.

This is The Florists' Manual

By William Scott

SECOND EDITION

THOROUGHLY REVISED AND BROUGHT UP TO DATE

NO SCIENCE, BUT LOTS OF PRACTICAL COMMON SENSE

"I have several times been consulted by those who would make a beginning in the Florists' business. In each case I have said that the first step is to subscribe for a Trade Paper, and the next to procure a copy of the Florists' Manual." —J. A. VALENTINE, Pres. Park Floral Co., Denver, Colo.

"Find enclosed $5 for the Florists' Manual, by William Scott. It is the best book of the age on commercial floriculture and should be in the home of every gardener."—CONRAD FORBACH, Buffalo, N. Y.

No dry-as-dust botanical classifications, but tells you just how to produce marketable plants and cut flowers in the best and cheapest way.

Greenhouse Heating.

DO IT NOW.

"A stitch in time saves nine," or even ten, if it is in a greenhouse heating plant.

In the last few years there has been great improvement in the character of the heating apparatus used by florists, for it has come to be realized that the facilities for warming are about the most important subject the grower has to consider. In these days of close competition it may easily happen that the efficiency of the heating apparatus may spell loss or profit: Without enough heat, properly distributed and controlled, the stock will not be of its best quality; and the difference in fuel consumed as between an economical arrangement and an extravagant one will eat a big hole in the receipts.

It is a far cry from the primitive flue to the up-to-date systems now used in the big, modern plants, like that of W. H. Elliott, who circulates steam by gravity through a half mile of pipe, or the Craig Co., who will heat a big new range with hot water under forced circulation. The big growers employ experts to plan the heating arrangements and consider the service so valuable that they are not only willing to pay well for advice but expend large sums in following it. To the small grower the subject is of no less importance.

This is the season at which the apparatus should be overhauled from A to Z and put in apple-pie order. Changes, if needed, take time and the cool nights, with their need for heat, will be here almost before you know it.

Hot water not only remains the best medium for warming, under certain conditions, but its range has been greatly extended in the last few years and it is now employed satisfactorily and economically in much larger units than heretofore. Steam has been so developed, as applied to greenhouse heating, that many of the largest growers have found it a profitable investment to concentrate the entire boiler plant in one central station, which may include pumps, dynamos and even cold storage apparatus.

While the best heating apparatus, small or large, is the one with the fewest frills, it is not always possible to employ either water or steam in its simplest form; conditions in each case must be met, and almost always can be satisfactorily met by study. It is not possible to say that any one system is the best under all circumstances and it may require, and, indeed, in possibly the majority of cases does require, the addition of one or more of the mechanical aids to secure the right results. Especially are these needed in the numerous establishments that have grown from small beginnings without plan or other reason than the need for "another house" to care for increasing business.

Nowadays there are half a dozen ways of making hot water do things it would not do before the inventors got to work. And steam is assisted on its rounds by regulators, condensation traps and mechanically created vacuums. Even pipe joints at trifling cost may be made tight with the guarantee that they will not rust and become inseparable.

By all means go over your heating apparatus now. Study its defects and rectify them; if not by such simple changes as frequently accomplish the desired result, then by employing one or more of the devices which are needed to make the apparatus both efficient and economical. Money spent in this way frequently comes back quickly; growers using small coal found a rocking grate with closely spaced bars quickly paid for itself through the saving of fuel that had dropped through their old, wide bars.

PIPING A SMALL HOUSE.

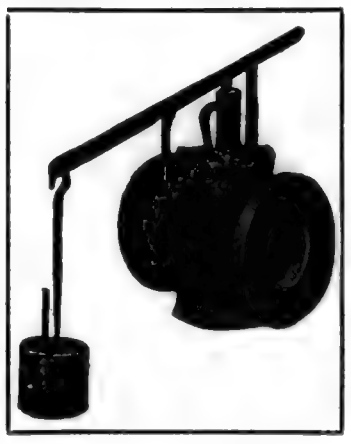
We are building a greenhouse 22x65 feet. The north wall is seven feet high, with two feet of concrete, three feet of boards and two feet of glass, the panes 16x24. The boarding will be double thick. The south wall is four feet high, with two feet of glass. The house is built with the long span to the south. The house runs east and west, to connect with another house at the west end, with a glass partition where it connects. How many runs of pipe will it take? What size would you advise using: 1¼-inch or 2-inch? The boiler is located in the cellar of the dwelling. The temperature required will be for carnations, say from 50 to 60 degrees, in Massachusetts climate. L. W.

The house can be heated with hot water by installing the following pipe: One 2½-inch or 3-inch flow from the boiler to the far end of the house, there to divide and return by fifteen 2-inch pipes. I would not advise the use of 1¼-inch pipe for hot water unless you intend converting the plant into a steam plant some day. If so, install twenty-one 1¼-inch pipes as returns.

STEAM FOR FOUR HOUSES.

We have three greenhouses, 22x100, 22x70 and 16x80, and intend adding one more, 22x70. The boilers, two in number,

The Perfection Of Up-to-Date Greenhouse Heating Science



Automatic Hot Water Circulator—The Castle System of forced circulation of hot water for greenhouse heating is the only one that has demonstrated its practicability, economy and perfection of action. It works while you sleep and if anything should happen to put your forced circulation out of commission, this device takes up its work automatically. Its use **increases** the efficiency of your heating plant but **reduces** the expense.

Don't build a greenhouse or remodel the old plant without securing complete information about the Castle Boiler.

THE CASTLE COMPANY

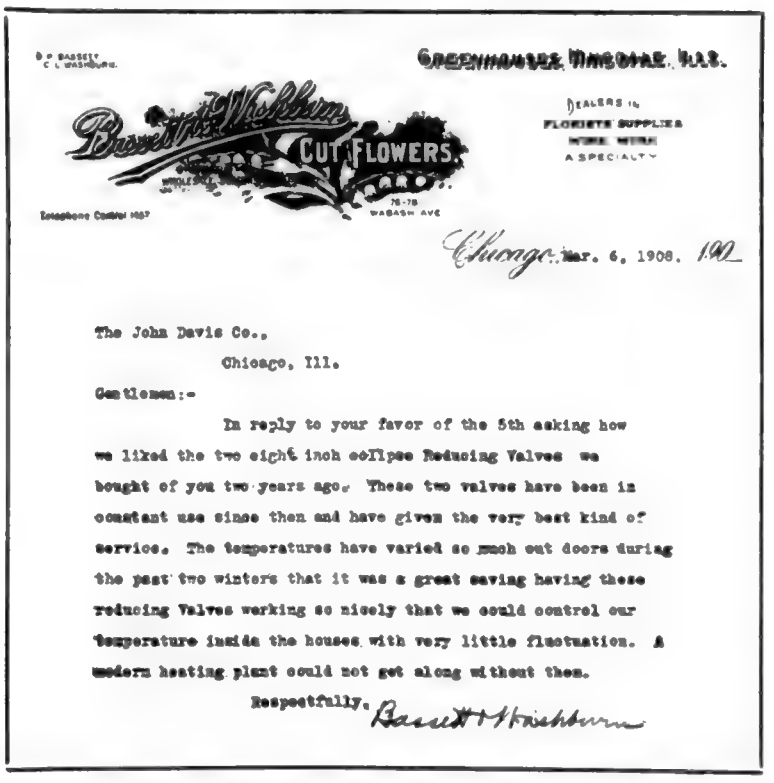
Send your address and I will mail you literature.

170 Summer Street, BOSTON, MASS.

The Days of Hot Water Heating

of Greenhouses are becoming a thing of the past. Steam heat **is the heat.** It can be controlled better and no danger of loss of plants by sudden drop in temperature. To accomplish this, however, you must maintain a pressure of 20 or more pounds on the boiler and reduce it with a regulating valve to about 10 pounds. **Now comes the point.** The **Valve** to use is the

Eclipse Regulating Valve



as shown in the cut. This valve is now used by some of the largest **growers,** and we can furnish any number of testimonials as to their efficiency.

We will be glad to send our catalogue, showing our full line of Regulating Valves, Steam Traps, Pump Governors, etc.

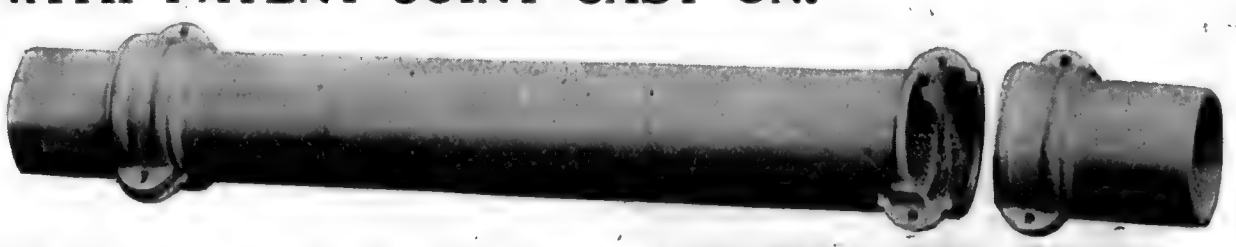
Barnett & Wickburn
CUT FLOWERS.
DEALERS IN FLORISTS' SUPPLIES
78-78 WABASH AVE

Chicago, Mar. 6, 1908.

The John Davis Co.,
Chicago, Ill.

Gentlemen:-



In reply to your favor of the 5th asking how we liked the two eight inch eclipse Reducing Valves we bought of you two years ago. These two valves have been in constant use since then and have given the very best kind of service. The temperatures have varied so much out doors during the past two winters that it was a great saving having these reducing Valves working so nicely that we could control our temperature inside the houses with very little fluctuation. A modern heating plant could not get along without them.

Respectfully, Barnett & Wickburn

H. MUNSON, 68 N. State Street, Chicago Sales Agent

Mention The Review when you write.

one 44x108, containing fifty-one 2½-inch flues, with a round firehole through center, and one 36x108, horizontal, with thirty 3-inch flues. We intend putting in a larger boiler, and can get one 46x144, with forty-two 3-inch tubes, or one 52x192, with sixty-four 3-inch tubes. Would the one 46x144 be large enough for the purpose? We grow roses, carnations and mums; also bedding plants. The boiler pit is seven feet deep. Will a 4-inch pipe be large enough for steam main pipe? W. S. F.

The boiler 46x144 inches, with forty-two 3-inch tubes, should be ample to carry the four houses, using steam. It is a good plan to have a reserve boiler to provide against accident. A 4-inch main flow will do your work. Each of the 22-foot houses should have a 2½-inch flow from the main riser to the far end of the house, there dividing to supply fifteen 1¼-inch returns. The 16-foot house can be handled with a 2-inch riser and twelve 1¼-inch returns. If the returns are carefully graded there will be no difficulty about returning the condensation to the boiler, provided the water line of the boiler is two feet or more below the lowest heating pipes in the greenhouses. If you don't have the proper fall you will have to put in a steam trap to return the water of condensation to the boiler. Better make the pit twelve feet deep, if you can.

HYDRANGEA ARBORESCENS.

I wish some further advice from you regarding the treatment of Hydrangea arborescens. Should it be cut back after the flowering season, or in the spring, like Hydrangea paniculata? L. A. G.

Treat Hydrangea arborescens exactly as you would H. paniculata, and it will succeed well. The pruning can be done any time after the foliage has fallen. If put off until spring, finish it before growth starts. C. W.

PANSIES FOR NEXT SPRING.

Next spring I would like to have pansy plants in bloom and bud for commercial purposes. Having never tried to grow them and finding the books I have read give such a vague idea, I wish I could have the opportunity of finding something in the Review. I would also like to know what priced seed I should use. Also please state whether they should be

covered during the winter with glass, leaves or boards. The thermometer in this part of Kansas sometimes registers 10 to 12 degrees below zero.

C. S. S.

Refer back to the REVIEW of July 22, page 9, and you will find under "Seasonable Suggestions" some cultural notes on pansies. To have plants for commercial purposes next spring you must procure and sow the seed at once. Do not buy any cheap seed. You should give from $3 to $5 per ounce for really good stock. Of course, some strains are much higher than even these prices, but you can get a good strain at the foregoing prices. In winter they can be carried over either in coldframes or outdoors, on sloping or well drained ground where no water can stand. After the ground freezes give them a mulch of meadow hay or leaves. Over these throw some light branches or corn stalks, to hold the mulch from blowing away. A thin mulch only is required.

C. W.

ST. PAUL.

The Market.

Intensely hot weather during the last month has had the usual effect on trade, causing poor business and a short supply of good stock. Asters are the main reliance at present, although some good sweet peas are still coming in. None of the local growers plant summer roses, so we have to depend on shipped-in stock.

Various Notes.

We have not heard of a single person from this part of the state who will attend the convention. President Wirth, of the State Association, is on the Pacific coast, where he attended the convention of park superintendents. Even the genial A. S. Swanson, who has been attending conventions for twenty years,

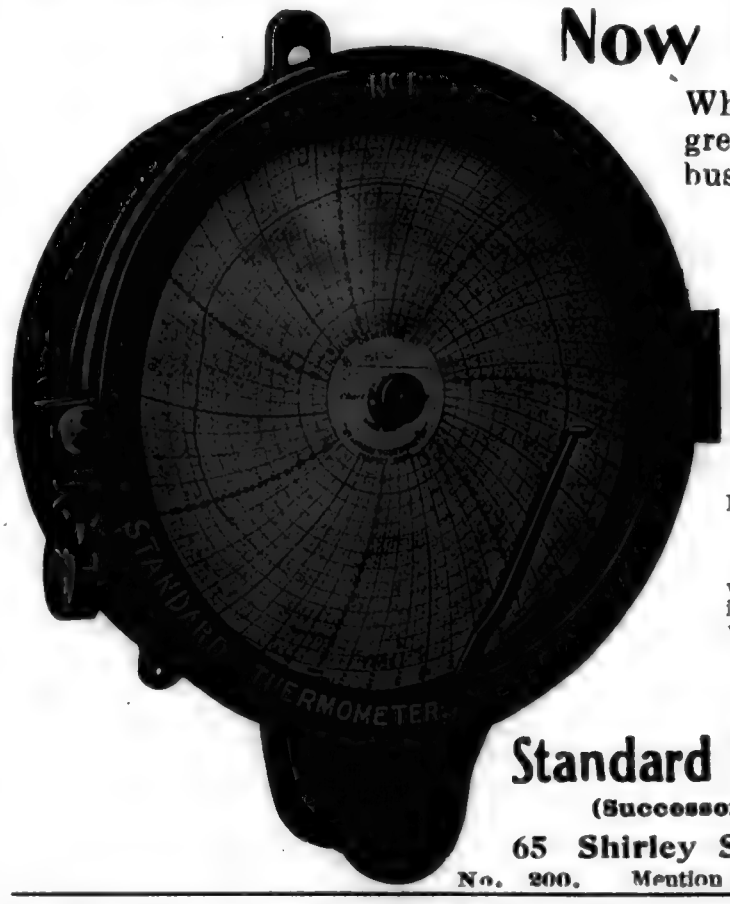
Vacations are now in order and the four points of the compass are followed by those seeking rest and pleasure.

X. Y. Z.

WEST GROVE, PA.



The Dingee & Conard Co. announces that it has purchased the good will, corporation name, stock, and all that pertains to the mail order business of Heller Bros., the rose growers of New Castle, Ind. James McLaughlin, a young man who has been trained in the Dingee & Conard establishment, has been placed in charge at New Castle. The business will be carried on under the name of Heller Bros., as a separate institution, and it is the purpose of the firm to push it energetically.

"New Castle has so many natural advantages," says a representative of the firm, "that we are confident we will in a short time have a business there as large as our present business. The soil there, we believe, is the best in the United States. There are three express companies and three railroads there, both of which are a great advantage in a business like ours, made up largely of express shipments. We did not take the cut flower end of the Heller Bros. business."

NEW BEDFORD, MASS.

The Market.

Trade remains about the same as last reported. There is a good deal of funeral work. Asters are the flowers mostly depended on to supply orders with. Carnations are about done. Asters retail at 35 cents per dozen. Sweet peas are quite plentiful, though the stems are rather short, on account of the dry weather. They sell at almost any price; 25 cents and 50 cents per hundred are the general prices. Some put them up in small bunches to sell for 5 cents and 10 cents. These bunches sell well. There are plenty of other outdoor flowers. Gladioli are coming in now and

Our line of boilers is extensive. The one shown is the largest series; but we have boilers for every **DEMAND**

This is one man's experience:

W. D. Snell, Mohawk, N. Y., says: "I have to report in regard to the No. 407 Standard Sectional Steam Boiler recently installed in my greenhouses, that it gives thorough satisfaction. About January 1, I had occasion to note an incident that I consider worth reporting. The boiler was attended to, fuel furnished, grate shaken down and everything arranged for the night at 12 o'clock midnight. At that time the boiler showed two lbs. steam. To test the boiler and see how long it would run without attention, I deferred giving it any further attention until 11 o'clock the following day. At that time the fuel needed replenishing, but steam had been maintained in the system practically all the time and at the time it was replenished the gauge stood at two lbs. pressure. The experiment showed that the boiler ran without any attention whatever for eleven hours, carrying 7000 sq. ft. glass to about 55 degrees. The weather outside was about zero."

HYDRANGEA OTAKSA.

I would like to know about the culture of Hydrangea Otaksa. Ours were planted out in the field out of 5-inch pots. How should they be cared for so they can be forced for Easter or a little later?

R. H. G.

Lift the plants about the end of August and, after potting, stand outdoors where the plants can get fullest sunshine. Syringe frequently until the plants stop wilting. In order to have the plants in good condition for early forcing, it is necessary to have the wood thoroughly ripened and of a nutty brown color in December. To secure this, the plants should be gradually kept drier at the root, commencing about a month after potting. Early frosts will sometimes work havoc with the plants, particularly when the shoots are green and soft. Heavy rains should be avoided and the protection of sashes given.

Easter comes early in 1910, and plants to be in flower then must be started not later than Christmas. The advantage of pot-grown over planted-out stock comes when we have an early Easter, as these can be ripened off much earlier than lifted plants.

C. W.

EARLY GLADIOLI.

How soon can Colvillei alba and Peach Blossom gladioli be forced into bloom if planted November 1? What culture and temperature will give best blooms?

C. B.

Such gladioli as Colvillei alba and Peach Blossom, if planted at the time you mention, cannot very well be flowered before the last of April. You can secure these bulbs at a much earlier date, and if you wish to have them in flower for Easter (the end of March in 1910), place them in flats as soon as they can be had, usually not later than the middle of September. A flat thirty inches long, twelve inches wide and four inches deep will hold 100 bulbs. Place on a cellar floor or in a frame covered with dry leaves until they start to grow. Keep cool until January 1. Then let them have a bench in a house kept at 50 degrees at night. Do not attempt any hard forcing, or you will ruin them. Be sure to furnish them with an abundant water supply and give some liquid manure when the flats are full of active roots.

C.

ADAMS, MASS.—A. J. Boothman, with the help of his two sons, has nearly completed a new greenhouse on Summer street.

GERANIUMS FOR SPRING SALES.

How late should geraniums be propagated in central Ohio to come in bloom not later than June 1? How many stock plants, that were 4-inch stock planted in ground this spring, should be used to make about 5,000 plants for next spring?

C. L. H.

You do not state what class of stock you want for sales about June 1. As a general rule, plants in 4-inch pots have the best call. Cuttings for these can be taken during September in your state. It would be better to wait until toward the end of the month. Each of these cuttings, when rooted and potted off, will give you a good cutting about the end of January or early in February.

The question as to how many stock plants would be required is difficult to answer. Everything depends on the growth the plants have made, but you should be able to get not less than twenty-five cuttings per plant; sometimes far more than this can be had, but often less. If you had fifty stock plants growing in a bench in a greenhouse and could take cuttings from these as produced during the winter, they should give you the necessary number of plants. With double that number you would have an abundance. Of course, expert propagators can get a far larger number of plants than those named; overpropagation cannot, however, be recommended. It only causes a deterioration in the vitality of the plants.

C. W.

NICOTIANA SYLVESTRIS.

Kindly tell us when to plant seed of Nicotiana sylvestris, and also as to temperature and soil and when they will bloom.

B. F. C.

If wanted for summer flowering in the garden, seed may be sown in March in a frame or greenhouse and planting out done about the middle of May. The seeds germinate quickly and the seedlings grow extremely fast. It is, therefore, a mistake to sow this annual as early as you would many slower growing sorts. For indoor culture this variety has little to recommend it. The foliage is quite handsome, but the flowers are less attractive than those of N. Sanderæ, or the hybrids of N. affinis.

APHINE

AN INSECTICIDE (EMULSION) THAT WILL POSITIVELY EXTERMINATE PLANT LICE OF EVERY SPECIES

The successful Florists, Gardeners, Nurserymen and Farmers—in fact everyone interested in horticulture and agriculture—must readily appreciate the value of this new discovery.

APHINE IS NOT AN EXPERIMENT

It has fully demonstrated its merits during the seven years that it has been in use within a limited field, in which time it has been tested by the highest scientific authorities of the land—and proclaimed an infallible spray for fruit trees, vines and all outside plants, trees and shrubs.

For the **Greenhouse** and **Conservatory** it has no equal among the various insect remedies now in use.

Aphine is a combination of essential and ethereal oils, combined with nicotine, in a ready soluble and available form, and completely kills such pests as the

Green Fly—Black Fly—Thrips—Red Spider—Mealy Bug—Caterpillars—White and Brown Scale—and many other insects injurious to foliage and vegetation.

Aphine, while admittedly a powerful insecticide, does not affect the most tender growths of plants, the nitrogen and phosphates which are contained in **Aphine** acting as a direct plant stimulant, thus nourishing the plant as well as protecting it from insect invasion.

This has been proven to the satisfaction of eminent scientists.

"Aphine has a future as wide and long as the United States" says "Collier's Weekly."

WHAT "COLLIER'S WEEKLY" SAYS

DEATH TO THE PLANT LOUSE

"A spray has been discovered that will surely kill that innumerable and ubiquitous pest of Aphids (Plant Lice). George E. Talmadge, a scientist out in Madison, New Jersey, compounded the discovery, which is named 'Aphine.' Talmadge used to be an orchid collector in South America, and he has always interested himself in the problems and tragedies of plant life. His spray looks like hard cider, and he runs it through a still all night. It costs $1.50 a gallon, and is mixed one gallon to forty gallons of water. Essential oils are used in its makeup, and these are imported and therefore expensive. Talmadge has nearly fallen into the hands of the Philistines in several episodes. A shyster lawyer, who saw the death-dealing possibilities of 'Aphine,' seized fourteen barrels of it and tried to force various park departments to take it at a price of $300 a barrel of fifty gallons. Now six dollars a gallon is too costly for any public utility, however deadly. This same lawyer wanted to flood the market with the stuff and guarantee its killing anything up to undesirable cats. But Talmadge finally shook loose from the crook, and in a very humble way has been distilling and selling the poison from his own home. If he will keep his hands on the patents, fight shy of partners, make the stuff pure, and shun adulteration as he would the devil, he has a life work ahead of him that will be blessed to husbandmen and housewives everywhere, and that will turn back to him a cozy income. There are plenty of insect destroyers for 'chewing insects.' It is the problem of 'sucking insects' that has been difficult. They must be killed by contact. 'Aphine,' when sprayed, liberates a gas that kills the lice. And this without injuring tender plants or delicate foliage. It answers summarily for some hundreds of varieties of soft-bodied insects, ranging in color from nearly white to a brilliant red. Many plants have their own special variety of pest. There is the hop-louse, for instance. In the South, the pea-louse will sometimes destroy the entire crop. Melons and gourds, greenhouse and garden plants, vegetables, flowers, all table plants (where the leaves are not directly eaten), apple trees, peach trees, and many other varieties of fruit trees—all have been in need of relief from plant lice. The old methods of fighting with tobacco smoke, pumpkin fumigation, and kerosene spray had objections and limitations. Every section of our country has some variety of malicious louse. 'Aphine' has a future as wide and as long as the United States."—Collier's.

The above article, appearing in the editorial columns of "Collier's Weekly" on April 17th, 1909, is a strong endorsement of the merits of **Aphine**—but its qualities are in no wise exaggerated.

This article was not solicited—in fact, the high standard of "Collier's Weekly" prohibits even a suggestion of the possibility of a subsidized item appearing in its news columns, and I have no knowledge as to where the details of my experience, as related therein, and which are virtually correct, were obtained.

WHAT LEADING ENTOMOLOGISTS, GARDENERS AND FLORISTS SAY

John B. Smith, Entomologist, New Jersey Agricultural Experiment Stations, New Brunswick, N. J.: . . . "I have again tried your material at various strengths on plant lice, and there is no doubt that, as against these insects, it is almost a specific. It kills everything that it touches at the strength that I have used. . . . You can guarantee your material to be effective against plant lice. I know that from personal experience, and it seems to be equally effective against all the kinds of plant lice against which I have used it."

Edmund B. Southwick, Entomologist, Department of Parks, New York City: "I want to say that I have given your preparation for the destruction of Aphids a very thorough trial on cucurbitas and other plants infested with Aphids and find it works very successfully; in fact, for this special purpose I have found nothing that compares with it."

John Herlihy, Arboriculturist, Prospect Park, Brooklyn, N. Y.: "Your sample of insecticide was received in due time. The **Aphine** I have tried on the Green Fly, Sugar Maple Aphid, and Euonymus scale and found it entirely satisfactory. In each case the death of the insect occurred in a few minutes."

A. Herrington, Superintendent Florham Farms, Park Department, Florham Park, N. J.: "I have made a careful test of your insecticide upon several different plants that were infested with green fly, red spider and scale, and in every case it completely destroyed the pests in question, with no apparent harm to the plants treated, although some of them were in a soft growing condition, most susceptible to injury from such preparations."

August Belmont, Banker, New York City: "I have received your letter, which I referred to my gardener, Mr. Henry M. Gilmour, who reports that he has used your **Aphine** in my greenhouses at Hempstead and finds it very good for the destruction of slugs, worms, red spider and Aphis."

William B. Berger, Cashier Colorado National Bank, Denver, Colo.: . . . "I will be very glad to get same, as since I have commenced to use it I do not see how I ever got along without it. I have a small greenhouse and outdoor garden, and it is indeed a satisfaction to find an insecticide which is so easily applied and so effective as **Aphine.**"

John E. Fray, White Oak Ridge Nurseries, Summit, N. J.: "I have used George E. Talmadge's insecticide for the past six or eight months to destroy Green and Black Fly, Thrips, Red Spider, and Scale. In every instance it was thoroughly effective. The buds and tender shoots are not in the least affected by the application of the preparation. I can heartily recommend it to any one desiring immediate and permanent results."

Albert M. Herr, Wholesale Florist, Lancaster, Pa.: "Your **Aphine,** if properly handled, will certainly destroy Aphids or plant lice, and, where a liquid insecticide is wanted, is just the thing."

Louis A. Noe, Floriculturist, Madison, N. J.: "In using your **Aphine,** beg to say that I find that wherever it touches the Aphis it means sure death."

The Brant-Hentz Flower Co., Madison, N. J.: "We have used your **Aphine** for Aphis on rose plants for the past five months, and find that it kills the pests in question without doing any injury to flower or foliage."

APHINE is sold in one gallon and in one quart cans. It is put up in these packages only, at the laboratory, to insure unadulterated delivery to the user.

It is used at an average strength of 40 parts water to one part of APHINE—full directions being on each package.

One gallon cans, $2.50; One quart cans, $1.00.

GLASS CLEANING COMPOUND.

The cleaning of greasy, dirt incrusted glass is a difficult problem for many greenhouse owners, who will be interested in a glass cleaning compound, quick and powerful in action, which the Andersen Specialty Co., of Chicago, is about to introduce to the trade. The compound is said to take off the dirt and grease without injury to paint or putty. The compound has been used covering a considerable period of time, on the skylights of such buildings in Chicago as the postoffice, Board of Trade, Art Institute and many of the leading skyscrapers. The Oak Park Elevated railroad has also used the preparation for cleaning the outside of its cars.

The compound is applied with a long handled brush, soaked in the solution. It should then be washed off with the hose. One gallon of the solution is said to clean from 400 to 600 square feet, according to the condition of the glass. Several Chicago florists are using the cleaner and it is believed that it will be the means of saving greenhouse people time, trouble and money in keeping their glass clear.

LAWRENCE, MASS.—W. F. Regan, the Essex street florist, has recovered from his illness.

OAKMONT, PA.—Robt. H. Neill has decided to leave the florists' business as soon as he can make satisfactory arrangements for doing so.

BROCKTON, MASS.—It is said that James Dyce, of the James Dyce Co., has been displaying a freak dahlia which he grew in his dahlia gardens at Winthrop. The flower is variegated pink and white and is a twin blossom, two perfect blossoms growing on a single stem, the blossoms being placed back to back with sepals around the base in a semicircle.

Buckskin Greenhouse Hose

¾-inch, 15c per foot, coupled, f. o. b. Detroit.

Furnished in continuous lengths of 500 feet, without seam, joint or connection, in ½ and ¾ inch sizes only. An exceptionally high-grade Florists' hose; with a double woven jacket insertion instead of cotton duck, and with specially selected rubber in the inner tube and cover.

The double woven jacket construction makes a stronger hose than can be obtained from cotton duck, and absolutely precludes the possibility of cover opening at seam—a common cause of failure of garden hose made on cotton duck. This construction also gives a more flexible hose and reduces the possibility of kinking.

Buckskin Hose is guaranteed to stand a pressure of 500 pounds per square inch, although its bursting pressure is far in excess of this.

Are You Wasting Money?

As truly stated by Prof. A. C. Beal, late of the Illinois Experiment Station:

> **"The point to keep in mind is that the value of these insecticides (nicotine solutions) depends on the amount of nicotine in them, and the price should be governed accordingly."** (Prof. Beal's Article on "Insecticides for Thrips," in "The Weekly Florists' Review," October 29, 1908.)

In short, Professor Beal's article fully substantiates our claim that our "Nico-Fume" products are furnishing the purchaser much more nicotine per dollar invested than is offered by other preparations. **For Example:**

"Nico-Fume" Liquid, guaranteed to contain not less than 40% nicotine, sells at $10.50 per gallon, in single gallon lots. Yet, through lack of information, some florists are paying $15.00 per gallon for competing preparations, of which the highest claim by any is 45% nicotine.

Don't you see how these florists are wasting money?

For, if 40% nicotine-solution can be bought for $10.50 per gallon, it is folly to pay $15.00 per gallon for only 45% nicotine-solution, because, as 45% is only ⅛ more than 40%, there is consequently only ⅛ more nicotine in a gallon of 45% nicotine-solution than in a gallon of 40% solution; therefore, the **price** of the 45% preparation should not be more than ⅛ greater—namely, not more than $11.81 per gallon in **single gallon lots,** instead of $15.00 per gallon.

Likewise, as to smaller packages: If you can buy a pint of "Nico-Fume" Liquid (40% nicotine) for $1.50, is it wise to pay the same price for an article containing only 30% nicotine, or to pay $2.00 to $2.50 per pint for other preparations when the most nicotine claimed for any of these latter is only ⅛ more than is in a pint of "Nico-Fume" Liquid? For ⅛ more than $1.50 is $1.69, and **not** $2.00 and $2.50.

QUANTITY DISCOUNTS. We have arranged to allow florists special discounts on quantity orders for "Nico-Fume" Products, our complete schedule of prices being as follows, net cash, f. o. b. Louisville, Ky.

"Nico-Fume" Liquid

¼ Pint	$ 0.50	5 Gallons	$ 47.25—(a saving of 10%)
Pint	1.50	10 Gallons	89.25—(a saving of 15%)
½ Gallon	5.50	20 Gallons	168.00—(a saving of 20%)
1 Gallon	10.50	40 Gallons	315.00—(a saving of 25%)

All quantities in excess of ½ gallon are packed in **One Gallon Cans**—and not in kegs or barrels—but without increased charge for the cans; the cans being much easier to handle in greenhouse work than kegs or barrels, besides affording less tendency to waste through accident or carelessness.

PURITY. As the question of purity is one of great importance to florists, we guarantee that "Nico-Fume" Liquid contains only nicotine and water, blended in the proportion we deem best for general florist usage, namely, a 40% nicotine solution.

"Nico-Fume" Tobacco Paper

This product, having been put upon the market some time before we offered "Nico-Fume" Liquid, is so well known to florists and horticulturists throughout the country that detailed comment is doubtless unnecessary; our claim being that "Nico-Fume" Paper is the "strongest, best packed, and easiest-applied" tobacco paper on the market—the sheets being folded and punched, ready for use; thus saving labor and loss of strength through evaporation while handling.

Our complete schedule of prices for "Nico-Fume" Paper is as follows, net cash, f. o. b. Louisville, Ky.:

Can containing 24 sheets,	$0.75	6 Cans, 288 sheets ea., $ 35.10—(a saving of 10%)
Can containing 144 sheets,	3.50	12 Cans, 288 sheets ea., 66.30—(a saving of 15%)
Can containing 288 sheets,	6.50	24 Cans, 288 sheets ea., 124.80—(a saving of 20%)
		48 Cans, 288 sheets ea., 234.00—(a saving of 25%)

THE KENTUCKY TOBACCO PRODUCT COMPANY, INC.

LOUISVILLE, KENTUCKY

CURE FOR WHITE ANTS.

I note in the Review for August 5 the troubles of Mr. C. Vestal with white ants, and can sympathize with him, and believe that he will find a never-failing remedy in Carbon Oil. I have used it in many instances and have found it instant death at all times. I would infer that crude oil should be efficient, but as it does not appear to have been, I suggest the use of Carbon Oil, which is intensely penetrating. On benches, pour along the edges and paint the sides; the bottom may also be sprayed and painted, though if already infested it is difficult to get at the pest there. Soak the soil, which, by the way, apparently contains much fibrous matter. I have never known the ants to remain in any soil not containing wood refuse or very fibrous matter. We at times have had bulb boxes infested; these were of southern wood, which seemed to contain the eggs.

My first experience with the ants was in the total loss of some palm seeds, which were pierced and devoured in three weeks. Have known them to ascend four feet in chrysanthemum stems, and under a sixteen-foot board outdoors have seen them by the hundred thousand.

Before filling any bench give a thorough painting with Carbon Oil and I feel confident that white ants and many other pests will shun such lumber. Have never known this painting to injure plants.

Theo. F. Beckert.

PECKY CYPRESS.

Cypress manufacturers are trying to interest the general public in the use of pecky cypress for bridge, culvert and sidewalk construction. They claim for this wood that inasmuch as it is sawed from trees which have been affected with a rot disease, but have recovered, the wood is therefore immune to rot, and is particularly adapted for this kind of construction. Not long ago the leading selling agency did considerable exploitation work to show florists how valuable pecky cypress is for greenhouse benches, with the result that nowadays scarcely any other wood is used for this purpose.

Manchester, Mass.—The greenhouses belonging to Mrs. W. Scott Fitz, on School street, have been cut into sections and moved on wheels to her estate at the Neck.

Owensboro, Ky.

To-Bak-Ine Products

THEY ALL

Kill Bugs

We have a little book with letters from growers who know from experience. It is free.

TO-BAK-INE PRODUCTS are not the cheapest insecticides on the market (in point of first cost), but in point of **results** there's nothing to compare with them. Users who are led to try something "cheaper" find there's nothing "just as good," and the next order is for "the old reliable" **To-Bak-Ine.** Why listen to the "cheaper" salesman? If the "cheap" article were as good as **To-Bak-Ine,** it could be sold for the same money, couldn't it?

TO-BAK-INE—Liquid Form

Kills Thrips, White Fly, Green Fly, Black Fly, Red Spider, etc. PRICES—¼ pint, 60c; ½ pint, $1.10; 1 pint, $2.00; ½ gal., $7.75; 1 gal., $15.00. 5 gals., $67.50. Write for prices on 10, 20, 40-gallon casks with **locked faucet** and for complete spraying directions and other information.

TO-BAK-INE—Fumigating Compound

Fumes Kill Thrips, Green Fly, Black Fly, White Fly, and other Insects. PRICES—1-pint can, $2.00; ½-gal. can, $7.75; 1-gal. can, $15.00; 5-gal. can, $67.50. Write for prices on 10, 20, 40-gallon casks with **locked faucet** and for other information on fumigating.

TO-BAK-INE—Fumigating Paper

Has taken the place of tobacco stems with all who value either safety or comfort. Every sheet uniform; as safe, easy and simple to use as lighting a pipe. **Death to Bugs, Life to Blooms.** 24 sheets, 75c; case of 288 sheets, $6.50. Each sheet 18 inches long.

TO-BAK-INE POWDER

Far better than tobacco dust; no sand; the same strength always; you can depend on it; burns freely. Equally good for **dusting** on mums, lilies, lettuce or cucumbers. 50-lb. bag, $1.50; 100-lb. bag, $3.00. Send for free 5-lb. sample.

Send for "Flowers and Profits" Booklet—Free

Every man who has a greenhouse should follow the lead of the big growers, who keep **To-Bak-Ine** constantly on hand (they buy the liquid forms in casks of from 10 to 40 gallons each). Fumigation should be done frequently and lightly, but if it has been neglected and you find insects getting a start, you take serious risk by waiting till you can order **To-Bak-Ine** even by wire—you ought to have it on hand and **go at them** at once. You wouldn't think of letting the coal bin run empty in winter—no more should you let yourself run out of **To-Bak-Ine.**

If your stock is low, order today

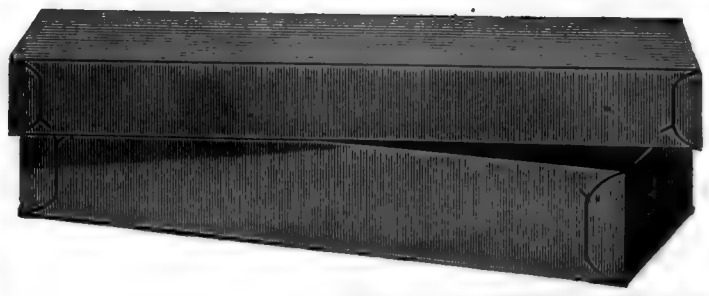
BRADFORD, PA.

G. R. Oliver has formed a partnership with C. E. Gunton to exploit a sulphur vaporizer invented by the latter, and on which a patent has been applied for. The vaporizer consists of an aluminum pan, in which the sulphur is placed, at the upper end of a cylinder of metal, at the lower end of which there is a wire gauze, the lamp being placed beneath the gauze. Mr. Oliver has used the device in his greenhouses for more than a year, and it is said it has been satisfactorily proven that the sulphur cannot be set on fire. The lamp is kept just far enough away to melt the sulphur and turn it into vapor. A large number of growers who have seen it in operation are now using it with equally satisfactory results, it is said.

Elm Grove, W. Va.—John Dieckmann & Co., formerly of Wheeling, W. Va., have moved their greenhouses and office to Park View, in this town, which is a suburb of Wheeling. Mr. Dieckmann has also moved his residence to this place.

Oskaloosa, Ia.—Theodore A. Greeve is erecting two Moninger greenhouses, 20x70, on North Ninth street, at the entrance of beautiful Forest cemetery. He is also building a handsome eight-room residence and extending his business considerably. The greenhouses and the new residence will be heated by an up-to-date hot water system.

It Works



E. H. HUNT, 76-78 Wabash Ave., Chicago.

Dear Sir:—The CHICAGO SPRAYER works admirably on small plants like pansies, and equally well for spraying roses. It has my approval. Very truly yours,

W. A. HARSHBARGER,

Supt. Washburn Campus.

WHITE FLY ON DAHLIAS.

Secretary Maurice Fuld, editor of the Dahlia News, published in the interest of the New England Dahlia Society, says:

"Reports have been received from several members that the white fly has again made its appearance, although only in a limited way. Due to prompt action of this office, the Massachusetts Experimental Station, at Amherst, Mass., has dispatched special experts to several dahlia fields to study the insect upon the plants, and no doubt some remedy will soon help us to keep away this pernicious pest.

"Meanwhile it may be well for us to give here some advice received but a short time ago from a prominent dahlia grower in England, who states that the thrips or white fly is a regular annual visitor there, but gives the grower but little concern, as two or three applications of a spray brewed from quassia chips usually are sufficient to deal the death blow to the insects, and they never appear again. The writer has tried this particular spray on a few plants which appeared to be affected by the white fly, with the result that the plants a week after said application seemed to look more thrifty and healthy. This is simply a suggestion, and not a final conclusion."

SWEET WILLIAMS FOR SPRING.

Kindly give us instructions about planting sweet williams so as to get blooms in early spring, in the state of South Carolina. B. F. C.

It is now too late to sow sweet williams and get flowering plants for next spring. From June 1 to July 15 is a good time to sow them. In your state I should say July 1 would be a suitable date. C.

INSECTICIDES.

Our callas, smilax and parsley are troubled with a little insect which works a good deal like red spider. It appears to be a little shorter and thicker-bodied than the carnation thrips. It is black in color, moves faster than red spider and slower than thrips, and works on both sides of the leaves. It is present on callas the year around, but is worse just now. It causes the leaves of smilax to turn white. What will destroy it?

D. F. C.

Fumigation with hydrocyanic acid gas is the best cure for the pest you have. It is more likely to be injurious to the foliage of plants, however, during hot weather, and if you decide to try it, choose a cool night. Use care in fumigating, as this is a deadly gas. The proportions of potassium cyanide, sulphuric acid and water have frequently been given in the Review, and you can readily find them by referring to back numbers. If you leave the house closed all night, ventilate early and hose your plants over well before the sun strikes them. Once you understand this fumigant, you will use no other, as it is sure death to all kinds of aphis, scale, mealy bug, thrips and everything attacking plants under glass.

Failing fumigation, syringing with a nicotine extract, such as To-bak-ine or Nico-fume, using a syringe or force pump and getting it below as well as above the leaves, is the best remedy you can adopt.

C. W.

Allentown, Pa.—Mrs. Matilda Catherine Stocker Haines, wife of Florist J. E. Haines, died at Bethlehem in the 64th year of her age. Three children, two brothers and one sister, all of this city, survive.

Knightstown, Ind.—B. F. Hensley was in Terre Haute and Indianapolis last month, visiting the florists. His brother-in-law, Mr. Winton, of the Terre Haute Rose and Carnation Co., had everything benched and in tip-top shape. The company is installing new boilers and will be quite busy for some weeks to come changing the heating plant. Mr. Hensley is through planting and went August 4, with his family, to Knoxville, Tenn., and thence to Asheville, N. C., for an outing of a month.

BAR HARBOR, ME.

The judges for the Mount Desert flower show, to be held in the Building of Arts, August 14 and 15, are as follows: W. N. Craig, head gardener on the Ames estate, North Easton, Mass.; Kenneth Finlayson, of the Boston park commission; Mr. Pettigrew, head of the Boston park commission; T. D. Hatfield, of the Hunnewell estate, Wellesley, Mass.; Duncan Finlayson, of the Lars Anderson estate, Brookline, Mass.; Mr. Cameron, superintendent of the Harvard Arboretum; Joseph Clark, Sr., of Manchester, Mass.; Joseph Clark, Jr., of the John Thayer estate, Lancaster, Mass.; and Mr. Meredith, of the Bayard Thayer estate, Lancaster, Mass.

Preparations for the show were begun at the Building of Arts Friday, July 30. The show this year will be larger than ever before, and the overflow exhibits will be staged in a tent, erected near the building.

An admission will be charged during the first day of the show, but the following day, Sunday, the exhibit will be free to all.

WELL FURNISHED CROTONS.

It is an important point in connection with the cultivation of crotons that all basal leaves be sound, of normal length, not seared and stumpy, and of rich color. All experienced cultivators of crotons know well the value of such examples. In order to obtain these good features, English gardeners arrange the plants on empty inverted flower pots on the front or central stage, or on shelves. Each one must be clear of its neighbor, so that light and the sun rays can reach all leaves. One well versed grower says he does not hesitate to syringe the plants early in the afternoon when the sun is shining on them if it be necessary to do so. A high temperature is maintained, and a moist atmosphere. Careful watering is essential to success. In lean-to structures the plants must be turned half-way round once every week. So treated, nice specimens will be available for table use later on.

Paola, Kan.—Mrs. W. Z. Garman is building a 40-foot addition to her greenhouses, on East Miami street, and is installing a hot water heating system.

Lenox, Mass.—The James Clifford Co. has just secured the contract for the foundations of a greenhouse 25x125 on the S. W. Woodward property at Eden Hill, in Stockbridge. Lord & Burnham Co. will build the structure.

CALDWELL TANKS and TOWERS are of the Highest Quality of Construction, producing the greatest durability, longest life and best service. Give florists at small expense same water service as in cities. Write for list of users in your vicinity, and illustrated catalogue.

A Thousand for One

An Advertiser's Returns From

THE WEEKLY FLORISTS' REVIEW

In the Review of August 5, Frey & Frey, of Lincoln, Neb., had a 6-line classified advertisement, as follows:

These were the little advs. One cost 60c, the other 40c; total cost to sell 20,000 plants, $1.00.

Field-grown carnations, first size, ready now, in any quantity. Enchantress, Rose-pink, Lady Bountiful, Queen Louise, Thos. W. Lawson, Victory, Beacon, Harlowarden, $5.00 per 100; White Enchantress, $7.00 per 100.
Frey & Frey, 1338 O St., Lincoln, Neb.

The response was so prompt, that for the issue of August 12 they changed it as follows:

Field-grown carnations, first size, ready now, in any quantity. Lady Bountiful, Queen Louise, Thos. W. Lawson, Harlowarden, $5.00 per 100.
Frey & Frey, 1338 O St., Lincoln, Neb.

Here is the result:

LINCOLN, NEB., Aug. 21, 1909.

FLORISTS' REVIEW, Chicago.

GENTLEMEN:—Please discontinue our advertisement in the Review; the first two insertions sold 20,000 plants.

Respectfully yours,
FREY & FREY.

At $5.00 per 100, the lowest price quoted in the advertisement, Frey & Frey made sales of $1000.00 on advertisements that cost them $1.00.

And still some people say it doesn't pay to advertise.

Here is another:

It is an absolute certainty and conceded by leading European growers, who have seen our pansies and theirs growing side by side in our gardens, that pansies grown from American seed will produce larger, earlier, finer blooms than foreign-grown seed of the same strain. We supply over 100 cities and towns in the west with blooming plants at a higher average price than any grower on the western continent. We sow and sell from the same bag. 1800 seeds, $1.00. Write for "Points on Pansies."
Steele's Giant Pansy Gardens, Portland, Ore.

FLORISTS' REVIEW, Chicago.

GENTLEMEN:—We are highly gratified at the results secured by advertising in the Review. We use no other medium and are practically sold out in the seed line.

Yours very truly,
STEELE'S PANSY GARDENS, per E. J. Steele.

If you, Mr. Grower, have seasonable stock to offer, a quick sale at small cost is to be found through an advertisement in the Review.

9000 COPIES PRINTED EVERY WEEK

Florists' Publishing Co.

530 Caxton Bldg., 334 Dearborn St. **Chicago**

Next Week We Dig

Peony and Iris Orders

have been coming our way all summer. Now we are to begin sending them out—by express and by freight.

Still, there's time to order—if you hurry

OUR FIELD IS CLEAN

Our Varieties Are the Best :: Our Prices Are Low

WE GUARANTEE to replace with three, every plant proving untrue to description.

Some Pointers for Wise Florists:

Peonies are easy to grow, and increase in productiveness each year.

If you grow the good sorts there is always a good market price.

Peonies will grow 20% better if planted in September.

Your own interest demands that you buy Peony roots, that you buy them at once, and that you buy them of us.

Send for free descriptive Wholesale List.

SEASONABLE SUGGESTIONS.

The Buds.

"Taking the buds," as it is generally termed, is where the unskilled cultivator sometimes comes to grief. In the first place the term is a misnomer, since it really means the saving or retaining of the buds and not the taking away, as many have thought. Every other flower in the greenhouses has a more or less everblooming habit of growth, but the chrysanthemum works up to the flowering stage and then is finished, and unless the proper bud is selected the grower has poor returns to show for his time and trouble.

The novice gets befogged by the technical terms of crown and terminal buds and often confuses the one with the other. For some years I have in these notes argued against the use of these terms in catalogue descriptions and other writings, as I claim that a date given, after which it is safe to take the bud, is the simpler way. If a grower reads that it is safe to take the first bud that shows after, say, August 20, no matter whether it is the first or the fifth crown bud, he knows all that is necessary for him to know.

The buds on all the early flowering kinds are all taken, many of them showing color, and these of necessity were all crown buds, because the terminal buds do not appear till late in August or early in September. Practically all of the midseason varieties, also, do best on a crown bud, if taken not before August 15, except in a few special cases that I will name. F. S. Vallis, Mrs. D. V. West and President Loubet will come all right if taken on a bud August 1, and produce a much larger flower than can be obtained from later buds.

Where Nature Steps In.

A natural query is: "If F. S. Vallis produces a monster flower from a bud taken August 1, why should not Colonel Appleton do likewise?" The only answer I know is, that the individuality of each variety is responsible for its behavior and there is in everything a point where Nature steps in and says, "Thus far shalt thou go and no farther." It is by close study of each variety that the exhibitor at the big shows scores his success.

The variety Colonel Appleton, while it will come all right from a bud taken August 15, will produce a much better flower from a bud taken early in September, the early buds producing flowers that are lumpy and short petaled.

As a broad general rule to go by, any crown buds that are showing by or after August 20 are perfectly safe on all midseason kinds and will produce flowers that are a great deal finer than flowers produced from later buds. Late varieties that do better on later buds are Chadwick, W. R. Brock, Enguehard, Nagoya and others of that character, and September 15 is early enough for them, because, while some come on an August crown, they show their true character from the later buds.

CHARLES H. TOTTY.

PEONIES.

I have purchased a small farm on which there is a field of peonies that have been neglected and weeds and grass allowed to grow until now there is quite a heavy sod. I tried to break it up with a harrow, but could not. Will it injure the roots to plow shallow furrows between the rows and then harrow well? This is their third year and they are large, strong plants. Will you kindly advise me as to what is best to do in this case and what fertilizer should be used this fall?

T. P. M.

A shallow furrow plowed between the rows will not injure the plants. If then harrowed, a good deal of the grass can be destroyed. You will be unable to clean the plants properly by this method, however. A good deal of hand weeding and work with a draw hoe or hand cultivator will be necessary to put the field in presentable condition. It will pay to give the land a thorough cleaning and then use the cultivator freely.

Peonies are rather heavy feeders. A top-dressing of well decayed horse or cow manure given about the end of October will do the plants lots of good. If barnyard manure is not procurable, a good commercial fertilizer applied in early spring can be used. About the time flower buds begin to form an application of nitrate of soda will be found helpful. By cleaning your field well now and manuring liberally, you should be able to secure a fine crop of flowers next June. Any transplanting you may wish to do had better be carried out in September.

C. W.

POTTING GERANIUM CUTTINGS.

I would like to be informed as to the best method of planting rooted cuttings of geraniums. Should they be potted, and what size of pots should they be carried in to make good, strong blooming plants for spring sales? A. O. N.

The best plan is to pot off into 2-inch pots when rooted. Later shift into 3-inch pots and finally into 4-inch pots. The latter size produces the most satisfactory plants for spring sales. You can, of course, pot into 2½-inch pots and later into 4-inch pots. This entails less labor, but we prefer smaller shifts, and find we get better plants by adopting this plan. C. W.

ROOTING GERANIUMS.

How can we root geranium cuttings? We are not successful in propagating this plant. L. N. B.

The most common cause of failure in rooting geraniums is taking the cuttings too early. I have always had the best results by waiting until the early part of October before putting in any cuttings from outdoor plants. The shoots then are harder and less sappy than during August and September, and the percentage of loss is small, indeed. In the case of cuttings inclined to be soft, it is a good plan to let them lie on the bench a few hours before placing in the flats.

Trim off the leaves closely and cut directly under a joint. Of course, they will root no matter where the cut is, but I have found that there is less likelihood of cuttings damping when the cut is under the leaf joints.

Flats four inches deep, with some coarse cinders in the bottom for drainage and this covered with moss and the balance sharp sand watered and well firmed, are suitable for these cuttings. A flat 24x12 x4 will hold 100 cuttings. Give a good watering, place on a shelf or bench in full sun, and not over five per cent should fail to root. The cuttings must never be shaded and should have no more water until they become quite dry. Then give just sufficient water to prevent shriveling.

I believe farther south the cuttings can be readily rooted in the open air, but in these northerly states glass protection gives the best results.

If you will adopt this plan with your cuttings, I see no reason why they should not root well. The main points to re-

member are: Do not propagate too early; plant in clear sand; never shade, and water sparingly until rooted.

W. N. Craig.

SPIRAEAS FOR MARKET.

Are spiræas sold as cut spikes? Are they free sellers and at what price per spike, and what varieties are best sellers? C. B.

Spiræa is not sold to any considerable extent as a cut flower, except at Easter or Memorial day. Probably more are disposed of at the latter holiday than any other time. It cannot be recommended as a market flower, on account of its wilting so soon when out of water. Prices vary from $1 to $4 per hundred, a fair average being $2, the higher prices being secured only on special occasions. The old S. Japonica is a good deal grown, but compacta grandiflora, Gladstone and astilboides make much finer spikes. C. W.

THE RETAIL FLORIST.....

SUMMER TABLE DECORATIONS.

One of the most important items in the leading retail flower stores, especially those in the better class residence sections of the big cities, is the arrangement of flowers on dinner tables. The hostess of means no more thinks of having guests at dinner without flowers than she would permit them to sit down at a table without appetizing viands. Naturally the demand for dinner flowers is greater in the social season than in the summer, but all the year around there is more or less of this business, and it demands the best efforts of the florist.

Simplicity must be the characteristic of a summer decoration. In hot weather no one wants high or elaborate centerpieces; they must be low and simple, yet artistic.

In one of the accompanying illustrations, where the florist had done his work before the caterer took charge, the large round table had in the center a low, irregularly edged glass bowl filled with pink pond lilies, and triangularly spaced about midway to the edge of the table were vases of valley, with Farleyense fronds. The vases used were the basket-shaped glass ones now handled by practically all the supply houses. This decoration was both simple and inexpensive, but it filled the bill to a nicety.

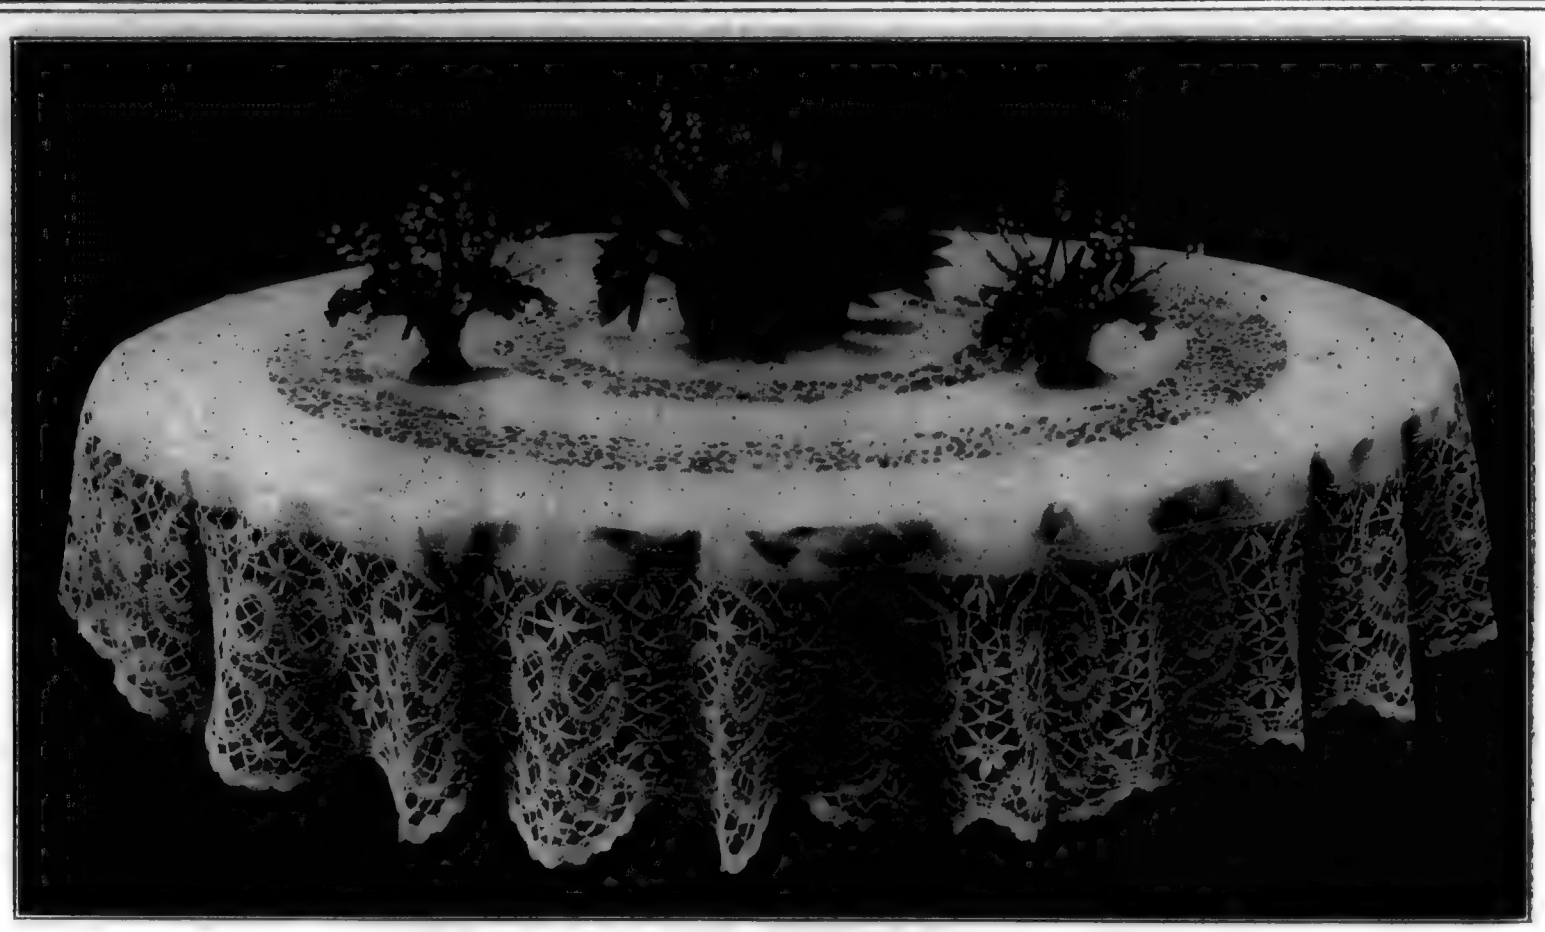
The centerpiece in the other illustration was somewhat different in character. The receptacles were on the order of the glass article used with the japana flower holder once well known in the trade, but these were of finest china, pure white with gold decorations, light and graceful. The ware comes in sections, so all the florist has to do is to group as many pieces as he requires for the space and stock. In this case the low, curved sections were filled with only slightly damp, clean, green moss, and the moss in turn was stuck full of Shasta daisies, on which the stems had been much shortened. The tall, urn-like little vases which join the sections contained marigolds with Farleyense fronds.

Nowadays no one of discriminating taste will stand for the overhead decorations of bygone days, which intercept the view across the table. It behooves all retail florists who are called upon to do dinner work to have a stock of vases and bowls for low work. The greater the variety, and all the supply houses now offer a wide range of choice, the easier it will be to make each centerpiece distinctive and satisfactory to the customer.

MECHANICAL AIDS IN DESIGNING

The Tools of the Trade.

Not to mention ordinary supplies, such as wire frames, mosses, vases, jars, plant stands, jardinieres, baskets and other things necessary for the handling and display of flowers, which the supply houses offer and exploit, there are a few tools that are needed in floral work.



First, of course, are the inevitable scissors and wire. About three or four sizes in shears are needed—large wire cutters, a medium heavy shears for bouquet wire and stems, and ribbon scissors. Wire for ordinary purposes ranges from No. 21 to No. 36. A stone of No. 36 will last a long time, if taken off uncut and kept in small coils. The remainder of the stone should be wrapped up, as the moisture from the air may be enough to rust it. This fine wire is the thing for shower effects without ribbon, for fine garlands, chains of small flowers and very dainty work where the flowers are not stemmed. Wire from No. 21 to No. 26, cut in 12-inch and 18-inch lengths, covers the demands for tying and wiring stems. Of course, for hanging baskets or altering design frames, a heavier wire must be used.

A few carpenter's tools, for making packing boxes, must also be at hand.

Wire snips, extra easels, including some square ones of different sizes, and bases for mounting pieces originally intended to be flat, are often called for. A base may be too small for the special arrangement you have planned for a piece, or a design may have too tall a standard, or some other faulty frame construction may need to be remedied

Shasta Daisies and Marigolds for a Summer Table Decoration.

A Simple Table Decoration; Pink Pond Lilies and Valley.

in a hurry. On the inspiration of the moment you may wish to change the mounting of a piece, to bend it back or forward and clinch it there, or remove the mounting entirely. All of these little things get to be important features of a piece.

Relieving the Monotony.

For example, a pillow always at the same angle becomes tiresome. But removed from the folding frame, with a sag in one end, or with a corner turned down, the opposite one turned up and the under surface filled as far as it is seen, it will make almost a new piece. The idea of the pillow is a good one and will be used long hence, but little changes and varieties in the make-up increase the popularity of the piece and ought to make it command more money. To alter a piece in this way, or to remove or add a folding frame, the wire snips will come in handy.

Besides wired picks, match sticks in three different lengths, for heavy and long stemming, are almost essential. Although a trifle annoying to handle, on account of coloring the fingers, yet the green dyed sticks are better for the appearance of the work. They cannot be driven in far enough to disappear in the moss, and, of course, if they are left the light, natural color, they will show. Long match sticks are useful for supporting a good sized spray, if enough large brush is not at hand. For an extra long, heavy spray a cane stake or bamboo rod serves best.

For Outside Decorating.

For outside decorative work a separate kit of tools should be kept, consisting of two hammers, large and small, two sizes of staples, an assortment of wire, picks, pins, scissors, tinfoil, dark twine, tape line and jackknife.

As experience increases, fewer tools and material will be found to retain their usefulness and more uses will be found for each one. One at a time you will discard what you formerly considered indispensable. For instance, it used to be the proper caper to pick stemmed flowers with tweezers and insert them in the moss. Now we consider our fingers all that are necessary, and tweezers have long since been forgotten.

A set of rattan screens can be used in a dozen different ways about the store and window. Likewise a stump, a camp kettle, a big straw hat, or a favorite basket may be brought out every now and again in a different guise. A chime of bells may be silver with pink or green decorations at one time, or gilded the next time with crimson setting. Your storeroom, no doubt, is nothing but a junk shop to the uninitiated, but a pile of resources to your mind's eye.

Japanese bamboo pockets, radiator and mantel pans, with rustic coverings, various small baskets, with inside pans, hanging brass and crockery vases, wire arches, canopy frames and Japanese umbrellas are also helpful articles for store, window and general decorative uses.

GERTRUDE BLAIR.

BULBS FOR CHRISTMAS.

What is the best method of forcing French Roman and Dutch hyacinths and tulips for the Christmas trade? I want to put in about 200 of each, to be used as cut flowers. Would it be best to put them in bulb pans or in the benches? If grown in the benches, what are the cultural directions to save the most space? Should they be started in a cool and dark place in flats and reset in benches later, or put directly into the bench upon receipt of the bulbs? C. A. S.

French grown Roman hyacinths, Paper White narcissi and Trumpet Major narcissi can be had in flower for Christmas. The two first named come in easily, but the Trumpet Majors need an early start and rather hard forcing. You cannot get Dutch hyacinths for Christmas, and the only tulip which will flower at that time is La Reine, unless you try the Duc van Thol varieties, which are too short-stemmed to become popular in the American trade.

It will not pay to plant any of these in the benches. Use flats containing four inches of soil. The Paper Whites can be placed in a frame or directly under the greenhouse benches. They start quicker than the other bulbs and can be flowered by the early part of November, if desired. These will possibly need some retarding in a cool house. Place the Roman hyacinths, Trumpet Majors and tulips in a cool cellar or pit. Soak well with water and keep dark until the growths are a couple of inches high and the flats filled with roots. Never allow them to approach dryness at the root. Place the tulips and Trumpet Majors in a darkened case in a warm house to draw them up. Gradually afford light as buds and flowers appear.

You will easily flower the hyacinths and Paper Whites for Christmas. The others are less certain; unless you have good forcing facilities it will be better to leave them alone. C. W.

YUCCA FILAMENTOSA.

Are seedlings of Yucca filamentosa, or Adam's Needle, considered hardy in southern New York? I have some of these which I am anxious to winter.

E. L. S.

Yucca filamentosa, or Adam's Needle, is a perfectly hardy plant. If your seedlings are small, give them a mulch of coarse straw or some other litter after the ground freezes. This will be ample protection and will prevent them from being heaved out of the ground by alternate freezings and thawings.

C. W.

LEWISTOWN, ILL.—William Jones has sold his greenhouse to Edson Bearce, who will take possession soon.

LYNN, MASS.—William Sim, Cliftondale, has a young Japanese, C. Abe, studying horticulture under his instruction. Prof. T. Shiraki, sent by the Japanese government to study the gypsy and brown tail moths, has recently been visiting the young man.

member are: Do not propagate too early; plant in clear sand; never shade, and water sparingly until rooted.

BULBS FOR CHRISTMAS.

What is the best method of forcing French Roman and Dutch hyacinths and tulips for the Christmas trade? I want to put in about 200 of each, to be used as cut flowers. Would it be best to put them in bulb pans or in the benches? If grown in the benches, what are the cultural directions to save the most space? Should they be started in a cool and dark place in flats and reset in benches later, or put directly into the bench upon receipt of the bulbs? C. A. S.

French grown Roman hyacinths, Paper White narcissi and Trumpet Major narcissi can be had in flower for Christmas. The two first named come in easily, but the Trumpet Majors need an early start and rather hard forcing. You cannot get Dutch hyacinths for Christmas, and the only tulip which will flower at that time is La Reine, unless you try the Due van Thol varieties, which are too short stemmed to become popular in the American trade.

It will not pay to plant any of these in the benches. Use flats containing four inches of soil. The Paper Whites can be placed in a frame or directly under the greenhouse benches. They start quicker than the other bulbs and can be flowered by the early part of November, if desired. These will possibly need some retarding in a cool house. Place the Roman hyacinths, Trumpet Majors and tulips in a cool cellar or pit. Soak well with water and keep dark until the growths are a couple of inches high and the flats filled with roots. Never allow them to approach dryness at the root. Place the tulips and Trumpet Majors in a darkened case in a warm house to draw them up. Gradually afford light as buds and flowers appear.

You will easily flower the hyacinths and Paper Whites for Christmas. The others are less certain; unless you have good forcing facilities it will be better to leave them alone. C. W.

YUCCA FILAMENTOSA.

Are seedlings of Yucca filamentosa, or Adam's Needle, considered hardy in southern New York? I have some of these which I am anxious to winter.

E. L. S.

Yucca filamentosa, or Adam's Needle, is a perfectly hardy plant. If your seedlings are small, give them a mulch of coarse straw or some other litter after the ground freezes. This will be ample protection and will prevent them from being heaved out of the ground by alternate freezings and thawings.

C. W.

LEWISTOWN, ILL.—William Jones has sold his greenhouse to Edson Bearce, who will take possession soon.

LYNN, MASS.—William Sim, Clifton dale, has a young Japanese, C. Abe, studying horticulture under his instruction. Prof. T. Shiraki, sent by the Japanese government to study the gypsy and brown tail moths, has recently been visiting the young man.

CARNATION NOTES.—EAST.

Preventive Measures.

Early housed stock will by this time be established and beginning to take on that glaucous bloom peculiar to the foliage of the carnation. It is by means of this bloom that the divine flower is protected against the entrance of fungous disease germs; therefore, syringing must not be resorted to, except to destroy red spider, but there is no excuse for this pest gaining a foothold if proper attention is given to ventilation.

Some rainy evening, after the plants are well under way, they should be treated to a light fumigation as a preventive of green fly. There is no economy in waiting until the enemy appears, for then it is only the more difficult to dislodge it.

It is by far the best plan to fumigate regularly every week from now on through the season, thus escaping not only the ravages of the fly, but, what is still more important, the liability of fungous disease gaining entrance through punctures made by them. We find the fumigating kind of tobacco easy to handle, safe to use and thorough in its work.

Supports.

To grow first-class blooms, such as the market calls for at the present time, practical supports are about as essential as good plants, and it is equally important that they be put in place before the plants get too large.

While it is yet too early to use these, it is none too early to decide what form to use and get the necessary material in readiness. There are several patent styles on the market, as will be seen by consulting the advertising columns of the Review, and while the first cost of these wire supports may seem large, we have found them to be a paying investment.

Many growers use a system of wires stretched lengthwise of the bench between the rows, and twine running crosswise attached to the wires, thus enclosing each plant in a square. As the flowering shoots lengthen, an additional tier or two is added. This is claimed to be less expensive than the patent support and its widespread use proves its practicability.

If any plants are left in the field, do not by any means neglect them. Many times these left-overs prove quite a source of revenue, either sold as field grown plants or potted and disposed of later, when in bloom. Geo. S. Osborn.

CARNATION NOTES.—WEST.

Stirring and Leveling the Soil.

As soon as you can discontinue syringing more than twice a day and the soil dries out enough to handle nicely, you should go over these beds and stir the soil. Break up all the lumps and level the soil off nicely, so that when you water the beds the water will not run off instead of soaking into the soil evenly. A crop of weeds will also be starting up about that time, and you can destroy most of them if you work over the soil before they are too large.

As you work over the bed, be sure that the plants all stand upright. Sometimes, if the plants are large at the first watering, some of them will drop over to one side. We usually go over the beds about the second day after planting, to straighten up all such plants. To let them go long will mean a lot of crooked growth, with trouble for some time after.

No mulch should be put on for at least a month after planting. Stirring the soil as often as a crust forms on top is much better than a mulch until the plants get under way. When the carnation roots begin to run through the soil there is less danger from souring if the soil is kept moist continually. You want to get rid of the weeds before you mulch, too.

You will want to get rid of what shade is left on the glass pretty soon, too. At this season there is danger of getting the plants into a soft growth, which will mean poor quality for some time to come. The strong sun may bleach the blooms now on many varieties and make the blooms come small on short stems, but it will keep the plants in a good, healthy condition, so that, as soon as cooler weather sets in, the quality at once improves. If you used air-slaked lime for shading, it will rub off easily with a dry brush.

Diseases and Pests.

About this time you will find it a good idea to spray your plants a few times with Bordeaux mixture. Often during the time of frequent syringing a little leaf-spot will start unnoticed and, if allowed to go unchecked, will develop into serious damage. Bordeaux is one of the greatest fungicides and it will do absolutely no harm to the plants, even if no disease should be present. Dusting with tobacco will also be beneficial in keeping down thrips. You may have brought in a great many of them unawares, and they breed fast in warm weather, if left to go unchecked. It is good policy to start the blooming season with as few as possible. Aphis will not bother for some time. It is a sure bet that if you keep your plants clear of thrips you will have no aphis to speak of.

Another pest which is likely to give you some trouble now is the wood louse or sow bug, which is also sometimes called the shot bug, on account of its habit, when disturbed, of rolling itself into a round ball resembling a shot. These bugs are really scavengers by nature, and are usually most abundant where decaying matter is found. They are, however, fond of certain kinds of greenhouse plants, among them the carnation. Sugar, with enough Paris green to give it a grass-green color, scattered here and there on the edge board, is the most effective remedy. We have found a considerable difference in the killing quality of Paris green. Some we have bought was little better than mere dust, and most likely was adulterated.

Did you notice what the officials of the Washington experiment station had to say at the convention about the various styles of beds and benches? In the Review of August 19, pages 47 and 48, you will find what they have to say. I was glad to hear what they said, as it was just exactly what I have preached in my notes for some six years past, only I had no records of blooms cut. It also did the writer much good to see such a prominent and successful grower as F. R. Pierson stand up and state that his conclusions were also the same. I say again, try the solid beds with cinder drainage. We have found them a good thing, and others are finding them so, too. The proof of the pudding is in the eating thereof. A. F. J. Baur.

LOCATION OF VARIETIES.

I have one east and west house, with raised benches, that I can run at 55 degrees; one north and south house, with solid beds, that I can run at 50 degrees, and one north and south house, with solid beds, that I can run at about 45 degrees. I wish to grow carnations and I have the following varieties to plant: Winsor, Fair Maid, White Perfection, Enchantress, Queen Louise and Harry Fenn. Please inform me as to the best plan for growing the different varieties in the different styles of houses. W. D.

To produce high grade carnations, you will have to arrange your heating plant so you can run all your houses at about 50 to 52 degrees; 55 degrees is too high

for any variety in your list. You would get weak stems and small flowers all through the season. At 45 degrees your plants would not bloom enough to be profitable and a large percentage would come with split calyxes.

After you rearrange your heating system, there will be little to trouble you if the solid beds have good drainage.

Plant the Winsor where it will be the warmest, and also where the light will be subdued in bright weather, as it bleaches in the strong sunlight. Enchantress, too, will bleach as hot weather approaches, but it wants a fairly cool place, the coolest of the lot, about 50 degrees. All the others enjoy 52 degrees best. Plant the white varieties in the east and west house, as the light is strongest there and the color will come purest. You will find little or no difference between the results from solid beds and raised benches, except that the stock in the former will hold out better in quality as summer approaches. So plant accordingly. A. F. J. B.

A WELL KNOWN CHICAGOAN.

Louis Wittbold is the third son of venerable George Wittbold, and is the secretary and treasurer of the Wittbold corporation, organized a few years ago for the purpose of carrying on the business established by the pioneer on the north side of Chicago in 1857. The establishment has a record equaled by few horticultural concerns in this country; a record of fifty-two years of uninterrupted progress.

Louis Wittbold believes the business rests on twin foundations: satisfactory service to the customer, and advertising. He applies the advertising principle as much to the retail end of the business as to the wholesale end, making liberal use of the space of the Chicago daily papers, employing street car cards, billboards and every other recognized means of telling his story to the public. The Wittbold establishments (there are two retail stores) are both on the north side of the city, some distance from the business center, where many retailers would think they could not draw anything but local trade. Louis Wittbold knows better. His phrase, "We are as near to you as your 'phone," has been so reiterated in his advertising that many a customer who never saw the Wittbold stores calls on them when in need of a florist's services. The Wittbold salesmen, workmen and wagons penetrate to the farthest limits of the city.

It was Louis Wittbold who invented the first one-piece concrete bench, and the one now most generally built in commercial greenhouse establishments. He also was the inventor of a mechanical watering system which is largely used, and of other devices for simplifying the work of greenhouse and store management. For a year or two after finding there was a market for the labor-saving inventions, designed primarily for use in their own establishment, Mr. Wittbold acted as his own selling agent, but something over a year ago turned these specialties over to E. H. Hunt, Chicago.

Louis Wittbold.

NEW ENGLAND DAHLIA SOCIETY.

The New England Dahlia Society will give its second exhibit, at Horticultural Hall, in Boston, Mass., September 10, 11 and 12. This year's exhibit is expected to eclipse everything of its kind ever undertaken, for the reason that the outlook for good flowers is splendid, and that with the enormous increase in the membership of the society, competition in all classes ought to be sharp.

In connection with this exhibit a special number of the Dahlia News will be issued, which no doubt will be one of the most interesting papers ever published on this subject, for it will contain articles by such prominent American writers as E. Stanley Brown, N. Allen Lindsey, Nathan A. Miller, W. C. Egan, Edwin S. Manuel, J. J. Broomall, Alex. MacLellan, Wm. F. Turner and Maurice Fuld. It will also contain articles from English writers, as follows: Mr. Green, of Hobbies, Ltd.; Mr. Fife, of Dobbie & Co., and Mr. Cheal, of Joseph Cheal & Sons. Germany will be represented by an article from the secretary of the German Dahlia Society, Mr. Curt. Engelhardt, and France by Mr. Rivoire, of Rivoire Pere et Fils. Some of the articles will be illustrated, our first attempt in this line with the Dahlia News. Anyone may obtain a copy of the September number for the price of 10 cents by addressing the secretary, Maurice Fuld.

MAURICE FULD, Sec'y.

CULTURE AND SALE OF LILIES.

How are longiflorum, auratum and speciosum lilies increased from scales in Bermuda or other places? Give directions for growing them to blooming size bulbs. How are blooms sold when there are several on a spike and what are counted? Would they be salable if separated from the spike and each bloom cut in bud with a short stem? Does the Philippine lily promise to be a good market lily? What are its faults?

C. B.

I am not acquainted with the Bermuda lily growers' methods, but here in the United States lilies can be raised from scales taken from well ripened bulbs and planted in flats or benches in a warm house and kept moist. The first year they form bulblets, the second moderate bulbs, and many will bloom the third season if carefully looked after. Except in rare cases and in favored latitudes, I doubt if there would be any profit in raising the varieties named in the way you speak of, especially when they can be purchased of flowering size so cheaply. L. auratum is the most uncertain of the sorts you name, usually running out altogether in two or three seasons.

Lilies are sold on the spike, each bud and bloom being counted as one. Of course, the buds will all open in water, but the whole spikes are often sold or used in design work. In Europe the single flowers are sold, but this method is rarely adopted here.

Lilium Philippinense is a beautiful white lily, usually carrying only one or two flowers per stem. For this reason, at its present price, it is not likely to become much of a market factor. It is produced on thin, wiry stems, has grassy-like foliage, and if it could be grown and sold profitably at the same prices as L. longiflorum, would largely supersede that variety in a cut state. It is easily raised from seeds under glass and has bloomed in as short a time as six to nine months.

C. W.

CARNATION NOTES.—EAST.

Preventive Measures.

Early housed stock will by this time be established and beginning to take on that glaucous bloom peculiar to the foliage of the carnation. It is by means of this bloom that the divine flower is protected against the entrance of fungous disease germs; therefore, syringing must not be resorted to, except to destroy red spider, but there is no excuse for this pest gaining a foothold if proper attention is given to ventilation.

Some rainy evening, after the plants are well under way, they should be treated to a light fumigation as a preventive of green fly. There is no economy in waiting until the enemy appears, for then it is only the more difficult to dislodge it.

It is by far the best plan to fumigate regularly every week from now on through the season, thus escaping not only the ravages of the fly, but, what is still more important, the liability of fungous disease gaining entrance through punctures made by them. We find the fumigating kind of tobacco easy to handle, safe to use and thorough in its work.

Supports.

To grow first-class blooms, such as the market calls for at the present time, practical supports are about as essential as good plants, and it is equally important that they be put in place before the plants get too large.

While it is yet too early to use these, it is none too early to decide what form to use and get the necessary material in readiness. There are several patent styles on the market, as will be seen by consulting the advertising columns of the Review, and while the first cost of these wire supports may seem large, we have found them to be a paying investment.

Many growers use a system of wires stretched lengthwise of the bench between the rows, and twine running crosswise attached to the wires, thus enclosing each plant in a square. As the flowering shoots lengthen, an additional tier or two is added. This is claimed to be less expensive than the patent support and its widespread use proves its practicability.

If any plants are left in the field, do not by any means neglect them. Many times these left-overs prove quite a source of revenue, either sold as field grown plants or potted and disposed of later, when in bloom. Geo. S. Osborn.

CARNATION NOTES.—WEST.

Stirring and Leveling the Soil.

As soon as you can discontinue syringing more than twice a day and the soil dries out enough to handle nicely, you should go over these beds and stir the soil. Break up all the lumps and level the soil off nicely, so that when you water the beds the water will not run off instead of soaking into the soil evenly. A crop of weeds will also be starting up about that time, and you can destroy most of them if you work over the soil before they are too large.

As you work over the bed, be sure that the plants all stand upright. Sometimes, if the plants are large at the first watering, some of them will drop over to one side. We usually go over the beds about the second day after planting, to straighten up all such plants. To let them go long will mean a lot of crooked growth, with trouble for some time after.

No mulch should be put on for at least a month after planting. Stirring the soil as often as a crust forms on top is much better than a mulch until the plants get under way. When the carnation roots begin to run through the soil there is less danger from souring if the soil is kept moist continually. You want to get rid of the weeds before you mulch, too.

You will want to get rid of what shade is left on the glass pretty soon, too. At this season there is danger of getting the plants into a soft growth, which will mean poor quality for some time to come. The strong sun may bleach the blooms now on many varieties and make the blooms come small on short stems, but it will keep the plants in a good, healthy condition, so that, as soon as cooler weather sets in, the quality at once improves. If you used air-slaked lime for shading, it will rub off easily with a dry brush.

Diseases and Pests.

About this time you will find it a good idea to spray your plants a few times with Bordeaux mixture. Often during the time of frequent syringing a little leaf-spot will start unnoticed and, if allowed to go unchecked, will develop into serious damage. Bordeaux is one of the greatest fungicides and it will do absolutely no harm to the plants, even if no disease should be present. Dusting with tobacco will also be beneficial in keeping down thrips. You may have brought in a great many of them unawares, and they breed fast in warm weather, if left to go unchecked. It is good policy to start the blooming season with as few as possible. Aphis will not bother for some time. It is a sure bet that if you keep your plants clear of thrips you will have no aphis to speak of.

Another pest which is likely to give you some trouble now is the wood louse or sow bug, which is also sometimes called the shot bug, on account of its habit, when disturbed, of rolling itself into a round ball resembling a shot. CULTURE AND SALE OF LILIES.

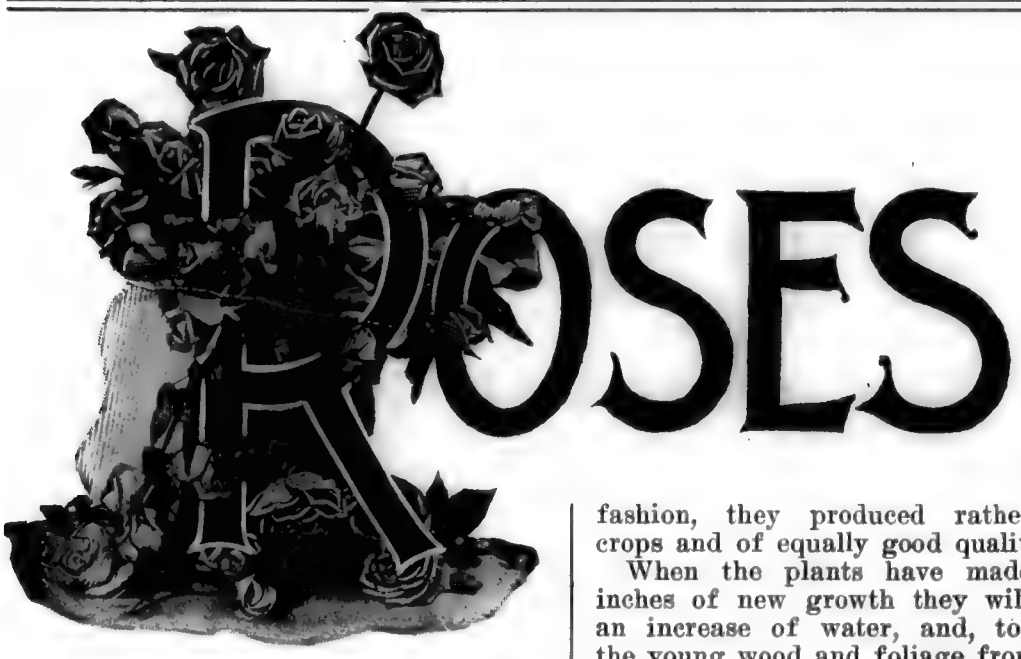
How are longiflorum, auratum and speciosum lilies increased from scales in Bermuda or other places? Give directions for growing them to blooming size bulbs. How are blooms sold when there are several on a spike and what are counted? Would they be salable if separated from the spike and each bloom cut in bud with a short stem? Does the Philippine lily promise to be a good market lily? What are its faults?



C. B.

I am not acquainted with the Bermuda lily growers' methods, but here in the United States lilies can be raised from scales taken from well ripened bulbs and planted in flats or benches in a warm house and kept moist. The first year they form bulblets, the second moderate bulbs, and many will bloom the third season if carefully looked after. Except in rare cases and in favored latitudes, I doubt if there would be any profit in raising the varieties named in the way you speak of, especially when they can be purchased of flowering size so cheaply. L. auratum is the most uncertain of the sorts you name, usually running out altogether in two or three seasons.

Lilies are sold on the spike, each bud and bloom being counted as one. Of course, the buds will all open in water, but the whole spikes are often sold or used in design work. In Europe the single flowers are sold, but this method is rarely adopted here.

Lilium Philippinense is a beautiful white lily, usually carrying only one or two flowers per stem. For this reason, at its present price, it is not likely to become much of a market factor. It is produced on thin, wiry stems, has grassy like foliage, and if it could be grown and sold profitably at the same prices as L. longiflorum, would largely supersede that variety in a cut state. It is easily raised from seeds under glass and has bloomed in as short a time as six to nine months.

C. W.

STOCK TO BE CARRIED OVER.

Ripening the Wood.

Stock which is intended to be run for a second season should now receive attention.

If not already ripened, this should be done as soon as possible, by gradually diminishing the supply of water and giving all air possible, both night and day. If the stock is on raised benches, the drying off can be accomplished in a short time if the weather is bright; if on solid benches, more time will be required.

During the period of ripening, great care must be taken not to dry too quickly or to such an extent as to cause the soft shoots to wilt. It is also essential that spider be kept in subjection. The dryness of the atmosphere and warm weather being favorable to the increase of this pest, it is necessary to exercise great care and vigilance to keep it in check.

When the plants are in good condition the top part of the soil—as much as possible without injuring the roots—should be removed, and the remainder should be given a sprinkling of air-slaked lime. A mulch of one-third decomposed cow manure and two-thirds good fibrous loam, well incorporated, should be put on to replace the soil removed. A sprinkling of bone meal, added to the mulch, is of great benefit.

Re-establishing the Plants.

The bench should now get a thorough soaking, which is all that will be required for a week or ten days. The house during this period should be kept as cool and moist as possible, using the syringe frequently and keeping the paths watered.

So soon as root action is again established, the small, strawy wood should be removed and the stronger canes cut back to a suitable eye. The taller canes can be bent down and tied, so as to retain this position. This will encourage the breaking of those dormant eyes near the base of the stem, which frequently make the best and most vigorous stems.

It is not always best to do all the pruning at one time, as denuding the plants of so much foliage has a tendency to retard root action.

With such varieties as Liberty and Richmond I have had good results without subjecting the stock to any preliminary drying or ripening, and with but little pruning. In fact, in comparison with benches treated in the orthodox fashion, they produced rather larger crops and of equally good quality.

When the plants have made a few inches of new growth they will require an increase of water, and, to prevent the young wood and foliage from becoming too soft, free ventilation must be practiced. Ribes.

FEEDING YOUNG ROSE PLANTS.

My young roses, Bridesmaid, Chatenay, Killarney and Richmond, were planted June 15, in a moderately rich soil. They are looking healthy, clean of disease, vigorous and thrifty. After disbudding them several times, they commence to throw up crown shoots from two to three feet tall, with pretty fair flowering buds on them. I am sure that they need something which will encourage their growth and strengthen their working capacity, especially the Richmonds, which do not produce as large a leaf as formerly. Some growers mulch the beds with cow manure, but conditions here make it undesirable and objectionable; neither do I want to trust chemicals. Could I feed with liquid made of sheep manure? Would sheep manure serve the same purpose as liquid? How much would you dilute it, and how often would you use it in the present condition of weather?

H. J. P.

Plants of this age—nine weeks—are doing remarkably well to produce canes of two or three feet, and though the buds are not quite up to size, they will improve as the weather gets cooler. The foliage on the Richmonds will also improve in size and texture as they grow older.

Sheep manure can be used with advantage, either as a mulch or in the liquid form. When applied as a liquid, it is safest to make it rather weak at first, gradually increasing in strength as the plants get accustomed to it. For a first application, one peck of manure to forty gallons of water will be strong enough Apply once in ten days.

Ribes.

REMOVING BLIND WOOD.

We should like to know how to trim the blind branches out of Brides and Maids that were planted in the last part of June. The roses are in perfect condition and we have been cutting about two weeks. G. W. P.

Stock planted in June cannot possibly require trimming in the sense you mean. Plants of this age require all the foliage they can make to keep root action going, and as every leaf is of benefit, they ought rather to be encouraged to make more wood instead of pruning.

The stock being in good condition and giving a crop, it should get a little encouragement by way of a little weak liquid food once in two weeks. Keep the branches neatly tied up, so that the air can circulate freely, and allow the sunlight to shine on the soil and you will have little trouble with blind wood.

Ribes.

SEASONABLE SUGGESTIONS

Hardy Roses.

As a general rule, hardy roses are neglected after the flowering season has passed. This is a mistake, for even the hybrid perpetuals will well repay one for a little extra care. Where budded plants are grown, any suckers of Manetti or briar should be carefully removed, as they quickly sap the vitality of the plants. Do not cut these off above the ground with a knife, but endeavor to pull them out root and branch to avoid further trouble. Cut off any seed pods which have formed. Keep the cultivator plied between the plants and you will be agreeably surprised at the nice fall crop of blooms you will get.

The teas and hybrid teas are specially valuable at this season and every florist who does a retail trade would do well to plant at least a few dozens of such splendid bloomers as white and pink Maman Cochet, Killarney, Gruss an Teplitz, Mme. Caroline Testout, Bessie Brown, Mrs. W. J. Grant (Belle Siebrecht), Mme. Ravary, Richmond and Mildred Grant. These will grow and flower well, either on their own roots or grafted, but the latter give much the finest blooms. In dry weather an occasional soaking of water will help to keep the plants growing and flowering freely.

Gardenias.

The growth of gardenias is now rapid. Plants benched in five inches of soil early in June are getting well established and their rate of growth is surprising. Blooms are valuable at Christmas and some growers bend their energies toward getting a crop at that time. There are, alas, many slips 'twixt the cup and the lip in gardenia culture for midwinter blooming. Too high or low temperature, too much or too little moisture at the root or in the atmosphere and an injudicious use of stimulants may, any one of them, cause the falling of the buds which is so common an experience with many.

It is different growing gardenias for

an early spring rather than a winter crop. In many cases the former pays fully as well as the latter. Plants should not now be pinched again where Christmas flowers are wanted. They should be allowed to dry out well between each watering, be syringed freely to keep bug in check and given a night temperature of not less than 70 degrees at this season. The roots will be seen running all over the surface of the beds, which we like to see. Where they show too prominently, scatter a little loam over them, but do not use any fertilizer in it. Your plants do not want and must not have any feeding for a long time. Ventilate quite freely during the day, but bottle up the sun-heat about the middle of the afternoon, after damping the house thoroughly.

Euphorbia Jacquiniaeflora.

Euphorbia jacquiniæflora has come back into some of its former popularity within the last two or three years. It is an excellent seller at Christmas, its cheerful color proving attractive. We like to grow six or eight plants to a pot. One six inches in diameter will hold six plants nicely, running them up to a single stem each. If these can be placed in a frame, plunged to the brims in leaves or ashes, kept close to the light and closed up about 4 o'clock each afternoon, they will make capital plants in a few weeks. They can be grown outdoors altogether, but we find frame culture even better than that of the greenhouse or open air. Place the plants in a warm greenhouse about the end of September—60 degrees at night is about right—and they will be in full flower for

[Continued on page 42.]

Lycaste Skinneri.

afternoon, unless the weather is dull, is also relished by the plants, which can be just as well grown in a frame as a greenhouse during the summer months, provided the glass is shaded well and congenial atmospheric conditions provided.

TWELVE BEST PEONIES.

The European trade papers are featuring the selection of the twelve best peonies as made by R. Whytte, the Canadian grower who visited most of the leading European peony growers last season. Mr. Whytte's list of the best dozen sorts is as follows:

Viscount de Fonceville — Large pink, fine form.

Mde. D. Galhau—Large pink, extra.

Festiva Maxima — Fine, white tipped carmine.

Floral Treasure—Soft rose, fragrant, free bloomer.

Asa Gray — Salmon-pink, very large, free bloomer.

Claire Dubois—Light rose, large, free bloomer.

Ella Christine Kelway—Extra fine pink, large, flat, large petals, sweet.

Baroness Schrœder—Pale pink to cream, large guards, perfumed.

Miss Salway—White, primrose guards, large, fine center, perfumed.

Bunch of Perfume—Rich deep pink, large, double, perfumed.

Rubra Superba—Purplish crimson, free bloomer.

BATH, N. Y.—The Bath Floral Co. opened its second annual carnival on the evening of August 10 at the Presbyterian church. One of the out-of-town exhibitors was Henry A. Dreer, who had three large tanks of water lilies from all parts of the world.

GREEN BAY, WIS.—Carl Meier has been making improvements of an extensive character both in the growing and selling ends of his business. An addition to his greenhouses, near Woodlawn cemetery, has just been completed. It is 24x150, equipped with hot water heat, and constructed by Contractor Herman Nitz. At his downtown office an addition 20x40 is under construction and will be finished in about a month. This extension will have glass roof and sides, affording a good sized display space.

ORCHIDS

LYCASTE SKINNERI.

Lycaste Skinneri is one of the oldest and most popular of Guatemalan orchids, having been in cultivation nearly seventy years. Thirty years ago any orchid collection, no matter how small, would contain one or more plants of this lycaste, and it was one of the first orchids the writer made the acquaintance of. It is not now seen so much as many other orchids, not being classed as a commercial variety, but no orchid grown makes a finer or more lasting show while in bloom. The individual flowers keep in good condition twelve to fifteen weeks, longer than any other orchid, with the possible exception of Cymbidium Lowianum.

The flowers of L. Skinneri are as much as six inches across and vary in color from pure white in alba to pure white sepals and petals, with heavily blotched rosy lips, as in the type. The scapes are usually ten to twelve inches high and several are produced from each of the new bulbs. The bulbs are quite large, dark green, and the solitary leaves are long and dark green, similar to those on some of the calanthes, but with much more substance, more like those of the anguloas.

Lycaste Skinneri succeeds well in an intermediate temperature, but can be successfully grown in an ordinary greenhouse in a compost of fern fiber and sphagnum. Pots are the best receptacles to grow them in, and during the growing season an abundant water supply is required. The flowering season is from December to May. W. N. CRAIG.

SEASONABLE ORCHID NOTES.

Coelogyne Cristata.

What a grand old orchid is Cœlogyne cristata! Even with the addition of multitudes of hybrids and new introductions from abroad, it holds its place as one of the most useful sorts in cultivation. What a glorious sight a well-flowered pan or basket makes, and how valuable it is to the man who has design work to make up! C. cristata is not what can be termed a tropical orchid. It resents forcing at any period, and is one of the varieties which cannot be hurried into flower. The growths are now about half completed, and the bulbs at the base just starting to swell out. An abundant water supply is now essential, and, in the case of well established plants, cow manure water in addition once in eight or ten days will be found helpful. A syringing overhead each

STOCK TO BE CARRIED OVER.

Ripening the Wood.

Stock which is intended to be run for a second season should now receive attention.

If not already ripened, this should be done as soon as possible, by gradually diminishing the supply of water and giving all air possible, both night and day. If the stock is on raised benches, the drying off can be accomplished in a short time if the weather is bright; if on solid benches, more time will be required.

During the period of ripening, great care must be taken not to dry too quickly or to such an extent as to cause the soft shoots to wilt. It is also essential that spider be kept in subjection. The dryness of the atmosphere and warm weather being favorable to the increase of this pest, it is necessary to exercise great care and vigilance to keep it in check.

When the plants are in good condition the top part of the soil as much as possible without injuring the roots should be removed, and the remainder should be given a sprinkling of air-slaked lime. A mulch of one-third decomposed cow manure and two-thirds good fibrous loam, well incorporated, should be put on to replace the soil removed. A sprinkling of bone meal, added to the mulch, is of great benefit.

Re-establishing the Plants.

The bench should now get a thorough soaking, which is all that will be required for a week or ten days. The house during this period should be kept as cool and moist as possible, using the syringe frequently and keeping the paths watered.

So soon as root action is again established, the small, strawy wood should be removed and the stronger canes cut back to a suitable eye. The taller canes can be bent down and tied, so as to retain this position. This will encourage the breaking of those dormant eyes near the base of the stem, which frequently make the best and most vigorous stems.

It is not always best to do all the pruning at one time, as denuding the plants of so much foliage has a tendency to retard root action.

With such varieties as Liberty and Richmond I have had good results without subjecting the stock to any preliminary drying or ripening, and with but little pruning. In fact, in comparison with benches treated in the orthodox fashion, they produced rather larger crops and of equally good quality.

When the plants have made a few inches of new growth they will require an increase of water, and, to prevent the young wood and foliage from becoming too soft, free ventilation must be practiced. Ribes.

FEEDING YOUNG ROSE PLANTS.

My young roses, Bridesmaid, Chatenay, Killarney and Richmond, were planted June 15, in a moderately rich soil. They are looking healthy, clean of disease, vigorous and thrifty. After disbudding them several times, they commence to throw up crown shoots from two to three feet tall, with pretty fair flowering buds on them. I am sure that they need something which will encourage their growth and strengthen their working capacity, especially the Richmonds, which do not produce as large a leaf as formerly. Some growers mulch the beds with cow manure, but conditions here make it undesirable and objectionable; neither do I want to trust chemicals. Could I feed with liquid made of sheep manure? Would sheep manure serve the same purpose as liquid? How much would you dilute it, and how often would you use it in the present condition of weather?

H. J. P.

Plants of this age—nine weeks—are doing remarkably well to produce canes of two or three feet, and though the buds are not quite up to size, they will improve as the weather gets cooler. The foliage on the Richmonds will also improve in size and texture as they grow older.

Sheep manure can be used with advantage, either as a mulch or in the liquid form. When applied as a liquid, it is safest to make it rather weak at first, gradually increasing in strength as the plants get accustomed to it. For a first application, one peck of manure to forty gallons of water will be strong enough Apply once in ten days.

Ribes.

REMOVING BLIND WOOD.

We should like to know how to trim the blind branches out of Brides and Maids that were planted in the last part of June. The roses are in perfect condition and we have been cutting about two weeks. G. W. P.

Stock planted in June cannot possibly require trimming in the sense you mean. Plants of this age require all the foliage they can make to keep root action going, and as every leaf is of benefit, they ought rather to be encouraged to make more wood instead of pruning.

The stock being in good condition and giving a crop, it should get a little encouragement by way of a little weak liquid food once in two weeks. Keep the branches neatly tied up, so that the air can circulate freely, and allow the sunlight to shine on the soil and you will have little trouble with blind wood.

Ribes.

SEASONABLE SUGGESTIONS

Hardy Roses.

As a general rule, hardy roses are neglected after the flowering season has passed. This is a mistake, for even the hybrid perpetuals will well repay one for a little extra care. Where budded plants are grown, any suckers of Manetti or briar should be carefully removed, as they quickly sap the vitality of the plants. Do not cut these off above the ground with a knife, but endeavor to pull them out root and branch to avoid further trouble. Cut off any seed pods which have formed. Keep the cultivator plied between the plants and you will be agreeably surprised at the nice fall crop of blooms you will get.

The teas and hybrid teas are specially valuable at this season and every florist who does a retail trade would do well to plant at least a few dozens of such splendid bloomers as white and pink Maman Cochet, Killarney, Gruss an Teplitz, Mme. Caroline Testout, Bessie Brown, Mrs. W. J. Grant (Belle Siebrecht), Mme. Ravary, Richmond and Mildred Grant. These will grow and flower well, either on their own roots or grafted, but the latter give much the finest blooms. In dry weather an occasional soaking of water will help to keep the plants growing and flowering freely.

Gardenias.

The growth of gardenias is now rapid. Plants benched in five inches of soil early in June are getting well established and their rate of growth is surprising. Blooms are valuable at Christmas and some growers bend their energies toward getting a crop at that time. There are, alas, many slips 'twixt the cup and the lip in gardenia culture for midwinter blooming. Too high or low temperature, too much or too little moisture at the root or in the atmosphere and an injudicious use of stimulants may, any one of them, cause the falling of the buds which is so common an experience with many.

It is different growing gardenias for

an early spring rather than a winter crop. In many cases the former pays fully as well as the latter. Plants should not now be pinched again where Christmas flowers are wanted. They should be allowed to dry out well between each watering, be syringed freely to keep bug in check and given a night temperature of not less than 70 degrees at this season. The roots will be seen running all over the surface of the beds, which we like to see. Where they show too prominently, scatter a little loam over them, but do not use any fertilizer in it. Your plants do not want and must not have any feeding for a long time. Ventilate quite freely during the day, but bottle up the sun-heat about the middle of the afternoon, after damping the house thoroughly.

Euphorbia Jacquiniaeflora

Euphorbia jacquiniæflora has come back into some of its former popularity within the last two or three years. It is an excellent seller at Christmas, its cheerful color proving attractive. We like to grow six or eight plants to a pot. One six inches in diameter will hold six plants nicely, running them up to a single stem each. If these can be placed in a frame, plunged to the brims in leaves or ashes, kept close to the light and closed up about 4 o'clock each afternoon, they will make capital plants in a few weeks. They can be grown outdoors altogether, but we find frame culture even better than that of the greenhouse or open air. Place the plants in a warm greenhouse about the end of September—60 degrees at night is about right—and they will be in full flower for

(Continued on page 12

Lycaste Skinneri.

LYCASTE SKINNERI.

Lycaste Skinneri is one of the oldest and most popular of Guatemalan orchids, having been in cultivation nearly seventy years. Thirty years ago any orchid collection, no matter how small, would contain one or more plants of this lycaste, and it was one of the first orchids the writer made the acquaintance of. It is not now seen so much as many other orchids, not being classed as a commercial variety, but no orchid grown makes a finer or more lasting show while in bloom. The individual flowers keep in good condition twelve to fifteen weeks, longer than any other orchid, with the possible exception of Cymbidium Lowianum.

The flowers of L. Skinneri are as much as six inches across and vary in color from pure white in alba to pure white sepals and petals, with heavily blotched rosy lips, as in the type. The scapes are usually ten to twelve inches high and several are produced from each of the new bulbs. The bulbs are quite large, dark green, and the solitary leaves are long and dark green, similar to those on some of the calanthes, but with much more substance, more like those of the anguloas.

Lycaste Skinneri succeeds well in an intermediate temperature, but can be successfully grown in an ordinary greenhouse in a compost of fern fiber and sphagnum. Pots are the best receptacles to grow them in, and during the growing season an abundant water supply is required. The flowering season is from December to May. W. N. CRAIG.

SEASONABLE ORCHID NOTES.

Coelogyne Cristata.

What a grand old orchid is Cœlogyne cristata! Even with the addition of multitudes of hybrids and new introductions from abroad, it holds its place as one of the most useful sorts in cultivation. What a glorious sight a well-flowered pan or basket makes, and how valuable it is to the man who has design work to make up! C. cristata is not what can be termed a tropical orchid. It resents forcing at any period, and is one of the varieties which cannot be hurried into flower. The growths are now about half completed, and the bulbs at the base just starting to swell out. An abundant water supply is now essential, and, in the case of well established plants, cow manure water in addition once in eight or ten days will be found helpful. A syringing overhead each afternoon, unless the weather is dull, is also relished by the plants, which can be just as well grown in a frame as a greenhouse during the summer months, provided the glass is shaded well and congenial atmospheric conditions provided.

TWELVE BEST PEONIES.

The European trade papers are featuring the selection of the twelve best peonies as made by R. Whytte, the Canadian grower who visited most of the leading European peony growers last season. Mr. Whytte's list of the best dozen sorts is as follows:

Viscount de Fonceville — Large pink, fine form.

Mde. D. Galhau—Large pink, extra.

Festiva Maxima — Fine, white tipped carmine.

Floral Treasure—Soft rose, fragrant, free bloomer.

Asa Gray — Salmon-pink, very large, free bloomer.

Claire Dubois—Light rose, large, free bloomer.

Ella Christine Kelway—Extra fine pink, large, flat, large petals, sweet.

Baroness Schroeder—Pale pink to cream, large guards, perfumed.

Miss Salway—White, primrose guards, large, fine center, perfumed.

Bunch of Perfume—Rich deep pink, large, double, perfumed.

Rubra Superba—Purplish crimson, free bloomer.

BATH, N. Y. The Bath Floral Co. opened its second annual carnival on the evening of August 10 at the Presbyterian church. One of the out-of-town exhibitors was Henry A. Dreer, who had three large tanks of water lilies from all parts of the world.

GREEN BAY, WIS. Carl Meier has been making improvements of an extensive character both in the growing and selling ends of his business. An addition to his greenhouses, near Woodlawn cemetery, has just been completed. It is 24x150, equipped with hot water heat, and constructed by Contractor Herman Nitz. At his downtown office an addition 20x40 is under construction and will be finished in about a month. This extension will have glass roof and sides, affording a good sized display space.

CONVENTION AFTERMATH

The Anniversary Session.

The roll call of the past presidents of the S. A. F. from the stage at the Odeon in Cincinnati on the evening of August 19 showed the following to be present: E. G. Hill, William R. Smith, Adam Graham, W. F. Gude, W. N. Rudd, John Burton, Philip Breitmeyer, J. C. Vaughan, William F. Kasting, W. J. Stewart and F. H. Traendly. P. O'Mara had been compelled to return to New York earlier in the day.

For the deceased presidents some intimate of former years was called on to speak: E. G. Hill for John Thorpe, J. D. Carmody for J. M. Jordan, J. C. Vaughan for J. T. Anthony, Prof. Cowell for William Scott, W. J. Stewart for E. M. Wood.

For the living but absent past presidents, letters were read from Robert Craig, M. H. Norton and James Dean. E. G. Hill spoke of J. N. May, and Joseph Heacock and others of Edwin Lonsdale.

A roll call of the members present at the first session, twenty-five years before, found hardly any of them in the hall; only one, B. P. Critchell, had anything to say. E. G. Hill read a paper, published in the last issue of the Review, descriptive of the first meeting, and J. C. Vaughan read a paper entitled "What the Society Has Accomplished in Twenty-five Years." He and H. H. Ritter are said to be the only members who have attended all the conventions. He took the broad ground that a large part of the wonderful development of the trade in the last quarter century has been due to the influence of the S. A. F. He said he would leave the audience to judge of the society's accomplishments when he had contrasted the conditions of twenty-five years ago with those that obtain today. He quoted William Nicholson at the time he visited this country, the year of the St. Louis convention, and spoke in appreciation of the coöperative spirit manifested by those of the society in their willingness to impart knowledge to those engaged in the same line of business.

After a few words by William R. Smith, the oldest past president, everybody joined in singing "Auld Lang Syne."

At the opening of the session, President-elect Pierson and Secretary-elect Dorner had been introduced and each said a few words of appreciation, coupled with pledges of loyalty and effort.

The Barbecue.

Friday, August 20, the Cincinnati Florists' Society took all those who had remained of the visitors—and they numbered several hundreds—for a ride on a big river steamer an hour and a half up stream to a resort called Coney Island, where a country fair was in progress. While the florists had the freedom of the fair, a portion of the grounds was set apart for their private use, and here a barbecue was held, with an ox and sheep roasted over big fires in the open air. The ladies were served at tables, but the men crowded about the carvers and helped themselves in real barbecue style. There was an abundance of lemonade and other liquids, also plenty to smoke.

After the repast a group picture was taken, though it contained only a comparative few of those who actually were in attendance. Then came the ball game, in which the visiting florists, led by Pitcher Charles Graham, of Cleveland, defeated nine Cincinnati florists, 13 to 4.

In the evening the fireworks display concluded with a splendid piece in honor of the florists—a portrait in pyrotechnics inscribed "J. A. Valentine."

The affair was under the immediate charge of J. A. Peterson, chairman, and Albert Sunderbruch, secretary, of the general committee, but all the other members of the executive committee were indefatigable in their efforts to see that everybody had a good time. The other members of the committee were: Albert McCullough, J. Charles McCullough, P. J. Olinger, Richard Witterstaetter, Ben George, E. G. Gillett, E. A. Forter, C. E. Critchell, J. W. Rodgers, D. Rusconi, William Murphy, Daniel Carmichael, George Bartlett, William Gardner, August Hoffmeister, Frank Dellar, Gus Adrian, Max Rudolph, Henry Schwarz and L. H. Kyrk.

Presentations.

During the outing at Coney Island, August 20, the members of the S. A. F. presented President and Mrs. Valentine with a large chest of silver. In his speech of acceptance Mr. Valentine stated that the selection was a particularly happy one, as they had recently celebrated their silver wedding and this was the silver jubilee of the society.

The New York members think so highly of Secretary Rudd that they could not permit him to go unremembered, also the secretary's old briar root has become so strong as to be noticeable wherever good fellows get together; so the New Yorkers presented Mr. Rudd with a case of two new pipes, a briar for every day and a meerschaum for Sunday, as J. H. Pepper explained in making the presentation.

The ladies never are to be outdone by the men. After having given their president, Mrs. Vaughan, a cut glass berry bowl Wednesday evening, at the outing, August 20, they presented Mrs. Maynard, the secretary, with a cut glass pitcher.

Louis Bullock, of Elkhart, Ind., was presented with a scarfpin by the Ladies' S. A. F. for his efficient services on the evening of the reception at the Sinton Hotel.

Convention Notes.

Cincinnati made good in every respect. Even the weather left nothing to be desired.

There was a large increase in S. A. F. membership, but not in proportion to the number of non-members attending. Here-

At Coney Island, Cincinnati, August 20, 1909.

tofore the hospitalities have been only for the S. A. F. members, but at Cincinnati non-members received all the courtesies.

Miss Pearl Fulmer is a great favorite because of her voice, and wherever florists gather about a piano she is called upon to furnish a large part of the entertainment.

Before the week was over the attendance had become probably the largest in the history of the S. A. F. Many staid only for a day, or two days, but there were many arrivals the later days of the week.

On the day the trade exhibition was open to the public there were over 1,200 paid admissions at 25 cents, and the local florists had given out some thousands of tickets at their stores. The attendance showed the interest of the people outside the trade.

Victor Morgan, who represented Bobbink & Atkins, found he was charged $20 for the cartage of his exhibit from the depot to the hall, while the haul from Rutherford to Cincinnati was only $46; he thought the charges out of proportion and refused to settle on that basis. The drayman got out an attachment for the exhibit and the sheriff had no difficulty in showing Mr. Morgan that when one is on the road it is cheaper to pay than to stay and fight, even if it isn't pleasant.

W. A. Manda went west from Cincinnati. He will visit the Seattle exposition and various points of interest on the Pacific Coast, expecting to spend a considerable time on the trip.

Mrs. J. W. Rodgers, wife of the superintendent of parks in Cincinnati, entertained a party of ladies at the Business Men's Club at luncheon August 18. Among those present were Mrs. J. C. Vaughan, Mrs. J. S. Wilson and Mrs. C. H. Maynard.

There was considerable increase in the membership of the ladies' society during the Cincinnati meeting. The ladies now have over 200 members, about one-fifth as many as the national society itself.

Phil Breitmeyer took Rush's place on the Detroit team and finished the championship contest, rolling 190 and 162.

Emil Leuly came all the way to Cincinnati from West Hoboken on his bicycle.

BOWLING.

The scores of the inter-city team contest were published exclusively in the REVIEW last week, page 51, Baltimore defeating Chicago by eighteen pins. The scores of the ladies also appeared in last week's issue, page 49, Mrs. Schaffer, of Washington, winning first place. In the men's individual contest W. F. Kasting won out. Following were the scores:

W. F. Kasting	159	201	360
C. W. McKellar	143	208	351
Nashlande	148	202	350
A. Shaeffer	166	178	344
P. Olsem	173	169	342
R. McLeman	166	173	339
E. F. Winterson	154	178	332
A. F. J. Baur	183	142	325
M. Dillon	150	174	324
F. Pasternick	168	138	306
W. W. Coles	176	128	304
F. H. Holton	133	164	297
G. McClure	146	148	294
W. B. Patterson	137	149	286
E. Leuly	158	126	284
H. Papworth	141	137	278
E. S. Kennedy	120	149	269
R. M. Phillips	124	141	265
E. R. Miller	132	132	264
F. Meinhardt	149	113	262
H. R. Brownell	119	144	261
G. H. Cooper	137	120	257
A. F. Vick	144	112	256
A. F. Longren	122	131	253
W. Hernest	125	125	250
J. A. Evans	118	130	248
A. Poehlmann	103	144	247
W. A. Manda	135	110	245
W. Smith	125	120	245
N. Zweifel	137	107	244
Hugh Seales	110	127	237
A. Elberfield	107	122	229
J. A. Shaw	110	117	227
C. J. Ohmer	113	112	225
A. H. Bush	109	115	224
G. Weiland	138	80	218
A. Rasmussen	89	128	217
L. Kill	115	80	195
H. Tobler	105	88	193
E. H. Gerschick	81	111	192
V. J. Gorley	100	90	190
I. L. Powell	76	111	187
J. Schulz	96	87	183
A. H. Langjahr	89	87	176
T. W. Moll	79	91	170
W. A. Sperling	66	93	159
J. W. Poehlmann	67	68	135

There also were prizes for individual bowling by men over 50 years of age, the following scores being made:

G. McClure	143	134	277
R. Kift	119	154	273
J. A. Shaw	124	109	233
J. Schulz	119	113	232
W. W. Coles	111	118	229
J. A. Evans	108	102	211
R. Miller	82	89	171

As representatives of the press, the following rolled the scores set opposite their names:

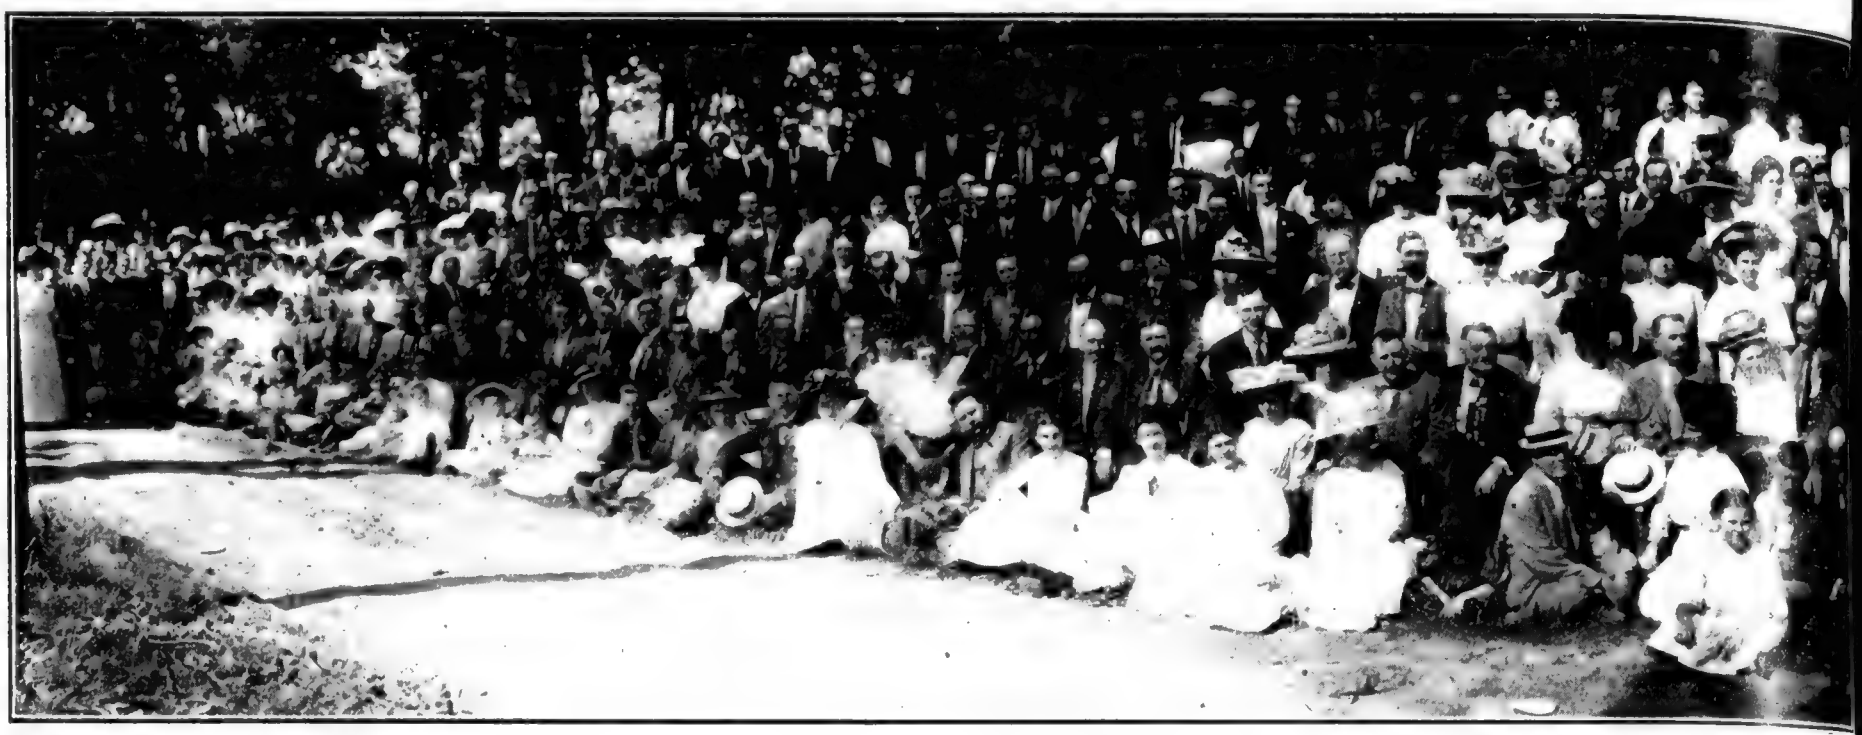
J. S. Wilson	157	159	316
A. F. J. Baur	156	158	314
T. C. Yarnell	134	158	292
W. W. Coles	143	135	278
J. A. Shaw	93	135	228

James Stevens rolled a match game against a local champion and lost, a fact his Chicago backers laid to the fact that his ball and shoes had been lost on the sleeper coming down.

A SONG OF CINCINNATI.

(With apologies to H. W. Longfellow.)

On the banks of the Ohio,
Of the muddy, dark Ohio,
Stands the city, Cincinnati,
The Queen City, Cincinnati.
Thither in the month of August,
When the moon was but a crescent,
Journeyed florists, young and hearty,
Florists hale, with locks so silv'ry,
For an anniversary meeting,
For a meeting with their fellows.



And the brothers of Queen City
Did the utmost for our pleasure,
Planned, and carried out their planning,
In a way to be commended.
Took us rides upon the street cars;
Those oft-turning, whizzing street cars,—
To the Zoo, out in the suburbs,
There to meet the chief for this year,—
J. A. Valentine, the mighty,
From the land of the great Rockies.
Took the ladies for a car ride,
To the fair state of Kentucky,
There to try their skill at bowling,
The uncertain game of ten-pins.
All was planned for fun and comfort,
By the friends in Cincinnati.

Then on Friday came the triumph,
Came the best of all their planning,
When they took us on the river,
On the muddy, dark Ohio,
In the steamer of their choosing
To the place called Coney Island.
There, surrounded by the forest,
By the hills so dark and frowning,
Did they serve a feast to please us,
Served a barbecue to please us.
With roast ox and lamb surrounded
Did we there take of their bounty,
In the place called Coney Island.

And when all the fun was ended,
When the sun sank 'neath the hill-tops,
Did we journey down the river,
Down the muddy, dark Ohio,
'Neath the crescent moon's dim shining
To the city Cincinnati.
There amid our friends and loved ones,
Did we part, with many hand-shakes,
Did we part, to meet next August,
Near the land of the Oswegos. P. B. F.

AFTER TWENTY-FIVE YEARS.

After a quarter century it appears that the attendance at the first meeting of the S. A. F., held in Music hall in 1885, was more representative of the trade of that day than the attendance at the silver jubilee last week was of the business as it stands today. Of the more than 200 who participated in that first meeting a considerable part have completed life's journey, and many others are so well along in years that they no longer have the strength for such gatherings, and others have dropped

W. A. Manda went west from Cincinnati. He will visit the Seattle exposition and various points of interest on the Pacific Coast, expecting to spend a considerable time on the trip.

Mrs. J. W. Rodgers, wife of the superintendent of parks in Cincinnati, entertained a party of ladies at the Business Men's Club at luncheon August 18. Among those present were Mrs. J. C. Vaughan, Mrs. J. S. Wilson and Mrs. C. H. Maynard.

There was considerable increase in the membership of the ladies' society during the Cincinnati meeting. The ladies now have over 200 members, about one-fifth as many as the national society itself.

Phil Breitmeyer took Rush's place on the Detroit team and finished the championship contest, rolling 190 and 162.

Emil Leuly came all the way to Cincinnati from West Hoboken on his bicycle.

BOWLING.

The scores of the inter-city team contest were published exclusively in the REVIEW last week, page 51, Baltimore defeating Chicago by eighteen pins. The scores of the ladies also appeared in last week's issue, page 49, Mrs. Schaffer, of Washington, winning first place. In the men's individual contest W. F. Kasting won out. Following were the scores:

W. F. Kasting	159	201	360
C. W. McKellar	143	208	351
Nashlande	148	202	350
A. Shaeffer	166	178	344
P. Olsem	173	169	342
R. McLeman	166	173	339
E. F. Winterson	154	178	332
A. F. J. Baur	183	142	325
M. Dillon	150	174	324
F. Pasternick	168	138	306
W. W. Coles	176	128	304
F. H. Holton	133	164	297
G. McClure	146	148	294
W. B. Patterson	137	149	286
E. Leuly	158	126	284
H. Papworth	141	137	278
E. S. Kennedy	120	149	269
R. M. Phillips	124	141	265
E. R. Miller	132	132	264
F. Meinhardt	149	113	262
H. R. Brownell	119	144	261
G. H. Cooper	137	120	257
A. F. Vick	144	112	256
A. F. Longren	122	131	253
W. Hernest	125	125	250
J. A. Evans	118	130	248
A. Poehlmann	103	144	247
W. A. Manda	135	110	245
W. Smith	125	120	245
N. Zweifel	137	107	244
Hugh Seales	110	127	237
A. Elberfield	107	122	229
J. A. Shaw	110	117	227
C. J. Ohmer	113	112	225
A. H. Bush	109	115	224
G. Weiland	138	80	218
A. Rasmussen	89	128	217
L. Kill	115	80	195
H. Tobler	105	88	193
E. H. Gerschick	81	111	192
V. J. Gorley	100	90	190
I. L. Powell	76	111	187
J. Schulz	96	87	183
A. H. Langjahr	89	87	176
T. W. Moll	79	91	170
W. A. Sperling	66	93	159
J. W. Poehlmann	67	68	135

There also were prizes for individual bowling by men over 50 years of age, the following scores being made:

G. McClure	143	134	277
R. Kift	119	154	273
J. A. Shaw	124	109	233
J. Schulz	119	113	232
W. W. Coles	111	118	229
J. A. Evans	108	102	211
R. Miller	82	89	171

As representatives of the press, the following rolled the scores set opposite their names:

J. S. Wilson	157	159	316
A. F. J. Baur	156	158	314
T. C. Yarnell	134	158	292
W. W. Coles	143	135	278
J. A. Shaw	93	135	228

James Stevens rolled a match game against a local champion and lost, a fact his Chicago backers laid to the fact that his ball and shoes had been lost on the sleeper coming down.

A SONG OF CINCINNATI.

(With apologies to H. W. Longfellow.)

On the banks of the Ohio,
Of the muddy, dark Ohio,
Stands the city, Cincinnati,
The Queen City, Cincinnati.
Thither in the month of August,
When the moon was but a crescent,
Journeyed florists, young and hearty,
Florists hale, with locks so silv'ry,
For an anniversary meeting,
For a meeting with their fellows.

And the brothers of Queen City
Did the utmost for our pleasure,
Planned, and carried out their planning,
In a way to be commended.
Took us rides upon the street cars,
Those oft turning, whizzing street cars, –
To the Zoo, out in the suburbs,
There to meet the chief for this year, –
J. A. Valentine, the mighty,
From the land of the great Rockies,
Took the ladies for a car ride,
To the fair state of Kentucky,
There to try their skill at bowling,
The uncertain game of ten-pins.
All was planned for fun and comfort,
By the friends in Cincinnati.

Then on Friday came the triumph,
Came the best of all their planning,
When they took us on the river,
On the muddy, dark Ohio,
In the steamer of their choosing
To the place called Coney Island.
There, surrounded by the forest,
By the hills so dark and frowning,
Did they serve a feast to please us,
Served a barbecue to please us,
With roast ox and lamb surrounded
Did we there take of their bounty,
In the place called Coney Island.

And when all the fun was ended,
When the sun sank 'neath the hill tops,
Did we journey down the river,
Down the muddy, dark Ohio,
'Neath the crescent moon's dim shining
To the city Cincinnati,
There amid our friends and loved ones,
Did we part, with many hand-shakes,
Did we part, to meet next August,
Near the land of the Oswegos. P. B. F.

AFTER TWENTY-FIVE YEARS.

After a quarter century it appears that the attendance at the first meeting of the S. A. F., held in Music hall in 1885, was more representative of the trade of that day than the attendance at the silver jubilee last week was of the business as it stands today. Of the more than 200 who participated in that first meeting a considerable part have completed life's journey, and many others are so well along in years that they no longer have the strength for such gatherings, and others have dropped

out altogether. But some three score of those present at the original meeting have maintained their loyalty to the present day. Of the ones known to have been at the first meeting, the following were noted at Cincinnati last week:

Ball, C. D., Philadelphia.
Breitmeyer, Phil, Detroit.
Bertermann, John, Indianapolis.
Burton, John, Philadelphia.
Carmody, J. D., Evansville, Ind.
Coles, W. W., Kokomo, Ind.
Critchell, B. P., Cincinnati.
Guy, E. W., Belleville, Ill.
Hill, E. G., Richmond, Ind.
Huntsman, Frank, Cincinnati.
Kift, Robert, Philadelphia.
Lamborn, Leroy L., Alliance, O.
Long, D. B., Buffalo.
Matthews, W. G., Dayton, O.
McCullough, Albert, Cincinnati.
McCullough, J. Chas., Cincinnati.
Peterson, J. A., Cincinnati.
Pierson, F. R., Tarrytown, N. Y.
Rieman, A., Indianapolis.
Ritter, H. H., Dayton, O.
Schulz, Jacob, Louisville.
Smith, H. P., Piqua, O.
Stewart, W. J., Boston.
Temple, J. T., Davenport, Ia.
Vaughan, J. C., Chicago.
Vaughan, Mrs. J. C., Chicago.
Waldbart, Alex., St. Louis.
Walker, H. G., Louisville.
Walker, John, Youngstown, O.
Whitnall, C. B., Milwaukee.

THE CRACK SHOTS.

In the gunners' contest at Cincinnati, August 18, Altick and Brown tied for high score, each breaking thirty-seven targets out of a possible forty-nine. In the shoot-off Altick broke ten straight, while Brown missed one, so Altick got the $55 gun offered as a prize by J. Charles McCullough. Altick also won the silver cup in the contest at twenty-five birds, the score being: Altick, 24; Brown, 22; Shaw, 22; Rodgers, 16; Rasmussen, 16. In the shoot-off to break the ties Brown defeated Shaw and Rasmussen defeated Rodgers.

In the contest at twelve pairs the crack shots finished in the following order: Brown, Rodgers, Altick.

In the team match against the five men from the local gun club the florists were beaten, 101 to 112. The florists' scores were: Altick, 22; Brown, 23; Rodgers, 22; Gardner, 15; Shaw, 19.

HAIL ASSOCIATION.

President E. G. Hill occupied the chair at the annual meeting of the Florists' Hail Association at Cincinnati, August 19. The association has had a busy year and has been of greater value to the members than ever before, because of the number and severity of the hail storms last spring. The losses paid amount to $34,628.62, with possibly $2,500 still in process of adjustment.

The report of Treasurer Joseph Heacock showed the following totals:

Balance on hand Sept. 8, 1908	$21,160.26
Total receipts for year ending Aug. 1, 1909	27,872.82
Total	$49,033.08
Losses paid Sept. 8, 1908, to Aug. 1, 1909	34,628.62
Expenses	2,967.81
Investments	4,309.47
Miscellaneous	12.50
Balance on hand Aug. 1, 1909	7,114.68
Total	$49,033.08

The losses paid in the year number 158 and represent a breakage of 215,665 square feet of single thick glass and 231,827 square feet of double thick glass, according to the report of Secretary John G. Esler, who also stated that the association has in its existence paid over 1,400 losses, amounting to over $161,000. The association now has 1,605 members, with insurance in force on 31,816,138 square feet of glass. The states that have more than a million square feet of double thick glass insured are:

Illinois	3,271,946
Pennsylvania	2,738,526
Ohio	2,108,506
Indiana	1,276,530
New Jersey	1,178,148
Missouri	1,098,701
Minnesota	1,065,430

Curiously enough, New York, with more greenhouse establishments than any other state in the Union, has insurance on only 693,381 square feet of double thick glass, in spite of the fact Statistician Esler has record of 106 hail storms in the state since June 1, 1887, when his office began keeping tab. In the same time Kansas has had 124, Illinois 122, Iowa, 115 and Missouri 105.

The Editor is pleased when a Reader presents his ideas on any subject treated in

THE WEEKLY FLORISTS' REVIEW

As experience is the best teacher, so do we learn fastest by an exchange of experiences. Many valuable points are brought out by discussion.

Good penmanship, spelling and grammar, though desirable, are not necessary. Write as you would talk when doing your best.

WE SHALL BE GLAD TO HEAR FROM YOU

The losses paid by the Florists' Hail Association since its organization is an indisputable argument in favor of hail insurance, and the fact that the excessive losses of the last two seasons have been paid without the levy of an extra assessment is a matter of just pride for the officials of the association, and one for congratulation by its members.

The Hail Association re-elected J. F. Ammann and chose A. M. Herr and Fred Burki directors in place of Fred Dorner, Jr., and E. D. Smith. The officers were re-elected: E. G. Hill, president; J. G. Esler, secretary, and Joseph Heacock, treasurer.

COLOR PHOTOGRAPHY.

[A synopsis of an illustrated lecture by O. P. Beckley, of Harrisburg, Pa., delivered before the Society of American Florists at Cincinnati August 18, 1909.]

Mr. McFarland briefly sketched the scientific side of the Lumiere autochrome system of color photography, and referred to previous processes which had been attempted.

After stating some of the laws of light, as applied to our perception of colors and the fact that white light is made up of three primaries, red, green and blue, he said that the Lumiere process originated in France after many years' experimentation.

The autochrome plate is composed of a layer of transparent starch dots so fine as to be present on each plate to the number of some five millions to the square inch. These transparent dots have been colored in the three primaries and are intermixed. When deposited on the plate they give to it, viewed at a distance, a light gray appearance, and at a sufficient distance, white. Viewed closely through a microscope, each dot appears separately.

This dot is the essential part of the Lumiere invention. It is covered by the ordinary photographic emulsion, and in the process of color photography the plate is placed in the camera in reverse

[Continued on page 29.]

OBITUARY.

Olaf Benson.

Olaf Benson, of Chicago, died at his summer home, at Higman Park, Benton Harbor, Mich., August 17, at the age of 72 years.

Mr. Benson was the landscape gardener who laid out Lincoln Park, Chicago. He was appointed superintendent of Lincoln Park in 1865 and held the position for seventeen years. He is survived by a widow and six children, four girls and two boys. Services were held at Higman Park, August 19, and the body was then brought to Chicago for burial.

The S. A. F. Gunners at the Northern Kentucky Gun Club, Dayton, Ky., August 19, 1909.

THE SOCIETY OF AMERICAN FLORISTS

What we have long needed

THE Florists of the United States have for a long time felt the necessity of an organization, national in character, honest and progressive in purpose. Such an organization is now an accomplished fact.

Who are Interested?—The 15,000 people directly and indirectly engaged in the business, are certainly interested in a Society that will study and further their general good; the amateur, lady or gentleman, the lover of flowers in town or country; the gentleman's gardener, will all be interested in our Society, as the whole range of horticulture will be reviewed from year to year, and gardening in all its phases will be discussed in a manner that can not fail to profit all.

Who will be Benefited.—Alike, the Florist, with his acres of glass, and his humbler brother, with a few hundred feet; the decorative florist and dealer in flowers, the manufacturer and dealer in supplies of all sorts; the greenhouse builder and heating apparatus manufacturer, and all those interested in floriculture, whether for pleasure or profit.

The Aim of the Society.—Is to lift up and carry forward all that tends to advance the growth of such a delightful occupation, to collect and diffuse from the best sources information that shall be beneficial to all its members, to care for and instruct all in the best modes of carrying on a successful business, to help those overtaken by misfortune and form a brotherhood worthy of the goddess Flora.

The Plan of Action.—Is to have a yearly meeting at one of the larger cities; in connection with these there will be an exhibition—at such meetings the business of the Society will be conducted, the transactions of the year previous will be presented, and the programme for the ensuing year laid down. The exhibitions will be entirely novel, and of such interest as will be worthy of the Society of American Florists. The desirability of forming either a Hail Fund or a Hail Insurance Company is generally conceded, and it will receive careful thought and prompt action on the part of the Society at its first annual meeting in Cincinnati.

Practical Papers, short, concise and full of instruction will be read at the meetings, and printed with the reports of the Society each year. No new plant or flower, no device or invention of merit will go unrewarded. Medals and certificates will be given for deserving exhibits. The Society will take especial care to have everything reported in the best manner. The Constitution and By-Laws are in preparation, and will be presented at our first general meeting.

Action Taken.—At a meeting of representatives from eight different States, held in Chicago on June 19th, 1884, this Society was organized by the election of the following

OFFICERS.

JOHN THORPE, President, Queens, N. Y.
J. M. JORDAN, First Vice-President, St. Louis, Mo.
M. A. HUNT, Treasurer, Wright's Grove, Chicago.
E. G. HILL, Secretary, Richmond, Ind.

EXECUTIVE COMMITTEE.

ROBT. G. BROWN, Kansas City, Mo.
J. C. VAUGHAN, Chicago, Ill.
ROBT. J. HALLIDAY, Baltimore, Md.
S. P. CRITCHELL, Cincinnati, O.
HARRY SUNDERBRUCH, Cincinnati, O.
ROBT. CRAIG, Philadelphia, Pa.
ALFRED NEUNER, Louisville, Ky.
ROBT. GEORGE, Painesville, O.
W. G. NEWETT, Chicago, Ill.

VICE-PRESIDENTS.

ROBT. M. HEATH, Canada West.
C. E. ALLEN, Vermont.
LUTHER ARMSTRONG, Missouri.
A. BRACKENRIDGE, Maryland.
WALTER COLES, Delaware.
J. D. CARMODY, Indiana.
A. DONAGHUE, Nebraska.
PETER HENDERSON, New Jersey.
FRANCIS MORAT, Kentucky.
C. A. REESER, Ohio.
MARCUS ELLIS, New Hampshire.
EDWIN LONSDALE, Pennsylvania.
ALEX. MURDOCH, Pennsylvania.
F. R. PIERSON, New York.
R. MAITRE, Louisiana.
A. H. BUNDE, Minnesota.
GEO. F. LAMB, North Carolina.
CARL JURGENS, Rhode Island.
W. R. SMITH, Dist. Columbia.
C. B. WHITNALL, Wisconsin.
O. F. DUE, Salt Lake City, Utah.
J. C. VAUGHAN, Illinois.

Our First Meeting.—The first meeting will be held at Cincinnati, O., between the 12th and 25th of August, 1885. We can promise even at this early date a more numerous attendance than has ever been accorded to any similar organization.

Our plans are maturing for an exhibition, noble in its conception and differing in character from any before attempted. The interest already manifested by many of the members warrants this positive statement. A schedule of premiums with rules and regulations and a complete list of members to date will be ready early in January.

S. A. F. 1884 1909

Losses by Hail.—One of the first intentions of the Society of American Florists is to provide in the best manner an insurance against loss of glass by hail. To advise the best plans for this insurance it will be necessary that all information regarding losses by hail during the years '82, '83 and '84 be furnished the Secretary as soon as possible. We wish to investigate this thoroughly and ask our friends to report any losses and to state the NAME of the sufferer, DATE of occurence, quantity and PER CENT. of glass broken. This is a matter of vital importance to the Society and a compliance with the above is urgently requested that the Society may have facts and data as a basis for action.

Who are Eligible.—"All Florists, Gardeners, Seedsmen, Nurserymen, Superintendents of Parks, Manufacturers of Heating Apparatus, Greenhouse Builders and dealers in Florists' Supplies in the United States and Canada shall be eligible to membership in this Society."

The fact that the large membership here given of representative men of the trade is voluntary and received almost without effort, proves that with the extended circulation kindly given our announcement through the various trade journals and catalogues we shall procure for our next membership list, the name of nearly every man connected with our business. Your name should be sent to the Secretary, or to the Vice-President of your State, or other officer of the Society and the regular numbered receipt of the Treasurer will be sent. **LET US HEAR FROM YOU.**

Annual Subscription.—The annual subscription is $2.00, entitling members to all the privileges of the Society. Most of our members so far, wishing to give the Society a good impetus in the shape of an incidental fund, have paid $3.00 extra, making a subscription of $5.00. We shall be glad of many other $5.00 subscribers.

For all particulars address:

E. G. HILL, Secy.
Richmond, Ind.

LIST OF MEMBERS SUBSCRIBING $5.00.

W. G. Newitt, Chicago, Ill.
Herman H. Ritter, Dayton, Ohio,
Peter Henderson, Jersey City, N. J.
J. M. Jordan, St. Louis, Mo.
Joseph Heinl, Jacksonville, Ill
Myron A. Hunt, Chicago, Ill
Wm H. Boomkamp, N. Y. City.
George R. Mumma, Dayton, Ohio.
Alexander Murdoch, Pittsburgh, Pa.
J. D. Carmody, Evansville, Ind
H. W Buckbee, Rockford, Ill
Luther Armstrong, Kirkwood, Mo

Waldbart, Alex., St. Louis.
Walker, H. G., Louisville.
Walker, John, Youngstown, O.
Whitnall, C. B., Milwaukee.

THE CRACK SHOTS.

In the gunners' contest at Cincinnati, August 18, Altick and Brown tied for high score, each breaking thirty-seven targets out of a possible forty-nine. In the shoot-off Altick broke ten straight, while Brown missed one, so Altick got the $55 gun offered as a prize by J. Charles McCullough. Altick also won the silver cup in the contest at twenty-five birds, the score being: Altick, 24; Brown, 22; Shaw, 22; Rodgers, 16; Rasmussen, 16. In the shoot-off to break the ties Brown defeated Shaw and Rasmussen defeated Rodgers.

In the contest at twelve pairs the crack shots finished in the following order: Brown, Rodgers, Altick.

In the team match against the five men from the local gun club the florists were beaten, 101 to 112. The florists' scores were: Altick, 22; Brown, 23; Rodgers, 22; Gardner, 15; Shaw, 19.

HAIL ASSOCIATION.

President E. G. Hill occupied the chair at the annual meeting of the Florists' Hail Association at Cincinnati, August 19. The association has had a busy year and has been of greater value to the members than ever before, because of the number and severity of the hail storms last spring. The losses paid amount to $34,628.62, with possibly $2,500 still in process of adjustment.

The report of Treasurer Joseph Heacock showed the following totals:

Balance on hand Sept. 8, 1908	$21,160.26
Total receipts for year ending Aug. 1, 1909	27,872.82
Total	$49,033.08
Losses paid Sept. 8, 1908, to Aug. 1, 1909	34,628.62
Expenses	2,967.81
Investments	4,309.47
Miscellaneous	12.50
Balance on hand Aug. 1, 1909	7,114.68
Total	$49,033.08

The losses paid in the year number 158 and represent a breakage of 215,665 square feet of single thick glass and 231,827 square feet of double thick glass, according to the report of Secretary John G. Esler, who also stated that the association has in its existence paid over 1,400 losses, amounting to over $161,000. The association now has 1,605 members, with insurance in force on 31,816,138 square feet of glass. The states that have more than a million square feet of double thick glass insured are:

Illinois	3,271,946
Pennsylvania	2,738,526
Ohio	2,108,506
Indiana	1,276,530
New Jersey	1,178,148
Missouri	1,098,701
Minnesota	1,065,430

Curiously enough, New York, with more greenhouse establishments than any other state in the Union, has insurance on only 693,381 square feet of double thick glass, in spite of the fact Statistician Esler has record of 106 hail storms in the state since June 1, 1887, when his office began keeping tab. In the same time Kansas has had 124, Illinois 122, Iowa, 115 and Missouri 105.

The Editor is pleased when a Reader presents his ideas on any subject treated in

THE WEEKLY FLORISTS' REVIEW

As experience is the best teacher, so do we learn fastest by an exchange of experiences. Many valuable points are brought out by discussion.

Good penmanship, spelling and grammar, though desirable, are not necessary. Write as you would talk when doing your best.

WE SHALL BE GLAD TO HEAR FROM YOU

The losses paid by the Florists' Hail Association since its organization is an indisputable argument in favor of hail insurance, and the fact that the excessive losses of the last two seasons have been paid without the levy of an extra assessment is a matter of just pride for the officials of the association, and one for congratulation by its members.

The Hail Association re-elected J. F. Ammann and chose A. M. Herr and Fred Burki directors in place of Fred Dorner, Jr., and E. D. Smith. The officers were re-elected: E. G. Hill, president; J. G. Esler, secretary, and Joseph Heacock, treasurer.

COLOR PHOTOGRAPHY.

[A synopsis of an illustrated lecture by O. P. Beckley, of Harrisburg, Pa., delivered before the Society of American Florists at Cincinnati August 18, 1909.]

Mr. McFarland briefly sketched the scientific side of the Lumiere autochrome system of color photography, and referred to previous processes which had been attempted.

After stating some of the laws of light, as applied to our perception of colors and the fact that white light is made up of three primaries, red, green and blue, he said that the Lumiere process originated in France after many years' experimentation.

The autochrome plate is composed of a layer of transparent starch dots so fine as to be present on each plate to the number of some five millions to the square inch. These transparent dots have been colored in the three primaries and are intermixed. When deposited on the plate they give to it, viewed at a distance, a light gray appearance, and at a sufficient distance, white. Viewed closely through a microscope, each dot appears separately.

This dot is the essential part of the Lumiere invention. It is covered by the ordinary photographic emulsion, and in the process of color photography the plate is placed in the camera in reverse

(Continued on page 29.)

OBITUARY.

Olaf Benson.

Olaf Benson, of Chicago, died at his summer home, at Higman Park, Benton Harbor, Mich., August 17, at the age of 72 years.

Mr. Benson was the landscape gardener who laid out Lincoln Park, Chicago. He was appointed superintendent of Lincoln Park in 1865 and held the position for seventeen years. He is survived by a widow and six children, four girls and two boys. Services were held at Higman Park, August 19, and the body was then brought to Chicago for burial.

The S. A. F. Gunners at the Northern Kentucky Gun Club, Dayton, Ky., August 19, 1909.

SOCIETY OF AMERICAN FLORISTS.

INCORPORATED BY ACT OF CONGRESS MARCH 4, '01

Officers for 1909: President, J. A. Valentine, Denver, Colo.; vice-president, E. G. Gillett, Cincinnati, O.; secretary, Willis N. Rudd, Morgan Park, Ill.; treasurer, H. B. Beatty, Pittsburg.

Officers for 1910: President, F. R. Pierson, Tarrytown, N. Y.; vice-president, F. W. Vick, Rochester, N. Y.; secretary, H. B. Dorner, Urbana, Ill.; treasurer, H. B. Beatty, Pittsburg, Pa.

Annual convention, Rochester, N. Y., August 16 to 19, 1910.

RESULTS.

We give them. You get them.
We both have them.

MANY of the wholesale firms say collections are even slower than usual in August.

GLASS contines to be low in price; several times the market has started up, but it has not gone very far and has slipped back again.

NOW comes the season for state and county fairs. Get in on them; they afford splendid opportunity for advertising the business.

PRIMULA LITTONIA, recently exhibited before the Royal Horticultural Society in London, by Messrs. Bees, Ltd., Liverpool, received a first-class certificate.

DOES THE BUSINESS.

There are many factors which may influence an advertiser part of the time, but it is actual results which influence him most of the time.

The Review is certainly the paper to do the business; the orders came in fast, and are still coming; the dracænas are all sold, so cut out the adv.—Geo. W. Haas & Son, Meadville, Pa., Aug. 18, 1909.

Please cancel my advertisement of carnation plants, sold out.—Willis W. Kinyon, South Bend, Ind., August 21, 1909.

Please discontinue our adv. of carnation plants in the Review. The first two insertions sold 20,000 plants.—Frey & Frey, Lincoln, Neb., August 21, 1909.

LORRAINE BEGONIAS.

The time has arrived when the Lorraine begonias begin to grow much faster and the heart of the cultivator is cheered by the celerity of growth, as compared with that of a month ago. The earliest batch of plants should now be of sufficient size to go in the pots or pans they are to flower in. For moderate sized plants 6-inch is a good size of pan, while 8-inch will grow big specimens, two feet across or even more. Only where big plants are in request can those as large as 10-inch be used. As a general rule the small 6-inch pans are the best sellers. If pots are used in preference to pans, be sure to use abundant drainage. We always have found pans will give better results than pots.

Some staking up should now be done. Use light, neat sticks and let them be a little longer than the shoots are at this time. Pinch any runaway shoots and nip off any flowers appearing. Remember that this begonia wants a light compost, plenty of flaky leaf-mold, some old, decayed manure passed through a half-inch screen, sand and loam. The leaf-mold should comprise half of the whole. Lorraines grow best in a house kept tolerably close and without much shade. From now on they will require constant care in staking, potting and spacing. Never allow them to become crowded so that they touch each other.

In the case of late rooted cuttings, the best plan is to place several together in a pan, although there is some sale for little plants in 3-inch pots. Many growers rely on securing their stock each year from specialists. Any such should lose no time in purchasing their plants if they want to grow them into salable plants for the holidays.

WINTERING WALLFLOWERS.

Will you inform me whether or not wallflower, Cheiranthus Cheiri fl. pl., is considered a hardy plant in southern New York? If so, should it be wintered outside in hotbeds or in a hothouse?

E. L. S.

Wallflowers are not hardy plants in southern New York and should have the protection of either a coldframe, from which all but light frost is excluded, or, better still, a cold greenhouse kept just clear of freezing. Wallflowers will withstand considerable frost, but it is not safe to expose them to a lower temperature than ten to fifteen degrees above zero. If you plant your wallflowers in a frame where they will have the necessary head room, about the end of October, it will be sufficiently early. Leave the sashes off as long as possible and air freely at all favorable opportunities during winter. When severe weather sets in, it is an advantage to pack dry leaves loosely among the plants, but a covering of board shutters or mats will also be needed during the coldest weather.

C. W.

CHICAGO.

The Great Central Market.

It was the general report that last week was an excellent one for midsummer. The demand was such that practically everything of useful quality found a purchaser at a fair price, though it is true the supply of stock was not large. The result, however, was that the wholesalers were able to report a most satisfactory total of sales considering the season. Shipping trade remains the chief reliance of the market. There is a good out-of-town demand, especially for roses and asters. It appears the Chicago district is not the only one in which asters have done poorly this season. City trade still is largely limited to the demand for funeral work. Augusta gladiolus is largely used.

This week supplies are somewhat increased, but the demand continues fair and the market is regarded as excellent for the latter part of August.

Beauties have been somewhat off crop, but the supply is now on the increase. There is excellent call for these, especially the medium length of stems. Of other roses, Killarney holds the lead, being in largest supply and first in demand. Much of the stock is good, though considerable mildew is seen. Kaiserin of course holds first place among white roses, Bride not comparing with it in quality and White Killarney not being sufficiently abundant to cut a figure; but the best white roses are White Killarney, and when it becomes plentiful Kaiserin may have to take a back seat. My Maryland is becoming more abundant. Some growers already are cutting superb flowers on long stems and others are sending in stock that is showing rapid improvement. There is no special demand at this date for Maid or Richmond, and Chatenay is pretty well out of the running.

Carnations from the field are now received in considerable quantity and have

If Your Trade Calls for GOOD

Beauties

We Can Supply Stock That Will Please

There is no flower that will take the place of the Beauty. Our cut now has increased so that we are able to maintain a supply at all times in this market—**but why not order direct from headquarters and make sure you get the best stock?** We aim never to be without Beauties in the ice box, ready for your wire.

Roses

Kaiserin — Killarney — Maryland

There are no better white roses in market than our Kaiserin, no better pink than our Killarney—and our My Maryland are coming stronger every day. Our supply of Summer Roses is better than ever before—sure to please—and we want to hear from all the buyers who want the best stock and best service.

Asters

We are now shipping the finest Asters of the year—weather conditions have been more favorable and the later varieties are in strong; the stock is much better than before the drought was broken.

Besides the finest outdoor stock we have Asters grown under glass that are special fancy and meet the needs of the most critical trade.

Gladioli

We still have a large supply of the three colors that are sellers—pink, white, and red. The stock is fine.

Green Goods

The best Ferns in the market, $1.00 per 1000. Asparagus, Smilax, Farleyense, Adiantum and all other greens in quantity.

relieved the pressure on asters. Last week, and at the opening of the present week, asters were excellent property, especially white. Since the rains, quality has improved materially, and there now are excellent asters to be had. Gladioli are much less abundant, but there still are more than the trade has any use for. There is good call for the few first-class America now coming in, and white and red sell fairly, but the sale for the mixed lots is even slower than it has been.

There has been a flurry in valley, but it was of short duration. The little spurt in business also found some of the houses short of auratum and Easter lilies, but these are to be had where sufficient notice is given. The last of the peonies at length has been seen. There is an abundant supply of garden flowers, with little demand. Both white and yellow mums are offered, but they do not meet with any special call.

The green goods market is quiet, but there already is inquiry for strings of asparagus and smilax for the fall opening decorations, which come on in September.

New Wholesale Firm.

W. P. Kyle has sold his interest in the J. B. Deamud Co. to Mr. Deamud and has formed a partnership with Joseph Foerster to open a wholesale commission cut flower house in the Atlas block. The new firm will be Kyle & Foerster and expects to be ready for business early in September. They have secured the rear half of the room at the north end of the second floor of the Atlas block, the front half having just been leased for the new wholesale house of Hoerber Bros., as reported in the Review of August 12. The partitions are being put in this week and ice-boxes and fixtures will go in at once. It is an excellent location.

W. P. Kyle spent many years with Kennicott Bros. Co., leaving two or three years ago to buy an interest with J. B. Deamud, becoming vice-president of the corporation then formed. Joseph Foerster began as bookkeeper for George Reinberg and worked up to be manager. Then he was for a time in business for himself, selling his place in the Flower

Growers' Market to Dominick Freres and entering the employ of Messrs. Deamud and Kyle. The new firm thus has all the experience necessary to make a success of the business.

Another Building Project.

Every little while some real estate firm comes to the front with a proposition to put up a building for the wholesale florists, the idea being to remove the market from its present somewhat expensive location at Wabash avenue and Randolph street and make room for all the firms in one large, specially equipped building. The last project of this character was brought forward by Oliver & Co., who have a property adjoining the Rock Island depot. This fell through because of the undesirable location.

Now Rounds & Wetten are trying to interest the wholesalers in a building they propose to erect at the southeast corner of Market and Randolph streets, where as many floors 120x180 as may be needed can be provided, with all the special equipment the wholesalers care to pay for.

With more than twenty firms in the wholesale section, with leases expiring at various dates, it is a matter of much difficulty to get concerted action, no one caring to split up the market into two localities. Some day a removal undoubtedly will come to pass, but heretofore, on getting down to figures, it has been found that the propositions for a special building afforded no great saving of money

but involved accepting a much less favorable location in return for slightly beter facilities.

Various Notes.

Jacob Falkenstein, at Naperville, has callas that will be ready for market early in the autumn. He has been growing these for seven years and each year has had them earlier, while at the same time improving the quality of his blooms. This year he repotted his bulbs about July 1, starting them up in a cool, damp cellar. After about a month he removed them to a shaded greenhouse and plunged the pots in fresh manure. He will have blooms by October. Mr. Falkenstein also has made a reputation for the quality of his Bonnaffon mums and has 4,000 fine plants. He says that last season, by means of a small advertisement in the Review, he sold 25,000 cuttings in one week, and had to return orders amounting to $150 more. Next spring he in-

This is The Big **Mail Order Supply House** Of The United States

Mail orders now are coming in heavily for all kinds of fall stock—**We carry a complete line.** If you haven't ordered, write us today. Glad to quote prices or send samples.

Ribbons and Chiffons

We carry an immense line of Ribbons and Chiffons—we can supply anything you need and can do it at the right price. In fact, buying in what are known as "loom orders," we can sell at the prices smaller jobbers have to pay—we can **compete** with any Ribbon House in the United States.

Cut Flower and Design Boxes

We want you to give us at least a part of your order for boxes this season—do it now, and we have enough confidence in our box to feel sure you will re-order. Our box is the heaviest on the market, but it doesn't cost any more than many inferior lines. We have a nice stock of half tone cuts for printing boxes—no charge for printing on orders for 1000 or more boxes.

A Full Line of Growers' Supplies, Fertilizers, Etc.

Complete illustrated catalogue gladly sent upon request.

Mention The Review when you write.

tends to go more heavily into the cutting business.

After having spent several hundred dollars in fitting up the store at 73 Jackson boulevard, the Eatons have come to the conclusion that it is too small for their needs and are offering their lease for sale.

The assuming of office by the new chief of police August 23 made a call for Beauties and a few other flowers, numerous large designs and bunches being sent by his friends and those who hope to be his friends. The most notable piece was a 6-foot floral urn made of asters and filled with long-stemmed Beauties.

C. W. McKellar and Mrs. McKellar are planning an automobile trip with friends in Michigan.

C. L. Washburn says Beauties are coming in nicely now and he expects to see the market heavily supplied within a week.

The E. F. Winterson Co. has moved the wire workers from the basement to the balcony on the street floor and will hereafter have the entire basement for cut flowers and greens. A number of improvements are to be made in the next few weeks.

L. H. Winterson is on vacation this week. Mrs. Winterson is visiting at Louisville.

E. C. Amling is entertaining a nephew and niece who are here from Orange, Cal.

August and Adolph Poehlmann and their families went to Cleveland and Detroit for a few days after the convention, but were home early this week.

W. E. Lynch, of E. H. Hunt's, with his family, and L. R. Bohannon and family are at Fremont, Mich., for their outing.

The Manos flower stand in the Union depot is closed while Mr. and Mrs. Manos are doing the summer resorts.

Poehlmann Bros. Co. has begun to cut October Frost, the first white chrysanthemum to come on the market. They are good, but there is no special rush to get mums, either yellow or white, at this season.

Kennicott Bros. Co. says August 23 was one of the best days of the summer and that the preceding ten days saw better business than ordinary in summer, due to a special call for asters.

Frank Johnson, of the A. L. Randall Co., went from the Cincinnati convention straight north into Michigan for a few days' vacation.

C. M. Dickinson says the months of July and August have been the best midsummer months in the history of E. H. Hunt's.

Vaughan & Sperry have begun to receive dahlias of the decorative type and say they have sold well thus far. When E. S. Thompson begins to cut his crop in Michigan they will have many thousands a day.

E. E. Pieser expects to get away August 30 for a three weeks' rest, going first to Quebec to join Mrs. Pieser, who is a hay fever sufferer and who has preceded him.

Fritz Bahr and his son, Fritz, Jr., have walked from Highland Park to Oshkosh, 173 miles, with some other prize pedestrians, camping out on the way.

A. C. Kohlbrand is at Torch Lake, Mich., fishing.

Visitors.

There have been a large number of visitors in town this week, mainly conventionites en route home. President Valentine and Mrs. Valentine are here, the Denver party having scattered. F. H. Holton, C. C. Pollworth and others from Milwaukee called. Other visitors included: U. J. Virgin, Mrs. Virgin, Wm. Rehm and Charles Ebele, New Orleans; B. Rosens, New York; W. A. Manda, South Orange, N. J.; H. H. Kuhlmann, Houston, Tex.; G. Van Bochove, Kalamazoo, Mich.; Martin Reukauf, Philadelphia; Wm. Currier, Elkhart, Ind.; C. A. Rott, Joliet, Ill.; D. C. Horgan, Macon, Ga.; T. L. Metcalf and Mrs. Metcalf, Hopkinsville, Ky.; Harry A. Bunyard, New York; Victor Morgan, Rutherford, N. J.; S. B. Wertheimer, New York, N. Y.; J. G. Esler, Saddle River, N. J.

Lincoln, Neb.—C. H. Frey is seeking recreation in the vicinity of Hubert, Minn. Just at present, he says, black bass are fully occupying his attention, but he will be at home and at work again before the mum buds begin to swell.

Fancy Asters

We are leading the market an Asters because of the special stock of some of our growers who have their own private strains of seed.

White, Pink, Lavender, Purple

Good, medium stem, $1.00 per 100; fancy, good length stem, $2.00 to $3.00 per 100; extra fancy, long stem, $4.00 per 100. Order of us and get the best.

ST. LOUIS.

The Market.

Last week was not a busy one for the local store men. They say that, except for funeral work, it would have been mighty dull. At the wholesale houses, too, there is but little business going on, and the only demand, they say, is for white stock.

A good, soaking rain is needed, as outdoor stock is suffering greatly. The weather has become cooler and shipments are coming much better. On looking over the stock at the wholesale houses Monday morning, August 23, however, we found but little coming in.

Roses are looking better and some splendid Beauties, pink and white Cochets and Killarneys are seen. More carnations are coming in, but the quality shows little improvement. The stems are extremely short, but the color shows better than last week.

Extra good valley and lilies are to be had. Asters seem to be a failure this season and have become scarce, though usually at this time of the year the market is glutted with them. Gladioli are not of as good a quality of late. Tuberose stalks are still a glut and are selling cheap. There is a lot of other outdoor stuff coming in, which has a slow demand.

Smilax is selling fairly well, and also all other greens, of which this market has a good supply.

Various Notes.

The majority of the St. Louis delegation have returned home from the Cincinnati convention, and all express themselves as having had a great time. The Cincinnati boys are entitled to much praise for the way they entertained their guests, and the twenty-fifth convention of the society will long be remembered by those who attended it.

Charles Kuehn is this week visiting his parents in Detroit, having gone there directly from the convention. He was high man on his bowling team and lost the diamond medal by eleven pins.

A report comes from the other side of the pond that Mr. and Mrs. Theo. Miller are both sick in Berlin. Their many friends here hope for their speedy recovery and safe return home.

The old flower woman, Mary Dennis, a familiar character in the wholesale district, attempted suicide on Friday, August 20. The doctors say she will not recover.

Word received from George Waldbart, who is traveling in Europe, says that he arrived safely in London and is having the time of his life. His return is not expected much before October 1.

Next week will end the early closing at the wholesale houses, which has been the custom for the last two months. They are looking for an early revival of business this year.

Mr. and Mrs. Henry G. Berning are visiting in old Kentucky this week. They left at the close of the convention and expect to be home by the end of this week.

A great many of our local greenhouse men who are putting up new houses have decided to use George B. Windler's new device for holding up concrete benches.

Mr. and Mrs. James Young and Mrs. John Young and family returned home Saturday, August 21, after a month's stay at Atlantic City, N. J. All are enjoying the best of health.

City Forester Andrew Meyer, Jr., reports that, owing to lack of funds, the spraying of trees throughout the city will have to be abandoned.

George Ostertag gave his friends much pleasure by appearing again among them, having recovered from his sickness, though he lost many pounds in weight.

The bowling contest at Cincinnati was one of the best managed affairs that the S. A. F. ever had and the bowlers are all singing the praises of Col. Ed Winterson, who managed the bowling.

The dates of the fall flower show, to be given by the St. Louis Horticultural Society, have been decided upon. The show will be held in the new Coliseum and will last four days, November 9 to 12. This year's show promises to be the best and largest ever held by the society. A fruit exhibition will be held in conjunction with the show. The next meeting of the executive committee will be held the second Tuesday in September, for further developments. J. J. B.

Last week John Myflot purchased the lot at 315 to 321 Florissant avenue. The property has a frontage of seventy feet on Florissant and seventy-five feet on Bernays avenue, with a depth of 200 feet. On the former front there are four stores, while on the latter Mr. Myflot will erect a modern range of greenhouses. This property immediately adjoins a strip 50x200 already occupied by Mr. Myflot. The price paid is said to have been $10,000, and the contemplated improvements will cost as much more.

Rockville, Conn.—W. M. Risley left here August 11 for a trip to Philadelphia, Pittsburg and Cincinnati.

Moire Ribbons are the thing right now.

We are making some beautiful numbers. The florist who is keeping ahead can use these ribbons, the plain taffetas and satin taffetas and chiffons. Samples and prices will prove to you that ribbons bearing the Pine Tree Brand Label are the best for your work.

Summer Roses

We are keeping busy all summer because we have the good stock to do business with. Our customers keep busy all summer because they know they can get the stock and therefore work for the business and get it. It is only a matter of time when all Florists will come to realize that they can do business all summer now they can get the stock. Let the community in which you live know that you can supply them with good stock any time and watch the business come to you.

MILWAUKEE.

The Market.

Market conditions are much the same as last week. Good stock, for which there is a limited call, is still scarce. Plenty of stock of inferior grade has been hanging fire.

Club Picnic.

It was indeed a jolly crowd which attended the Florists' Club picnic last Sunday. The weather was ideal; consequently it was an easy matter to run off all events on the program with more comfort than in former years. Each event seemed to create more excitement than the previous one and it would be hard to say which was the best. Following is the list of events and prize winners:

Nail driving contest—Girls under 18 years, first, Anna Friedrich; second, Olive Neustaedter. Ladies, first, Gertrude Sommers; second, Miss Friedrich. Boys under 18 years, first, R. Klockner; second, H. Baumgarten. Men, first, Will Zimmerman; second, N. Zweifel.

Stemming contest—Girls under 18 years, first, M. Czarkowski; second, Lora Valom. Ladies, first, Gertrude Sommers; second, Miss O. Beyer.

Sack race—Boys under 18 years, first, C. Retzlaff; second, R. Haasch. Men, first, J. R. Sweasy; second, D. R. F. Ronneburger.

Egg race—Ladies and girls, first, Miss Voulzke; second, Miss Haasch.

Tug of war—Captains, Nic Zweifel and Fred Holton; first named side winners.

Various Notes.

Our conventionists returned Saturday and all report the convention to have been up to expectations. It was the first convention of its kind that Gust Mueller ever attended and he was so enthusiastic that he became a member and said he would attend all meetings hereafter. Fred Holton and Nic Zweifel pronounced it a continual round of pleasure and the best ever.

In view of the fact that there was an unusual influx of personal business matters during his stay at Cincinnati, C. C. Pollworth returned home last Friday, thus postponing his eastern trip for some time.

The Holton & Hunkel Co. is beginning to receive Beauties and White Killarneys in small quantities from its plant at Brown Deer.

The Mueller & Schroeder Co. has commenced to cut carnations from the new stock housed this summer. E. O.

CEDAR RAPIDS, IA. — John E. Lapes has leased room in the Boyson pharmacy and September 1 will open a flower store.

DAYTON, OHIO.

The Market.

Much as it would please us to give a glowing report on business, it is impossible to do so. The same old story is again revealed, with the same condition of trade we experience every year during the midsummer months. As soon as stock gets a little scarce, trade seemingly brightens up and the demand gets larger than the supply; then the florist thinks the spell has broken, but as soon as stock comes in more plentifully trade drops back into the same old rut. Everybody seems to be away on vacation and there is nothing doing to create a demand for flowers, except an occasional funeral. A new crop of Beauty, together with Killarney, Bride, Kaiserin, Bridesmaid and a few Richmond, make up the assortment of roses which is obtainable at present. Select stock seems a little scarce, consequently it is not difficult to dispose of it. New carnations, the Enchantress and red, are coming in now. They are not plentiful and the demand readily consumes the supply. Only a few giganteums are on the market, while gladioli are plentiful and cheap.

Heavy rains which fell in this section August 12 to 14 were much needed, for all outdoor vegetation was commencing to suffer for want of water. Ever since the rain the weather has been ideal and things have taken on new life. Outdoor asters have not done as well this year as they might and it is surprising to note how poorly the majority of the geraniums look, while other bedding plants, such as cannas, verbenas, petunias, salvias, etc., look fine. The farmers report an extra heavy crop of corn and other farm products this year. There is also a large crop of tomatoes, but with no market whatsoever. At the present it is impossible to realize more than 25 cents per bushel for them, and in many cases the gardener will sacrifice them at 20 cents in order to dispose of them.

EVERY now and then a well-pleased reader speaks the word which is the means of bringing a new advertiser to

FLORISTS' PUBLISHING CO.
530-60 Caxton Bldg. Chicago

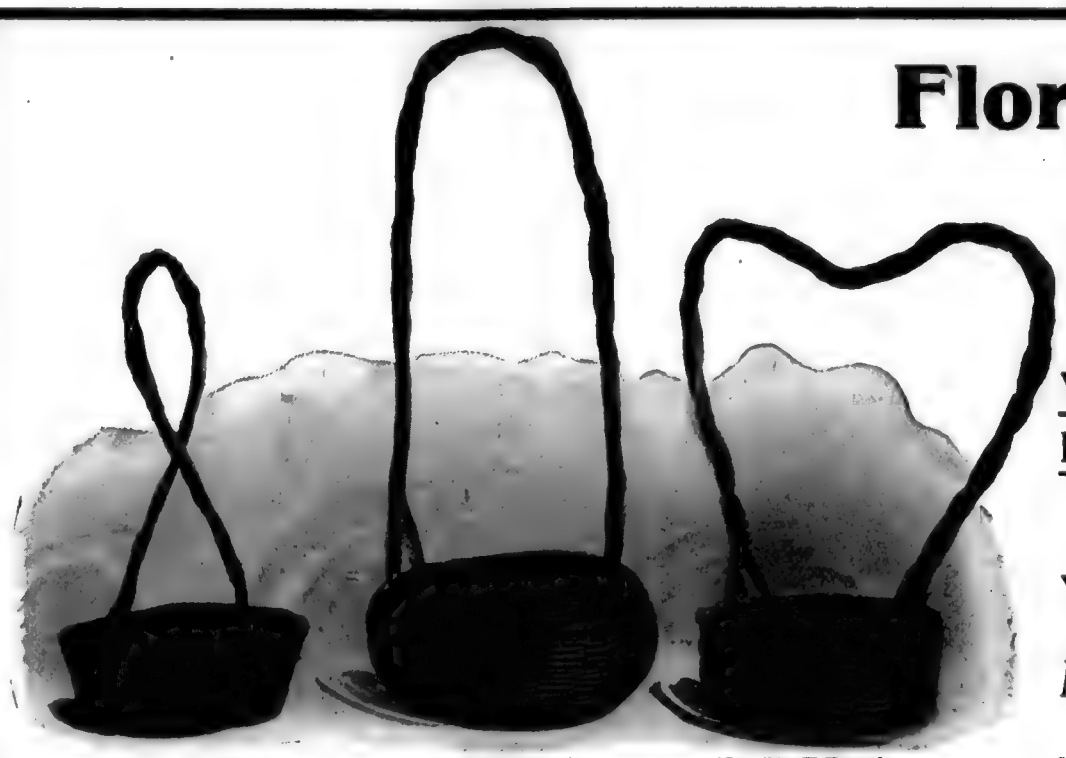
Various Notes.

Those of the Dayton florists who attended the convention at Cincinnati were: George W. Bartholomew, H. H. Ritter, John F. Young, Warren G. Matthews, Walter Matthews, E. E. Schaefer, John Boehner, Joseph Furst, Horace Frank, Mrs. Elizabeth Young and Mrs. Bertha Hendrichs. They all report a most enjoyable time.

Arno Hendrichs left last week for an extensive trip, taking in Cleveland, Detroit, Niagara Falls, Thousand Islands, Montreal, from there down the St. Lawrence river to New York city, returning by way of Philadelphia.

Wm. Kiefaber, secretary of Miami Floral Co., and his wife, have just returned from an enjoyable trip to Atlantic City, N. J., New York city and other eastern points.

Mr. and Mrs. M. Cook, of New Orleans, La., spent several days in this city as the guests of Mrs. B. Hendrichs, and from here went on to the S. A. F. convention. Mr. Cook reports the florists' business in New Orleans as somewhat quiet.



Herbert Bartholomew and Roy Tice enjoyed an outing at Sandusky, O., and Cedar Point August 15.

Henry Miene, recently employed by the Miami Floral Co., has taken a position at Reeveston, in Richmond, Ind.

Mrs. B. H. Duvall, of Chicago, who has been a guest at the home of Mr. and Mrs. George W. Bartholomew for three weeks, returned to her home August 19.

The Miami Floral Co. has been cutting new carnations for the last two weeks. The stock is good and it finds the market encouraging.

Mo., spent August 22 with Mr. and Mrs. George Bartholomew.

Several out-of-town tradesmen who attended the convention at Cincinnati stopped here on their way home in order to visit their Dayton brothers. Among them were H. T. Miller, Alliance, O.; V. Gorley, St. Louis, Mo.; I. Rosnosky, representative of Henry F. Michell Co., Philadelphia; Mr. Lempke, of W. W. Barnard Co., Chicago, Ill; George Dysinger, of Ionia Pottery Co., Ionia, Mich.; and D. E. Adsit, Jamestown, O.

R. A. B.

CLEVELAND.

The Market.

Flowers of all kinds moved steadily last week. Asters are still the bulk of the stock sent in. Some Japan and giganteum lilies are to be had, but are usually cleaned up early. Kaiserin is still the leader in the rose line, being plentiful and of the best quality. New carnations have put in an appearance and are snapped up at sight. Asparagus, adiantum and smilax are plentiful. Chrysanthemums and dahlias will soon be in. Valley has been selling well.

Various Notes.

The Cleveland delegation reports a good time at the convention, having been entertained most royally by those in charge. Cleveland was represented by a well filled special car.

The Poehlmann brothers, of Chicago, called on the trade here on their return from the convention, visiting the different retail stores and the greenhouses of the J. M. Gasser Co. and the F. R. Williams Co.

The Cleveland Cut Flower Co. is receiving some fine carnations from its greenhouses, from new plants.

W. J. Cramer, of Rocky River, is sending in a fine cut of asters, good flowers with long stems.

Charles A. Bramley reports a good run of funeral work last week.

Herman Knoble, of Knoble Bros., is spending a month at his summer cottage on the lake shore.

F. R. Williams and family are spending their vacation at Portage Lake.

B.

The J. M. Gasser Co. has greatly strengthened its store force. Frank J. Schoen, who has assumed the management of the Euclid avenue store, was associated with A. M. Murdock, of Pittsburg, for twelve years in the capacity of decorator and designer. W. S. Wheadon, who will assist Mr. Schoen, has just resigned a responsible position held for the past twenty years with the P. R. Quinlan Co., of Syracuse, N. Y. H. L. Renard, of Unionville, Pa., will take charge of the wholesale store on Prospect avenue.

MINNEAPOLIS.

The Market.

There is but little change in the flower market, as trade continues dull, with nothing but funerals to keep up the slight demand. Sweet peas are poor and scarce. There are but few carnations on the market and these are very short. Roses are plentiful, and asters are about equal to the demand.

Various Notes.

Miss Whitted has been getting in some fine chrysanthemums during the last three weeks, and finds ready sale for them. Business here is fairly good for the season.

Carl Melby, formerly of Minnetonka Beach, is now with Souden & Desmond, who have had an excellent week, including a large wedding decoration.

R. A. Latham is cutting some good gladioli and asters off his farm, and he finds business quite satisfactory.

The Minneapolis Floral Co. is cutting some good Kaiserin and White Killarney, the latter promising to be a popular variety.

M. E. M.

Niessen's News Column

ASTERS

We are now getting the choicest stock of Asters that we have handled this season. Some of our growers, in spite of the unfavorable conditions of the season, are producing a grade of Asters of surprisingly fine quality. It has been a poor growing season, we admit, but if you are under the impression that there are no good Asters in the market, we would like you to try a shipment of our goods. We know that we can please you both in quality and price.

Field-grown Carnation Plants

With a few exceptions, we are still offering Carnation Plants of all the varieties as listed in the last issue of the Review. We guarantee these plants to be healthy, and as good as can be had this season. If you so desire, before placing your order, we will submit samples.

The Leo Niessen Co.

Wholesale Florists

1209 Arch Street

PHILADELPHIA

OPEN FROM 7:00 A. M. TO 6:00 P. M.

To The Growers

You will soon be making your plans for the coming season, deciding where you will send your cut flowers, whether you will continue shipping them to your wholesaler of last year or whether you will make a change, important points that will have much to do with your returns.

We ask that before you decide this point you will come and see us and talk the matter over, find out whether we can have a good opening for the kind of stock you are producing and look at our facilities to see whether we keep abreast of the times; we believe that a business chat will be to our mutual advantage, and hope you will call when you are in town. We will be glad to call on you at any time.

Very truly yours,

W. E. McKISSICK & BROS.

WHOLESALE FLORISTS

PHILADELPHIA.

The Rising Eastern Market.

There is a wide divergence of opinions regarding business conditions for the week ending August 25. The majority hold that there is a decided improvement, the minority as stoutly maintain there is not. A slight increase is evident in the demand from the seashore resorts. Added to this is a slight addition to the ranks of the stay-at-homes who take an interest in flowers. Their interest is stimulated by the cooler weather. Trifling matters these, but straws that prove low-tide is past.

The quality of the asters coming to town indicates clearly the height of the season for this queen among late summer flowers. We have Ostrich Plume, Vick's and Semple's Branching, all at their best. The market is hardly able to care for so many really fine asters at once, following the shortage in this grade. Beauties come next to asters as the flowers of the day. Both eastern and locally grown stock is in demand. Valley has been selling well, for the supply is light. Cattleyas are scarce. Greenhouse grown gardenias have made their appearance and in some instances are accepted instead of orchids. Fine giganteum lilies are abundant, with little demand. The scouts of the carnation army have made their appearance. Kaiserin is not plentiful. Maryland is in excellent supply. Many of the flowers are of excellent quality with long stems, but despite of all that is said in favor of My Maryland it has not the place in the hearts of the flower-loving public held by Killarney. Gladioli are decreasing in numbers. Hardy ferns are most active among the greens.

The Cincinnati Convention.

Leo Niessen returned to this city August 22 after a week's stay in Cincinnati. On the following day Mr. Niessen kindly consented to talk a little about his trip.

The attendance at the convention was equal to that of former years, the middle west being largely represented, the east and south sparingly. The weather was delightful, and the Cincinnati florists did all they could to make the visit pleasant. The S. A. F. has accomplished an excellent work through its tariff committee, as shown in the report of Mr. Pierson. The trade exhibit was of high quality, Philadelphia making a splendid display.

The gladioli of the Cushman Co. were wonderfully fine. An interesting feature at the Cincinnati wholesale commission houses is the way gladioli are shipped. A square box open on top is filled with four cans firmly braced in the four corners; these cans are partly filled with water and in them the gladioli are placed and secured. It is possible with this method of shipping to cut the gladioli two-thirds developed, this insuring far finer flowers than can be obtained under the method in vogue in the east, where they are shipped in bud. The Chicago wholesalers who saw this unusual method of shipping expressed doubt as to whether the express companies would accept boxes open on top and containing buckets of water in their city.

A Pleasing Novelty.

Harry Bayersdorfer, head of the firm that bears his name, made time to show a representative of the Review an attractive novelty in chinaware that seems destined to play a part in the table decorations of the coming season. This novelty consists of miniature rivers, so to speak, or perhaps to be more accurate river banks, the china pieces, a couple of inches high and perhaps half as wide, being made to hold water. There are straight lines and curves of china, so designed that any desired form can be outlined on a table. The fernery can be surrounded by a circle of violets or panies. The whole table can be outlined with just the right curve at the end, or a series of S's can be made to wind in and out among the table ornaments. There are gates and gate posts which cunningly devise flower holders from which asparagus may be trailed to meet the vine trailing from another china

Last week we exploited the **NEW KIND** of store.

Below we offer the **NEW KIND** of bucket or flower jar, made of the best galvanized iron, which is only one of the many novelties we have in store for our customers the coming season.

After a practical and thorough test of two years this bucket has been found far more durable, easier handled; in fact, superior in every way to any flower receptacle on the market today.

It does not break, does not wear out, does not rot, does not chip; in fact, with any kind of care, will last a life time.

	Width	Depth	Per doz.	Per 100		Width	Depth	Per doz.	Per 100
No. 0	6-in.	5½-in.	$3.00	$20.00	No. 5	7-in.	12-in.	$ 7.00	$ 45.00

flower post. An ingenious contrivance of merit.

West Grove to New Castle.

The florists' business world has been startled by the announcement in western and eastern papers, confirmed from headquarters, that the Dingee & Conard Co., West Grove, Pa., has purchased the plant growing department of Heller Bros., New Castle, Ind. This department comprises about 50,000 square feet of glass, devoted to the plant mailing trade. It is further stated that the purchasers will operate this plant as a separate branch from their main plant at West Grove, with a superintendent, James McLaughlin, in charge. The sale was effected by P. Joseph Lynch, managing owner of Dingee & Conard Co., and was made possible by the death of Herbert Heller, who had charge of this department of his firm's business.

Surprise was manifested by the business world when the Dingee & Conard Co. added its rose growing plant at Charlotte, N. C.; greater surprise will certainly be shown when the present purchase becomes generally known. Everybody knows that Mr. Lynch is a good business man, who prospers, but there has been a sort of mild skepticism among the profession as to the possibilities of the "dollar a dozen" roses. The New Castle purchase will do much to dissipate these doubts.

Various Notes.

B. Eschner, of M. Rice & Co., returned to this city from the Cincinnati convention August 24, full of enthusiasm over the appreciation by the delegates and by the Cincinnati Enquirer for his firm's handsome exhibit.

Henry Kabierske, who gained renown for his artistic work in Founders' Week celebration last fall, has started in business for himself, opening an office in the Flanders' building, Fifteenth and Walnut streets. Mr. Kabierske did some local work for a local celebration in Dayton, O., and another in Milwaukee, also for the Hudson-Fulton celebration next month. He has secured a contract here in November and another in Washington next May.

George Cooper, formerly with H. H. Battles, now with President Valentine in Denver, was a visitor in this city this week.

William A. Keaton, Andalusia, Pa., is adding one new house 24x80 and doubling another house. This will give Mr. Keaton a little less than twice as much glass. It will be devoted to violets and carnations.

Frederick J. Michell spoke entertainingly in his cheery way of his visit to Cincinnati last week. Mr. Michell enjoyed himself, as he always does, and also did a satisfactory business, as he generally does. When asked about the latter Mr. Michell mentioned that he had secured a new insecticide sprayer for use

THE Florists' Supply House of America

NEW, JUST ARRIVED

We have just received by incoming steamers a splendid assortment of all that is best in Florists' Supplies. We call your special attention to the following, selected from these importations.

BEECH SPRAYS, in all colors, red, brown, yellow, green, etc.

WREATHS, made of **MAGNOLIA LEAVES, LAUREL LEAVES, STATICE, RUSSIAN IMMORTELLES.**

Our renowned **WHEAT SHEAVES** always on top, in flat, standing and open sheaves.

JAPANESE AIR PLANTS or SEA MOSS, CAPE FLOWERS, IMMORTELLES.

MAGNOLIA and LAUREL LEAVES, loose; for making wreaths, etc., they are cheaper and better than fresh galax and do the same service. **BASKETS** in all sizes and shapes, these we import and manufacture. **METAL WREATHS, CROSSES, etc.,** which we manufacture ourselves, can make any style you want. **WAX FLOWERS.**

Everything in Florists' Supplies. Send for our illustrated catalogue.

H. BAYERSDORFER & CO., 1129 Arch Street, PHILADELPHIA, PA.

Mention The Review when you write.

in greenhouses which he believes the best thing out for the purpose.

Robert Crawford, Jr., is rapidly pushing work to completion in the alterations in his Eleventh street store, which he assures me will be pretty. Judging the future by the past, this statement can be cordially endorsed.

Frank L. Politis has returned from a trip to a number of places of interest, and is now ready to take charge of his many varied business places.

William C. Herbert, Atco, N. J., set September 10 as the date when the dahlia will become an important factor in the wholesale cut flower market.

Mrs. Sarah I. Smith, Secane, Pa., who has been at Atlantic City for two months since leaving the hospital, is steadily gaining strength; in fact, Mrs. Smith is so much better that she is planning a vigorous campaign for the coming season. The success of her greenhouses during the spring and summer made a good rest and complete recovery possible at the city by the sea, because when things are going well they are off their mind, you know.

D. T. Connor, of Lord & Burnham Co., will erect a palm house 26x80 at the U. S. Naval Home, Graye Ferry road, Philadelphia; a bedding plant house 20x100 at Hillside cemetery, Hillside, Pa.; three orchid houses 22x87 for Louis Burk, Olney, Philadelphia; a rose house 36x210 for John Stephenson's Sons, York road, Philadelphia; a seed testing house 18x58 for H. F. Michell Co., and a private conservatory and workroom 18x60 for Charles H. Smith, Eddington, Pa. PHIL.

COLUMBUS, OHIO.

The Market.

Trade is rather quiet, with only a little funeral work now and then. Stock has been rather scarce. Carnations are not to be had at present, but some growers think they will be cutting from new stock in about ten days. Roses have been fair. Some stock from young plants has been short stemmed, but has carried fair buds. Some fairly good Killarney are to be seen. Asters are plentiful, but of poor quality, a great many coming in with brown edges. Some later stock promises to be much better. Gladioli are still plentiful, but demand is light. Lilies are in good demand and good supply. Ferns and palms have been moving nicely.

CYCLAMEN SEED NEW CROP

Michell's Fancy Giant Strain

If you want thrifty plants that will bloom freely, and produce gigantic bloom, then our Fancy Giant Cyclamen is the strain to grow. Our seed is grown for us in England by a leading specialist.

Various Notes.

A small crowd attended the convention from here. Although it was expected that at least twenty-five would go, there were only about ten, but they all report a good time. A number of members stopped here on their way home.

Charles W. McKellar and wife, of Chicago, stopped here for a day or two to visit his brother, James. They also stopped at Greenfield and Chillicothe, to visit his sisters.

E. Metzmeier has all his carnations housed and they are looking fine.

The Fifth Avenue Floral Co. is cutting some good roses from young stock. They also have a nice lot of lilies. They cut their first mums a few days ago.

Mr. and Mrs. C. A. Roth report having a fine trip out to the coast, but they say Ohio is good enough for them.

Gus Ackerman has been cutting some roses which are extra fine for this time of the year. J. M.

Sterling, Ill.—The Sterling Floral Co. is erecting another greenhouse, a glass covered building, 24x120, just south of its other buildings in the first ward. The new building is for raising of carnations exclusively.

Clifton Springs, N. Y.—Mrs. George C. Raymond, who has been in the florists' trade here for several years, has sold her greenhouses, with the residence and lot adjoining, to J. W. Kellogg, of Canandaigua, who will conduct the business.

It Pays to be Particular

Colville Nursery and Greenhouses

H. C. SMITH, Proprietor

Fruit and Ornamental Trees, Roses, Shrubs, Etc.
Cut Flowers, Plants, Hot House Vegetables.

Colville, Wash., August 8, 1909.

MESSRS. WIETOR BROS., Chicago, Ill.

Dear Sirs—The roses arrived yesterday in good condition, and thank you very much for the extras.

Now I wish especially to thank you for this shipment, the first I have had from you, as it was properly packed and in a very light weight crate, and the plants were good quality. I have been bitten so many times by ordering from firms and asking them as a special favor to pack in light weight boxes and then having, perhaps, 4 or 5 pounds of cuttings or plants come in a 20 pound box with from 2 to 3 dollars more express charges on it than should be if properly packed, that it does me good to have a package come as it should and I can't help telling you about it. I have had so many instances and in fact one only a few days ago that I now keep a list of those firms that I happen to deal with who send out their goods packed in any old kind of a heavy box to save a nickel's worth of time procuring a light one and thereby making my goods cost me perhaps from 2 to 3 times as much as they should. I also keep a list of the firms who pack right and needless to say I patronize them as soon as I find them out. This matter means money to many florists in the West, and I hope that all growers will think of customers' interests, that are two or three thousand miles away.

Thanking you, yours truly,
H. C. SMITH.

DETROIT.

The Market.

Reports of good business are heard on all sides. At least good for this time of the year. Good stock is none too plentiful and is picked up on arrival at the commission houses. Roses are improving as the weather gets cooler. Asters are much improved since last report and some fine flowers are now available.

Various Notes.

Miss Emma Louise Pochelon, born Monday morning, August 23. Mr. Pochelon says when his family gets grown up it will not be necessary to hire outside help.

All G. H. Taepke's store needs now to make it one of the prettiest in town is a few coats of paint. White and green are to be the colors.

Most of the convention delegates have returned tired but happy. Those who bought extra light summer wear were somewhat disappointed, for the weather was no warmer than in Detroit. All you hear is, "You should have seen the fireworks and the fine trade display," and, "Oh, that barbecue!"

E. A. Scribner and wife are still at large, and when last heard from were traveling through Kentucky, bound for Chicago.

some White Killarney that are the envy of all the growers. Fine flowers and stems over a foot long is speaking well for so early in the season. H. S.

BOSTON.

The Market.

Outside of funeral orders, which have called for a good many flowers, little has occurred during the last week to break the ripple of summer dullness. The best roses are still Beauty and Kaiserin. White roses have been rather scarce. So far, White Killarney as a summer bloomer is not a great success. The flowers are too single and show considerable pink. My Maryland is well liked and is evidently going to displace Killarney to a large extent as a summer variety. Many flowers seen are short-stemmed and mildewed. Good flowers bring fair prices.

A few carnations of the new crop are appearing. The remnants of the old crop still linger, but are worth little. Asters are abundant and of splendid quality. Prices vary greatly, some bringing $1 per 100, others a fourth that price.

Gladioli are fine, but far too numerous. Sweet peas since the recent rains have improved and are now quite abundant. Good callas are still seen. Lilies are quite plentiful; longiflorum and speciosum album sell the best. Tuberoses are not in much demand, and neither are cosmos.

The demand for lily of the valley is moderate. Golden Glow chrysanthemums of excellent quality are coming from several growers. Prices on green stock remain about the same.

Exhibition.

The main exhibition hall was completely filled August 21 and 22, on the occasion of the second weekly show held in August. It would almost seem as if the withholding of many prizes improved the summer shows, for exhibits are much more extensive than in former years.

R. & J. Farquhar & Co. were again the largest exhibitors. Their sloping bank of herbaceous perennials, covering 500 square feet, was a whole show in itself. Included were large bunches of many liliums, including Henryi, myriophyllum, longiflorum, Batmanniæ, tigrinum, etc. The same firm showed a large table of hybrid tea roses.

W. W. Rawson & Co. had a fine collection of dahlias and choice gladioli.

B. Hammond Tracy had an unusually extensive and well arranged display of gladioli, one or two beds planted on the floor being quite effective.

T. C. Thurlow & Sons had a large collection of perennial phlox, as had F. J. Rea. Old Town Nurseries and Bellevue Nurseries each had fine collections of herbaceous plants.

W. Whitman, M. Sullivan gardener, had two tables of asters, one of perennial phlox, as well as fine displays of Lilium tigrinum and a general collection of annuals and perennials.

Mrs. J. L. Gardner, William Thatcher gardener, showed annuals in great variety. Mrs. E. W. Gill had excellent dahlias, as well as a general assortment of greenhouse and outdoor flowers.

C. W. Parker had a collection of roses and Mrs. Alvin Fuller fine Hohenzollern asters. There were the usual fine displays of fruits, vegetables and fungi.

Special awards were: B. Hammond Tracy, silver medal for collection of gladioli; first-class certificates to W. W. Rawson & Co. for Gladiolus Hohenstaufen, Sans Pareille and Mrs. Frank Pendleton; honorable mention, Farquhar & Co. for tea roses.

Various Notes.

The Gardeners' and Florists' Club will hold its next field-day with the Bay State Nurseries, North Abington, September 11. Regular club meetings will resume September 21. The speaker of the evening will be J. W. Duncan, whose subject will be "Some Facts About the West."

The Boston Coöperative Flower Market anticipates an excellent auction sale of stalls at the market in Music Hall place August 28.

Thomas Roland states that in spite of the dry summer he has never had his outdoor stock in finer condition, all plants making a fine, sturdy growth.

The decision of the S. A. F. to hold a national spring show in Boston in 1911 meets with general favor locally. There

COLOR PHOTOGRAPHY.

[Concluded from page 14.]

fashion, so that all the light which reaches the sensitive surface must first pass through the layer of colored starch grains or dots. When exposure is made, all the light reflected from the petals, say, of a red rose, passes only through the red starch grains, except sufficient of the blue and green to modify the red to the exact shade of the rose. The rest stops right at the starch grain layer and is absorbed. In the same way the green leaves reflect light which passes through the grain dots, modified by the other colors.

Thus each color reflects its own intensity of light action onto the sensitive photographic surface lying back of these marvelous starch grains.

When developed by ordinary photographic means the chemical action places over each of these little dots which has been acted on, an appropriate amount of metallic silver. Immediately a wide departure is taken from the familiar photographic methods, by subjecting the plate to chemical action which dissolves away every scrap of this silver which has been acted upon, thus uncovering the transparent starch grains which have been opposite any particular color reflection, and the remainder of the grains are left covered, so that when the plate is completed only the red dots opposite the red rose petals are uncovered and all others are wholly or partially veiled by deposited metallic silver.

The lecturer explained how, when this plate is viewed closely by microscopic means, it is seen that the brightest red contains green and blue and the brightest blue contains red and green, the astonishing fact being presented that there is no absolutely pure color in nature.

By far the most interesting part of the lecture to those not concerned in the technical aspects was the presentation of fifty or sixty examples of the autochrome, which were shown by a specially arranged stereopticon illuminated by a powerful electric light. The most delicate graduations of color in flowers, plants, trees and manufactured objects were noted. The commercial application of the process was illustrated by autochrome reproductions of work done from autochromes.

The lecture was an interesting presentation of a novel and important process, new to most of the audience.

WATERVILLE, ME.—Superintendent J. C. Fuller, of the Coliseum department of the Central Maine fair, and several others have been canvassing the city in order to ascertain who will send flowers to the fair for exhibition. Many prizes have been offered for all varieties of flowers and plants. J. C. Fuller will be able to arrange for free transportation of exhibits.

STYRAX JAPONICA.

The two or three species of styrax in general cultivation are all ornamental plants and worthy of inclusion in most collections. S. Japonica forms a large, spreading shrub fifteen to twenty feet high eventually, but is more frequently met with about half that height. The leaves are small and ovate, with serrate margins; the flowers white, in axillary, pendulous racemes. The racemes are loose in appearance and composed of about half a dozen flowers each. As they are borne freely, a good-sized bush covered with flowers presents an attractive appearance. Such specimens are occasionally met with. An exceptionally fine one has long been famous in Veitch's Nursery at Coombe Wood, near London, England, while, according to the Gardeners' Magazine, there is another specially nice example, sixteen to eighteen feet high, in Lord Clinton's garden at Stevenstone, N. Devon. Like the other styraxes, this is impatient of root disturbance, and the transplanting of a large example must be done with great care. When first planting it a position should be selected which is likely to be a permanent one, and the plant should, if possible, be planted from a pot. Though it thrives in loamy soil, it appreciates a little peat, and it is a good plan to place a little about the roots at the time of planting. Although originally described as a Japanese plant, it is found in China also.

Norfolk, Va.—Ernest J. Newton and Miss Marian Stone were married in Trinity Church, Boston, July 19. Mr. Newton is head of the Norfolk Floral Gardens.

Milford, Ia.—H. N. Antisdel, proprietor of the Milford Nurseries, is about to erect a residence and three greenhouses on his property, near the Milwaukee station. The greenhouses are to be 16x40. A hot water heating plant will provide for the residence as well as the greenhouses.

Helena, Mont.—The seedlings which were set out last spring at the Muskrat Nursery, near Boulder, in the Helena forest reserve, are doing finely. No action will be taken by the forestry officials toward the reforestation of Mount Helena until local grown seedlings are secured, it having been found that seedlings from outside the state do not thrive in Montana.

FOR SALE—A large number of second-hand genuine Morehead steam traps, pressure reducing valves, and pipe and fittings; don't buy before asking us for prices; our boilers are nearly as good as new. Address Rollins Steam Specialty & Valve Co., 425 Dearborn St., Chicago, Ill.

FOR SALE—In Illinois town of 5000, splendid market, no opposition, 4000 sq. ft. glass, steam heat; can use as much again glass; dwelling, barn, 2 acres, half in fruit, asparagus, etc.; $1400.00 cash, balance $1800.00 at $10.00 per month; this is your chance. Address No. **154**, care Florists' Review, Chicago.

FOR SALE—Boiler bargains; 4 60-in.x14-ft. tubular boilers, good for 90 lbs. pressure; no patches nor blemishes; price, $150.00 each; more than 40 other good boilers, both larger and smaller, suitable to greenhouse work, including fire-box boilers; can furnish a number of good boiler tubes. Hugh W. Dyar, 204 Dearborn St., Chicago.

FOR SALE—5 modern greenhouses, 10,000 ft. glass, stocked with roses, carnations and bedding plants; no competition; 8 acres land in garden and fruit; 1½ miles from a growing resort town in western Colorado; thoroughly established business that will make money from the start and will grow with the country; cause, poor health. John Tenbrook, Glenwood Springs, Col.

FOR SALE—Two fire-box hot water boilers, used four years; will heat 6000 feet of 4-inch pipe each, in good condition, price $215.00 each on board car; 3000 feet of 4-inch pipe, 1000 feet of 5-inch pipe, as good as new, at 10 cents per foot; four No. 2 Morehead steam traps, used three years, in perfect working condition, $45.00 each; one high pressure steam pump, 3½-inch suction, 3-inch discharge, in good condition, price, $50.00. Address George Reinberg, 51 Wabash Ave., or call 301 Balmoral Ave., Chicago.

FOR SALE—Within 8 miles of one of the largest cities in the east, of 1,000,000 population, on direct route of modern electric railway, 45,000 sq. ft. of 16x24 double-strength glass, built on 19 acres of land; houses mostly all new, semi-iron, steam-heated, with 3 boilers, one a Babcock & Wilcox water tube; all houses planted up to carnations, which reach the best market in the United States within one hour; ill health compels me to dispose of this property. Address No. **171**, care Florists' Review, Chicago.

FOR SALE—An up-to-date, 18 years established florists' business, located in a city of 250,000, 2½ miles from court house, 1 block from car line, adjoining a large cemetery; city water; steam heat; well stocked; the place has been rebuilt only 4 years ago, and a 4-room house, office, 2 greenhouses and shed were put up new then, so the place is in splendid condition; a great opportunity for the right party; only $1500.00 cash required; balance on easy terms. For particulars apply to H. Fuchs, 556 4th Ave., Louisville, Ky.

FOR SALE—On account of other business, a florist's store and 2 greenhouses, 100x20, located in good neighborhood with good retail trade; long, favorable lease; no repairs; greenhouses planted in Boston ferns will bring price of place by first of November; also primroses, palms and other stock; reason for selling and full particulars will be given to parties interested. Address P. P., 920 N. Campbell Ave., Chicago.

FOR SALE

Nice home and florist business; bargain; will sell business to be moved off property; splendid chance to buy an established business and good will; seashore home; splendid climate; growing town and growing business. If interested write No. **122**, care Florists' Review, Chicago.

Pacific Coast Business Chance.

Being obliged to give up work on account of sickness, the owner of a controlling interest in a clean and good paying business will sell. This is a growing and shipping business, trade well established and extending to Atlantic coast. No debts and money in bank. Rare opportunity for a good man (or two men) with ten to twelve thousand dollars cash to invest, and the opportunity to live in "God's Country." Don't bother unless you have the capital to put up. Address No. **158**, care Florists' Review, Chicago.

HELP WANTED

At once; a reliable florist; one who understands carnations, roses and general stock.

Wanted

One best grower in every city in the U. S. and Canada to grow a Christmas novelty cut flower and plant for the season '09. Plenty stock can be obtained in your home city during August and September, very cheap. For particulars, write today to

I. I. NEFF, Florist, Bellevue, Pa.

Wanted

First-class carnation grower, middle age, to take charge of carnation growing, on large commercial place; must be an experienced grower and capable of handling help; reply with references and state wages expected in first letter.

Address **No. 137**, care Box 545, New York, N. Y.

FOR SALE

The Fairview Floral Company's Plant and Business at Beatty, Clark County, Ohio.

The plant consists of 3½ acres of land and has situate thereon nine hothouses, as follows: Two 20x110 feet; one 12x110 feet; one 12x80 feet; three 18x80 feet; two 16x50 feet; packing and potting house 30x70 feet; one six-room dwelling house; one three-room tenement house; stable 18x35 feet; modern hot water and steam heating plant; wind mill and tank, an unfailing water supply.

The business consists of a large active mailing list; mail order and wholesale business, and has on hands now growing 180,000 plants and bulbs of various kinds. Shipping facilities handy, and a U. S. Postoffice in the office of the Company. Propositions to purchase the above at private sale will be received up to the **10th day of September, 1909**, by

SAMUEL F. McGREW, Special Master Commissioner, Springfield, Ohio

Judicial Sale of Part of Assets of the Rosery Flower & Seed Company, Limited

Tenders will be received addressed to T. Harry Webb, Esquire, Liquidator of the Rosery Flower & Seed Company, Limited, New Nanton Building, Winnipeg, Manitoba, Canada, and marked "Tender re Rosery Flower & Seed Company Limited," up to four o'clock p. m. of the 15th day of September, 1909, for the purchase of the following property of the above named Company, namely:

That portion of the North West Quarter of Section thirty-two (32), in Township twelve (12), Range five (5) West of the fourth meridian in the City of Medicine Hat in the Province of Alberta, consisting of five (5) acres situate and abutting the South West corner of the City Park, purchased from one William R. Johnston,

together with all buildings and erections thereon and appurtenances thereto, including the following, namely: Greenhouses, store rooms, cold storage basement, piping, temporary heating apparatus, benches, pots, implements and usual accessories, representing an investment of $15,000 or thereabouts.

The City of Medicine Hat, in the Province of Alberta, has made favorable arrangements as to taxation and for the supply of water and natural gas.

The above property offers a good opportunity, owing to the existence of natural gas, good sunny climate and good soil, for establishing a wholesale florist business with a market in Winnipeg, Regina and Calgary.

TERMS OF SALE: Twenty-five per cent in cash and the balance on terms to be arranged with, and secured to the satisfaction of, the liquidator.

A marked cheque payable to the liquidator for ten per cent of the amount of the tender must accompany each tender, which will be returned if tender is not accepted. The tenders will be opened by the Liquidator at his office aforesaid on the 16th day of September, 1909, at the hour of eleven o'clock a. m., and all who tender are requested to be then present.

The highest or any tender not necessarily accepted.

The above property will be sold subject to the following conditions:

1. The property will be sold subject to a reserve price.
2. The Purchaser shall be bound by the terms of an agreement with the City of Medicine Hat dated the 17th day of May, 1909, which provides amongst other things that the occupant for the time being shall maintain upon the said lands and premises the business of florists as a going concern for a period of five years from the date of the purchase, in default of which the lands will revert to the City on repayment of the sum of $1,000.00 and the owner shall have the right to remove his buildings and other improvements. The agreement further provides that in order to obtain reduced rates for natural gas the occupant must instal and maintain on the premises a steam heating plant.
3. The purchaser will be required to enter into an agreement with the City embodying the above terms.
4. The purchaser shall have the conveyance prepared at his own expense, and tender same for execution.
5. If the purchaser fails to comply with the conditions aforesaid or any of them, the deposit and all other payments made thereon, shall be forfeited, and the premises may be resold; and the deficiency, if any resulting from such re-sale, together with all charges attending the same, or occasioned by the defaulter, are to be made good by the defaulter.
6. The said property will be sold subject to the approval of the Court of King's Bench for the Province of Manitoba.

For further particulars apply to the Liquidator, or to Messrs. Andrews, Andrews, Burbidge & Bastedo, Barristers and Solicitors, Aikins Building, McDermott Avenue and Albert Street, in the City of Winnipeg, in the Province of Manitoba, his solicitors.

Dated at Winnipeg, this 28th day of July, A. D., 1909.

T. HARRY WEBB, Liquidator, No. 308-11 New Nanton Building, Winnipeg, Manitoba, Can.

LEADING RETAIL FLORISTS

The retail florists whose cards appear on the four pages carrying this head, are prepared to fill orders from other florists for local delivery on the usual basis. If you wish to be represented under this heading, now is the time to place your order.

CINCINNATI.

The Market.

Business last week did not amount to much. There was a fair amount of stock coming in, but the demand was weak and there was not much doing. This was fortunate, as nobody had much time to attend to business. The local florists had all they could do working on the various committees and seeing that visitors were being taken care of.

The Convention.

The twenty-fifth meeting of the S. A. F. is now a matter of history, and since it is over, there is hope in the breast of every Cincinnati florist that all that throng of visitors, who were with us during last week, were pleased with the reception they met with in this city and that from this time onward they will always have a good word and a kindly feeling in their hearts for the local craft.

Weather conditions were ideal for the convention and we believe our prediction that Cincinnati is a first-class summer resort has been verified. The attendance also was all that could be desired. The trade exhibit was fully up to expectations and was a fine showing of what the flower business is today. It was a sight worth seeing, and no one could view the various and extensive exhibits without learning something that would pay him many times for the cost of his trip.

The various local committees had everything well in hand and all of the numerous entertainments moved off smoothly as they had been planned. The sporting events were well contested in every instance and the visitors surely deserved their prizes.

Various Notes.

Many of the local florists are now planning for their summer vacations, which had been put off till after the convention. E. G. Gillett and family have left for a stay at Traverse City, Mich.

William Murphy, who is suffering from his annual attack of hay fever, is preparing to leave for northern Michigan.

George Murphy has received the appointment as superintendent of the Jabez Elliott Flower Market and will assume his duties at once. C. J. Ohmer.

St. Catherines, Ont.—The thirty-first biennial meeting of the American Pomological Society will be held here September 14 to 16. E. D. Smith, of Winona, Ont., is chairman of the executive committee, which is sending invitations to members of the florists' trade. This committee is acting in behalf of the Ontario Fruit Growers' Association, the St. Catherines Horticultural Society and the Niagara District Fruit Growers' Association.

NEW YORK.

The Market.

The cut flower market remains in exactly the same condition as a week ago, with the wholesale prices unchanged and midsummer dullness everywhere in evidence. "There will be another month of it," said one of the oracles of Twenty-eighth street, who has prophesied correctly for a quarter century. What can you expect with no retail demand, few good roses, no good carnations and floods of asters and gladioli?

Now come the dahlias. Everybody must be growing Hydrangea paniculata grandiflora, and Golden Glow mums already add their cheerful faces to the retail windows. Orchids are few and far between, but they are coming along fast and will be ready for society when it arrives from the seashore and the mountains.

Various Notes.

Everybody is back safe and sound from the convention, and with only praise and happy memories in behalf of the big-hearted, generous men and women of Cincinnati. The majority returned on the Pennsylvania special, some have gone west to Denver and Seattle, and a few are coming via the Falls and Montreal. Next year Rochester may count upon a host from New York, and the Flower City will undoubtedly have the greatest attendance ever known by any S. A. F. convention.

The first fall meeting of the New York Florists' Club will be held September 13. Those of its members who were unable to attend the convention will there hear from the new president of the S. A. F. and several of its ex-presidents all about the great meeting at Cincinnati. Exhibits may be sent to Secretary Young, as usual.

is hoped to make this a general love feast, in which retailers from all the cities around New York may join, and to which doubtless all the wholesalers and growers will be invited. On the eve of the wonderful season so close at hand, this would be a send-off worth while to all concerned.

George Saltford is enjoying a week's rest at his old home in Rhinebeck, N. Y., "where the violets bloom."

The wholesale streets are busy making everything spick and span for the fall opening, which will be, the nabobs say, about September 15.

The young men of the employee brigade are all back from their holidays, much the better and browner for the open air life upon the mountains or near the billowy ocean, and all are busily engaged in putting the finishing touches on the wholesale stores' decorations.

The spirit of expectation is rampant. A great season is prepared for, and a strenuous one. It does not depend on Harriman and Wall street, fortunately, but is founded on the great harvests and the general prosperity they are sure to materialize. The same hope dominates the retail enterprises everywhere. Stores are being redecorated and improved in every direction. Some of the new ones will excel, it is said, anything ever before seen in the metropolis.

Carnivals are all the rage now at the seaside resorts near New York. At Asbury Park and Averne, as usual, our retail florists are supreme. From baby carriages to automobiles, their skill is demonstrated. Luckily, these make a needed outlet for the tremendous shipments of gladioli and asters. Enough of these arrive daily to decorate every baby carriage in Brooklyn.

The seed and bulb houses are all busy downtown with the largest summer retail business they have ever known. Their window decorations are renewed daily, and several seem to realize more than ever before the practical attractiveness of a brilliant display. The coming season is quite promising and a great fall trade is inevitable.

Captain Berry won high score honors in our club's bowling. Owing to the absence of Donaldson, Miesen and Fenrich, the team was not as strong as expected, but it "did its durndest" and kept out of the bottom hole, at any rate. Messrs. O'Mara, Traendly and Young modestly refused to risk their reputations.

The club will meet every Friday evening at Thumm's alleys until further notice. J. AUSTIN SHAW.

ALBANY, N. Y.

The third annual outing and clambake of the Albany Florists' Club was held at Henkes Bros.' grove, near Newtonville, August 15. The day was spent in looking over the new greenhouse in course of construction by Henkes Bros., in sports and games and social intercourse. Over 100 persons were present.

On a meadow which sloped eastward gradually toward the grove the games and sports of the day were carried through. James S. Snyder, of Rhinebeck, won the fat men's race. The winners of the other contests were as follows: Boys'

race, Herbert Kurth; free-for-all, George Skinkel; ladies' race, Miss Belle Reilly; sack race, John G. Young; broad jump, and hop, skip and jump, William Newport.

A five-inning baseball game was played late in the evening between picked-up teams representing the retailers and the growers. The game resulted in a victory for the growers by a score of 6 to 5. Kurth and Butts acted as battery for the retailers, and Newport and Haggerty for the growers.

The outing was held this year two weeks earlier than usual, because the club is making extensive preparations for its first flower show, to be held in the state armory in November.

Seed Trade News.

AMERICAN SEED TRADE ASSOCIATION.

Pres., J. C. Robinson, Waterloo, Neb.; First Vice-pres., M. H. Duryea, New York; Sec'y and Treas., C. E. Kendel, Cleveland, O.

THE beet seed crop in New England is said to be good.

WALTER ROGERS, of Hope Valley, R. I., dealer in seeds and agricultural implements, has filed a petition in bankruptcy.

CORN has been coming forward rapidly of late and there is no occasion for worry over the supply of seed of the popular sugar sorts.

L. A. BUDLONG CO., Chicago, is advertising in the daily papers for men and women to do "light garden work" harvesting its crops.

THE report is that the larger sizes of Harrisii bulbs were quickly sold, but that there still are plenty of small and medium sizes to be had.

VINE seed crops in Nebraska continue to give some concern. From some reports the bugs have been getting more than their fair share of the crops.

SECRETARY C. E. KENDEL has issued the "Proceedings of the Twenty-seventh Annual Convention of the American Seed Trade Association," a neatly printed volume of 136 pages.

RAIN in Michigan has been of considerable assistance to the beans, but from the pessimistic tone of the correspondence of the growers the peas appear to be beyond all help. However, crop conditions seldom are as bad as they are painted.

W. W. RAWSON & Co., Boston, have found a means of accepting all the many invitations to supply a trophy for competition at exhibitions that come to every large seed house. They have had a medal designed by one of the best men in the business, have struck off a number of these and are offering them to the managers of the fall shows.

LUTHER BURBANK has issued "a brief descriptive list of the new Burbank giant amaryllis," in which he says the way to judge novelties is to look to their source, and adds that he has from time to time sold "the more ordinary kinds" of his seedlings to seedsmen and florists, but the best sorts are now to be offered for the first time. He briefly describes 136 varieties, stating the number of bulbs and price of each variety, the sale to include all rights.

THE Michigan bean crops have been benefited by the belated rains.

THE sweet peas in California are turning out rather better than was expected by some of the growers.

J. E. NORTHRUP, of Northrup, King & Co., Minneapolis, sails from New York August 28, on the steamer Amerika, accompanied by his three daughters. After placing the young ladies in school at Dresden he will make an extensive tour of the European seed growing centers.

DUTCH BULBS.

The exporters of Dutch bulbs are advising their customers in this country that the harvesting of the crop was concluded under difficulties, the weather being so continuously wet that the crop was lifted under the most unfavorable of circumstances, and with a great deal of mud. The crop came in late, in poor condition and the drying is thereby much delayed, so shipments are only now beginning. The Holland bulb growers generally regard with much satisfaction the

new American specific rates of duty on bulbs. The practices which unprincipled persons are said to have employed to defeat the ad valorem duty will now be done away with and the reduction effected on tulips of the better varieties is expected to result in an increase in demand which will eventually be reflected in better prices in Holland.

The tulips this year appear to be a quite satisfactory crop in all bulb districts, but hyacinths have not come up to expectations. Narcissi are a fine crop and crocus generally is good.

ONION IN CONNECTICUT.

Watson S. Woodruff, who was last year president of the American Seed Trade Association and who is a member of the firm of S. D. Woodruff & Sons, Orange, Conn., has been much interested in the pictures of Ohio and Illinois onion fields for seed recently published in this department of the Review; in fact, he was so deeply interested that he went out to one of his own fields and took a photograph, August 14, just to see how the pictures would compare. He says the result is such that he has for the present at least given up all thought that Connecticut is about to be eclipsed as a seed growing state for onion. And this is with a crop about which he says he does not feel they can brag at all this year.

Mr. Woodruff says he does not wish in the least to disparage the efforts of anyone who may want to try his hand at seed growing, but that really the heads of onion seed must be large and close together to produce a crop that will pay a living profit; when one almost has need of the proverbial fife and drum to call the heads together, there is nothing in the crop to pay for time and bother.

What Old Connecticut Can Show for Onion Seed.
(Photographed August 14, 1909, on the farms of S. D. Woodruff & Sons, Orange, Conn.)

THE FIXITY OF SWEET PEAS.

Regarding the English controversy on the fixity of sweet peas and the Sydenham versus King challenge, referred to in my notes on sweet peas, in the Review of August 12, I am now able to give particulars more fully. The challenge was made by R. Sydenham, of Birmingham, and stipulated that he would give £10 to gardening charities and all expenses of the trial if there were

not more than two rogues in any one variety. If any variety gave more than two rogues, E. W. King & Co. were to pay.

E. W. King & Co. sent to the society's trial grounds twenty seeds of each of the following varieties: Evelyn Hemus, Countess Spencer, Mrs. Henry Bell, Marjorie Willis, White Spencer, Blush Spencer, Paradise Ivory, Princess Victoria, Mrs. Wm. King and Malcolm's Waved Primrose. The first four varieties gave one rogue each, and the remainder came true. The result, consequently, was in King's favor. All the seeds did not germinate. Marjorie Willis gave nineteen plants; White Spencer, eighteen; Princess Victoria, sixteen; Malcolm's Waved Primrose, twelve, and the rest fifteen plants each. BEE.

NEW DISEASE IN SWEET PEAS.

The British sweet pea specialists, or at least some of them, are greatly alarmed at a new disease they call the streak, which is reported as making great havoc and "may do to sweet peas what the hollyhock disease did to hollyhocks." A writer in the Gardeners' Magazine says:

"A few days ago I had a conversation with several of our most successful sweet pea growers, and all assured me that their plants were affected with streak. Further, one grower said that everyone to whom he had spoken on the subject complained of streak. My own plants are badly affected; in some instances there are isolated plants quite free from it, growing nearly five feet high, and bearing flowers, while others near them are stunted, and the flowers they are striving to bear are also stunted, and fall off before they are fully developed.

"The young plants seem to be perfectly free from streak, and to grow well until they attain to a height of about eighteen inches or two feet, and then the

BULBS

WE suppose all florists are more or less interested in Bulbs, especially if American-grown. If you do not grow any, why is it? They are certainly easier to grow than potatoes and decidedly more profitable. Every florist should have a few thousand around the place. The cost is now so small you cannot afford to be without them; the public having taken to them so strongly that if you, Mr. Florist, won't handle them, they will go to the market for them. Moreover, there are thousands who can afford 25c to 50c that cannot afford more expensive flowers; so it will pay you to cater to the masses. If you have not awakened to this fact, you are getting left and missing a good thing; and if you grow your own flowers, the fakers cannot undersell you. To start, buy only the standard varieties that will grow in any soil or section; you cannot go wrong so long as the water doesn't stand on the land. They like good land, well enriched with old cow manure, and pay to keep clean until the tops are dead, when you can plant Asters, etc., on top of them.

Following are best sorts to plant (3 inches deep, 2 to 3 inches apart): Emperor, 5 grades from $2.00 to $10.00, 1000; Grandee, $2.00, $4.00 and $6.00; Poeticus Ornatus, $1.00, $2.00 and $3.00, 1000; Pheasant Eye, $1.00, $1.50 and $2.00; Barri Conspicuus, $1.00, $2.00 and $3.00; Princeps, $1.00, $2.00 and $3.00; Sir Watkin, $3.00 and $5.00. If you want a Tulip that won't deteriorate, buy Gesneriana Major, at $9.00 per 1000; also Darwin Tulips, these are splendid, at $8.00 per 1000.

We will give you credit with references. Send order now. We promise you your money's worth, and you can return them at our expense if not satisfactory.

points of the shoots begin to show unquestionable signs of distress.

"Two years ago, and even last year, one only heard of isolated cases of streak; but this year, so far, the disease seems to be very prevalent indeed, and, judging from my own experience and that of other growers, I firmly believe that it will soon work as much havoc among sweet pea plants in the country as the hollyhock disease did many years ago. One cultivator told me he had, he thought, discovered a remedy; if so, I hope he will make good use of it. So far, I feel skeptical in the matter, and would like to enlist the help of the National Sweet Pea Society, and I would suggest that a conference of expert growers be held at the forthcoming exhibition at Vincent Square to discuss the subject of streak especially. The time seems opportune, and, in view of the rapid progress made by the disease in the past, no delay must occur in attacking the disease itself, else, I am afraid, it will soon dishearten all growers. I believe the disease is caused by a fungous growth, but I have not heard that anyone really knows what streak is, but many are painfully conscious of its dire effects on the plants."

BULB IMPORTS.

The Bermuda bulbs are about all in for the present season. The last boat brought only thirty-two cases, consigned as follows:

GIANT PANSY SEED

The KENILWORTH Strain

is unsurpassed: the immense flowers of 3½ to 4 inches are of perfect form and substance; every tint and shade is produced in striking combination and endless variation of beautiful colors and markings; it is the result of years of selection; it embraces the largest and best of English, French, German and American novelties; 1909 seed greatly improved by rich shades of brown bronze, red and mahogany. New seed: 1000, 25c; 2000, 40c; 6000, $1; ¼ oz., $1.40; ½-oz., $2.50; oz., $5.

RAINBOW is a blend of over 50 of the latest introductions of giant pansies, of the most beautiful, gorgeous colors, blotched, striped, veined, margined, etc. With every $1.00 worth of Kenilworth strain, I will send 1000 of Rainbow free; and with other amounts in like proportion.

Fennel	6	32	Other		8828

In the same period the imports of bulbs, trees and plants were valued at $37,907.

IMPORTS AND EXPORTS.

The government has published the figures of the foreign commerce of the United States for June of this year, compared with last. In the matter of seeds the figures are:

	1908	1909
Imports	$231,810	$572,433
Exports	16,003	51,263

NEW PETUNIAS.

A new race of petunias has been raised by M. Bruant, of Poitiers, France, under the name of carnation petunias. This race is worthy of being taken up for decorative purposes in the open ground and for pot culture, and the present existing varieties will form the beginnings of a compact, dwarf, more or less double flowered strain, says the Horticultural Trade Journal. The following will be put into commerce during the present year, the descriptions being those given by the raiser:

Stella rosa—Growth very dwarf and compact, the small double flowers are of a bright rose carmine with a clear white star.

Albida—Growth less dwarf than the rest of this race, the semi-double flowers are of a rosy pearl white.

Rosine—Growth dwarf and much branched, the plant is covered with small, double, lively pink colored, white-edged flowers.

Carlo—Growth low, leaves small, the pretty flowers are semi-double, and in color dark red.

Mignonette—The leaves of this dwarf variety are acutely pointed, the pretty semi-double flowers granite red as regards the outer petals, and the center red and white petals form a rosette.

Stella—Growth dwarf and prettily com-

SEASONABLE SUGGESTIONS.

[Concluded from page 11.]

Christmas, when you will find them a salable novelty.

Poinsettias.

Poinsettias also are euphorbias, but the name poinsettia is the popular one and likely to remain the one in general acceptance. There is still time to put in cuttings. Even as late as the early part of September they can be rooted and grown into nice, compact little stock for pans. The dwarf pans are the ones which always sell the best, as they carry foliage close to the base and do not need the addition of so many other plants to make them move. Keep the cuttings potted before they have a chance to become hard, and shift the earlier batches into pots or pans before they become pot-bound and stunted. Poinsettias want no shade at any time. It only tends to make them drawn and soft. Water with care; too much or too little means poor foliage and unsalable plants.

Amaryllis.

As the foliage on amaryllis commences to turn yellow, gradually reduce the water supply. For the best results the bulbs are better kept under glass while in pots. A sudden withholding of all water is injurious to these, and, in fact, all other bulbs. A too common practice, once the flowers are cut, is to lay them under the benches, out of the way. How anyone can expect amaryllis to do well with such treatment passes comprehension, for it takes practically the whole summer for them to complete their growth. An excellent way to grow amaryllis, once they have reached the flowering size, is to plunge the pots in a bed of leaves in the greenhouse. A striking contrast will be noted between plunged and unplunged plants.

Young seedlings which have not yet flowered should never be allowed to rest until the blooming stage has been reached. These make fine bulbs and will bloom more quickly if they can be planted in a bench. A good plan with bulbs which are of flowering size, but not as strong as could be desired, is to plant them outdoors for a season, lifting them just before frost arrives. Even in the more northern states there is some attention being given to hippeastrums or amaryllis for late summer blooming outdoors. We lately saw a fine block of these, containing many hundreds of bulbs, and the spikes were, in spite of dry weather, almost equal to indoor grown ones. They had the benefit of a mulch of well decayed manure, but had received no water whatever.

Coleus and Alternantheras.

Rather than lift a number of old coleus and alternanthera plants, which are veritable breeding haunts for mealy bug, we like at this season to put in a few flats of cuttings of each kind. In a close frame or propagating house they will soon root, and with one or two pinchings will make nice stock for carrying over winter and will furnish an abundance of cuttings early in the new year.

The present is also a good time to insert cuttings of any tropical plants used for bedding purposes, of which it is intended to increase the stock. Colored dracænas, crotons, dieffenbachias, acalyphas and similar subjects will root readily now. What they want is to be kept constantly soaked. The sand must never

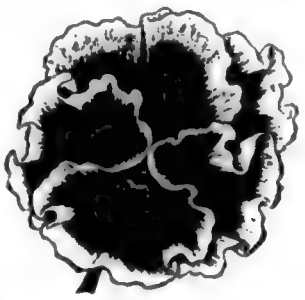
approach dryness, or they may as well be thrown away.

Stevias.

Keep the stevias pinched, and as they have brittle stems, easily broken by rain and wind storms, it will pay to place a stake to each plant to hold the shoots intact. Where stock has been planted outdoors it is better to lift and pot it about the end of August, before the plants become unwieldy in size. Shade for a few days; spray overhead freely and soon they will establish themselves in the pots. Keep outdoors just as late as you can.

THE TRADE PRESS.

Its Value as a Commercial Force.



In the very nature of things the man of affairs, with multitudinous and various cares pressing sorely on his time and attention, necessarily becomes self-centered and preoccupied. So engrossed is he in the proper attention to his own immediate problems that he can find no time—even if he had the inclination—to observe those of his neighbor. Least of all has he the incentive to step out from his own circumscribed world, banish from his mind the narrow things, level self and individuality, merge them all in a common and impartial landscape and then calmly and fairly study the situation.

Such a man as this—and variations from type are only in degree—is the man for whom the trade press stands as an invaluable ally. While he digs and delves in his own tasks, the trade press is his reliance for more basic information than he imagines. The ordinary press gives him the product of its daily observations

in the doings and misdoings of the big round world of politics and society, but what it brings is only a diversion; a stepping aside from his grind. It may refresh him, but it does not aid him in his money-making slavery.

A Confidential Messenger.

But the trade press has an entirely different function in his life. While he toils in his office or warehouse the trade press is performing for him the task of confidential messenger to the rest of the commercial world. Its human machinery is finely tempered and carefully adjusted. Its men are trained, not merely in the collection of interesting facts of ordinary happening, but in the observation of those events and developments which have a direct bearing on the commercial side of life. They have learned just what information the busy business man needs to supplement his work of application. The events which transpire in the lives of other merchants are gathered together and presented to him in the most concise and digestible form; the changeable values of commodities, not only in one shop, but throughout a large field, are carefully noted and calculated in such a way that he may judge them at a glance. The doings of legislatures throughout the country, all having a direct bearing on the busy merchant's business operations, are reported, with discriminating accuracy, selection and brevity. The doings of foreign states, from whose ports he draws much of his stock, are carefully reported by the coöperated effort of hundreds of trained watchers and correspondents. The incidents which pass in front of his very eyes, but which escape more than cursory attention in the rush of his daily cares, are fitted into their place with other events which he has not seen, and from them are deduced the delicate course of trade evolution.

A Guide in Great Crises.

The trade press is his organ of communication outward as well as inward. Circulating, as it does, among his fellow tradesmen, both in a local field and throughout the country, he has but to say the word and his message is disseminated among the very men most interested in his ideas. If trade conventions furnish him a medium for the exchange of ideas —a clearing house of trade information and advice—the trade press is one perpetual convention; a clearing house open to him and all his fellows all the year. No man who has ever watched the development of any great trade movement can deny that, without an intelligent, trustworthy trade press, it would have been impossible. In times of commercial unrest the trade press is invaluable and indispensable.

A Wise and Judicious Friend.

The trade press ought to be regarded not only as a servant and "watchman on the mountain top;" it can attain its greatest usefulness only when it is accepted as the confidant and best friend of the trade. It has been truthfully said that "a little information is a dangerous thing." The trade press relies for its material on the confidential information given by its clients quite as much as on its own independent observations. A trade press, kept well and reliably informed, is far better able to serve the trade than one which has the benefit of only half a

truth. If the trade press knows anything, it is how to carry the truth and use it discriminatingly. Laymen have no conception of the vast store of valuable, sometimes dangerous, secrets which lie carefully treasured away in the minds and memories of trade press factors. Only by the full command of illuminating sidelights can the truth be properly judged. The merchant who cultivates the trade press trustfully, honestly, confidingly and in fullest friendship never has cause to regret it.

Must Be Fair and Independent.

The trade press must be independent. Anything else would make it useless and unreliable. There are men who seek to hide their doings behind the cloak of secrecy; who want only one side of a case turned to the public — the side which pleases their ends and interests. No loyal trade press can lend its sympathies or silence or disregard to any such practice. Buyer and seller are alike entitled to the open truth, however unpleasant for the one or the other it may be. It might seem profitable to a man with an end in view to be able to command the attitude of the trade press for a time, but it would be at the cost of a total loss of his confidence in its statements for all future time. The trade press which is upright once may be safely trusted to be upright always, and vice versa. The reputation and character of the trade press are alike the proud asset of the publisher and the reader. When a trade press loses its independence and spirit of fairness it has undermined its very life and its days are numbered.

And so the student might sketch, to the extent of columns, the duty and power of the trade press in the trade of today.—Journal of Commerce.

POUGHKEEPSIE, N. Y.—Geo. A. Relyea spent the month of July in camp in the mountains and is running out for the week ends during August.

NURSERY NEWS.

AMERICAN ASSOCIATION OF NURSERYMEN.
Officers for 1909-10: Pres., F. H. Stannard, Ottawa, Kan.; Vice-Pres., W. P. Stark, Louisiana, Mo.; Sec'y., Geo. C. Seager, Rochester, N. Y.; Treas., C. L. Yates, Rochester, N. Y. Thirty-fifth annual meeting, Denver, June, 1910.

THE Kentucky Nursery Co., of Louisville, Ky., is increasing its capital stock from $30,000 to $40,000.

AUBREY FRINK, formerly of Macclenny, Fla., has become manager of the Tennessee Wholesale Nurseries, at Winchester.

THE Wooster Nursery Co., Wooster, O., has leased the building now occupied by the Wooster Brush Works, and will occupy it in a short time.

HENRY FIELD has about decided that he will not undertake to wholesale the recently purchased H. A. Terry peonies, believing he has a retail outlet for them at much better prices.

WHOLESALE nurserymen are counting that the approaching autumn will give them the best fall season ever experienced, while everyone is looking for a record-breaker in the spring of 1910.

FROM Lafayette, Colo., comes word that Peter Schroeder and A. M. Schroeder no longer have official connection with the Schroeder-Son Nursery Co. They expect to open an office in Denver in a few weeks.

QUITE a few eastern nurserymen and florists have visited the Alaska-Yukon-Pacific Exposition at Seattle this summer, and all speak highly of the landscape plan and the horticultural features it embraced.

WILLIAM A. PETERSON, proprietor of Peterson Nursery, Chicago, states that on the whole the season has been a favorable one for peonies, good growth having been made. The digging and shipping of peony roots will begin next week.

THE Southern Nurserymen's Association was in session at Huntsville, Ala., last week. H. B. Chase was the presiding officer. Besides the usual program of talks on business topics, the principal events were visits to the big nurseries of the neighborhood.

AUGUSTINE & Co., of Normal, Ill., say that they expect an unusually large demand for their nursery stock this year. It is probable, they think, that growers and shippers will do a heavier business than for several years. There is a great demand for fruit trees, and the stock in many localities is scarce.

A NEW concern has been started at New Haven, Conn., to be known as the New Haven Nurseries. Besides growing and selling hardy nursery stock, it will do general and landscape gardening. Alfred T. Ostermann is president and Louis A. Soldan is manager and treasurer. The latter was formerly with the Elm City Nursery.

THE appointment of W. P. Stark, Louisiana, Mo., as chairman of the transportation committee of the American Association of Nurserymen, was a wise move on the part of President Stannard. The Stark concern has probably a more elaborately organized and thoroughly equipped traffic department than any other nursery in the United States.

STOCK FOR FLORISTS

F. A. BALLER says the only trouble with the peony business is that the plants multiply too rapidly.

THE eastern nurseries all deplore the drought. It has been almost without precedent, and it has retarded growth.

PEONY MONS. DUPONT.

Frank H. Wild Floral Co., Sarcoxie, Mo., considers Mons. Dupont one of the

Peony Mons. Dupont.

best white varieties in its large collection of peonies. It is one of the French sorts, originating with Calot and introduced in 1872. It is a midseason bloomer, with large, ivory white flowers on long, strong stems, and many peony authorities indorse Mr. Wild's statement that it is an extra good sort for florists' use for cut flowers.

WORMS ON SHADE TREES.

I am sending you a specimen of a worm which is giving us a lot of trouble. The worm in this part of Missouri works mostly on box elder, soft maple and different kinds of evergreens. I should like to know the name of the worm, where it originates and what is the best way to get rid of it. It seems to stay in its shell and keep eating. Sometimes it will hang down from the tree by a web and then draw itself up again. When there are many on a tree they completely strip it. S. C. C.

I could not tell from the dried specimen received what the pest troubling your tree is. There are four stages in the life history of all these pests: First, the eggs, usually deposited on the foliage or bark of trees; second, the worms or caterpillars, which do the real damage; third, the chrysalis or pupa, in which stage the majority of them pass the winter, and lastly the moth, butterfly or beetle stage. In some cases the worms are hatched in late summer and pass the winter in nests on the trees. We have one case of this in Massachusetts in the destructive brown tail moth.

The most effective remedy for caterpillars on trees is spraying the foliage as soon as it is unfolded. The attacks usually commence with the expanding of the leaves, and to save trees from being stripped the trees must be sprayed with a poisonous substance, taking special care to cover the under surface of the leaves. In this state, Massachusetts, the poison

most widely used is arsenate of lead, at the rate of eight to ten pounds to 100 gallons of water. It is adhesive and rain does not wash it off, as it does other poisons. Any tree properly sprayed with this should be clean the whole season.

Do not use this poison on fruits or vegetables which are soon to be eaten, as it is difficult to wash off. In this state big tracts of woodland, shrubberies and many thousands of shade trees of large size are annually sprayed, hundreds of tons of arsenate of lead being used. Hand pumps, which will cover trees seventy-five feet high with a little climbing, are comparatively inexpensive. Of course, a fine spray nozzle should always be used.

If you try this remedy early next season, I think you will find it will keep your trees clean. There are now so many pests attacking trees that spraying is becoming more and more a necessity.

W. N. Craig.

BLACK-ROT OF GRAPES.

In the eastern half of the United States black-rot has proven a serious drawback to grape culture. Humidity is favorable to this disease. More than twenty years ago spraying was introduced as a means of combating this and other fungous diseases of vines and fruit trees, and Bordeaux mixture has been the standard fungicide from the first.

As, during recent years, a good deal of discouragement among commercial grape growers has resulted from the spread of black-rot and their failure to control it satisfactorily, the United States Department of Agriculture about three years ago began a series of experiments to demonstrate the best methods of combating this disease. These experiments have been conducted in Pennsylvania, New Jersey, New York and Michigan, and have extended over three seasons.

Several different fungicides were tried, but none was found to be as satisfactory as Bordeaux mixture. It was demonstrated, however, that four pounds of bluestone, three pounds of lime, and fifty gallons of water gives fully as good results as stronger mixtures. It was found to be unwise to use more lime than is absolutely necessary, as, when used to excess, it tends to hinder the action of the copper sulphate. It was also found that five sprayings will usually produce as good results as a greater number.

Paducah, Ky.—C. L. Brunson, of this city, has been appointed assistant superintendent of the department of flowers and plants for the state fair, to be held in Louisville, September 13 to 18.

Vegetable Forcing.

PLANNING A VEGETABLE HOUSE.

We contemplate building a house 15x 60, with sides four feet high, for the growing of radishes and lettuce. We should like to know whether the sides should be part glass, and if so, how much. We intend growing the vegetables in beds on the ground. R. H. L. & B.

Yes, a house with solid beds should have glass below the gutters, by all means, and the more the better. Even if raised benches are used, a row of glass below the gutters is a great advantage.

An 18-foot house is much better than a 15-foot one, on account of the arrangement of aisles and beds or benches. Fifteen feet is too wide for a two-bench house and not wide enough for three benches and two aisles. An 18-foot house with a center bench seven feet wide and 2-foot aisles on each side of it, and a 3½-foot bench along each wall, makes a nice arrangement for a small house. No supports are needed under the ridge, but a purlin should be run above the edge of the side benches, so that the ¾-inch pipe post supports stand along the edge of the aisle. They can be set along either side of the aisle; it does not matter just where the purlin is run, except that it cannot run along halfway between the gutter and ridge, as that would bring the posts in the center of the aisles.

I would advise making the walls five feet high, instead of four feet. As to the amount of glass, I would suggest that you put one row of 16x18 glass below the eaves for raised benches or two rows (butted) for solid beds. Raised benches will grow the crops in a much shorter time in winter than solid beds. H. G.

MUSHROOMS WITH CUCUMBERS.

Will you kindly tell me how to grow mushrooms in a cucumber house under the benches? P.

You can grow mushrooms under the benches used for cucumbers, provided you can protect the bed from drip from waterings afforded the benches and, by means of boards or thick cloth coverings, incase the beds so as to exclude all possible air and light, neither of which mushrooms like.

Presuming that you know how to prepare the manure for the mushroom beds, you should spread it in layers and pound thoroughly until nine inches thick. The mixture we prefer is two-thirds horse manure, with the rougher straw shaken out, and one-third loam passed through a coarse screen. This should be turned over daily, to allow the rank heat to subside. After the bed is made the temperature will probably run up to 100 or 110 degrees. Use a bottom heat thermometer in your bed, and spawn when the heat has declined to 90 degrees.

Break the spawn in pieces the size of a walnut. Make holes two inches deep and nine inches apart each way. Do not firm the manure over the spawn for a few days. Give the bed a covering of two inches of loam about ten days after spawning. When the mycelium has begun to run, firm this well. Give the beds a covering of straw or hay and enclose them so that as little water, air and light as possible will reach them. Mushrooms will appear in eighteen days sometimes, and again will not show for almost as many weeks; usually they will come in six weeks. The straw covering can be removed when they appear. Be sure no heating pipes are near the beds, as they will cause the surface to dry up so that no mushrooms will appear. A night temperature of 60 degrees is about right, but 5 degrees lower or higher will grow good mushrooms. C. W.

RAWSON'S HOTHOUSE CUCUMBER
As a forcing Cucumber is one of the largest and most profitable crops of the Market Gardener, it is essential that the very best possible strain should be sown. With this idea in view we have made selections for the past few years from our Rawson's White Spine, which have resulted in a strain about two inches longer and a darker green in color, with a few light spines showing at blossom end. **This new strain** we confidently believe to be **superior** to any other on the market. The results we have had at our own greenhouses with the stock conclusively prove the above to be true. ½ oz., 35c; oz., 60c; 4 oz., $1.75; lb., $6.00.

PACIFIC COAST.

SEATTLE.

The Market.

Considerable comment has been caused by the early appearance of all fall flowers. Asters, dahlias and, yes, count mums, too, for all are away ahead of the season. The mums, a yellow variety, made their appearance even before asters and dahlias, and one man is now cutting a few of them every day. However, there is not much of a call for these early flowers in any of the varieties, as fancy Brunner roses, with stems ranging from four to five feet, and carnations, which are still of fair quality, are the chief sellers, with fancy peas a close second.

Indications point to a scarcity in the fall flowers this season, and everyone is expecting high wholesale prices and a scarcity of fancy stock, at least. Gypsophila is making itself popular again this season, and great quantities of it may be seen in all the retail stores. It is really a profitable investment, for while not much is sold outright, like the stevia, a small quantity will make an ordinary vase a fluffy creation. What snapdragon is available on this market is certainly fancy, and finds a ready sale. Fine flowers in both red and yellow varieties were seen in several windows this week, and really made an artistic effect when used in combination with the commoner roses and carnations.

Quite a flurry was caused among the florists in securing 30,000 cactus dahlias, the official exposition flower, for Idaho day, as they were certainly given away in abundance, and everywhere huge bunches of them were to be had for the asking.

The florists have been quite fortunate in landing several large orders for decorations this week, and thus moving quite a quantity of surplus stock. Several entertainments and engagement announcements have also done their part in helping us out, and, even better, we look forward to several larger decoration orders in the near future.

Various Notes.

Arthur Zirkman, representing Rice & Co., called here this week.

The McCoy Co. seems well satisfied with its deal whereby it annexed the houses of the Washington Floral Co., and sees bright future prospects along this line.

Mr. and Mrs. C. T. Kipp, of the Spo-

BURBANK'S Spineless Cactus

Mention The Review when you write.

kane Florist Co., called here last week on their return journey to Spokane, after an extensive trip to the coast. Mr. Kipp is remodeling his entire store, and no doubt will have the finest store in Spokane next fall.

Gus Bjorkman reports fine success with his mums, and looks forward to a splendid cutting.

Mr. Landfield, connected with Sam Graff Co., anxiously awaited his wife's coming last week. Mrs. Landfield has been in Chicago for some time.

The Seattle Carnation Co. has added several thousand Bassett carnations to their stock, and say they are doing fine. Mgr. Hopkins certainly deserves success.

Sam Graff, of Graff's Flower Shop, made a flying trip to Spokane. He reports Spokane as being busy as ever. Mr. Pritchard, of the same firm, is contemplating a pleasure trip to Portland.

I. G. C.

SAN FRANCISCO.

The Market.

There has been a slight improvement in business even during the last week, and the chances seem to be favorable for a fair fall trade. Carnation growers are now in the midst of changing their houses, and although this makes a shortage of this popular flower, there is such an avalanche of asters at this time that it is not noticed. Asters, by the way, are the most popular flower at present. The prices have not been high, but they are well used up and the growers are satisfied.

Outside gladioli are again popular. Some late flowered varieties are wholesaling at from $5 to $6 per hundred and move freely. Dahlias, which gave promise early in the season of being one of the favored fall flowers, have not sold as well as was expected. Barring the small, white sorts that are used in funeral work, there is but little demand for them, although the displays have been better than ever this season.

Roses, while not plentiful, are in almost sufficient supply to fill all requirements, with the possible exception of long-stemmed Beauties.

All the Japanese lilies have proven to be good sellers this season. They find great favor both in funeral orders and for other purposes. There has been a good demand for L. auratum, but only a few growers have had them in sufficient quantity to make any showing.

Other kinds of hardy stock, with the exception of sweet peas, move well, and the trouble with the peas is that they are becoming so short-stemmed as to be unfit for almost anything except funeral work. Amaryllis are in evidence by the thousands, but the early flowered varieties have not proven to be good sellers and the street hucksters are getting the benefit of them.

Reports from the chrysanthemum growers say the coming crop will be the largest in the history of the local trade.

Various Notes.

Samuel Lundy is no longer connected with the Thorsted Floral Co., of Oakland and San Francisco.

Over 200 prizes are offered by the Pacific Coast Horticultural Society at the coming flower show, which will be held in conjunction with the California State Floral Society, at the Fairmont hotel, October 14 to 16. H. Plath is manager of the exhibition, Daniel MacRorie is assistant manager, and Charles Abraham is a member of the committee on arrangements.

The carpet bedding, the figures of which are in commemoration of the Portola festival, is causing much enthusiasm among the crowds who daily visit Golden Gate park.

F. Ludemann has returned from a month's trip to the country, much improved in health.

A. C. Baird will spend a month in the southern portion of the state before he resumes his duties in town.

The extensive improvements in the store of the Piedmont Floral & Seed Co., of Oakland, have been completed and this firm now has one of the nicest store fronts in town.

G.

Creditors of John R. Sievers have filed a petition praying that he be adjudicated bankrupt. The petitioning creditors are Schwerin Bros., $480.05; St. Regis Basket Co., $81.25; Joseph Leib, Jr., $45.

SPOKANE, WASH.

The Irrigation Congress.

Little drops of water
On little grains of sand,
With a little sunshine,
Grow to beat the band.

What they grow in the great state of Washington was shown to the great National Irrigation Congress, which closed its sessions Saturday, August 14. Spokane gave the delegates to the congress a warm reception, as she is wont to do with her many visitors, and, according to all reliable reports, the delegates, with ex-Governor Pardee's help, kept it warm at the Armory, where the deliberations were held.

Socially speaking, the time was fully occupied. Monday evening a reception was given to the distinguished guests at the Masonic Temple, for which all the florists furnished palms and flowers. Numerous private entertainments kept the Spokane people busy at home, while a series of small banquets kept the Hall of the Doges, at Davenport's, in a gala state all the week. Summer flowers

Bay Trees Bay Trees

2000 just to hand JULIUS ROEHRS CO. Rutherford, N. J.

Mention The Review when you write.

were used entirely in the decorations. Sweet peas are holding their own and will for weeks yet. This climate is superb for them. Quantities of fine specimens may be seen at any time in all the stores.

Many pretty exhibits of fruit, vegetables and grain were shown in the store windows about town. The city was elaborately decorated with flags and bunting, and, electrically speaking, was done to a finish. Surrounding sections of the state sent exhibits, which were shown in the street parades. Walla Walla had a vacant corner on Riverside and Monroe, laid out in a miniature irrigated orchard. At one side was a great geyser driven by an invisible dynamo. From the basin of the geyser a flume connected with the irrigation ditches supplied the water. Various kinds of ditches were shown between the rows of trees, demonstrating how the water is used on a level or slope, and other intricacies of the science.

A street parade was given on Tuesday afternoon, August 10, and repeated on Wednesday evening, showing a number of fine floats which illustrated historical events from the time of Indian possession to the present day. Indians in war dress, mounted, took the lead, followed by a float decorated in tepee style; next a canoe afloat, with Indian rowers. Then civilization appeared, reproducing the Lewis and Clark discovery, while the immigrants, cowboys, miners and lumbermen were each creditably represented. A pioneer cottage developed to a bungalow as the float passed on, and soon a carriage decorated with artificial morning glories appeared. Decorated autos formed the rear guard.

First prize was given to a fine, large car decorated with artificial wistarias and natural lavender and white peas. The car proper was solid in wistarias; the spokes also were decorated with these, and wreaths adorned the lamps. Six girls occupied the car. They carried lavender and white silk Japanese umbrellas, at the ends of whose ribs were showers of gauze ribbon and sweet peas. Violet electric lights marked the outlines of the umbrellas.

Second prize was given to a dark olive green car, decorated solid with Bruant geraniums and Shasta daisies. The canopy was covered with gypsophilas and greens, with clusters of geraniums.

Other well decorated cars were: One in white peas and cedar boughs, with the words "National Irrigation Congress" done in yellow immortelles; and one in Golden Glow and cedar boughs, with a miner's pick and shovel done in white peas; yellow ribbon completed the decoration.

Various Notes.

The best things seen this week in the stores and windows are roseum lilies at the Spokane Florist Co.'s, valley of extra quality at Miss Armstrong's, and scarlet and America gladioli at Hoyt's. Asters have no well established quality yet.

Mr. Kipp reports business good with the Spokane Florist Co. He and his force are busy with extensive repairs, the details of which are promised for a later letter. This firm has quite an elaborate church wedding decoration, to be composed mostly of gladioli and roseum and album lilies.

Paul Jandl, of the Spokane Florist Co., leaves this week for St. Louis, to be married.

Mrs. Alice M. Cope, who has been with Miss Armstrong for the last six years, is to be married early in September to John Gill, of the Hazelwood Creamery Co., of this city. The wedding will be quite a pretty one and will be at the residence of Dr. Hilscher, on Pacific avenue.

H. U. Horne, of Red Wing, Minn., was a caller last week. S.

Montpelier, Ind.—E. E. Stinson is building a large addition to his greenhouses, in the south part of the city.

LEXINGTON, KY.

The Market.

Business continues extremely quiet and a good many flowers remain unsold. Asters are arriving in larger quantities, but the most of them are small flowers with short stems. Tuberose stalks are in good supply, but they have slow sales at present. Green goods are in good supply and demand.

Various Notes.

Lucien Le Clere, formerly manager of the South Broadway Greenhouses, has left the city, to locate in the west.

John Ballow, of Frankfort, Ky., has returned from a trip to Ohio and Indiana.

The florists here were all well pleased with what they saw at the convention.

Mrs. Ida Coates, who for twenty-five years has been connected with the store of W. S. Bell, the Main street florist, and who is widely known in Lexington, has accepted the position of manager of the store of the Atlanta Floral Co., at Atlanta, Ga., and will go to that city to enter upon her duties September 1. Mrs. Coates knows the cut flower business thoroughly, is always obliging and has a gracious manner that has won hundreds of friends for the establishment with which she has so long been connected. Her many friends here, while regretting her departure, wish her success in her new field.

Blue Grass.

APPEAL TO KENTUCKY FLORISTS

The Kentucky State Fair management has expended $250,000 in fitting up one of the most elaborate fair grounds in the country. The fair will be held September 13 to 18, at Louisville. In order to make our industry a credit to our profession and to advance the interest in floriculture in our state, it is desired that all florists of the state who can in any way make a display of either cut flowers or plants shall do so, and compete for the prizes offered. In case you cannot do this, or attend in person, if you will send any cut flowers for Thursday, September 16, as an advertisement, our decorator, Mr. Wright, will be in daily attendance and will properly stage your display, with any card for advertisement you may furnish, providing you notify the undersigned by September 10.

C. L. Brunson, Paducah, Ky.
Asst. Supt. Flowers and Plants,
Dept. M, Kentucky State Fair.

East Defiance, O.—Work has been started on a modern greenhouse for Carl Scharfenberger, corner of East Second and Summit streets, to take the place of the present greenhouse building.

PANDANUS UTILIS

4-inch pots.....$25.00 pe 100

DRACAENA FRAGRANS

5-inch pots.....35c and 50c each

DRACAENA MASSANGEANA

This handsome plant is the best of all Dracaenas for houses.

6-inch pots.....$18.00 and $24 00 per doz.
8-inch pots .....$2.50 and $3 00 each
9-inch pots..... 4.00 and 5.00 each

DRACAENA TERMINALIS

We will have a fine stock of the above variety, well colored plants, for delivery December 1st.

4-inch pots .....$25.00 per 100
5-inch pots.....$6.00 and $9.00 per doz.
6-inch pots ..... 9.00 per doz.

Let us have your order early.

ARECA LUTESCENS

Our plants are in splendid condition.

5-inch pots.....Delivered Nov. 1, $6.00 and $7.50 per doz.
5-inch pots.....3 plants, 24 26 in. high. $9.00 per doz. Ready now.
6-inch pots 3 plants, 28-30 in. high. $12 and $15 per doz. Ready now.
7-inch pots....3 plants. heavy, 30 in high. $18 per doz. Ready now.
7-inch pots, 3 plants. very heavy, 36 in. high, $24 per doz. Ready now.

KENTIA FORSTERIANA

7-inch pots.....6 and 7 leaves, 36-40 inches tall, $2.00 each

PANDANUS PACIFICA

6-inch pots.....$1.00 each
7-inch pots..... 1.50 each

PHOENIX ROEBELENII

4½-inch pots .....$7.50 per doz.

This is a most satisfactory plant.

BEGONIA GLOIRE DE LORRAINE

We have the largest and finest stock of this grand Christmas plant in America.

2½-inch pots.....$15 00 per 100; $140.00 per 1000
4-inch pots..... 30.00 per 100; 250.00 per 1000
5-inch pots..... $50.00 per 100
6-inch pots..... $7 50 and $9 00 per doz.

We also have a large stock of the Light Lonsdale Sport at same prices This variety we consider far superior to the original type, it making a finer shaped plant as well as holding the flowers much better, while the color is a little lighter than that of the original Lorraine.

OTAHEITE ORANGES

Our stock is unusually fine this year. We can supply plants with from 4 to 25 fruit. When shipped prior to Oct. 1st, 15 cents per fruit in green state; when fully ripened 25 cents per fruit—for Christmas.

CYCLAMEN

Our stock at this time is better than we have ever had it and sure to be a money maker for anyone buying now. The prices at Christmas will be just double those quoted below.

2¼-inch pots.....$6 00 per 100; $50.00 per 1000
4-inch pots.....$25.00 per 100
5-inch pots..... 50.00 per 100
6-inch pots..... 75.00 per 100

GARDENIA VEITCHII

4-inch pots, strong.....$20.00 per 100

BOUGAINVILLEA SANDERIANA

INDIANAPOLIS.

The Market.

Business for the last week has been more than satisfactory. A number of large funerals early in the week cleaned up all the flowers in sight. The auto races at the Indianapolis motor speedway did their part to keep the florists busy. Seven deaths and a number of injuries were a result of the races. These fatalities, however, did not call for a great many flowers, but there were a number of large decorations at the speedway and numerous parties and banquets kept the florists busy. There are some good asters to be seen, but not enough to go around. Gladioli, roses, short-stemmed carnations and lilies are plentiful. A few Golden Glow chrysanthemums are coming in.

Various Notes.

Most of the Indianapolis florists have returned from the convention and all pronounce it "the best ever."

The Pahud Floral Co. is sending in some fine lilies.

Walter Bertermann has gone for a two weeks' trip in the east.

Alfred Pahud met with a serious accident on his return to Indianapolis from the convention. In getting off a street car he lost his balance and fell backward, alighting on his head. It is impossible to tell at this time how serious his injury is, but it is hoped he will be all right in a few days.

E. A. Nelson is fishing at his camp on Eagle creek.

Hans Kipke was in Chicago this week.

L. F. Benson made a flying trip to Cincinnati this week. H. L. W.

R. VINCENT, JR., & SONS CO., WHITE MARSH, MD.

Current Comment.

A visit to the south end group of greenhouses reveals various enlargements and improvements which will be completed before the advent of cold weather.

Ground has just been broken for the erection of a cold-storage warehouse by The American Rose & Plant Co. This will be 20x100, constructed in the usual manner with two thicknesses of wood, and will be used for the storage of dormant shrubbery and similar lines. An office building will also be erected by this company.

The Highland Floral Co., Kriegbaum & Campbell, is just completing an additional rose house 30x110 feet.

The houses on Center boulevard, in which Gustav Schneider began as a local retail florist, have been dismantled and removed to his five-acre tract, on Johnson avenue, where they are being reerected. In addition, three new houses, each 24x150, have been built upon substantial cement walls. Mums and carnations are being grown, together with a miscellaneous line, embracing practically everything floral, in demand by the local trade. In addition to his store at 15 South Fountain avenue, Mr. Schneider maintains a regular stand in the City market. Although an experienced mail order catalogue man, having for years been superintendent for The Springfield Floral Co., Mr. Schneider is now enthusiastic as a hustler for local trade and a tireless worker. Ge Dale.

CHASSELL, MICH.

Early in the morning of July 29 the property of the Lakeside Floral Co. was badly damaged by a hail storm. Besides breaking about 20,000 square feet of glass, the storm destroyed a great deal of stock, both in the houses and in the fields. The total loss, according to the estimate of A. W. York, the superintendent, was about $4,000. Several acres of field carnations and other outdoor plants were ruined. The firm, however, took immediate steps for duplicating the lost stock and repairing the damage to the houses.

Though the storm continued for only ten minutes, the damage was said to be the greatest in the history of the Copper Country. The storm cut a swath about five miles wide across the peninsula, beating down crops, denuding fruit trees and smashing windows.

Vancouver, B. C.—Swires & Fatkin, formerly of the West End Nursery, on Georgia street, are now proprietors of the Hazlewood Nursery, at 2976 Westminster road.

Tariff Now Settled

Prosperity is Everywhere and is Now Knocking at Your Door. Why Not Get Your Share of It?

Look! This speaks for itself—one order of 500 Araucarias, 50 at $2.00, 50 at $1.00, 200 at 75c, 200 at 50c, has just been shipped to a large New England concern.

This is our 25th anniversary. For 25 years we have been importing, growing and shipping that so well-known decorative plant the **Araucaria Excelsa, Excelsa Glauca** and **Robusta Compacta,** of which we are specialists. Convince yourself of the immensity and quality of our stock by coming to the spot—to our greenhouses—and see it growing. It will do you good.

Four Houses Filled with the Best. With What? Sure, with ARAUCARIAS, Our Specialty

We are one of the largest importers of these well-known and beautiful evergreen decorative plants, the **Araucaria Robusta Compacta, Excelsa Glauca and Excelsa.**

Araucaria Robusta Compacta, 6-in. pots, 3-yr.-old, 3 tiers, $1.25, $1.50 and $1.75.

Araucaria Excelsa Glauca, 6-in. pots, 3 to 4-yr.-old, 12 to 20 inches high, $1.00, $1.25 and $1.50.

Araucaria Excelsa, 1909 importation, in sizes as herewith stated: 5, 5½ to 6-in. pots, 3, 4, 5, 6 tiers, 12, 14, 16, 18, 20 to 25-in. high, 35c, 40c, 50c, 60c, 75c, $1.00 to $1.25.

Sago Palm, or Cycas Revoluta, 5½, 6, 7 and 8-in. pots, from 5 to 20 leaves to a plant, 10c per leaf.

Kentia Belmoreana, 4-in., 25c to 35c; 6 to 7-in., 6 good leaves, 75c, $1.00, $1.25 to $1.50.

Kentia Forsteriana, 8-in. pots, made up, 1 large, 4 ft. high in center, with 3 small around, price $3.00 to $4.00; single plants, 6 to 7-in. pots, 25, 30, 35, 40 to 48 in. high, 75c to $1.00, $1.25 to $1.50, $2.00 to $2.50 each.

Areca Lutescens, 4-in., made up of 3 plants, 25c.

Cocos Weddelliana, 3½-in., 18 to 20 in. high, 20c to 25c; 3-in., 15 in. high, 18c.

Ferns. Nephrolepis Whitmani, Todeaoides and Boston, 5, 5½ and 6-in. pots, 35c, 40c, 50c. Whitmani, large, 4-in. pots, fit for 6-in., 25c.

Rice The Florist, Sapulpa, Okla.

Rubber plants. Write for price list.
Geo. A. Kuhl, Pekin, Ill.

SEEDS.

COBURN'S SELECTED PANSY SEED.
BEST MARKET STRAIN GROWN.

Our seed is saved from about 12,000 plants, carefully selected, when in bloom, from the 500,000 we grow for our spring sales.

Each plant is carefully selected, color, size, form and substance being taken into consideration, and the proportion of each color is properly balanced.

As a result of over 25 years' work along these lines, we feel justified in claiming to have the best strain of pansies on the market, and we invite trial and comparison.

Growing our stock in this manner, we have only a limited amount of seed to spare, and in order to distribute as widely as possible, we offer it in packets of 1,000 seeds. Price $1.00 per packet (only one to each customer).
I. E. COBURN, 291 Ferry St., Everett, Mass.

BUCKBEE'S "FULL OF LIFE" PANSY SEED.

New crop now ready, our MAMMOTH SUNRISE STRAIN unsurpassed for size, perfect form, rich colors and beautiful markings; the very finest gilt-edged stock for particular growers who want the best. 1000 seeds, 75c; ½ oz., $3.00; oz., $5.00. Giant Mme. Perret, rich wine and red shades, 1000 seeds, 50c; ½ oz., $1.75; oz., $3.00. Giant White, improved strain, 1000 seeds, 40c; ½ oz., $1.25; oz., $2.00. Improved Giant Yellow, dark center, 1000 seeds, 30c; ½ oz., $1.15; oz., $1.90. Improved Giant Black Prince, 1000 seeds, 35c; ½ oz., $1.20; oz., $2.00. Prompt shipment. Cash with order.
H. W. BUCKBEE.
Rockford Seed Farms, Rockford, Ill.

It is an absolute certainty and conceded by leading European growers, who have seen our pansies and theirs growing side by side in our gardens, that pansies grown from American seed will produce larger, earlier, finer blooms than foreign-grown seed of the same strain. We supply over 100 cities and towns in the west with blooming plants at a higher average price than any grower on the western continent. We sow and sell from the same bag. 1800 seeds, $1.00. Choice plants, same strain, $4.00 1000; 50c 100. Write for "Points on Pansies."
Steele's Giant Pansy Gardens, Portland, Ore.

Greenhouse Heating.

GREENHOUSE owners everywhere are invited to submit their heating troubles to the REVIEW. Give all the details and we will give an expert's opinion free of cost to you.

JOINTS IN CAST-IRON PIPE.

Will you kindly give directions for making a cement joint with red lead and oakum, or any other good cement joint for cast-iron pipe? S. W.

A good paste for calking cast-iron joints with oakum is made by using equal parts of red and white lead mixed with boiled oil. Make the paste thick, thoroughly saturate the oakum and drive it in tight. Let it set well before putting on the water.

A CARNATION HOUSE.

Please inform me how to pipe a house 25x80 for carnations. The house runs east and west, is five feet to the eaves and twelve feet to the ridge, with two feet of glass on the sides. The east end also is glass, the west end being protected by a shed. There will be five benches the length of the house. We want to use 1½-inch pipe for the returns under the benches. The boiler-pit is four feet below the surface at the west end. The expansion tank is fifteen feet above the boiler. The location is Western Pennsylvania. L. & B.

The house in question should be well provided for by using one 3-inch flow

and eighteen 1½-inch returns, or two 2½-inch flows and the same number of returns. The piping can be arranged so as to place five lines of pipes under the bench on the most exposed side; four under the other outside bench, and three lines under each of the three interior benches.

OLD BOILER TUBES.

Please give me information as to how many 4-inch pipes we need to heat a house 26x118 in northern Illinois climate. We want to heat to 60 degrees at 10 degrees below zero. How should it be arranged? The house contains two 4-foot benches and two 6-foot benches. The house runs north and south and the boiler-shed will be at the north end.

H. & H.

Heating experts do not recommend the use of 4-inch pipe in houses over 100

feet in length, unless the boiler shed is at the middle of the house, so the runs of pipe will be less than 100 feet long, but the following will supply the necessary radiation with a boiler temperature of 180 degrees and normal circulation. Under these conditions eight 4-inch pipes the length of the house should supply the desired temperature. Arrange to use two of the pipes as flows and six as returns.

EVANSVILLE, IND.

The Market.

Trade was fairly good last week and seems to be improving steadily. The weather has been warm and dry. Asters are a failure in this section, owing to the lack of rain. Roses are improving, as are the carnations.

Various Notes.

Louis Fritsch has a fine new delivery wagon. He began business last year and did well. This year he expects to do considerably better. He has three houses 20x60 feet.

The Wm. Blackman Floral Co. is cutting thousands of carnations from the field.

Ben Kramer has had a nice trade right along. E. L. F.

MORRISON, ILL.—A representative of R. R. Davis & Co. was recently in Chicago, where he sold a carload of ferns. The ferns are being sold in order to make room for the planting of cucumbers.

Boilers in Battery Save Fuel and Labor

With a Battery you don't have to fire the whole plant to get a little heat, as you do with one big boiler. With the boilers in battery you can fire as many on the system as you need, and you get just as much heat as you want—no more. A mighty big saving of fuel and labor. The Hitchings boilers are particularly adapted for this kind of heating.

The Battery shown is heating the range of Righter & Barton, the well-known growers, at Madison, N. J.

PROVIDENCE, R. I.

Trade Conditions.

Business holds up well, and with some of the downtown stores the month of August has been far better than that of a year ago. Asters continue to hold the center of the stage and are in good supply and quality. The lighter shades of pink and the whites, together with delicate lavenders, are the most popular. Roses are coming better and carnations have shown a marked improvement since the rains of a week ago. Funeral work kept nearly everybody busy last week, and several large orders were filled.

Various Notes.

Mr. and Mrs. Timothy O'Connor were guests at the luncheon given at the Narragansett Pier Casino August 16, by Dr. and Mrs. James E. Sullivan.

John Howe, who is a member of the National Dahlia Association of England, but is now living at Central Falls, addressed the members of the Field Naturalists' Society August 15, on "Dahlias and Their Propagation," and described the dahlia exhibitions of the National Association.

John A. Macrae and family have been the guests of friends in Anthony.

Peter S. Byrnes, of Wickford, is having his hands full with decoration work at Narragansett Pier. He is adding two more greenhouses to his range on West Main street, Wickford.

A voluntary petition in bankruptcy was filed in the United States District court, this city, August 18, by Walter Rogers, of Hope Valley, dealer in agricultural implements and seeds.

John Johnson, of Johnson Bros., started August 23 on a two weeks' vacation.

F. Macrae & Sons are cutting some fine lilies, the first of the season. They have several thousand plants. Their benches of mums are also looking fine.

Fred Hoffman, of Pawtucket, is spending most of his spare time in a new touring car he has recently purchased.

J. G. Jensen is improving and enlarging his range at 1142 Broad street.

There is a bountiful peach crop reported throughout the state this year, the trees not only yielding heavily, but the fruit being of large size and handsome. W. H. M.

MANCHESTER, N. H.— Harry Sanford, of 394 Amherst street, has found it necessary to enlarge his greenhouses. The addition will probably be finished about the middle of September.

Buckskin Greenhouse Hose

¾-inch, 15c per foot, coupled, f. o. b. Detroit.

Furnished in continuous lengths of 500 feet, without seam, joint or connection, in ½ and ¾ inch sizes only. An exceptionally high-grade Florists' hose; with a double woven jacket insertion instead of cotton duck, and with specially selected rubber in the inner tube and cover.

The double woven jacket construction makes a stronger hose than can be obtained from cotton duck, and absolutely precludes the possibility of cover opening at seam—a common cause of failure of garden hose made on cotton duck. This construction also gives a more flexible hose and reduces the possibility of kinking.

Buckskin Hose is guaranteed to stand a pressure of 500 pounds per square inch, although its bursting pressure is far in excess of this.

BALTIMORE.

The Market.

There seems to be reason for indulging in the hope that the lowest ebb of midsummer dullness has passed. Business in cut flowers has again commenced. The demand is chiefly for fancy asters and roses, but this demand has had a perceptible effect on several other varieties of flowers. The market conditions differ from last week, in that there are more really fine asters coming in, the quality of many of Semple's and Vick's leaving little to be desired. The flowers are large, firm and well colored, with stems long and foliage good. Outside stock of asters has been a failure here on account of the dry season.

Various Notes.

The members of the Gardeners' and Florists' Club, who attended the convention at Cincinnati, have returned and speak in glowing terms of the hospitality shown the delegation from Baltimore. It was considered one of the best conventions that has ever been held. The exhibits were excellent in every respect. Hotel accommodations were excellent. Those who attended from Baltimore were: I. H. Moss, Chas. Seybold, C. Klutch, Wm. Lehr, F. Baur and wife, H. J. Quick, J. Keplinger, R. Vincent, Jr., J. Vincent, J. J. Perry, C. Hess.

Charles M. Wagner, manager for James Hamilton, at Mt. Washington, has been taken to the hospital with a bad case of typhoid fever.

Richard Vincent was unable to attend the convention on account of sickness, he having been taken sick during the horticultural meeting at Mountain Lake Park, Md.

R. Vincent, Jr., & Sons Co. will erect two large houses this fall for bedding stock. Q.

ALLIANCE, O.—Albert B. Barber, of Reisch & Barber, has sold his interest in the firm to his partner. He leaves here September 1 to take a position with the Jones-Russell Co., of Cleveland.

GRAND RAPIDS.

We are again having a dry spell and are greatly in need of rain. While the sun is hot in the daytime, the nights are delightfully cool. Carnation plants are not as large as usual, but they are fine, sturdy stock, with plenty of breaks. All are hard at work now benching their plants and will be through in about ten days. If it were not for repairs to benches, the work would go on much faster. Roses are looking well and promise a fine winter crop.

Henry Smith is rebuilding several old houses, making three new ones in their place, each 275 feet long.

Business is quiet, except for occasional funeral orders, which relieve the summer monotony.

Bruinslot & Sons are excavating for a large marine boiler, bought recently from Charles Chadwick, when he quit the florists' business. The walls of the boiler hole are of cement and extend about nine feet below the ground; the boiler will thus work on the gravity plan. When the boiler is set they will proceed with the erection of two new houses for cucumbers and lettuce.

Henry Smith has returned from the convention, and is loud in his praises of its quality and great success. He is especially well pleased with the location of next year's meeting, and it is to be hoped our city will make a much better showing than it did this year. The only ones who could get away besides Mr. Smith were Mrs. Schols and her son. The latter was unfortunately taken with appendicitis as soon as he arrived, and is still at Cincinnati, packed in ice and receiving every possible care. He is in a fair way to recover, although this is his third attack. Everybody hopes he will get well quickly and be able to return to his home.

There are practically no carnations in the market, and what asters there are are of poor quality, except those grown inside. It looks as if it will be necessary if one wants good asters these days to plant them inside. Outside grown asters are no longer the success of former years.

G. F. C.

TARENTUM, PA. — The McWilliams Floral Co. has been incorporated, with a capital of $15,000.

SPRINGFIELD, MASS.—Mark Aitken has bought the E. N. Powers place, about three-quarters of a mile below the south end bridge, in Agawam, and intends erecting there one of the biggest and best ranges in this part of the state. A start will be made with 50,000 feet of glass, to be added to from time to time, as conditions warrant. Plans are being drawn by the Lord & Burnham Co. Ground will not be broken until spring.

Mr. Rose Grower

The Gunton Sulphur Vaporizer solves the mildew problem. Absolutely safe; it doesn't burn the sulphur. The gauze bottom does the trick. Capacity, 12,000 cubic feet. **Price, $2.00.** Address

Do You Know Aphine?

The FLORISTS' REVIEW says:
"The demand for Aphine, the insect destroying discovery, is widespread. Its endorsement has been remarkable. An unsolicited editorial in Collier's Weekly is especially strong in its behalf, and Arthur Herrington Albert M. Herr, Louis A. Noe, Brant-Hentz Flower Co., August Belmont, and the entomologists, J. B. Smith and E. B. Southwick, have much to say as to its efficiency."

COLLIER'S WEEKLY says:
"Aphine has a future as wide and long as the United States."

The FLORISTS' EXCHANGE says:
"It is not very often that any new enterprise receives such an impetus at the very start as the newly exploited insecticide Aphine has. We have been told on what would seem to be the very best expert authority, that this preparation is a very excellent thing."

It kills the Black Fly, Green Fly, White Fly, Red Fly, Thrips, Red Spider, Mealy Bug, Slugs, Caterpillars and White and Brown Scale.

TO SPRAY — Use 1 part Aphine to 40 parts water.

$2.50 per gal.; $1.00 per quart.

KING CONSTRUCTION CO., North Tonawanda, N. Y.

The Advance Machine

A Texas florist bought one of our machines May 13th—ordered another Aug. 9th—says they work very satisfactorily and will order three more next year. All we need is a trial to show you that we do have the goods for you. Easy to erect, easily operated, sold at fair prices and profits with the best of material, brings us the trade and keeps it. Why not try one of our machines? We guarantee satisfaction.

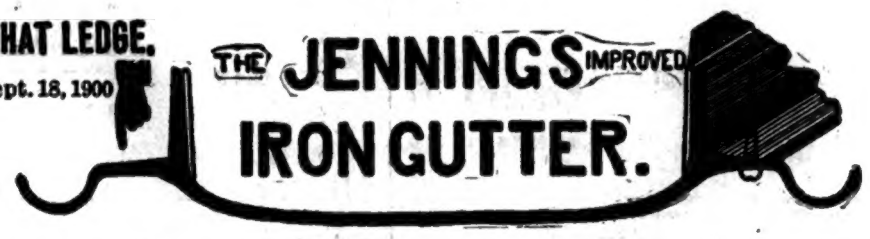
Florists' Review
When Writing Advertisers



WE don't mind admitting having been just a bit slow in adopting the Curved Eave House, but we had our reasons. There were certain rather serious construction defects in other Curved Eave houses, which we were bound to completely overcome before we sold a single house. Even the house we will sell you now is a great improvement over the first ones we built. And that's our way of doing business; first we are sure of a thing—and then we go ahead—and after that, keep on improving it.
